Management's Statement

Today, the Board of Directors and the Executive Board have discussed and approved the annual report of A/S Dansk Shell for the financial year 1 January – 31 December 2017.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2017 and of the results of the Company's operations for the financial year 1 January – 31 December 2017.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's operations and financial matters and the results of the Company's operations and financial position.

We recommend that the annual report be approved at the annual general meeting.

Independent Auditor's Report

To the Shareholder of A/S Dansk Shell

Report on the Financial Statements

Opinion

We have audited the financial statements of A/S Dansk Shell for the financial year 1 January – 31 December 2017, which comprise income statement, balance sheet, statement of changes in equity, and notes, including accounting policies. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2017 and of the results of the Company's operations and cash flows for the financial year 1 January – 31 December 2017 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements.

Management's responsibilities for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

Independent auditor's report (Continued)

- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

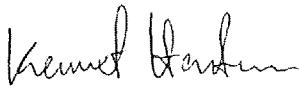

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.

Management's Review

A/S Dansk Shell was established in 1913. The Company is ultimately a wholly owned subsidiary of Royal Dutch Shell plc, whose head office is based in The Hague, The Netherlands. The Company's core business activity is Downstream, comprising refining, and connected sale of refined products. The Company's head office is located in Fredericia, while the supply activities are located in Copenhagen.

In March 2014, Royal Dutch Shell plc announced its intention to divest the Downstream activities in Denmark. The decision to put the Danish Downstream business up for sale is consistent with Shell's strategy to concentrate its Downstream footprint on a smaller number of assets and markets to where it can be most competitive.

A Share Purchase Agreement for the sale of the Marketing business was signed in March 2015 with Alimentation Couche Tard. The sale received regulatory approvals and was carried out 30th April 2016 by sale of the wholly owned subsidiary Dansk Fuels A/S.

The planned sale of the remaining activities in A/S Dansk Shell including the Refining business in Fredericia was cancelled 2th January 2018. A/S Dansk Shell will remain as wholly owned subsidiary of Royal Dutch Shell plc.

There are no current divestment plans.

Market Development

The International Oil Market in 2017

The average price of marker crude Brent in 2017 was approximately 54 USD/BBL, a 10 USD/BBL increase vs. 2016.

The first half of 2017 saw falling crude oil prices, however from late June onwards they have increased steadily upwards, and closed the year on the highest quote of the year at 67 USD/BBL.

The increase was driven mainly by global demand exceeding global supply for the first time for some years. Global demand for oil was expected to increase by 1.7% 2017, which was above market expectations.

The US dollar exchange rate started the year at approximately 7 DKK/USD but showed a steadily declining trend over the year, closing just above 6 DKK/USD.

The Refinery

In 2017 the Fredericia Refinery processed 2.7 million tonnes of Crude from the Danish Underground Consortium (DUC) and a few minor non DUC Crudes (2016 3.0 million tonnes). In addition, the Fredericia Refinery imported HDS feedstock and blending component for diesel and petrol as well as Gas to Liquid (GTL) for Arctic diesel export.

For 2017 the Refinery had a major Turn Around in September according to planned schedule.

Unplanned downtime was at 3.8% and not satisfactory. The Turn Around accounted for 2.3%.

Management's Review (continued)

The utilization of the Refinery was 77.7%, of which the Turn Around accounted for 9.1% planned downtime.

2017 showed improved earnings compared to 2016. Continued focus on upgrading, reliability and process safety delivered competitive margins. Main challenges for the year were execution of the Turn Around, environmental permit renewal, and unusually high project activity load.

Taxation

The tax in the income statement is based on the profit of the year. This includes the use of unrecognized tax losses for prior years, including Group Companies' payment for use of A/S Dansk Shell tax losses under the joint taxation scheme.

For the year 2017 A/S Dansk Shell paid DKK 2016.6 million in terms of VAT and duties. This is a reduction of DKK 1,155.6 million compared to 2016. This is due to the divestment of the marketing business.

