## Management's Statement

Today, the Executive Management and Board of Directors have discussed and adopted the Annual Report for 2019 of Mesco Denmark A/S.

The Annual Report has been prepared in accordance with the Danish Financial Statements Act.

In our opinion, the Financial Statements give a true and fair view of the Group's and Company's assets, liabilities and financial position at 31 December 2019, as well as of the results of the Group's and the Company's operations and the Group's consolidated cash flows for the financial year ended 31 December 2019.

In addition, it is our opinion, that the Management Report gives a true and fair view of the development in the Group's and the Company's operations and economic conditions, the year's result and of the Group's and the Company's financial position.

It is recommended that the Annual Report be approved at the Annual General Meeting.

### **Independent Auditors' Report**

#### To the Shareholder of Mesco Denmark A/S

#### **Opinion**

We have audited the consolidated Financial Statements and the Parent Company Financial Statements of Mesco Denmark A/S for the financial year 1 January – 31 December 2019 comprising income statement, balance sheet, statement of changes in equity and notes, including accounting policies, for the Group as well as for the Parent Company and a cash flow statement for the Group. The consolidated Financial Statements and Parent Company Financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated Financial Statements and the Parent Company Financial Statements give a true and fair view of the Group's and the Parent Company's assets, liabilities and financial position at 31 December 2019 and of the results of the Group's and the Parent Company's operations and consolidated cash flows for the financial year 1 January – 31 December 2019 in accordance with the Danish Financial Statements Act.

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the consolidated Financial Statements and the Parent Company Financial Statements" section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Management's responsibility for the consolidated Financial Statements and the Parent Company Financial Statements

Management is responsible for the preparation of consolidated Financial Statements and Parent Company Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control that Management determines is necessary to enable the preparation of consolidated Financial Statements and Parent Company Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated Financial Statements and the Parent Company Financial Statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the consolidated Financial statements and the Parent Company Financial Statements unless Management either intends to liquidate the Group or the Company or to cease operations, or has no realistic alternative but to do so.

## Auditor's responsibilities for the audit of the consolidated Financial Statements and the Parent Company Financial Statements

Our objectives are to obtain reasonable assurance as to whether the consolidated Financial Statements and the Parent Company Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements in Denmark will always detect a material misstatement when it exists. Misstatements may arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of Financial Statement users made on the basis of these consolidated Financial Statements and Parent Company Financial Statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also

- identify and assess the risks of material misstatement of the consolidated Financial Statements and the Parent Company Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the consolidated Financial Statements and the Parent Company Financial Statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated Financial Statements and the Parent Company Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- evaluate the overall presentation, structure and contents of the consolidated Financial Statements and the Parent Company Financial Statements, including the disclosures, and whether the consolidated

Financial Statements and the Parent Company Financial Statements represent the underlying transactions and events in a manner that gives a true and fair view.

 obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated Financial Statements.
 We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

#### Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the consolidated Financial Statements and the Parent Company Financial Statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated Financial Statements and the Parent Company Financial Statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the consolidated Financial Statements or the Parent Company Financial Statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the consolidated Financial Statements and the Parent Company Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.

Equity ratio	38%	24%	35%	42%	40%
Return on equity	-15%	-31%	-6%	10%	11%

According to the custom of the sector profit ratio has been calculated as the profit before tax proportional to the revenue. The calculations of the remaining financial ratios are described in the accounting policy section of the Annual Report.

#### 2019 Review

Mesco Denmark A/S (the Company) is mainly a holding company with no revenue in the parent company. The Company employed one employee and the group employed an average of 767 employees during 2019 (2018: 764 employees), one in the parent company and 766 in the group.

Further description of the activity in the subgroup is available in the 2019 annual report of Burmeister & Wain Scandinavian Contractor A/S (hereinafter BWSC), which is accessible on the homepage of BWSC (www.bwsc.com).

#### Fundamental error

In 2016-2018 internal profits on two EPC projects had erroneously not been eliminated. This has been corrected as a fundamental error. Please see page 17.

#### Development in activities and finances

The Group's financial statements and the financial statements of the Parent Company show a result for the year of DKKm -86 (2018: DKKm -173) and equity at 31 December 2019 of DKKm 680 (2018: DKKm 464).

The expectation for 2019 stated in the Annual Report for 2018 of higher revenue and higher profit before tax have not been realised.

