Management's Statement

The Executive Board has today considered and adopted the Annual Report of FMH ApS for the financial year 1 January - 31 December 2019.

The Annual Report is prepared in accordance with the Danish Financial Statements Act.

In my opinion the Financial Statements and the Consolidated Financial Statements give a true and fair view of the financial position at 31 December 2019 of the Company and the Group and of the results of the Company and Group operations and of consolidated cash flows for 2019.

I recommend that the Annual Report be adopted at the Annual General Meeting.

Gentofte, 16 March 2020

Executive Board

Ole Munksgaard Hansen

Independent Auditor's Report

To the Shareholders of FMH ApS

Opinion
In our opinion, the Consolidated Financial Statements and the Parent Company Financial Statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2019 and of the results of the Group's and the Parent Company's operations and of consolidated cash flows for the financial year 1 January - 31 December 2019 in accordance with the Danish Financial Statements Act.

We have audited the Consolidated Financial Statements and the Parent Company Financial Statements of FMH ApS for the financial year 1 January - 31 December 2019, which comprise income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies, for both the Group and the Parent Company, as well as consolidated statement of cash flows ("the Financial Statements").

Basis for opinion
We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the Financial Statements" section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Statement on Management's Review
Management is responsible for Management's Review.

Our opinion on the Financial Statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financials Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Consolidated Financial Statements and the Parent Company Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Independent Auditor's Report

Management's responsibilities for the Financial Statements
Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the Financial Statements unless Management either intends to liquidate the Group or the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Statements
Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the Financial Statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial

Independent Auditor's Report

Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and contents of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that gives a true and fair view.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Management’s Review

Key activities

FMH ApS operates as a holding company of the sub-group 'BPI A/S'. Key acitivities in the group relates to global trading of foodstuffs under own brands as well as private labels.

Development in the year

The income statement of the Group for 2019 shows a profit of DKK 9,094,947, and at 31 December 2019 the balance sheet of the Group shows equity of DKK 77,377,338.

The past year and follow-up on development expectations from last year

The group has realized revenues of more than DKK 1.419 million, which is DKK 83 million above the 2018 figure. Growth is according to expectations, however, this is partly due to the fact that more than 70% of the markets on which we operate are pegged to the USD, which has increased in strength relative to the danish kroner from DKK 6,52 to DKK 6,68 during 2019.

Profit for the year amounts to DKK 9 million which is DKK 15 million above the 2018 figure, which is according to expectations for the year.

2019 has been a stable year with reasonable results in most departments of the group's business areas. In the year 2019, we have created a new strategic plan 2020-2025 where we expect reasonable growth on both top line and bottom line in the coming years.

Significant events during the year

Foreign sales account for more than 80%, within expectations and this share is expected to be maintained in the future. Revenue from our own brands exceeded 65% of the total revenue.

2019 has been influenced by major events in international trade in meat. China's influence on world-market prices is significant, and pork in particular has benefited from this with sharply rising prices. This has also had a positive impact on the top and bottom line in the group. We expect that 2020 also will be a year with high demand for proteins, especially pork but also with a spillover effect on poultry. For milk powder and cheese, we still expect good demand in the nearest future.

New activities, investments and consolidation

2019 was not characterized by major new activities or investments. On the other hand, we consolidated the current business areas.

The group continues to invest in representation internationally, securing our global presence.

Furthermore, the subsidiary, BPI A/S, has continued investing in related product to our new ERP-system in order to better control our goods and costs.

Management’s Review

Risk assesment

Interest rate risks

The Group's interest bearing debt primarily consists of mortgage loans and debt to credit institutions with a variable interest rate. Consequently, the Group is exposed to interest rate fluctuations.

Credit risks

The Group remains relatively independent from individual customers due to heavy diversification. Debtors are for a large part credit-insured to minimize losses. Debtors who cannot be insured have to prepay or issue a letter of credit. They can alternatively agree to "cash against documents" terms.

Operating risks

The core business of the group is "back-to-back" trading, which to a large degree is low risk. As most goods traded by the group have a long shelf life, the group is less exposed to expiration risk than many other companies in the food sector.

International trade barriers are a risk to all trading companies. For many years, more and more trade barriers had been removed, which provided companies such as the group a larger market and more opportunities. In recent years, this trend towards less trade barriers has been reversed and this is a development we have in our overall risk assessment. The group is not yet affected by this new development; nonetheless, we continue to monitor the situation and remain ready to act in a new reality.