See note 6 for further tax information.

Employees

A/S Dansk Shell had 257 employees (respectively 46 women and 211 men) on 31 December 2017.

Shell is a global organisation, which provides employees with a wide range of personal and professional development opportunities in a dynamic, diverse and inclusive work environment. The Group Wide Performance Bonus Scheme rewards not only financial results, but also considers HSSE (Health, Safety, Security and Environmental) performance, customer satisfaction, employee engagement and reputation.

Employee communication and involvement

Two-way dialogue between management and staff – directly and where appropriate, via employee representative bodies – is important and embedded in the Company's work practices. The annual Shell People Survey is one of the principal tools used to measure employee engagement. It provides insights into employees' views, and has had a consistently high response rate. No survey was conducted in 2017 due to the now cancelled divestment plans. The company plans to undertake a survey in 2018.

Gender Distribution in Leadership Roles

With effect from 1 April 2013, A/S Dansk Shell has complied with legislation encouraging the top 1,100 companies in Denmark to deliver a focused approach in getting a balanced gender representation in the Company's Board of Directors and on other management levels. According to the legislation one gender is not considered underrepresented when it constitutes 40 percent or more of the supreme governing body and/or other management levels.

Management's Review (continued)

Board of Directors

Target and status

As an outcome of the legislation, the Company's Board of Directors has set a target and developed a policy whereby it will aspire to have a minimum of 2 members of the gender with the least representation on the Board of Directors. The target is currently not fulfilled as only 1 (of 4) members of the shareholder elected board are female. No change took place during 2017 as election to the board was postponed to 2018. The aim is to fulfil the target by 2021 at the latest.

Other Management Levels

Status

The phrase "other management levels" includes all management positions in the Company, which are below the Board of Directors. If all levels of management throughout A/S Dansk Shell taken into consideration, the Company had a total of 40 leadership positions as of 31 December 2017. Of these, 33 (82%) were held by men, and 7 (18 percent) by women.

Policies

To strengthen its efforts to increase the proportion of the under-represented gender on other levels of management, the Board of Directors has initiated a policy, which includes the following initiatives:

- **Hiring and recruitment:** The Company is committed to recruit the best qualified person for the job regardless of gender.
- **Career Development:** The Company wants to ensure that all employees, regardless of gender, have equal opportunities to make a career in the Company.
- **Mentoring and Networking:** The Company offers mentoring for all junior management regardless of gender.
- **Gender Dashboard:** An internal Dashboard has been developed and published on the Intranet. It shows the trend and gender split of supervisors. This will help to focus on gender diversity and clarify any potential need for adjustments in actions and processes.

Executive Review of Current Status

The Board of Directors of A/S Dansk Shell sees diversified management as an asset that will contribute positively to the Company's operational results and strengthen the Company's management force. The Board of Directors recognises the fact that it requires a long term sustained effort in this area to influence and potentially change the gender distribution in leadership roles in the Company being a member of a truly global organisation like Royal Dutch Shell. However, the Board of Directors of A/S Dansk Shell is convinced that it has created the foundation for delivering a focused approach in getting an overall balanced gender representation in the Company, management levels included, going forward.

Health, Safety, Security and Environment (HSSE)

The Company is committed to Royal Dutch Shell's Goal Zero Programme; no harm and no leaks. In cooperation with the employees each manager is responsible for complying with the agreed safety standards.

The Refinery

Lost Time Incidents (LTI)

There has been two LTI at the Fredericia Refinery in 2017, which is the highest number since 2010.

Management's Review (continued)

Environment

In 2017 there has been continued focus on the ongoing work with investigation and remediation of spills and older pollution. The number of spills to soil is still decreasing, but the demand for information from the authorities has increased.