#### Events after the balance sheet date

No significant events subsequent to 31 December 2019, which could materially impact the financial position, have occurred.

#### **Main Activities**

The group has three main activities:

- Provider of tailored power plants
- Power plants generation service
- Investments in power plants

#### **Knowledge sharing**

The group is knowledge-based. People and internal processes are key resources to solve customers' challenges in the best and most efficient way possible. Furthermore, the group continuously focuses on maintaining and developing its employees.

Knowledge key figures of the group:

- 767 employees
- Emphasis on further education and training of the employees

#### Order intake and backlog

Order intake for 2019 amounted to DKKm 474 (2018: DKKm 2,955). The order intake primarily relates to service projects with DKKm 402. The EPC projects order intake has been unsatisfactory low with DKKm 72 (2018: DKKm 1,578). EPC projects, that typically ensures revenue over the construction period - typically around 2- 3 years per project, have been below expectations in 2019. O&M projects which ensure revenue over the lifetime of contract (up to 20 years) will to some extend follow the EPC projects and have consequently also been below expectations. The order backlog amounted to DKKm 6,797 (2018: DKKm 7,917) at 31 December 2019.

#### **EBIT**

The financial performance has been below expectations, which has resulted in a loss before interest and tax (EBIT) for 2019 of DKKm 77 compared to a loss of DKKm 102 in 2018. The unsatisfactory development in EBIT is mainly the result of technical and commercial matters related to a few challenging projects in particular.

#### Uncertainties

In 2014, two engine-based projects in the Middle East were suspended due to the client not paying the milestone payments on time. The outstanding milestone payments were paid at the end of 2014, and the suspension was lifted at the beginning of 2015. The subsidiary BWSC has claimed the customer for direct costs, overhead and profit. A part of the costs related to the claims has been included in the project accounts/work in progress over the years. At the end of 2016, the taking-over certificates (TOC) were signed by the customer. Since 2017, focus has been on reaching an agreement on the claims with the client's representatives. Since it has not been possible to reach an agreement, we decided in 2018 to file for arbitration through ICC, France. A material part of the amount we are claiming has not been recognised as income due to the claim negotiations not being finalised. The outcome of the claim settlement is uncertain, and it is considered likely that it could have a material positive impact on result before tax when the claims have been settled.

#### Financial income and expenses

The subsidiary BWSC has made a number of investments in power plants together with partners. The main investments are the Brigg, Snetterton and Kent biomass power plants in the UK. Key elements for the financial performance of the plants are the sales price for the power produced and fuel prices. In 2019, power prices in the UK were below expectations, which had a negative impact on profit from investments in and impairments of associated companies compared to expectations. Result from investments in associated companies amounts to DKKm -27 (2018: DKKm -83). In 2018 the result from investments in associated companies included impairment losses of DKKm 87.

#### Working capital

Working capital has increased by DKKm 547. The decrease is mainly related to extraordinary large prepayments received just before year end 2018 which has been used for projects as planned. Reducing working capital bindings will continue to be a focus area going forward. Cash DKKm 504 represents 28% of total assets.

#### Cash flow

Cash flows from operating activities amounts to DKKm -545, which is a decrease of DKKm 659 compared to last year. The decrease is mainly caused by large project down payments received late 2018, which has been used for projects in 2019. Cash flows from investing activities amounts to DKKm 215 versus DKKm 3 last year. Cash flows from investing activities is mainly related to proceed from the disposal of a share in a power plant. Cash flow from financing activities amounts to DKKm 297 compared to DKKm 47 last year. In 2019 cash flow from financing activities is due to capital increase and loan from the ultimate parent company less repayment of bank loan.

#### Risk Management

Risk management is a fundamental part of the Group's business. The groups' business includes large construction and service projects in various jurisdictions and related contracts with sub-suppliers and consortium partners, which expose the group to a number of risks.

The group holds comprehensive experience within engineering, procurement, construction and servicing, which has been accumulated during construction of 184 power plants in more than 54 countries and a large number of service projects. The experience contributes to reducing potential risks. Risk will always be a significant factor in large construction and service projects, and each project is carefully evaluated in the planning and execution phases.

Beside the operational risks, the group is also exposed to currency, interest, counterpart, investment and credit risks which are mitigated and considered less material. For additional information please see the Annual Report for the subsidiary Burmeister & Wain Scandinavian Contractor A/S on their homepage (www.bwsc.com).