As the Group is increasingly engaged as an inventory manager - primarily on its own brands for the catering market as well as for some major customers in the retail segment - there is increased risk directly influenced by the price fluctuations in the market; the increased risk is counteracted by the following mechanisms: inventory for larger customers is generally bought and sold on back-to-back basis (through fixed contracts) and thus is unaffected by market developments. However, the situation is different for goods in own brands, for example goods for the catering market. The uncertainties are regulated here - partly through strict management of goods and warehousing, and - when possible - through contractual hedging.

Targets and expectations for the year ahead

Revenue in 2020 is expected to be about the same level as 2019, but profit in 2020 is expected to increase and be above DKK 15 million EBIT-level.

Management’s Review

Statement of corporate social responsibility

The group follows the UN's 10 guiding principles for Global Compact, which constitutes the foundation for the company's Code of Conduct. Our Code of Conduct (http://bpi.nu/csr/) makes sure we live up to our responsibility internally and also to secure that our suppliers live up to and follow the principles in our Code of Conduct. The Code of Conduct describes the company's values and approach to corporate social responsibility within the areas of environment/climate, human rights, social relations and animal welfare.

As a concrete measure, in 2017 and continuing, the group collaborated with the Danish Animal Protection organization to have our lamb from Chile approved as the first supplier outside of the EU. This helps us explain our values in a concrete way to our customers. This gives us the status as a high quality supplier to supermarket chains and in food service businesses.

Business model

The subsidiary, BPI A/S, is an international trading house with representation in several countries worldwide.

BPI imports chicken products from South America and Asia, which are sold in Europe and Scandinavia. These products are sold to industry, catering and retail in our own brands as well as under private label. Similarly, milk powder, pork and beef products are sold to customers in Asia, the Middle East and Africa.

Social and employee relations

We want to be an attractive and preferred place to work both to current and future employees. We will ensure equal opportunity and a diverse workforce through the way we hire. Employee health and safety is a prerequisite for how we do business, both within our own company and within the companies we cooperate with. We are constantly monitoring that employee turnover does not increase. The risk of this increases if we, for example, are not careful about the working environment.

Action/Effort
It's our ambition that all employees shall maintain the opportunity to advance on an equal basis in the organization regardless of gender or ethnicity; we pursue this goal by formulating our job postings so that they are accessible broadly. It has been possible, therefore, to hire competent employees from very different backgrounds.

The APV Committee has held the scheduled meetings. We also follow the sick leave.

Results
Those efforts is an ongoing process and we still get closer to our goals according to more equal representation of both gender in leading positions in the group, without compromising qualifications. There have been no work injuries so far.

Management’s Review

Human rights

In support of human rights and living conditions in general in the countries where our suppliers are situated, we will continue to engage in social projects that will improve and develop the local areas where we operate.

In the medium and long term, compliance with human rights will increase our international opportunities and make it possible to engage with most of the world's buyers and suppliers in the international food industry, which maintain a similar focus.

We are aware that we also have a responsibility in the meantime, where we are constantly on guard against the risk of contributing to the violation of human rights.

Action/Effort
We therefore in 2019 again visit our suppliers on a number of occasions and state that their compliance with basic human rights matters to our cooperation and that this also will be important for the group in 2020.

The subsidiary, BPI A/S, is member of Sedex, who help us to increase regarding human rights according to Labour standards, Health and safety, The environment, Business ethics.

BPI A/S has supported the NGO “Save the Children” in order to help increasing the living standards and respect for human rights in the countries where we operate, such as in the Middle East and Asia.

BPI A/S work together with NGO Animal Welfare in Denmark and we brand our lamb with the official animal welfare logo. We also work together with the international animal welfare organization ANIMA – in order to produce our chicken under the animal welfare rules called ECC standard.

Results
During these conversations with our suppliers, we feel that they are moving in a positive direction with respect to human rights, but it is not an area where the group can monitor the development by using KPIs.

Anti-corruption and bribery

The group has a zero tolerance to all types of corruption, facility payments and anti-competitive behaviour.

We continuously assess the risk of violating local law in the countries in which we operate, in the same way that we assess the risk of violating our own standards.

Action/Effort
We have reviewed all agreements with a view to identifying whether agreements and transactions may be subject to the risk of bribery and corruption.