The work on the old pollution on the public beach in Fredericia is ongoing in close cooperation with the relevant authorities and is progressing according to plan. Renewal of the environmental permit initiated by the publication of the relevant EU legislation for refineries (BREF) in October 2014 has been progressing according to plan.

Corporate Social Responsibility

In 1976, Shell was one of the first global companies to inform about and share general business principles. These principles commit the Company to contribute to a sustainable development, to balance short and long-term interests and to integrate financial, environmental and social responsibilities into the Company's decision-making processes. All Shell companies are expected to abide by these business principles.

With reference to the Danish Financial Statements Act section 99 a A/S Dansk Shell has no independent policies on neither climate change, environment nor human rights.

Research and Development

Human ingenuity and new technology hold the key to unlocking the energy consumers need to power their lives in the years ahead. At the same time, they help the Company to limit its impact on the environment. With customers and partners, the Company applies innovative thinking across its businesses, now and for the future.

For more information please see the following link: www.shell.com/home/content/innovation/

Management's Review (continued)

Financial Review

Net Profit

Net profit after tax was a gain of DKK 327.2 million in 2017, compared to a gain of DKK 429.9 million in 2016. The result is considered satisfactory.

Two main areas contributed to the positive result in 2017; Positive refining margins throughout the year as well as increasing product prices leading to a stock gain of DKK 38 million before tax.

Revenue and Profit Margins

Revenue in 2017 increased significantly compared to 2016.

Crude and product prices increased on average 22 percent when comparing 2016 average prices vs 2017 average prices.

Profit Margins in 2017 increased by 0.2 percentage points from 1.5 percent in 2016 to 1.3 percent in 2017 calculated as gross profit proportionate to revenue.

Costs

Compared to 2016 the total costs of sales, distribution and administration decreased by DKK 16.5 million to DKK 117.5 million in 2017.

Other Income

Other income decreased by DKK 2.3 million (1 percent) from DKK 202.9 million in 2016 to DKK 200.6 million in 2017.

Distribution of Profit

The Board of Directors suggests that the Company's net profit for the year, a gain of DKK 327,2 million is carried forward to next year, and thus equity is DKK 1,163.9 million at year-end 2017.

Capital Resources

The Company's total drawing rights on intercompany credit facilities is USD 300 million, of which USD 216 million are unused at year-end.

Based on the expected cash flow development in 2018 and the unused credit facilities the Company's Board of Directors and Executive Board consider capital resources to be adequate.

Financial Position

In 2017 investments were focused at the Turn Around at Fredericia Refinery as well as replacing the convection bank.

The value of the inventories increased by DKK 113.6 million from DKK 529.8 million in 2016 to DKK 643.4 million in 2017. This is primarily an effect from increased product prices.

Receivables increased by DKK 224.9 million (26 percent) from DKK 876.9 million in 2016 to DKK 1,101.8 million in 2017. This is mainly an effect from increased product prices.

Management's Review (continued)

Current liabilities increased by DKK 185.0 million (12 percent) from DKK 1,584.5 million in 2016 to DKK 1,769.5 million in 2017. This is also mainly an effect of increased product prices.

Prospect and Outlook for 2018

Due to the cancellation of the divestment plans, the outlook for 2018 will be significantly different than initially planned. The company has used significant resources to prepare for a new business environment no longer under Shell ownership as of end 2017.

Many of these activities will now need reversing. The business agenda for 2018 will comprise of many reintegration tasks in relation to continuation of Shell ownership.

The refinery margins are expected to remain under pressure in 2018 in line with the trend observed end 2017 and early 2018.

Risk Factors

Operational Risks

A/S Dansk Shell's significant operational risk factors are:

- Exposure to pricing on the European product market, and the crude oil price has a significant effect on refinery operation profit.
- Unscheduled operational shut-downs at the refinery can lead to adverse financial impact.
- The Company's large holdings of oil products lead to increased risk associated with fluctuations in oil prices. As part of an integrated international oil company, it is the Company's policy not to hedge the risk on the operational stock. It might result in significant variations in the financial results.