#### Corporate social responsibility

The Company is mainly a holding company and consequently the Company has not itself implemented any policies for corporate social responsibility. This includes all 5 main focus areas of CSR:

- · Environment and climate
- Human & labour rights
- · Business integrity
- · Social and staff matters
- Community engagement and social impact

The Company's Sub-Group has a separate CSR statement which is incorporated in their financial statement and available on their homepage (<a href="www.bwsc.com">www.bwsc.com</a>). Equal opportunities for all employees is important to the group and accordingly we do not differentiate based on gender, race or religion when people are employed, or when training programs are offered to employees or when employees are promoted. The Company has implemented a policy regarding gender parity. For Mesco Denmark A/S the policy reflects the fact that the Company is a holding company with only one employee and a Board of Directors of three members with an expected long term of service and anticipated little rotation. Burmeister & Wain Scandinavian Contractor A/S has furthermore implemented a gender parity policy.

#### 2020 Outlook

BWSC carried through a strategy review in 2019 and made an organisational restructuring of the company. It is expected that the transition of BWSC will take another one to two years and 2020 is therefore expected to be a year of transition for BWSC. Certain initiatives will be implemented regarding market focus, competitiveness and optimisation. We expect to see an effect from these initiatives on our profitability on a medium to long-term basis. For 2020 we expect an improved operating result, and a positive result before tax.

Forward looking statements like the 2020 outlook are uncertain and depend on a number of factors. Furthermore, BWSC disclaims any liability to update or adjust statements in the Annual Report 2019 about future or possible reasons for differences between actual and anticipated results except where required by law.

#### **Note 1 Accounting Policies**

#### General

The Annual Report of Mesco Denmark A/S has been presented in accordance with the provisions of the Danish Financial Statements Act for large reporting Class C companies.

#### Fundamental error

Internal profits on two EPC contracts were erroneously not eliminated in previous years, this has been adjusted as a fundamental error. The adjustment of the errors has decreased equity as at 1 January 2018 with DKKm 22, the net result for 2018 with DKKm 12 and equity as at 31 December 2018 with total DKKm 34 net of tax effects.

#### Change in accounting policies

There are no changes to accounting policies compared to previous year.

#### **Accounting estimates and Judgements**

In preparing the financial statements, the subsidiary BWSC has made a number of estimates and judgements that form the basis for recognition and measurement of assets, liabilities and items in the income statement. The most significant accounting estimates and judgements are stated below.

Determining the carrying amount of certain assets and liabilities requires judgements, estimates and assumptions relating to future events and is therefore by nature subject to uncertainty. Particular risks referred to in the Risk management section of the Management review may have a substantial influence on the accounting risks. In the financial statements, attention is particularly drawn to the following assumptions and uncertainties as these substantially influence the assets and liabilities recognised in the statements and may be adjusted in subsequent accounting years if the assumed course of events is not realised as anticipated:

- Construction contracts are measured at contract work performed, less prepayments received from the
  customers and anticipated losses. The percentage of completion is determined from an assessment.
  The contract value is measured based on the total expected income of the individual contracts claim
  income is further mentioned below. The total expected expenses are partly based on estimates and
  contingency are included for unforeseen cost deviations to plan cost due to project risks, disputes
  etc.
- The subsidiary BWSC has a material claim related to engine-based projects in the Middle East.
   Currently, the claim negotiations have not been finalised, and a material part of claim income cannot be recognised as income. The settlement is uncertain and could have a materially positive impact on the result when the claim has been final settled. It is considered less likely that the settlement would have a negative impact on the result

- Provisions are based on the subsidiary BWSC's best estimate of the amount at which the obligation is expected to be discharged. Provisions consist mainly of warranty provisions and other provisions.
- Investments in associated companies are recognised at the subsidiary BWSC's proportionate share of the net assets of the Companies (the equity method). An impairment test is performed when an indicator of impairment exists. The impairment test is based on cash flow estimates of future income and cost. Uncertainty about the future development in the power sales price and fuel cost are the key uncertainties in the impairment test. As shown in note 6 an impairment loss of DKKm 87 has been recognised in 2018. The impairment loss relates to investments in associated companies in the UK operating a number of power plants. The impairment is caused by underlying lower than expected earnings of the companies as well as lower than expected long term outlook for the companies. The impairment is based on a discounted cash flow model calculation and budgets for the power plants throughout the expected life of the plants.