Management's Review

Results
The above review of agreements did not result in any agreements or transactions being found which were found to be covered by terms such as bribery or corruption.

Environment and climate

We will continuously work to reduce our environmental and climate impact. This primarily relates to our own activities when transporting products to our customers, but also includes travelling and maintenance of our own buildings. In dialogue with our customers and clients, we will aim to improve performance in our supply chain by providing advice when relevant and possible and by this reduce the risk according to the environment.

The group work to buy our products where they are produced most co2 neutral. For example, chicken is an Asian jungle bird that thrives on local temperatures in Asia and South America. In Scandinavia, huge co2 resources are required for local production of special chickens as much as the feed is imported and the production of chicken in Scandinavia require heating to 35 degrees.

Acction/Effort
As a trading company, the subsidiary, BPI A/S, does not directly have an environmental impact from production or similar activities. As mentioned, our impact is related to transport, where we don't have the directly influence on the environmental impact.

Indirectly our environmental impact will decrease in bigger scale from 1 January 2020, when all containerships is forced to change from heavy fuel to light fuel or mounting of scrubbers if continued use of heavy fuel. This will reduce the direct impact on the environment from this transport. This international initiative is also expected to replace old ships with new and more fuel efficient vessels.

In 2019 we introduce more efficient controlling of waste from our head office in Gentofte, by separating waste from paper, plastic and metal. After this it's, we now have the possibility to recycle paper, plastic and metal.

2019 is first full year with using public heating in our head office.

Results
Our environmental impact in decreased in 2019 related to:
- Many vessels has changed fuel in second part of 2019
- Introducing of fore efficient separation of paper, plastic and metal from waste.
- Full year with using public heating of our head office.

Non-financial key performance indicators

The Group is not using Non-financial key performance indicators.

Management's Review

Statement on gender composition

On Group level, there is no underrepresentation in Group Management because Group Management consists of one person.

In the sub-group, BPI A/S, has an ambition to have 25% females in the board of directors no later than 2023. At the end of 2019, status is that there are no women among the four members of the Board of Directors, since the general assembly did not find it necessary to make changes to the Board in 2019.

BPI A/S's gender policy on other management levels is revised on an ongoing basis. The overall aim is to secure a gender composition that represents both genders. In 2018, equal distribution of the genders was achieved on other management levels.

Uncertainty relating to recognition and measurement

In the past financial year 2019, there have been no events or otherwise unusual circumstances that have affected the recognition or measurement of the company's activities.

Unusual events

The Group's assets, liabilities and financial position at 31 December 2019 and the results of the Group's activities and cash flows for 2019 are not affected by unusual circumstances.

Subsequent events

No events materially affecting the assessment of the Annual Report have occurred after the balance sheet date.

17 Contingent assets, liabilities and other financial obligations

Charges and security

The following assets have been placed as security with mortgage credit institutes:

Land and buildings with a carrying value of	40.103.199	39.431.597	0	0

Contingent liabilities

The Danish group companies are jointly and severally liable for tax on the jointly taxed incomes etc of the Group. At the balance date, the jointly taxed Danish Group companies has no payable corporation tax liability. Foreign subsidiaries are, at the balance date, liable of a tax payment of DKK 826.737. Moreover, the Danish group companies are jointly and severally liable for Danish withholding taxes by way of dividend tax, tax on royalty payments and tax on unearned income. Any subsequent adjustments of corporation taxes and withholding taxes may increase the Company's liability.

BPI A/S has granted a floating charge of a nominal amount of DKK 48,1 million for bank debt to Jyske Bank A/S. On the balance date, BPI A/S debt to Jyske Bank A/S amounts to DKK 44,6 million.

BPI A/S has provided a surety (primary liability) in respect of the parent company MCM International A/S bank facility. On the balance date, MCM International A/S debt to Jyske Bank A/S amounts to DKK 24,6 million.

BPI A/S has provided a surety (primary liability) in respect of the group company BPI GmbH bank facility. On the balance date, BPI GmbH debt to Jyske Bank A/S amounts to DKK 0,1 million.

When applying for import licenses from the EU authorities in a limited number of EU countries, large insurance companies, on behalf of BPI, guarantee to fulfill the company's obligations in applying for the above import licenses.

BPI A/S has assumed lease obligations, which at the balance date amounted to DKK 1,1 million in the period of non-terminability.

