Statement by the Board of Directors and the Executive Board

The Board of Directors and the Executive Board have today discussed and approved the annual report of Vikan A/S for the financial year 1 January – 31 December 2021.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

It is our opinion that the financial statements give a true and fair view of the Company's financial position at 31 December 2021 and of the results of the Company's operations and cash flows for the financial year 1 January – 31 December 2021.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's operations and financial matters and the results of the Company's operations and financial position.

We recommend the annual report be approved at the annual general meeting.

Independent auditor's report

To the shareholders of Vikan A/S

Opinion

We have audited the consolidated financial statements and the parent company financial statements of Vikan A/S for the financial year 1 January – 31 December 2021, which comprise income statement, balance sheet, statement of changes in equity and notes, including accounting policies, for both the Group and the Parent Company, and a consolidated cash flow statement. The consolidated financial statements and the parent company financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2021 and of the results of the Group's and the Parent Company's operations as well as the consolidated cash flows for the financial year 1 January – 31 December 2021 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements and the parent company financial statements" (hereinafter collectively referred to as "the financial statements") section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

Management's responsibilities for the financial statements

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

Independent auditor's report

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- ▶ Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Independent auditor's report

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the Management's review.

Management's review

Principal activities

The Company's principal activities are developing, manufacturing, and market hygienic cleaning and food handling tools for professional use, thereby helping keep food production and other hygiene-sensitive environments cleaner and safer. Vikan markets the most comprehensive range of cleaning tools and solutions, which are primarily intended for the following sectors:

- Food and Beverage
- Food Retail and Food Service
- Facility Management
- Transport and Industrial

Products and services are developed and designed based on the needs of our customers and statutory requirements, ensuring that our customers' increasing hygienic standards are being met. For further information, please visit the Vikan website at www.vikan.com.

Development in activities and financial position in the financial year

The global Covid-19 pandemic continued to impact the business's activity level, but to a lesser extent than in 2020. Revenues were affected negatively in the first half of the year, whereas the company bounced back to a high level in the second half of 2021. Revenues totalled M DKK 502 against M DKK 434 in 2020.

In 2021, particularly during the second half of the year, the business was significantly impacted by increasing pricing and the shortage of raw materials. In addition, rising transport costs and delays in the supply chain impacted the business's profitability. As a countermeasure, the Group has continued a cost-conscious approach during 2021, resulting in a proportionally lower impact on profitability. The Group totalled a satisfying EBITDA of M DKK 110 against M DKK 88 in 2020.

The Company strategy was revised in the second half of 2020 to position the business for maximum post-Covid-19 success. Strategic investments in digitalisation and new technology were accelerated, and the entire organisation's digital competencies were ramped up quickly. These investments and initiatives have demonstrated the ability to develop and provide new services and customer service off-site. In addition, investments to further improve efficiencies have taken place during 2021. Total investments in tangible assets amounted to M DKK 16, with further commitments for 2022.

Management's review

The Group realised positive cash flows from operations totalling M DKK 74.

Outlook 2022

With the geopolitical crisis and instability, the Covid 19 still present, and the volatility at the financial markets, the outlook for 2022 is uncertain. In the light of the current situation, the activity level and profitability for 2022 are expected to be close to the 2021 level.

Cash resources and capital structure

On 31 December 2021, equity amounted to M DKK 230. The solvency ratio totalled 65 % at the end of the financial year. Net interest-bearing debt was decreased during the financial year 2021, and total cash deposits exceeded the company's debt with M DKK 11 as of 31st December 2021. Consequently, the debt leverage (the relation between net interest-bearing debt and EBITDA) was 0 at the end of 2021.

Particular risks

Risks related to operations, financing activities, foreign exchange, interest rates and trade credit conditions are considered usual for the industry, and they may have a considerable impact on future earnings. Fluctuations and increasing prices on raw materials affected profitability negatively in 2021, and the effects are expected to continue to have a significant effect in 2022. Management monitors the situation closely and works proactively to manage and reduce the risks related to operational and financial activities, including the fluctuations in raw material prices and hedging of cash flow in foreign currencies.