#### Accounting judgements

In applying the accounting policies, the subsidiary BWSC makes judgements concerning recognition principles to use. Especially related to when income and expenditure relating to third-party contracts must be treated in accordance with the percentage of completion method (construction contracts) compared to sale of goods. BWSC has for each group of transactions assessed, whether projects contain a sufficiently high degree of individual adjustment to qualify for recognition as a construction contract under the percentage of completion method. If this is not the case, the projects are recognised as revenue on sale of finished projects.

#### **Defining materiality**

The subsidiary BWSC's Annual Report is based on the concept of materiality to ensure that the content is material and relevant to the reader. This objective is pursued, amongst other things, by providing relevant rather than generic descriptions. The consolidated financial statements consist of a large number of transactions. These transactions are aggregated into classes according to their nature or function and presented in classes of similar items in the financial statements and in the notes as required by the Danish Financial Statements Act. If items are individually immaterial, they are aggregated with other items of similar nature in the statements or in the notes.

#### Going concern

The company is required to decide whether the financial statements can be presented on a "going concern" basis. Based on budgets, forecast and expectations of future cash flow etc., the company is of the opinion that there are no factors giving reason to doubt whether the company can continue operating for at least 12 months from the balance sheet date.

#### Recognition and measurement in general

Assets are recognised in the balance sheet when it is probable that future economic benefits associated with the assets will flow to the Group, and the cost of the assets can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits associated with the liabilities will flow from the Group, and the cost of the liabilities can be measured reliably.

At initial recognition, assets and liabilities are measured at cost. Assets and liabilities are afterwards measured as described below for each balance sheet item.

#### Consolidation

The consolidated financial statements are prepared on the basis of financial statements of the Parent Company and each subsidiary by aggregating items of a similar nature and by eliminating intra-group transactions.

The project financial statements of international contracting activities are translated into DKK as follows: The items in the income statement and the balance sheet are translated according to weighted project rates, corresponding to the exchange rates according to forward exchange contracts entered into. As the exchange rates applied are the same during the entire project period, generally no exchange rate adjustments arise on large projects.

The financial statements of foreign subsidiaries that operate as independent entities are translated into DKK as follows: The items in the income statement are translated at average rates that do not differ materially from the exchange rates at the date of transaction. Balance sheet items are translated at c losing exchange rates. Exchange rate adjustments are recognised directly in equity.

The financial statements of international subsidiaries that operate as integrated entities are translated into DKK as follows: The items in the income statement are translated at average rates that do not differ materially from the exchange rates at the date of transaction. Current assets and liabilities are translated at closing exchange rates, whereas fixed assets and long-term liabilities are translated at historical rates. Exchange rate adjustments are recognised in the income statement.

The items from the subsidiaries are consolidated into the consolidated financial statements 100% line by line. The minority interests' proportional share of the net result and equity of the subsidiaries are included as separate items under the consolidated result for the year and equity.

Companies in which the Group holds between 20% and 50% of the voting rights or in some other way holds significant influence, but not control, are regarded as associated companies as described under the item "Financial fixed assets".

#### Foreign currency translation

Transactions in foreign currency are translated at the exchange rate at the transaction date. Exchange rate adjustments arising between the exchange rate at the transaction date and the payment date are recognised in the income statement.

Receivables, payables and other monetary items in foreign currency, which are not paid at the balance sheet date, are translated at the exchange rate at the balance sheet date. The difference between the exchange rate at the balance sheet date and the exchange rate at the time when the receivable or payable is incurred is recognised in the income statement.

#### **Financial instruments**

Financial instruments are initially recognised in the balance sheet at cost and subsequently measured according to fair value. The fair value of financial instruments is included in other debtors (positive fair value) or other creditors (negative fair value) as the case may be.

Changes in the fair value of financial instruments that hedge the fair value of already recognised assets or liabilities are recognised in the income statement under financial income or financial costs together with changes in the value of the assets and liabilities hedged.

Financial instruments used to hedge expected future transactions regarding specific projects or interest payments are measured at fair value on the balance sheet date, and value adjustments are recognised directly in equity until the hedged item is realised. When the hedged item is realised, the changes in value are recognised in the same accounting entry as the hedged item as stated above by transferring the changes in value from equity to the income statement.

Financial instruments which are not held for hedging purposes regarding specific projects or interest payments are recognised in the balance sheet at fair value on the balance sheet date. Value adjustments are recognised in the income statement under financial income or costs.