MCM International A/S has provided a surety (primary liability) in respect of the group company BPI A/S bank facility. On the balance date, BPI A/S debt to Jyske Bank A/S amounts to DKK 44,7 million.

Notes to the Financial Statements

20 Accounting Policies

The Annual Report of FMH ApS for 2019 has been prepared in accordance with the provisions of the Danish Financial Statements Act applying to large enterprises of reporting class C .

The accounting policies applied remain unchanged from last year.

The Consolidated and Parent Company Financial Statements for 2019 are presented in DKK.

Recognition and measurement

Revenues are recognised in the income statement as earned. Furthermore, value adjustments of financial assets and liabilities measured at fair value or amortised cost are recognised. Moreover, all expenses incurred to achieve the earnings for the year are recognised in the income statement, including depreciation, amortisation, impairment losses and provisions as well as reversals due to changed accounting estimates of amounts that have previously been recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future economic benefits attributable to the asset will flow to the Company, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow out of the Company, and the value of the liability can be measured reliably.

Assets and liabilities are initially measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

Basis of consolidation

The Consolidated Financial Statements comprise the Parent Company, FMH ApS, and subsidiaries in which the Parent Company directly or indirectly holds more than 50% of the votes or in which the Parent Company, through share ownership or otherwise, exercises control. Enterprises in which the Group holds between 20% and 50% of the votes and exercises significant influence but not control are classified as associates.

On consolidation, items of a uniform nature are combined. Elimination is made of intercompany income and expenses, shareholdings, dividends and accounts as well as of realised and unrealised profits and losses on transactions between the consolidated enterprises.

The Parent Company’s investments in the consolidated subsidiaries are set off against the Parent Company’s share of the net asset value of subsidiaries stated at the time of consolidation.

Notes to the Financial Statements

20 Accounting Policies (continued)

Minority interests

Minority interests form part of the Group's total equity. Upon distribution of net profit, net profit is broken down on the share attributable to minority interests and the share attributable to the shareholders of the Parent Company. Minority interests are recognised on the basis of a remeasurement of acquired assets and liabilities to fair value at the time of acquisition of subsidiaries.

Business acquisitions carried through before 1 July 2018

Minority interests are recognised at the carrying amounts of the acquired assets and liabilities at the time of acquisition of subsidiaries.

Business acquisitions carried through on or after 1 July 2018

Minority interests are initially measured at their proportionate share of the fair value of the acquired entity's identifiable net assets. In this way, only goodwill related to the Parent Company's share of the entity acquired is recognised.

On subsequent changes to minority interests where the Group retains control of the subsidiary, the consideration is recognised directly in equity.

Leases

Leases in terms of which the Group assumes substantially all the risks and rewards of ownership (finance leases) are recognised in the balance sheet at the lower of the fair value of the leased asset and the net present value of the lease payments computed by applying the interest rate implicit in the lease or an alternative borrowing rate as the discount rate. Assets acquired under finance leases are depreciated and written down for impairment under the same policy as determined for the other fixed assets of the Group.

The remaining lease obligation is capitalised and recognised in the balance sheet under debt, and the interest element on the lease payments is charged over the lease term to the income statement.

All other leases are considered operating leases. Payments made under operating leases are recognised in the income statement on a straight-line basis over the lease term.

Translation policies

Transactions in foreign currencies are translated at the exchange rates at the dates of transaction. Exchange differences arising due to differences between the transaction date rates and the rates at the dates of payment are recognised in financial income and expenses in the income statement. Where foreign exchange transactions are considered hedging of future cash flows, the value adjustments are recognised directly in equity.

Notes to the Financial Statements

20 Accounting Policies (continued)

Receivables, payables and other monetary items in foreign currencies that have not been settled at the balance sheet date are translated at the exchange rates at the balance sheet date. Any differences between the exchange rates at the balance sheet date and the rates at the time when the receivable or the debt arose are recognised in financial income and expenses in the income statement.

Fixed assets acquired in foreign currencies are measured at the transaction date rates.

Revenue

Information on business segments and geographical segments based on the Group´s risks and returns and its internal financial reporting system. Business segments are regarded as the primary segments.

Income Statement

Revenue

Revenue from the sale of goods is recognised when the risks and rewards relating to the goods sold have been transferred to the purchaser, the revenue can be measured reliably and it is probable that the economic benefits relating to the sale will flow to the Group.

Revenue is measured at the consideration received and is recognised exclusive of VAT and net of discounts relating to sales.