Environmental, Social Responsibility and Governance (ESG)

The ESG/ CSR policy defines the standards for the company's operations.

Vikan is a member of SEDEX and is compliant with the SEDEX 4 pillars of Labour Rights, Health and Safety, Environment and Business Ethics. The Company is being audited by the Company's customers based on the SEDEX principles. Transactions with the Company's most important suppliers are made in accordance with the guidelines regarding employee and environmental conditions and are compliant with applicable legislation.

Vikan is committed to operating in an environmentally friendly manner. The Company continuously strives to reduce its environmental impact, which among other things, is achieved through the Company's environmental management system ISO 14001 by focusing on optimising the consumption of raw materials and other scarce resources.

Management's review

Vikan's production site in Skive is certified to the ISO standards ISO 9001:2015 for quality and ISO 14001:2015 for the environment.

For more details on the Company's environmental policy, please see the Company's website at www.vikan.com.

Reporting on social responsibility and gender distribution in management, cf. §99a and b in The Danish Financial Statements Act

For Vikan's statutory reporting on sustainability, including human and labour rights, anti-corruption, environment and climate, please visit <https://www.vikan.com/int/about-vikan/csr/>.

Policies for the handling of data and data ethics

Vikan has set specific policies concerning data ethics and information security when data are used to plan, analyse, manage or support our business models and financial results. All employees are trained and updated on the policies regularly.

When collecting data from external sources, customers, suppliers, employees or other partners, it is always based on policies where technical or procedure-based measures are implemented based on an adequate risk evaluation to ensure a high level of data security. Furthermore, based on the policies, data will be deleted when it is no longer needed to support our business or when the deletion is mandatory based on current law and regulations or contractual demands.

Intellectual capital

The Company is continuously investing in the training of its employees. In 2021, several training and development programmes were also completed throughout the organisation, particularly within digital skill sets.

Vikan operates from the principle that diversity among its employees, including gender balance contributes positively to the work environment and strengthens the Company's performance and competitiveness. Thus, the Company has a clear policy regarding discrimination and intends at all times to employ and retain its employees based on qualifications and competencies.

Research and development

Continuous development of new products and technologies is an integrated part of the Company's ongoing operations to maintain its leading position as provider of the most innovative hygienic cleaning and food handling tools. Research and development activities are based on both customer-specific projects and internally defined projects.

Notes

17. Events after the balance sheet date

Management monitors the current geopolitical crisis and instability related to the situation in Ukraine closely. The events are not considered to have a significant impact on the evaluation of the annual report, nor the Management Report's expectations to the outlook for 2022. No other events have occurred after the balance sheet date affecting the evaluation of the annual report.

	Consolidated		Parent	
	2021 t.kr.	2020 t.kr.	2021 t.kr.	2020 t.kr.

18. Charges

The Company is jointly taxed with other danish companies in the Vikan Group. Jointly taxed companies which are not wholly-owned have limited and secondary liability for Danish withholding taxes on dividends, interest and royalties within the joint taxation unit.

Notes

20. Currency and interest rate risks and the use of derivative financial instruments

To minimize the currency exposure the Vikan Group has entered into financial instruments. Unrealised profit on financial instruments amounts to DKK -1,210 thousand in 2021 (2020: DKK 539 thousand) and is recognised directly in equity adjusted for deferred tax. Financial instruments are recognized in accordance with fair value level 2.

21. Related party disclosures

Related parties exercising control of Vikan A/S:

Vissing Holding A/S, Rævevej 1, 7800 Skive (parent company)

Vissing Fonden, c/o Lawyer Allan Højbak, Vingårdsgade 22, 9000 Aalborg

Section 98c(7) of the Danish Financial Statements Act is applied regarding related party transactions.