#### **INCOME STATEMENT**

#### Revenue

The Group's revenue is derived from contract activities, service contracts, etc.

Contract work and operational contracts are recognised according to the percentage-of-completion method. Profits on contracts are recognised by reference to actual stage of completion based on an estimate of both known and expected additional costs. In connection with consortiums, only the Group's share is taken into account.

Stage of completion is determined on the basis of an assessment of the work carried out, evaluated on the basis of costs incurred on the project, compared to the total estimated costs.

Realised profits on completed contracts are recognised net of provisions for warranties. Income from spare part contracts and the sale of electricity is recognised when delivered.

#### **Production costs**

Production costs comprise expenses, including wages and salaries, raw materials and consumables, and depreciation made for purposes of generating the year's revenue, including indirect costs related to wages and salaries, rent and leases and depreciation.

Research costs and development costs that do not qualify for capitalisation and depreciation of capitalised development costs are recognised as production costs.

Write-downs in connection with expected losses on contract activities are recognised as production costs.

#### Sales costs

Costs related to offers and orders, including expenses r elated to sales personnel, marketing, including costs for IPP project development, and internal development projects, are recognised as sales costs.

#### Administrative costs

Costs related to management and group administration, including costs related to administrative officers, management, office premises, office expenses, depreciation etc., are recognised as administrative costs.

The administrative costs that are included in production overheads are transferred to production overheads.

#### Financial items

Financial income and costs include interest income and costs, realised and unrealised capital gains and losses, changes of financial instruments not designated as hedging arrangement, amortisation of financial assets and liabilities and surcharges and allowances under the advance-payment-of-tax scheme, etc. Financial income and costs are recognised at the amounts relating to the reporting period.

#### Tax

The estimated tax charge for the year is recognised in the income statement and is recorded as a current liability in the balance sheet. Non-refunded dividend tax concerning dividends from foreign subsidiaries is expensed in the year in which the dividend is declared.

The Company and its Parent Company are jointly taxed. The tax of the joint taxation income is fully allocated by payment of joint taxation contributions.

Deferred tax resulting from timing differences between income and expenses in the financial statements and the statement of taxable income and from tax loss carry-forwards is provided for in the balance sheet. Changes in the deferred tax charge for the year are taken to the income statement. Actual and deferred tax related to equity movements is recognised directly in equity.

#### BALANCE SHEET

#### Intangible and tangible fixed assets

Intangible and tangible fixed assets are measured at cost plus subsequent additions and revaluation and less accumulated amortisation/depreciation and impairments.

The useful life and residual value are reassessed annually. Changes are treated as accounting estimates, and the effect on depreciation is recognised prospectively.

Amortisation/depreciation in the year is provided on a straight-line basis over the estimated useful lives of the individual assets, using the following periods:

Goodwill 3 years Contract rights 2 years IT software 3-7 years IT hardware 3 years Development costs 3 years Office building 100 years Warehouse 25 years Installations 10 years Cars 5 years Plant and equipment 5 years Fixtures, fittings and tools 3-10 years

Development costs comprise costs, wages, salaries and amortisation directly and indirectly attributable to development activities.

Development projects that are clearly defined and identifiable, where the technical feasibility, sufficient resources and a potential future market or development opportunities are evidenced, and where the Company intends to use the project, are recognised as intangible assets provided that the cost can be measured reliably and future earnings exceeding the capitalised costs. Other development costs are recognised in the income statement as incurred.

#### Financial fixed assets

Land is not depreciated

Investments in subsidiaries and associated companies are recognised at the Parent Company's proportionate share of the net assets of the companies, calculated by reference to the accounting policies applied by the Parent Company, adjusted for proportionate share of unrealised intra-group profits and losses (the equity method).

Subsidiaries and associated companies whose net asset value is negative are recognised at DKK 0, and any receivables from these companies are written down by the Parent Company's share of the negative net asset value. If the net asset value exceeds the receivables, the residual amount is recognised under provisions provided that the Parent Company has a legal or actual obligation to cover the subsidiaries' deficits.

Net revaluation of investments in subsidiaries and associated companies is taken to equity as a net revaluation reserve according to the equity method to the extent that the carrying amount exceeds the cost.

Newly acquired or newly established companies are recognised in the financial statements from the time of acquisition. Companies sold or otherwise disposed of are recognised until the time of sale.