Foreign Exchange and Interest Exposure

As a consequence of operation, investments and financing, the Company is exposed to changes in exchange rates (primarily USD), and in interest rate levels. The risks are managed in cooperation with the Shell Group's internal specialists, and by managing the Company's cash flow fluctuations.

Currency risk mainly arises from the purchase, storage and sale of oil products, since these they are bought and valued on the basis of the US dollar, and simultaneously sold to customers in both Danish kroner and US dollars. As part of an international integrated oil company, it is the Company's policy not to hedge such currency risks, which can lead to significant fluctuations in the financial results. Open currency risks are managed by the Company's financial processes, while the Company to the widest possible extent ensures that payables and receivables arise in the same currency.

Management's Review (continued)

Pension Funds Risks

The transfer of pension funds' assets and liabilities to CNP Assurances Danmark, effectuated in 2013, has significantly reduced the risks relating to pension obligations. The future risks maintained by the Company are those relating to changes in legislation that require additional funding, cf. description of pension-related contingent liabilities in note 12. Specifically, this is comprised of changes in the State Pension Age and potential increases in the PAL-Tax rate, currently 15.3 percent.

Post Balance Sheet Events

No events materially affecting the assessment of the Annual Report have occurred after the balance sheet day.

Within 1 year	0.4	1.2
Between 1 and 5 years	1.8	1.3
Total	2.2	2.5

Lease obligation

The obligation relates to leased vehicles.

Other contingent liabilities

The Company is jointly taxed with other Danish group entities and is jointly and severally with other jointly taxed group entities liable for payment of income taxes as well as dividends failing due for payment.

Pension obligations:

In 2012 assets and liabilities in the Company's two pension funds' were transferred to CNP Assurances Danmark (CNP). In this respect, the Company has committed itself to indemnify CNP for losses resulting from changes in defined benefit obligations attributable to any future changes in the PAL tax rate, the state pension, the Danish Labour Market Supplementary Pension (ATP), and the current VAT rate (effect on administration expenses). These contingent liabilities are not quantifiable at the balance sheet date.

Notes (continued)

Note 15

Related parties and group information

Transactions with related parties

According to the Danish Financial Statement Act section 98 c transactions with related parties are not disclosed as all transactions have been affected at arm's length.

Group information

A/S Dansk Shell's immediate parent company, The Shell Petroleum Company Limited, United Kingdom (100 percent ownership), does not present consolidated financial statements.

A/S Dansk Shell is included in the consolidated financial statements prepared by Royal Dutch Shell plc, the ultimate parent company. Royal Dutch Shell plc is based in The Hague, the Netherlands.

The consolidated financial statements of Royal Dutch Shell plc can be obtained by contacting A/S Dansk Shell or on:

www.shell.com/global/aboutshell/investor/financial-information/annual-reports-and-publications.html

Accounting Policies

Basis of Preparation

A/S Dansk Shell's Annual Report 2017 is prepared in accordance with the Danish Financial Statements Act's provisions for accounting class C large companies.

The accounting policies applied remain unchanged from last year.

The Annual Report is presented in million Danish kroner (DKK).

In accordance with Section 86(4) of the Danish Financial Statement Act, the Company does not prepare cashflow statements, as the company and its subsidiary are included in the consolidated cashflow statements of the Shell Group.

Recognition and Measurement

The Financial Statements are prepared under the historical cost basis.

Revenues are recognised in the income statement as earned. Revenue is considered earned when the following criteria are met:

- delivery has taken place before the end of the financial year
- a binding sales agreement exists
- the sales price is agreed, and
- payment at the time of sale has been received or may reasonably be expected received

On this basis, revenue is recognised in the income statement when realised. Furthermore value adjustments of financial assets and liabilities measured at amortised cost are recognised. Costs incurred to achieve the earnings for the year are recognised in the income statement, including depreciation, amortisation, impairment losses and provisions as well as reversal due to changes in accounting estimates of amounts previously recognised in the income statement.