22. Shareholders

The following shareholders are registered in the Company's register of shareholders as holding minimum 5% of the votes or minimum 5% of the share capital:

Vissing Holding A/S, Rævevej 1, 7800 Skive

Brush Holding ApS, Sølystvej 59, 8600 Silkeborg

23. Group structure

Vikan A/S and related subsidiaries are included in the consolidated financial statements of Vissing Holding A/S.

Accounting policies

The annual report has been prepared in accordance with the provisions applying to reporting class C large enterprises under the Danish Financial Statements Act.

The accounting policies used in the preparation of the financial statements are consistent with those of last year.

Presentation currency

The financial statements are presented in Danish Kroner (DKK'000).

Consolidated financial statements

The consolidated financial statements comprise Vikan A/S (parent company) and the enterprises (group enterprises) over which the parent company exercises control, see note 11. Control is obtained in companies in which the parent company directly or indirectly holds more than 50% of the voting rights or which it, in some other way, controls. Entities over which the Group exercises significant influence, but which it does not control, are considered associates. Significant influence is generally obtained by direct or indirect ownership or control of more than 20% of the voting rights but less than 50%.

Consolidation principles

The consolidated financial statements are based on the financial statements of Vikan A/S and its subsidiaries. The consolidated financial statements are prepared by adding together financial statement items of similar nature. On consolidation, intra-group income and expenses, intra-group balances and dividends, and gains and losses on intra-group transactions are eliminated. The financial statements applied for consolidation purposes are prepared in accordance with the Group's accounting policies.

In the consolidated financial statements, the items of subsidiaries are recognised in full. The proportionate share of the non-controlling interests' results and net assets are recognised as separate items in the income statement and the balance sheet, respectively.

Investments in group enterprises are recognised after tax in one separate line item in the income statement.

Investments in subsidiaries are set off against the proportionate share of the subsidiaries' fair value of net assets at the acquisition date.

Business combinations

Recently acquired entities are recognised in the consolidated financial statements from the date of acquisition. Entities sold or otherwise disposed of are recognised up to the date of disposal. Comparative figures are not restated to reflect newly acquired entities.

The date of acquisition is the date when the Group actually obtains control of the acquiree.

The purchase method is applied to acquisitions of new businesses over which the Group obtains control. The acquired businesses' identifiable assets, liabilities and contingent liabilities are measured at fair value at the acquisition date.

Identifiable intangible assets are recognised if they are separable or arise from a contractual right. Deferred tax related to the revaluations is recognised.

Positive differences (goodwill) between, on the one hand, the consideration for the acquiree, the value of non-controlling interests in the acquired entity and the fair value of any previously acquired equity investments and, on the other hand, the fair value of the assets, liabilities and contingent liabilities acquired are recognised as goodwill under "Intangible assets". Goodwill is amortised on a straight-line basis in the income statement based on an individual assessment of the economic life of the asset.

Negative differences (negative goodwill) are recognised in the income statement at the date of acquisition.

Upon acquisition, goodwill is allocated to the cash-generating units, which subsequently form the basis for impairment testing. Goodwill and fair value adjustments in connection with the acquisition of a foreign entity with a functional currency different from the presentation currency used in the consolidated financial statements are accounted for as assets and liabilities belonging to the foreign entity and are, on initial recognition, translated into the foreign entity's functional currency using the exchange rate at the transaction date.

The consideration paid for an entity consists of the fair value of the agreed consideration in the form of assets transferred, liabilities assumed and equity instruments issued. If part of the consideration is contingent on future events or compliance with agreed terms, such part of the consideration is recognised at fair value at the date of acquisition. Subsequent adjustments of contingent considerations are recognised in the income statement.

Expenses incurred to acquire entities are recognised in the income statement in the year in which they are incurred.