Profits or losses on the sale of subsidiaries and associated companies are stated as the difference between the selling price and the carrying amount of the net assets at the time of sale and expected costs related to the sale and/or disposal and recognised in the income statement under other income.

The takeover method is applied to newly acquired subsidiaries and associated companies. Thus, the assets and liabilities of such companies are measured at fair value at the time of acquisition. The takeover method is also applied when an associated company becomes a subsidiary company, through step acquisition of more shares in the associated company, whereby control of the company is obtained at such time. A positive difference between the fair value of assets and liabilities acquired and the purchase consideration is treated as goodwill, which is subsequently amortised over the useful life; and a negative difference is treated as negative goodwill, which is recognised as other operating income at the time of acquisition or the time of obtaining control.

Other securities including equity investments are investments in unlisted shares that management considers investment securities. The equity investments are measured at cost

#### Other securities

Other securities including equity investments are investments in unlisted shares that management considers investment securities. The equity investments are measured at cost.

#### **Inventories**

Inventories, including prepayments for goods, are measured at cost according to the FIFO principle. However, inventories are written down to the lower of cost or net realisable value.

#### **Debtors**

Debtors, etc. are measured at amortised cost, which usually equals the nominal value.

Impairment for bad debts are based on individual assessments if there is an objective indication that a debtor is impaired.

#### Contract work in progress

Contract work in progress is measured by reference to the stage of completion. Reference is made to the Revenue section.

The sales value is based on the stage of completion at the balance sheet date and the total expected income on the individual work in progress.

The individual work in progress is recognised in the balance sheet under debtors or liabilities other than provisions, dependent on the net value of the selling price less payments on account and prepayments. Costs related to sales work and contracts are recognised in the income statement as incurred.

#### **Prepayments**

Payments, made or received concerning costs or income in subsequent years are recognised as prepayments under receivables or current liabilities.

#### Warranty provisions

Warranty provisions comprise commitments to repair work within the guarantee period. Provisions are measured and recognised based on previous experience with guarantee work.

#### Other provisions

Other provisions comprise expected remaining costs relating to delivered contracts.

When it is probable that the total costs will exceed the total income on contract work in progress, a provision is made for the total loss expected to be incurred on the work. The provision is recognised as costs under production costs.

#### Proposed dividend

Proposed dividend for the year is included in the equity.

#### Financial liabilities

Financial liabilities are recognised from the raising of the loan at the proceeds received net of transaction costs incurred.

25

The financial liability is subsequently measured at amortised cost, equalling the capitalised value, using the

effective interest rate method. The difference between the proceeds and the nominal value is thus recognised

in the Income Statement over the loan term.

Other financial liabilities, which comprise trade creditors, payables to related and associated companies and

other creditors, are measured at amortised cost, which usually corresponds to the nominal value.

CASH FLOW STATEMENT

The cash flow statement shows the Group's net cash flows for the year, broken down by operating, investing

and financing activities, changes in cash and the Group's cash at the beginning and at the end of the year.

A cash flow statement for the parent company has not been prepared in accordance with §86.4 of the Danish

Financial Statements Act.

Cash flows from operating activities

Cash flows from operating activities are made up as the operating result, adjusted for non-cash operating and

financial items, changes in working capital, financial items and paid income taxes.

Cash flows from investing activities

Cash flows from investing activities comprise payments related to additions and disposals of companies and

additions and disposals of intangible and tangible assets.

Cash flows from financing activities

Cash flows from financing activities comprise changes in the size or composition of the Company's share

capital and related costs, raising of loans and repayments of interest-bearing debt and dividends distributed

to shareholders.

#### Note 15 Financial instruments

The subsidiary BWSC manages the currency hedging as well as the Group cash management. The major part of BWSC's cash flow are in DKK, EUR, USD and GBP. The future cash flow and net positions in currencies other than EUR and DKK will be hedged initially upon contract signing and during the project execution, if changes in currency net positions occur. Subsequently, investment in subsidiaries, and associated companies in foreign currency are not hedged.

Foreign exchange forwards contracts are used to hedge future cash flow and net positions. Interest rate swaps are used to hedge interest rate exposure on borrowings which is not within the treasury policy.

The market value of open derivative financial instruments allocated by type as follows:

Open foreign exchange transactions and options:

		2019			2018	
		Ne	t market	-	Ne	t market
DKKt	Sold	Bought	value	Sold	Bought	value
USD	50.824	14.019	-5.008	210.410	17.928	-9.643
