Management's Statement

The Executive Board and Board of Directors have today considered and adopted the Annual Report of Howden Axial Fans ApS for the financial year 1 January - 31 December 2018.

The Annual Report is prepared in accordance with the Danish Financial Statements Act.

In our opinion the Financial Statements give a true and fair view of the financial position at 31 December 2018 of the Company and of the results of the Company operations for 2018.

In our opinion, Management's Review includes a true and fair account of the matters addressed in the Review.

We recommend that the Annual Report be adopted at the Annual General Meeting.

Independent Auditor's Report

To the Shareholder of Howden Axial Fans ApS

Opinion

We have audited the Financial Statements of Howden Axial Fans ApS for the financial year 1 January - 31 December 2018, which comprise income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies. The Financial Statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company at 31 December 2018 and of the results of the Company's operations for the financial year 1 January - 31 December 2018 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the Financial Statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Management's responsibilities for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the Financial Statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

Independent Auditor's Report

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the Financial Statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the Financial Statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Independent Auditor's Report

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financials Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Key activities

Howden Axial Fans ApS, which is owned 100% by Howden Holdings ApS, markets, sells, design and supplies large axial fans of type VARIAX primarily to the global power plant market and to a lesser degree to the global mining and metro/tunnel market.

Howden Axial Fans ApS refers to an overall group management in Howden Ltd. Glasgow, Scotland, which is part of the American group Colfax Group. (www.colfaxcorp.com)

The products include new axial fans, conversion of axial fans, service of these and related replacement parts.

Howden Axial Fan ApS follow our owners policies and guidlines as laid out in the Colfax Code of Conduct and related policies as well as Howden Globals policies and guidelines. Howden Axial Fan Aps are certified towards ISO 9001, ISO 14001 and OHSAS 18001 and we have our own policy regarding values, quality, environment, health and safety. Policies and guidelines is available on www.howden.com.

The year that was and the follow-up to last year's expected development

In 2018 there was again focus on Howdens long-term strategic objectives, and there was another organizational change. A regional structure was implemented where the operational part of Howden Axial Fans (New Built & Aftermarket Sales, Engineering, Project execution and supporting functions) was integrates in a larger group of Howden units for Fans & Heaters focusing on Europe as the main marked. This was part of a new global organizational strategy with focus on strong Product companies (where Howden Axial Fans is also involved as a Center of Excellence for Axial fans) – strong Regional companies (close to the customers) – global supply chain organization (ensure procurement synergies) and global aftermarket organization (to ensure better service towards end-users).

In addition to the above mentioned changes we did still continue with the local strategic projects deal, like CBS/LEAN, product development, project cost optimization, new market initiatives and the continued expansion of the business area, Aftermarket (spares, retrofits and service). Aftermarket did not meet the expectation as budgeted for 2018 and we did not see the same growth that we had seen in the previous years.

All these proactive measures were instrumental in strengthening Howdens competitiveness and profitability in 2018 - and in the years ahead. However, in spite of winning a large part of the new projects in the global power plant market, the total order volume for new projects was lower than expected. This has put additional focus on development and our strategy for the future.

The American market, has now changed to mainly be an aftermarket focused market – meaning not many new build projects – but mainly focus on an active aftermarket and retrofit solutions primarily due to the upgrading of the flue gas cleaning of existing power plants. Likewise, we ensured again some large Aftermarket orders in the US market.

China, Middle East & South East Asia market are the most active markets for Howden Axial Fans and we are focused on continued positioning with the local Howden entities, our key customers as the leading

supplier of axial fans. We expect and hope also in 2019-2021 that the market will develop positively in may again be some years of lower activity.

Throughout 2018, we have again developed our organization with the appointment of several new key employees as well as reorganization in connection with the integration, so that we are well prepared for 2019-2021. We have continued to buy machined parts in Howdens factory in Weihai / China - which also provides a great flexibility and improved competitive position. In additional machined parts will be manufactured at the Howden factory in India for the growing Indian marked. Also it should be noted that we also have good focus on the metro/tunnel market where we have special focus in the EU.

In general the power market is still characterized by limited growth and uncertain global environment legislation; however our win / loss rate has still been positive. The volatile USD continues to have an impact on the one hand our competition partly earnings in particular the US market, but so far we have been able to adapt and dietary basis as sales prices and thus maintain earnings.

The revenue, gross profit and net profit for 2018 has declined compared to 2017. This is mainly due to the decline in the power segment in both new built and aftermarket.