Expenses for raw materials and consumables

Expenses for raw materials and consumables comprise the raw materials and consumables consumed to achieve revenue for the year.

Other external expenses

Other external expenses comprise indirect production costs and expenses for premises, sales and distribution as well as office expenses, etc.

Staff expenses

Staff expenses comprise wages and salaries as well as payroll expenses other than production wages.

Amortisation, depreciation and impairment losses

Amortisation, depreciation and impairment losses comprise amortisation, depreciation and impairment of intangible assets and property, plant and equipment.

Notes to the Financial Statements

20 Accounting Policies (continued)

Other operating income and expenses

Other operating income and other operating expenses comprise items of a secondary nature to the main activities of the Group, including gains and losses on the sale of intangible assets and property, plant and equipment.

Income from investments in subsidiaries and associates

The items “Income from investments in subsidiaries” and “Income from investments in associates” in the income statement include the proportionate share of the profit for the year.

Financial income and expenses

Financial income and expenses are recognised in the income statement at the amounts relating to the financial year.

Tax on profit/loss for the year

Tax for the year consists of current tax for the year and changes in deferred tax for the year. The tax attributable to the profit for the year is recognised in the income statement, whereas the tax attributable to equity transactions is recognised directly in equity.

The Company is jointly taxed with Danish subsidiaries. The tax effect of the joint taxation is allocated to enterprises in proportion to their taxable incomes.

Balance Sheet

Intangible assets

Goodwill acquired is measured at cost less accumulated amortisation. Goodwill is amortised on a straight-line basis over its useful life, which is assessed at 7 years.

Patents and licences are measured at the lower of cost less accumulated amortisation and recoverable amount. Patents are amortised over the remaining patent period, and licences are amortised over the licence period; however not exceeding 20 years.

Property, plant and equipment

Land and buildings

On acquisition land and buildings are measured at cost comprising the acquisition price and costs of acquisition. The cost of own constructed properties comprises the acquisition price and expenses directly related to the acquisition, including costs of acquisition and indirect expenses for labour, materials, components and supsuppliers up until the time when the asset is ready for use.

Notes to the Financial Statements

20 Accounting Policies (continued)

Interest expenses on loans contracted directly for financing the construction of properties are recognised in cost over the construction period.

After the initial recognition land and buildings are measured at fair value at the date of the revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are made with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Estimated useful lives of buildings are estimated at 20-50 years.

The estimated useful lives and residual value, DKK 24.2 million, are reassed annually.

Fair value is the amount for which the property could be exchanged between knowledgeable, willing parties in an arm's length transaction on the balance sheet date. The determination of fair value involves material accounting estimates.

The fair value of land and buildings has been determined at year end for each property by using a yield-based model under which the expected future cash flows for the coming year combined with a rate of return form the basis of the fair value of the property. The calculations are based on property budgets for the coming years. The budget takes into account developments in rentals, vacancies, operating expenses, maintenance and administration, etc. The budgeted cash flow is divided by the estimated rate of return to arrive at the fair value of the properties.

The fair value of land and buildings has been assessed by the independent assessor firm 'Nordicals' at 29 January 2020.

The estimates applied are based on information and assumptions considered reasonable by Management but which are inherently uncertain and unpredictable. Actual events or circumstances will probably differ from the assumptions made in the calculations as often assumed events do not occur as expected. Such difference may be material.

Other fixed assets

Other fixed assets are measured at cost less accumulated depreciation and less any accumulated impairment losses.

Cost comprises the cost of acquisition and expenses directly related to the acquisition up until the time when the asset is ready for use.

Interest expenses on loans raised directly for financing the construction of property, plant and equipment are recognised in cost over the period of construction. All indirectly attributable borrowing expenses are recognised in the income statement.

20 Accounting Policies (continued)

Depreciation based on cost added revaluations and reduced by any residual value is calculated on a straight-line basis over the expected useful lives of the assets, which are:

Other fixtures and fittings, tools and equipment	3-5 years
Leasehold improvements	3-10 years

Depreciation period and residual value, DKK 25,2 million for buildings, are reassessed annually.

Impairment of fixed assets

The carrying amounts of intangible assets and property, plant and equipment are reviewed on an annual basis to determine whether there is any indication of impairment other than that expressed by amortisation and depreciation.

If so, the asset is written down to its lower recoverable amount.