Where, at the date of acquisition, the identification or measurement of acquired assets, liabilities, contingent liabilities or the determination of the consideration is associated with uncertainty, initial recognition will take place on the basis of provisional values. If it turns out subsequently that the identification or measurement of the purchase consideration, acquired assets, liabilities or contingent liabilities was incorrect on initial recognition, the statement will be adjusted retrospectively, including goodwill, until 12 months after the acquisition, and comparative figures will be restated. Hereafter, any adjustments are recognised as misstatements.

Gains or losses from divestment or winding-up of subsidiaries which imply that control is no longer maintained are calculated as the difference between, on the one hand, the selling price less selling expenses and, on the other hand, the proportionate share of the carrying amount of net assets. If the entity still holds equity investments in the divested entity, the remaining proportionate share of the carrying amount forms the basis for the measurement of equity investments in associates or securities and equity investments.

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rates at the transaction date. Receivables and payables and other monetary items denominated in foreign currencies which are not settled at the balance sheet date are translated at the exchange rate at the balance sheet date. Foreign exchange differences arising between the exchange rates at the transaction date and at the date of payment and the rate at the balance sheet date, respectively, are recognised in the income statement as financial income or financial expenses. Non-current assets purchased in foreign currencies are translated using historical rates.

On recognition of foreign subsidiaries and associates that are separate entities, the income statement is translated at the average exchange rate for the months which does not deviate significantly from the rate at the transaction date. Balance sheet items are translated to the exchange rates at the balance sheet date. Goodwill is deemed to relate to the independent foreign entity and translated at the balance sheet date. Currency translation differences arisen when translating foreign subsidiaries' equity at the beginning of the year using the closing rate and when translating income statements from average exchange rates using the closing rate are recognised directly in equity.

Exchange rate adjustments of intra-group balances with independent foreign subsidiaries which are considered part of the total investment in the subsidiary in question are recognised directly in equity.

Derivative financial instruments

Derivative financial instruments are initially recognised in the balance sheet at cost and subsequently at fair value. Derivative financial instruments are recognised as other receivables or other liabilities, respectively.

Changes in the fair value of derivative financial instruments designated as and qualifying for recognition as a hedge of the fair value of a recognised asset or liability are recognised in the income statement together with changes in the value of the hedged asset or liability.

Changes in the fair value of derivative financial instruments designated as and qualifying for recognition as a hedge of future transactions are recognised directly in equity. When the hedged transactions materialise, changes are recognised in the related items.

For derivative financial instruments that do not qualify for hedge accounting, changes in fair value are recognised in the income statement as financial income or financial expenses.

Changes in the fair value of derivative financial instruments used to hedge net investments in independent foreign subsidiaries or associates are recognised directly in equity.

Income statement

Revenue

Income from the sale of goods, comprising the sale of hygiene cleaning tools, is recognised as revenue when transfer of the most significant rewards and risks to the buyer has taken place and provided that the income can be reliably

measured and payment is expected to be received. The date of the transfer of the most significant rewards and risks is based on standardised terms of delivery.

Revenue is measured at fair value of the agreed consideration ex. VAT and taxes charged on behalf of third parties.

To the extent that customers are offered a right of return in connection with the sale, revenue corresponding to the Company's experience with returns is recognised.

Production costs

Production costs comprise direct and indirect costs incurred in generating revenue for the year. Trading entities recognise their cost of sales, and production entities recognise cost of raw material, consumables and production staff as well as depreciation of production assets.

Production costs comprise costs regarding development projects that do not qualify for recognition in the balance sheet as well as depreciation of development projects recognised.

Distribution costs

Costs incurred in distributing goods sold and in conducting sales campaigns are recognised as distribution costs. Also, costs relating to sales and distribution staff, advertising as well as depreciation and amortisation are recognised as distribution costs.

Administrative expenses

Administrative expenses comprise expenses incurred for management and administration of the Group, including expenses for the administrative staff and the management, office supplies as well as depreciation.

Other operating income and costs

Other operating income and costs comprise items secondary to the primary activities of the Group.