Howden Axial Fans ApS consists of the following departments / activities:

- New Equipment Sales
- · Marketing & Business Development
- Quality Assurance
- Engineering
- Aftermarket
- Operations
- · Finance, Admin, HR & IT

Special risks, operational risks and financial risks

The US dollar variation against the Danish krone and the euro remains the largest non-industry dependent parameter of competition. Since 2015 the dollar has been very volatile and that has impacted as well the competitiveness as the profit levels. For 2018 the US dollar exchange rate has been relatively stable and not impacted the result significantly.

Expectations for the coming year 2019

In 2019 we will continue our focus on selecting profitable and strategic customers and not least invest further in continued expansion of the Aftermarket segment. Furthermore, we aim to capture market share in other areas like Middle East, Far East/South East Asia and China via our Howden network.

The sales in 2019 is expected to be at the same level as in 2018 but the profit will increase due to growth in the aftermarket segment. Aftermarket including Retrofit and Tunnel/Metro are expected to continue the growth in accordance with the strategic initiatives also for the coming years.

Development (including research) of our products and business systems

Recent years decline in especially power (coal fired) driven by strong environmental legislation/policies adopted by most EU countries has driven our product developments. While power has decreased other industrial markets not least within tunnel & metro (urbanization combined with increasing need for effective transportation of goods/vehicle transportation) has experienced significant growth (7% CAGR). Our focus have been to expand and develop new products specifically for T&M applications – jet fans and large axial fans – while both product ranges have been subject to continuous improvement initiatives to improve supply chain and VAVE (Value Adding Value Engineering).

While new build market for power plants have declined our installed base of power axials have seen increased requirements for retrofit solutions and service. To strengthen this opportunity further we have had several development initiatives on retrofit solutions including turning gear brake, acid resistant hydraulic hoses and hydraulic regulating systems for competitor fans.

In 2018 we also saw the first booking related to our digitization solution - 'Uptime' – for a power plant in the Philippines. The DDA (data driven advantage) concept have required substantial research and development and we expect, as markets increasingly adopt this type of technology, a substantial market opportunity for our product in the future.

Corporate Social Responsibility (CSR)

Howden Axial Fans ApS strives to operate in a responsible manner in every aspect of its business. Following the business model, described initially, where Howden Axial Fans ApS operates within the global power plant market, the risks with regards to our social responsibility primarily relates to our impact on the environment, our work environment and the risk of bribery and anticorruption. For the same reason, this is the focus when it comes to our social responsibility. Below we have further described our policies, goals, actions and accomplishments in these areas.

External environment

In 2018, we focused on the external environment, especially in connection with our action plans in connection with our ISO 14001 certification. In this regard, we focused on environmental initiatives in product development and our household including reducing local consumption of electricity, heating, water, paper etc.

We also focus on our products where we increasingly place demands on our partners and subcontractors can demonstrate environmental improvements and either ISO 14001 or other documented environmental improvement initiatives.

In our Aftermarket marked we are focused on retrofit solutions optimising efficiency and hereby reducing the energy consumption of fans and thus reduce emissions from power plants, by offering more optimal solutions (high-efficiency machines) for our customers.

We incorporate environmental parameters in our selection process of new partners and suppliers.

Howden Axial Fan do not have an explicit CO2 or Climate policy but we have integrated the impact of our

product in our environmental part of our overall policy. Our Axial Fan products are the highest efficient fans on the global power and mining market.

In the 2018 Engagement Survey output report associates clearly communicated that confidence in Howden was slipping. This is clearly driven by the obvious global decline in coal fired power generation that again leads to a drop in order intake that impact Howden Axial Fans. This along with structural changes have caused a drop in the overall engagement that we have seek to mitigate by strengthening of our communication around our future strategy and by demonstrating that we successfully are diversifying into new markets and industries.

The UN sustainable development goals are discussed in Howden management. In 2019/2020 Howden will incorporate the goals in a policy.

Bribery and anticorruption

Howden Axial Fans ApS has again in 2018 focused on initiatives that can prevent any form of bribery and corruption, and has continued to develop the policy implemented during 2014/2015 in regards to "Bribery and Corruption Policy". Every associate has gone through an ethics, bribery and corruption training including passing a test to be able to work in Howden Axial Fans ApS. This is part of a group wide Colfax requirement and Howden Axial Fans ApS drives it even further. During 2016/2017, we again have performed a review and update of contracts with the agents used worldwide again to prevent any type of corruption. We now believe we have a good and robust process.

