Statement by Management on the annual report

The Board of Directors and the Executive Board have today considered and approved the annual report of Gerresheimer Vaerloese A/S for the financial year 01.12.2019 - 30.11.2020.

The annual report is presented in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the Entity's financial position at 30.11.2020 and of the results of its operations for the financial year 01.12.2019 - 30.11.2020.

We believe that the management commentary contains a fair review of the affairs and conditions referred to therein.

We recommend the annual report for adoption at the Annual General Meeting.

Independent auditor's reports

To the shareholders of Gerresheimer Vaerloese A/S

Opinion

We have audited the financial statements of Gerresheimer Vaerloese A/S for the financial year 01.12.2019 - 30.11.2020, which comprise the income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the Entity's financial position at 30.11.2020 and of the results of its operations and cash flows for the financial year 01.12.2019 - 30.11.2020 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's responsibilities for the audit of the financial statements section of this auditor's report. We are independent of the Entity in accordance with the International Ethics Standards Board of Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's responsibility for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Entity's ability to continue as a going concern, for disclosing, as applicable, matters related to going concern, and for using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Entity or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent auditor's reports

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements, and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Entity to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the management commentary

Management is responsible for the management commentary.

Our opinion on the financial statements does not cover the management commentary, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the management commentary and, in doing so, consider whether the management commentary is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the management commentary provides the information required under the Danish Financial Statements Act.

Independent auditor's reports

Based on the work we have performed, we conclude that the management commentary is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the management commentary.

Management commentary

Primary activities

Gerresheimer Vaerloese A/S produces and sells packaging to the pharmaceutical industry and other consumers with high demands for hygiene and product quality. The production takes place on the production sites in Vaerloese and Haarby.

Development in activities and finances

Gerresheimer Vaerloese A/S' equity ratio was 74,2% (2019: 78,9%), equivalent to shareholders' equity at 30 November 2020 of DKK 194,6 million (2019: DKK 182,6 million).

The company's operating income (EBIT) is higher than in 2019 due to increased sales and lower costs. The management finds that the EBIT for the year of DKK 62,4 million (2019: DKK 45,1 million) very is satisfactory.

Profit for the year before tax was DKK 62,9 million (2019: DKK 45,3 million). Adjusted for tax, the profit for the year was DKK 49,2 million (2019: DKK 35,5 million).

Covid-19 has not material effected the operations of the company.

Particular risks

Business risks

Gerresheimer Vaerloese A/S is to some extent exposed to fluctuations in the price of plastic granulate, which is the company's primary raw material. An attempt is made to meet the exposure by incorporating price clauses into the sales contracts.

Financial exposure

The company's foreign exchange and interest rate risks are managed centrally in the Gerresheimer Group.

Foreign exchange risks

Gerresheimer Vaerloese A/S' international activities imply that much of the sales goes to other countries than Denmark. Substantial amounts in foreign exchange are invoiced and the company is hereby primarily exposed in EUR and less significantly in GBP.

Credit risks

The company's credit risks are primarily linked to financial assets, which are mainly trade receivables. The company's policy for assuming credit risks implies the regular assessment of all major customers' creditworthiness. The company has assumed no significant risks in connection with a single customer.

Intellectual capital resources

Gerresheimer Vaerloese A/S aims at using the most efficient and automated production processes and, in that way, secure a high and stable product quality that constantly meets the customers' specific requirements for our packaging.

This requires a continuously high competence level throughout all stages of the production process, and the ongoing updating of the skills and knowledge of the company's technicians are, therefore, a focus area. Training courses are provided both internally and externally.

Management commentary

Environmental performance

For production of the company's products, plastic granulates of the polyethylene (HDPE) and polypropylene (PP) type are primarily used. These granulates are not pollutant in themselves. Packaging produced of PE or a similar granulate is converted into CO₂ and water in connection with complete incineration and, therefore, do not have an impact on the environment during such process of destruction.

The company is a major supplier to the pharmaceutical industry, which places great demands on the standard of hygiene in production. Continuous steps are taken to improve the standard of hygiene and ensure that it meets specific customer requirements at all times, which is regularly verified by auditors.

Gerresheimer Vaerloese A/S is certified according to ISO 9001:2008 no. 100123, ISO 14001:2004 no. 100125 and ISO 15378:2012 no. 104035. ISO 45001:2020

Events after the balance sheet date

No events have occurred after the balance sheet date to this date which would influence the evaluation of this annual report.

Outlook

For the year to come, the Board of Directors and the Executive Board expect a positive development in both activities and results. Covid-19 is not expected to impact the operations of the company.

Accounting policies

Reporting class

This annual report has been presented in accordance with the provisions of the Danish Financial statements Act governing reporting class C enterprises medium.

Referring to section 112(1) of the Danish Financial Statements Act, Gerresheimer Vaerloese A/S has not prepared any consolidated financial statements.