Financial income and financial expenses

Financial income and expenses comprise interest income and expense, interest element of financial lease payments, realised and unrealised gains and losses on securities, payables and transactions denominated in foreign currencies, amortisation of financial liabilities, cash discounts, etc. as well as surcharges and refunds under the on-account tax scheme.

Corporation tax and deferred tax

Tax for the year comprises current tax for the year and changes in deferred tax. The tax expense relating to the profit/loss for the year is recognised in the income statement, and the tax expense relating to amounts directly recognised in equity is recognised directly in equity.

The current tax payable or receivable is recognised in the balance sheet, stated as tax calculated on this year's taxable income, adjusted for prepaid tax.

Deferred tax is recognised and measured applying the liability method on all temporary differences between the carrying amount and tax value of assets and liabilities. The tax value of assets is calculated based on the planned use of the asset.

Deferred tax assets, including the tax base of tax loss carryforwards, are recognised in the balance sheet at their estimated realisable value, either as a set-off against deferred tax liabilities or as net tax assets.

Deferred tax is measured according to the tax rules and at the tax rates applicable in the respective countries at the balance sheet date when the deferred tax is expected to crystallise as current tax. Changes in deferred tax due to changes in the tax rate are recognised in the income statement.

Vikan A/S is jointly taxed with the parent company, Vissing Holding A/S, and the Danish subsidiaries in Group. The current Danish corporation tax is allocated between the jointly taxed companies in proportion to their taxable income (full absorption with refunds for tax losses).

Balance sheet

Intangible assets

Goodwill and consolidated goodwill

Goodwill is amortised on a straight-line basis over its estimated useful life determined on the basis of Management's experience of the specific business areas. Goodwill is usually amortised over ten years, but may be amortised over a maximum amortisation period of 20 years, longest for strategically acquired enterprises with strong market positions and long-term earnings profiles, provided that the long amortisation period is assessed to better reflect the Group's utilisation of the resources in question.

The carrying amount of goodwill is assessed on an ongoing basis and is written down to the recoverable amount if the carrying amount exceeds the expected future net income from the enterprise or activity to which goodwill is allocated.

Development projects, patents and licences

Development costs comprise salaries, amortisation and other costs directly or indirectly attributable to the Company's development activities.

Development projects that are clearly defined and identifiable, where the technical feasibility, sufficient resources and a potential future market or development opportunities in the Company are evidenced, and where the Company intends to produce, market or use the project, are recognised as intangible assets provided that the cost can be measured reliably and that there is sufficient assurance that future earnings can cover production costs, selling costs and administrative expenses and development costs. Other development costs are charged to the income statement as incurred.

Patents and licences are measured at cost less accumulated amortisation and impairment losses. Patents are amortised on a straight-line basis over the remaining term of the patent, and licences are amortised over the term of the licence, however not exceeding 3 years.

Gains and losses on the disposal of development projects, patents and licences are determined as the difference between the selling price less costs to sell and the carrying amount at the date of disposal. Gains and losses are recognised in the income statement as other operating income or other operating expenses, respectively.

Development costs that are recognised in the balance sheet are initially measured at cost and subsequently at cost less accumulated amortisation and impairment losses.

Development projects (continued)

Following the completion of the development work, development costs are amortised on a straight line basis over the estimated useful life. The amortisation period is usually five years and does not exceed 20 years.

Gains and losses on the disposal of development projects are determined as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains or losses are recognised in the income statement as other operating income or other operating costs, respectively.

Property, plant and equipment

Land and buildings are measured at cost plus revaluation and as to buildings less accumulated depreciation and impairment losses. Revaluation is made based on regular, independent valuations of fair value.

Plant and machinery and fixtures and fittings, other plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost comprises the acquisition price, costs directly attributable to the acquisition, and preparation costs of the asset until the date when it is ready to be put into operation. The cost of self-constructed assets comprises direct and indirect costs of materials, components, subsuppliers, and wages and salaries. The cost of assets held under finance leases is recognised at the lower of fair value of the assets and the present value of the future lease payments.