No corruption incidents have been reported in 2018.

Social responsibility (climate, work environment and human rights)

Howden Axial Fans is aware of and take its wider community responsibility. We are very focused on environmental and working conditions, environmental impact and our general ethical and social responsibility. To us, this is also what constitutes securing human rights - that we act responsible in respect of employees, in respect of the community and in respect of ensuring that our business partners act with responsibility – please also see the section on bribery and anticorruption. Howden Axial Fans currently has the three main ISO certificates in the industry, namely ISO 9001, ISO 14001 and ISO 18001. In 2018 we managed again to avoid any severe work related accidents in staff and this is also the goal for 2019. We will furthermore continue to support a number of local social activities in vicinity of Næstved, including financial support to local organizations that support local charities for special children. We still focus on HEALTHY HOWDEN for all employees, recruitment of students, training of citizens who, for various reasons have been away from the labor market for a longer period, sponsorship of local sports clubs in football and basketball in Næstved. Finally, Howden Axial Fans strives to follow all rules and regulations in the social and environmental fields, and initiate even more volunteer activities for continual improvement of our ethical and social responsibility.

Anti-harassment and discrimination policy

It is important that our workplace remain free from all forms of discrimination, intimidation and harassment. An environment where Associates can maximize their potential is only possible when each person is treated fairly and with respect. Associates are expected to comply with the Colfax Anti-

Harassment and Discrimination Policy.

Howden Axial Fans is committed to enforcing this policy at all levels within the organization. This includes all sales agents, representatives, independent contractors, consultants, employees, officers, and when they are acting on behalf of Howden Axial Fans. Any Associate who engages in prohibited discrimination or harassment will be subject to discipline, up to and including immediate discharge from employment.

In 2018 no harassment or discrimination incidents was reported.

Gender Policy

Howden Axial Fans see it as strength that both genders are well represented at management level and that this brings added value to Howdens business and the development of this. In Howden Axial Fans everyone has an equal opportunity independent of gender, sexual preference, religion or color.

Howden Axial Fans seeks to ensure a balance in the number of men and women at all levels of management, and are striving towards the objective, that neither men nor women in 2020 will be represented by less than 25%.

Today, one of the five Executive Board members elected by the owner is a woman, and among the broader management (incl. team leaders) - totaling 10 members - two of these are women. In total this equivalent to 20% female representation in the board and 20% representation in the broader local leadership team.

Target fulfillment is hard to meet since the industry in general is male dominated. Objective in all recruitments it to place the best-qualified candidate and the male/female ratio of applicants is approx. 90/10%. We do however when we have the opportunity to make internal placement seek to improve the gender balance in both the board of Directors and in management in general.

13 Derivative financial instruments

Derivative financial instruments contracts in the form of forward exchange contracts have been concluded to hedge future sale of goods in USD, SEK, PLN and JPY and to hedge future purchase of goods in USD, GBP and PLN. Furthermore, at the balance sheet date the Company has derivative instruments in the same currencies to hedge recognized accounts receivables and payables. At the balance sheet date, the fair value of unsettled derivative financial instruments amounts to:

	2018 DKKk	2017 DKKk
Assets	0	977
Liabilities	-1,581	0

In addition to the fair value of unsettled derivative financial instruments, derivative financial instruments of DKK 623k have been settled concerning sale and purchase goods.

Profit and loss accounted for in equity concerning future sale and purchase of goods amount to DKK -556k.

Sales contracts and purchase orders for purchase of goods in USD have been hedged for a period of 1-26 months for an amount of USD 15,016k (net sales) corresponding to approx 85% of those sales contracts and purchase orders.

Sales contracts and purchase orders for purchase of goods in JPY, GBP, PLN and SEK have been hedged for a period of 1-11 months for an amount corresponding to DKK 4,741k (net sales) and approx 70% of those sales contracts and purchase orders.

		2018	2017
14	Deferred tax asset	DKKk	DKKk
	Deferred tax asset at 1 January	12,152	-1,177
	Amounts recognised in the income statement for the year	-1,794	-3,240
	Amounts recognised in equity for the year	192	16,569
	Deferred tax asset at 31 December	10,550	12,152

The deferred tax asset primarily concerns temporary differences between the carrying amount and tax base of goodwill, work in progress and warranty provisions.

15 Prepayments

Prepayments consist of prepaid expenses concerning rent, insurance premium, subscriptions and interest.