The accounting policies applied to these financial statements are consistent with those applied last year.

Recognition and measurement

Assets are recognised in the balance sheet when it is probable as a result of a prior event that future economic benefits will flow to the Entity, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when the Entity has a legal or constructive obligation as a result of a prior event, and it is probable that future economic benefits will flow out of the Entity, and the value of the liability can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. Measurement subsequent to initial recognition is effected as described below for each financial statement item.

Anticipated risks and losses that arise before the time of presentation of the annual report and that confirm or invalidate affairs and conditions existing at the balance sheet date are considered at recognition and measurement.

Income is recognised in the income statement when earned, whereas costs are recognised by the amounts attributable to this financial year.

Foreign currency translation

On initial recognition, foreign currency transactions are translated applying the exchange rate at the transaction date. Receivables, payables and other monetary items denominated in foreign currencies that have not been settled at the balance sheet date are translated using the exchange rate at the balance sheet date. Exchange differences that arise between the rate of the transaction date and the one in effect at the payment date, or the rate at the balance sheet date are recognised in the income statement as financial income or financial expenses. Property, plant and equipment, intangible assets, inventories and other non-monetary assets that have been purchased in foreign currencies are translated using historical rates.

When recognising foreign subsidiaries and associates that are independent entities, the income statements are translated at average exchange rates for the months that do not significantly deviate from the rates at the transaction date. Balance sheet items are translated using the exchange rates at the balance sheet date. Goodwill is considered as belonging to the independent foreign entity and is translated using the exchange rate at the balance sheet date.

Accounting policies

Exchange differences arising out of the translation of foreign subsidiaries' equity at the beginning of the year at the balance sheet date exchange rates as well as out of the translation of income statements from average rates to the exchange rates at the balance sheet date are classified as equity.

Exchange adjustments of outstanding accounts with independent foreign subsidiaries which are considered part of the total investment in the subsidiary in question are classified directly as equity.

Income statement

Gross profit or loss

Gross profit or loss comprises revenue, changes in inventories of finished goods and work in progress, own work capitalised, other consumables, external expenses and other income.

Revenue

Net turnover from the sale of goods for resale and finished goods is booked to the profit and loss account if delivery and transfer of risk to the individual purchaser took place before the end of the year and if income can be calculated reliably and is likely to be received. Net turnover is measured exclusive of value added tax, other taxes and discounts in relation to the sale.

Other operating income

Other operating income comprises income of a secondary nature as viewed in relation to the Entity's primary activities.

Cost of sales

Cost of sales comprises costs of sales for the financial year measured at cost, adjusted for ordinary inventory write-downs.

Costs of raw materials and consumables

Costs of raw materials and consumables comprise the consumption of raw materials and consumables for the financial year after adjustment for changes in inventories of these goods from the beginning to the end of the year. This item includes shrinkage, if any, and ordinary write-downs of the relevant inventories.

Other external expenses

Other external expenses include expenses relating to the entity's ordinary activities, including expenses for premises, stationery and office supplies, marketing costs etc. This item also includes write-downs of receivables recognised in current assets.

Staff costs

Staff costs comprise salaries and wages as well as social security contributions, pension contributions etc. for entity staff.

Accounting policies

Amortisation, depreciation and impairment losses

Amortisation, depreciation and impairment losses relating to intangible assets and property, plant and equipment comprise amortisation, depreciation and impairment losses for the financial year, calculated on the basis of the residual values and useful lives of the individual assets and impairment testing as well as gains and losses from the sale of intangible assets as well as property, plant and equipment.

Income from investments in group enterprises

Income from investments in group enterprises comprises the pro rata share of the individual enterprises' profit/loss after full elimination of internal profits or losses.

Other financial income

Other financial income comprises dividends etc. received on other investments, interest income, including interest income on receivables from group enterprises, payables and foreign currency transactions as well as tax relief under the Danish Tax Prepayment Scheme etc.

Other financial expenses

Other financial expenses comprise interest expenses, including interest expenses on payables to group enterprises, payables and foreign currency transactions, amortisation of financial liabilities as well as tax surcharge under the Danish Tax Prepayment Scheme etc.

Income taxes

Tax for the year, which consists of current tax for the year and changes in deferred tax, is recognised in the income statement by the portion attributable to the profit for the year and recognised directly in equity by the portion attributable to entries directly in equity.

The current tax payable or receivable is recognised in the balance sheet, stated as tax calculated on this year's taxable income, adjusted for prepaid tax.

Deferred tax is recognised on all temporary differences between the carrying amount and tax-based value of assets and liabilities.

Deferred tax assets, including the tax base of tax loss carry-forwards, are recognised in the balance sheet at their estimated realisable value, either as a set-off against deferred tax liabilities or as net tax assets.

The entity is jointly taxed with all Danish subsidiaries. The current Danish income tax is allocated among the jointly taxed entities proportionally to their taxable income (full allocation with a refund concerning tax losses).