The basis of depreciation is cost less expected residual value at the end of the useful life. Depreciation is provided according to the straight-line method, based on the following expected useful lives:

Buildings	10-50 years
Plant and machinery	5-8 years
Fixtures and fittings, other plant and equipment	3-6 years

Depreciation is recognised in the income statement as production costs, distribution costs and administrative expenses, respectively.

Property, plant and equipment are written down to the recoverable amount if this is lower than the carrying amount.

Gains and losses on the disposal of property, plant and equipment are calculated as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Profits and losses are recognised in the income statement together with depreciation and impairment losses or under other operating income if the selling price exceeds original cost.

Investments in subsidiaries and associates

Investments in subsidiaries and associates are recognised and measured according to the equity method. This means that investments in the balance sheet are measured at the proportionate share of the enterprises' net asset value minus or plus non-amortised positive or negative group goodwill, respectively and minus or plus unrealised intra-group profits and losses.

In the income statement of the parent company, the share of the enterprises' profit/loss after elimination of unrealised intra-group profits and losses and minus or plus amortisation of group goodwill or negative group goodwill, respectively.

Subsidiaries and associates with negative net asset value are measured at DKK 0 (nil), and any amounts owed by such enterprises are written down by the parent company's share of the net asset value if the amount owed is deemed irrecoverable. If the negative net asset value exceeds the amounts owed, the remaining amount is recognised under provisions if the parent company has a legal or a constructive obligation to cover the enterprise's deficit.

Net revaluation of investments in subsidiaries and associates is transferred to the reserve for net revaluation to the extent that the carrying amount exceeds cost.

On acquisition of subsidiaries, the purchase method is applied, see Consolidated financial statements above.

Inventories

Inventories are measured at the lower of cost in accordance with the FIFO method and the net realisable value.

Goods for resale and raw materials and consumables are measured at cost, comprising purchase price plus delivery costs. Goods and work in progress are measured at cost, comprising the cost of raw materials, consumables, direct wages and salaries and indirect production overheads.

Indirect production overheads comprise indirect materials and wages and salaries as well as maintenance and depreciation and impairment losses regarding production machinery, buildings and equipment as well as factory administration and management. Financing costs are not included in the cost.

The net realisable value of inventories is determined taking into consideration estimated sales price less costs of completion and costs necessary to make the sale.

Receivables

Receivables are measured at amortised cost, usually equalling nominal value, less provisions for bad debts.

An impairment loss is recognised if there is objective evidence that a receivable or a group of receivables is impaired. If there is objective evidence that an individual receivable has been impaired, an impairment loss is recognised on an individual basis.

Receivables in respect of which there is no objective evidence of individual impairment are assessed for objective evidence of impairment on a portfolio basis. The objective evidence applied to portfolios is determined based on historical loss experience.

Prepayments, assets

Prepayments recognised under "current assets" comprise expenses incurred concerning subsequent financial years.

Cash

Cash comprise cash and short term securities which are readily convertible into cash and subject only to minor risks of changes in value.

Dividends

Dividends are recognised as a liability at the date when they are adopted at the annual general meeting. The proposed dividend payment for the financial year is disclosed as a separate item under equity.

Cost of acquisition of, consideration received for and dividends received from treasury shares are recognised as retained earnings in equity.

Reserve for development costs

The reserve for development costs comprises recognised development costs. The reserve cannot be used to distribute dividends or cover losses. The reserve will be reduced or dissolved if the recognised development costs are no longer part of the Company's operations by a transfer directly to the distributable reserves under equity.

Other provisions

Other provisions comprise anticipated costs of non-recourse guarantee commitments, loss on work in progress, decided and published restructurings etc.

Other provisions are recognised and measured as the best estimate of the expenses required to settle the liabilities at the balance sheet date. Provisions that are estimated to mature more than one year after the balance sheet date are discounted at the average bond yields.