Assets are recognised in the balance sheet when a future flow of economic benefits to the Company is probable, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when an outflow of future economic benefits is probable, and the value of the liability can be measured reliably.

Assets and liabilities are initially measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

Accounting Policies (continued)

Recognition and measurement take into account predictable losses and risks occurring prior to the presentation of the Annual Report, which confirms or invalidates affairs and conditions existing at the balance sheet date.

Danish kroner (DKK) is used as the measurement currency. All other currencies are considered foreign currencies.

Reclassifications of a few comparatives has been done with no effect on net profit/loss and equity

Leasing

Leases of property, plant and equipment are divided into finance and operating leases.

The contracts where lessor retains a significant portion of the risks and rewards are classified as operating leases.

Leases currently in force are operational leases, and payments made under operating leases are recognised in the income statement over the leasing period.

Foreign Exchange Translation

Foreign currency transactions are translated using the exchange rate at the dates of the transactions. Gains and losses arising between the date of transaction and the date of payment are recognised in the income statement as a financial item.

Receivables, payables and other monetary items denominated in foreign currencies that have not been settled at the balance sheet date are translated at the closing rate. Differences between the exchange rates at the balance sheet date and transaction date rates are recognised in the income statement as financial items.

Segment Information

Segment information is presented on revenue by business segments and geographical markets. Information on geographical segments is based on the Company's risks and returns, and its internal financial reporting system. Business segments include only the energy and oil products.

Incentive Programme

Management and employees are covered by the Shell Group's share plans.

Discontinued operations and Assets held for sale

Individual assets or groups of assets that are to be disposed of collectively are classified as assets held for sale, when the activities to carry out such a sale is highly probable and is expected to be completed within 12 months.

Accounting Policies (continued)

Income Statement

Revenue

Revenue from the sale of goods is recognised in the income statement as earnings takes place in accordance with the above general criteria for revenue recognition. Only sales where risk and delivery is transferred to buyer before the end of the year are recognised as revenue. Revenue is recognised exclusive VAT, duties and discounts in connection with the sale.

Production Costs

Production expenses include costs incurred to generate revenue for the year. Cost includes raw materials, consumables, direct labour and indirect production costs such as maintenance and depreciation, etc. Furthermore, costs for operation, administration and management of the Fredericia Refinery are allocated.

Selling and Distribution Costs

Selling and distribution expenses include costs such as salaries for sales and distribution personnel, advertising and marketing costs, depreciation, etc.

Administrative Costs

Administrative expenses include costs of management, administrative personnel, office, depreciation etc.

Other Operating Income and Expenses

Other operating income and expenses comprise items of a secondary nature in relation to the Company's core business.

Value adjustments at fair value of derivative financial instruments not qualifying as hedging instruments are recognized in the income statement.

Income from Investments in Subsidiaries

Dividends from investments in subsidiaries measured at cost are recognised in the income statement in the period in which they are declared.

Financial Items

Financial items comprise interest income and expenses and realised and unrealised exchange differences.

Accounting Policies (continued)

Taxation

Income tax for the year comprises current tax and changes in deferred tax. The tax attributable to the profit for the year is recognised in the income statement, and the tax attributable to equity transactions is recognised directly in equity.

Current tax receivables and liabilities are recognised in the balance sheet at the amount calculated on the basis of the expected taxable income for the year adjusted for tax on taxable incomes for prior years. Tax receivables and liabilities are offset if there is a legally enforceable right of set-off and an intention to settle on a net basis or simultaneously.

Deferred taxation is determined, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Balance Sheet.

Measurement of deferred tax is based on the statutory tax rules and rates prevailing at the time when deferred tax is expected to become current tax. Re-measurement of deferred tax as a consequence of changes to tax rates is recognised in the income statement. Discounting is not performed when measuring deferred tax.