Balance sheet

Intellectual property rights etc.

Intellectual property rights etc. comprise acquired intangible assets primarily including investments in software concerning the company's ERP system.

Accounting policies

Software is measured at cost less accumulated amortisation. Cost comprises costs, including salaries and amortisation, which directly or indirectly are attributable to the acquisition and the development of this software.

The amortisation period is five years, corresponding to the probable useful life.

Property, plant and equipment

Land and buildings, plant and machinery as well as other fixtures and fittings, tools and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated.

Cost comprises the acquisition price, costs directly attributable to the acquisition and preparation costs of the asset until the time when it is ready to be put into operation. For self-constructed assets, cost comprises direct and indirect costs of materials, components, sub-suppliers and labour costs.

The basis of depreciation is cost less estimated residual value after the end of useful life. Straight-line depreciation is made on the basis of the following estimated useful life of the assets:

Buildings	20-40 years
Plant and machinery	5-10 years
Other fixtures and fittings, tools and equipment	3-10 years

Property, plant and equipment are written down to the lower of recoverable amount and carrying amount.

Profits and losses from the sale of property, plant and equipment are calculated as the difference between selling price minus selling costs and carrying amount at the time of sale. Profits or losses are recognised in the income statement as adjustment to depreciation and impairment losses, or under other operating income if the selling price exceeds original cost.

Investments in group enterprises

Investments in group enterprises are recognised and measured according to the equity method. This means that investments are measured at the pro rata share of the enterprises' equity value plus or minus unamortised positive, or negative, goodwill and minus or plus unrealised intragroup profits or losses.

The company's share of the enterprises' profits or losses after elimination of unrealised intragroup profits and losses and minus or plus amortisation of positive, or negative, goodwill is recognised in the income statement.

Group enterprises with negative equity value are measured at DKK 0, and any receivables from these enterprises are written down by the Parent's share of such negative equity value if it is deemed irrecoverable. If the negative equity value exceeds the amount receivable, the remaining amount is recognised under provisions if the Parent has a legal or constructive obligation to cover the liabilities of the relevant enterprise.

Accounting policies

Upon distribution of profit or loss, net revaluation of investments in group enterprises is transferred to Reserve for net revaluation according to the equity method under equity.

Goodwill is calculated as the difference between cost of the investments and fair value of the assets and liabilities acquired. Goodwill is amortised over its estimated useful life which is normally five years, however, in certain cases it may be up to 20 years for strategically acquired enterprises with a strong market position and a long-term earnings profile if the longer amortisation period is considered to give a better reflection of the benefit from the relevant

Investments in group enterprises are written down to the lower of recoverable amount and carrying amount.

Inventories

Inventories are measured at the lower of cost using the FIFO method and net realisable value.

Cost consists of purchase price plus delivery costs. Cost of manufactured goods and work in progress consist of costs of raw materials, consumables, direct labour costs and indirect production costs.

Indirect production costs comprise indirect materials and labour costs, costs of maintenance, depreciation and impairment losses for machinery, factory buildings and equipment applied for the manufacturing process as well as costs of factory administration and management. Finance costs are not included in cost.

The net realisable value of inventories is calculated as the estimated selling price less completion costs and costs incurred to execute sale.

Receivables

Receivables are measured at amortised cost, usually equalling nominal value less write-downs for bad and doubtful debts.

Cash

Cash comprises cash in hand and bank deposits.

Deferred tax

Deferred tax is recognised on all temporary differences between the carrying amount and tax-based value of assets and liabilities, for which the tax-based value of assets is calculated based on the planned use of each asset.

Deferred tax assets, including the tax base of tax loss carry-forwards, are recognised in the balance sheet at their estimated realisable value, either as a set-off against deferred tax liabilities or as net tax assets.

Accounting policies

Operating leases

Lease payments on operating leases are recognised on a straight-line basis in the income statement over the term of the lease.

Other financial liabilities

Other financial liabilities are measured at amortised cost, which usually corresponds to nominal value.

Deferred income

Deferred income comprises received income for recognition in subsequent financial years. Deferred income is measured at cost.

Cash flow statement

Referring to section 84 of the Danish Financial Statements Act, Gerresheimer Vaerloese A/S has not prepared any cash flow statement.

Financial highlights

Financial highlights are defined and calculated in accordance with the applicable version of the "Recommendations & Ratios" issued by the Danish Society of Financial Analysts.

Ratios

Calculation formula

Return on equity (%)

$$\frac{\text{Profit for the year} \times 100}{\text{Average equity}}$$

Solvency ratio (%)

$$\frac{\text{Equity} \times 100}{\text{Total assets}}$$

Ratios reflect

Return on equity

The entity's return on capital invested in the entity by the owners.

Solvency ratio

The financial strength of the entity.