Investments in subsidiaries and associates

Investments in subsidiaries and associates are recognised and measured under the equity method.

The items"Investments in subsidiaries" and "Investments in associates" in the balance sheet include the proportionate ownership share of the net asset value of the enterprises calculated on the basis of the fair values of identifiable net assets at the time of acquisition with deduction or addition of unrealised intercompany profits or losses and with addition of the remaining value of any increases in value and goodwill calculated at the time of acquisition of the enterprises.

The total net revaluation of investments in subsidiaries and associates is transferred upon distribution of profit to "Reserve for net revaluation under the equity method" under equity. The reserve is reduced by dividend distributed to the Parent Company and adjusted for other equity movements in the subsidiaries and the associates.

Subsidiaries and associates with a negative net asset value are recognised at DKK 0. Any legal or constructive obligation of the Parent Company to cover the negative balance of the enterprise is recognised in provisions.

Inventories

Inventories are measured at the lower of cost under the FIFO method and net realisable value.

The net realisable value of inventories is calculated at the amount expected to be generated by sale of the inventories in the process of normal operations with deduction of selling expenses. The net realisable

Notes to the Financial Statements

20 Accounting Policies (continued)

value is determined allowing for marketability, obsolescence and development in expected selling price.

The cost of goods for resale, raw materials and consumables equals landed cost.

The cost of finished goods and work in progress comprises the cost of raw materials, consumables and direct labour with addition of indirect production costs. Indirect production costs comprise the cost of indirect materials and labour as well as maintenance and depreciation of the machinery, factory buildings and equipment used in the manufacturing process as well as costs of factory administration and management.

Receivables

Receivables are measured in the balance sheet at the lower of amortised cost and net realisable value, which corresponds to nominal value less provisions for bad debts. Provisions for bad debts are determined on the basis of an individual assessment of each receivable, and in respect of trade receivables, a general provision is also made based on the Company's experience from previous years.

Prepayments

Prepayments comprise prepaid expenses concerning rent, insurance premiums, subscriptions and interest.

Provisions

Provisions are recognised when - in consequence of an event occurred before or on the balance sheet date - the Group has a legal or constructive obligation and it is probable that economic benefits must be given up to settle the obligation.

Deferred tax assets and liabilities

Deferred income tax is measured using the balance sheet liability method in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes on the basis of the intended use of the asset and settlement of the liability, respectively.

Deferred tax assets are measured at the value at which the asset is expected to be realised, either by elimination in tax on future earnings or by set-off against deferred tax liabilities within the same legal tax entity.

Deferred tax is measured on the basis of the tax rules and tax rates that will be effective under the legislation at the balance sheet date when the deferred tax is expected to crystallise as current tax. Any changes in deferred tax due to changes to tax rates are recognised in the income statement or in equity if the deferred tax relates to items recognised in equity.

Current tax receivables and liabilities

Current tax liabilities and receivables are recognised in the balance sheet as the expected taxable income for the year adjusted for tax on taxable incomes for prior years and tax paid on account. Extra payments and repayment under the on-account taxation scheme are recognised in the income statement in financial income and expenses.

Financial debts

Loans, such as mortgage loans and loans from credit institutions, are recognised initially at the proceeds received net of transaction expenses incurred. Subsequently, the loans are measured at amortised cost; the difference between the proceeds and the nominal value is recognised as an interest expense in the income statement over the loan period.

Other debts are measured at amortised cost, substantially corresponding to nominal value.

Cash Flow Statement

The cash flow statement shows the Group´s cash flows for the year broken down by operating, investing and financing activities, changes for the year in cash and cash equivalents as well as the Group´s cash and cash equivalents at the beginning and end of the year.

Cash flows from operating activities

Cash flows from operating activities are calculated as the net profit/loss for the year adjusted for changes in working capital and non-cash operating items such as depreciation, amortisation and impairment losses, and provisions. Working capital comprises current assets less short-term debt excluding items included in cash and cash equivalents.

Cash flows from investing activities

Cash flows from investing activities comprise cash flows from acquisitions and disposals of intangible assets, property, plant and equipment as well as fixed asset investments.

Cash flows from financing activities

Cash flows from financing activities comprise cash flows from the raising and repayment of long-term debt as well as payments to and from shareholders.

Cash and cash equivalents

Cash and cash equivalents comprise ”Cash at bank and in hand”.

Notes to the Financial Statements