On acquisition of enterprises, provisions for restructurings of the acquired enterprise are made provided that they have been adopted and announced not later than at the date of the acquisition.

Mortgage debt

Mortgage debt is measured at cost at the date of borrowing corresponding to the proceeds received less transaction costs paid. Subsequently, mortgage debt is measured at amortised cost corresponding to the capitalised value in accordance with the effective interest rate method.

Lease obligations

Leases for non-current assets that transfer substantially all the risks and rewards incident to ownership to the Company (finance leases) are initially recognised in the balance sheet at cost, corresponding to the lower of fair value and the net

present value of future lease payments. In calculating the net present value of the future lease payments, the interest rate implicit in the lease or the incremental borrowing rate is used as the discount factor. Assets held under finance leases are subsequently depreciated as the Company's other non-current assets.

The capitalised residual lease obligation is recognised in the balance sheet as a liability, and the interest element of the lease payment is recognised in the income statement over the term of the lease.

All other leases are considered operating leases. Payments relating to operating leases and any other leases are recognised in the income statement over the term of the lease. The Company's total obligation relating to operating leases and other leases is disclosed in contingencies, etc.

Other financial liabilities

Other financial liabilities are recognised at amortised cost, which usually corresponds to nominal value.

Prepayments, liabilities

Deferred income comprises payments received concerning income in subsequent years. Prepayments are measured at amortised cost, which usually corresponds to the nominal value.

Fair value

Fair value is determined based on the principal market. If no principal market exists, the fair value is based on the most advantageous market, i.e. the market that maximises the price of the asset or liability less transaction and/or transport costs.

All assets and liabilities that are measured at fair value or whose fair value is disclosed are classified based on the fair value hierarchy, see below:

Level 1: Value based on the fair value of similar assets/liabilities in an active market.

Level 2: Value based on generally accepted valuation methods on the basis of observable market information.

Level 3: Value based on generally accepted valuation methods and reasonable estimates based on non-observable market information.

Cash flow statement

The consolidated cash flow statement is presented in accordance with the indirect method and shows cash flows from operating, investing and financing activities and the Group's cash and cash equivalents at the beginning and end of the year.

The cash flow effect of acquisitions and disposals of enterprises is shown in cash flows from investing activities. Cash flows from acquisitions of enterprises are recognised in the cash flow statement from the date of acquisition. Cash flows from disposals of enterprises are recognised up until the date of disposal.

Cash flows from operating activities are calculated as operating profit/loss adjusted for non-cash operating items, changes in working capital and corporation tax paid.

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of enterprises and activities and investments as well as the acquisition, development, improvement and disposal, etc. of intangible assets, property, plant and equipment, including assets held under finance lease.

Cash flows from financing activities comprise changes in the size or composition of the parent company's share capital and related costs as well as the raising of loans, the closing of finance leases, repayment of interest-bearing debt and payment of dividends.

Cash and cash equivalents comprise cash and short-term securities with insignificant price risks less short-term bank loans.

Segment information

Information is disclosed by geographical markets.

Revenue is not disclosed per business area, as such disclosure in the opinion of Management and for competitive reasons will be detrimental to the Company.

Financial highlights

The financial ratios are calculated as follows:

Gross margin	=	$\frac{\text{Gross profit/loss} \times 100}{\text{Revenue}}$
Operating margin	=	$\frac{\text{Operating profit/loss} \times 100}{\text{Revenue}}$
Return on capital employed	=	$\frac{\text{Operating profit/loss} \times 100}{\text{Average number of operating assets}}$
Debt leverage	=	$\frac{\text{Net interest-bearing debt}}{\text{EBITDA}}$
Return on equity	=	$\frac{\text{Profit/loss for the year} \times 100}{\text{Average equity}}$
Solvency ratio		$\frac{\text{Equity} \times 100}{\text{Total assets}}$

Operating assets are calculated as the balance sheet total less liquid funds, interest-bearing assets (including shares) and investments in associates.