A/S Dansk Shell is jointly taxed with the Danish affiliated companies.

A/S Dansk Shell acts as a management company towards the Danish tax authorities in relation to the joint taxation, and pays the total Danish tax on the Danish affiliated companies' taxable income.

The tax effect of joint taxation with the Danish affiliated companies is allocated to the profits and losses of the companies in proportion to their taxable income. The jointly taxed companies are included in the tax prepayment scheme.

Balance Sheet

Property, Plant and Equipment

Land and building, technical installations and operating equipment and fixtures are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated.

Cost comprises the purchase price and any costs directly attributable to the acquisition until the date when the asset is ready for use. The cost of assets under constructions comprises direct and indirect costs of materials, components, sub-suppliers, and wages and salaries. Borrowing costs are not capitalized.

Assets are depreciated on a Straight-line basis over the expected useful lives of the assets as follows:

- Buildings 10-50 years
- Technical installations and machinery 8-20 years
- Operating equipment and fixtures 3-8 years

Cost related to regulatory Turn Around is booked and depreciated over the service period.

Accounting Policies (continued)

Expected useful lifetime and scrap value are reassessed annually. In case of changes in the amortisation period or the residual value, the effect on the depreciation charges is recognised prospectively as a change in accounting estimates.

Depreciation is recognised in the income statement as production costs, sale and distribution costs and administrative costs, respectively.

Fixed assets are reviewed annually to determine whether there are indicators of impairment resulting in the recoverable value being lower than the carrying amount. An asset's recoverable amount is the higher of the net selling price and value in use. If it is not possible to determine the recoverable amount of an individual asset, the need for depreciation of the smallest group of assets for which it is possible to determine the recoverable amount is determined.

Investments in Subsidiaries

Investments in subsidiaries are measured at cost. In cases where cost exceeds the recoverable amount it is written down to its recoverable amount.

Inventories

Inventories are valued at cost using the FIFO method or net realisable value, whichever is lower. Net realisable value for inventory is calculated as the amount expected to be generated in the ordinary course of business less selling and completion costs. Calculating net realisable value, marketability, obsolete stocks and sales price development are taken into account.

Goods for resale, raw materials and consumables comprise the purchase price plus transportation costs.

The cost price of finished goods comprises the cost of raw materials, consumables, and direct labour plus production overheads. Indirect production overheads comprise indirect materials and wages, maintenance and depreciation of production machinery, plant and equipment as well as administration and management.

Exchange agreements with other oil companies form part of the balance for inventories.

Receivables

Receivables are measured at amortised cost or at a lower net realisable value, which essentially corresponds to the nominal value less provisions for bad and doubtful debts.

Provisions for bad debt and doubtful debts are determined on the basis of an individual assessment of each receivable, and in respect of trade receivables a general provision is also made based on the Company's experience from previous years.

Accounting Policies (continued)

Prepayments

Prepayments recognised under assets comprise incurred costs pertaining to the subsequent financial years.

Proposed Dividend for the Financial Year

Dividend proposed by the Management for the financial year, is disclosed as a separate item under equity.

Provisions

Provisions are recognised when the Company as a result of events occurring before the balance sheet date has a legal or constructive obligation, and when an outflow of economic benefits is probable to settle the obligation.

Provisions are recognised and measured as the best estimate of the expenditure required to settle liabilities at the reporting date. Provisions with an expected maturity exceeding one year from the balance sheet date are discounted using the average bond yield.

Financial liabilities

Financial liabilities are measured at amortised cost, substantially corresponding to nominal value.

Ratios

Ratios are calculated as follows:

Return on assets:

$$\frac{\text{Operating profit/loss} \times 100}{\text{Total assets}}$$

Liquidity ratio:

$$\frac{\text{Current assets} \times 100}{\text{Current liabilities}}$$