16 Equity

The share capital consists of 1 share of a nominal value of DKKk 1,500. No shares carry any special rights.

19 Contingent assets, liabilities and other financial obligations (continued)

Guarantee obligations

Guarantee obligations amount to DKK 120,661k (2017: DKK 132,804k).

Other contingent liabilities

The group companies are jointly and severally liable for tax on the jointly taxed incomes etc of the Group. The total amount of corporation tax payable is disclosed in the Annual Report of Howden Holdings ApS, which is the management company of the joint taxation purposes. Moreover, the group companies are jointly and severally liable for Danish withholding taxes by way of dividend tax, tax on royalty payments and tax on unearned income. Any subsequent adjustments of corporation taxes and withholding taxes may increase the Company's liability.

22 Subsequent events

On 16 May 2019, it was announced that Colfax Corporation has signed a definitive agreement to sell the Howden Group, which the Company is part of. Completion of the transaction is expected in the second half of 2019.

No further events materially affecting the assessment of the Annual Report have occurred after the balance sheet date.

23 Accounting Policies

The Annual Report of Howden Axial Fans ApS for 2018 has been prepared in accordance with the provisions of the Danish Financial Statements Act applying to large enterprises of reporting class C.

The accounting policies applied remain unchanged from last year.

Financial Statements for 2018 are presented in Danish kroner.

Cash flow statement

With reference to section 86(4) of the Danish Financial Statements Act and to the cash flow statement included in the consolidated financial statements of Colfax Corporation, the Company has not prepared a cash flow statement.

Business combinations

Acquisitions

On acquisition of subsidiaries, the difference between cost and net asset value of the enterprise acquired is determined at the date of acquisition after the individual assets and liabilities having been adjusted to fair value (the purchase method). Cost comprises the fair value of the consideration paid as well as expenses for consultants etc directly related to the acquisition. Any remaining positive differences are recognised in intangible assets in the balance sheet as goodwill, which is amortised in the income statement on a straightline basis over its estimated useful life. Any remaining negative differences are recognised as income in the income statement at the date of acquisition.

Positive and negative differences from enterprises acquired may, due to changes to the recognition and measurement of net assets, be adjusted until the end of the financial year following the year of acquisition. These adjustments are also reflected in the value of goodwill or negative goodwill, including in amortisation already made. Moreover, any change in contingent consideration is adjusted in the value of goodwill or negative goodwill.

Amortisation of goodwill is recognised in "Amortisation, depreciation and impairment losses".

Uniting of interests

Intragroup business combinations are accounted for under the uniting-of-interests method. Under this method, the two enterprises are combined at carrying amounts, and no differences are identified. Any consideration which exceeds the carrying amount of the acquired enterprise is recognised directly in equity. The uniting-of-interests method is applied at the date of acquisition, and comparative figures have not been restated.

23 Accounting Policies (continued)

Leases

All leases are considered operating leases. Payments made under operating leases are recognised in the income statement on a straight-line basis over the lease term.

Translation policies

Transactions in foreign currencies are translated at the exchange rates at the dates of transaction. Exchange differences arising due to differences between the transaction date rates and the rates at the dates of payment are recognised in financial income and expenses in the income statement.

Receivables, payables and other monetary items in foreign currencies that have not been settled at the balance sheet date are translated at the exchange rates at the balance sheet date. Any differences between the exchange rates at the balance sheet date and the rates at the time when the receivable or the debt arose are recognised in financial income and expenses in the income statement.

Derivative financial instruments

Derivative financial instruments are initially recognised in the balance sheet at cost and are subsequently remeasured at their fair values. Positive and negative fair values of derivative financial instruments are classified as "Other receivables" and "Other payables", respectively.

Changes in the fair values of derivative financial instruments are recognised in the income statement unless the derivative financial instrument is designated and qualify as hedge accounting, see below.

Hedge accounting

The Company has chosen IAS 39 as interpretation for hedge accounting.

Changes in the fair values of financial instruments that are designated and qualify as fair value hedges of a recognised asset or a recognised liability are recognised in the income statement as are any changes in the fair value of the hedged asset or the hedged liability related to the hedged risk.

Changes in the fair values of derivative financial instruments that are designated and qualify as hedges of expected future transactions are recognised in retained earnings under equity as regards the effective portion of the hedge. The ineffective portion is recognised in the income statement. If the hedged transaction results in an asset or a liability, the amount deferred in equity is transferred from equity and recognised in the cost of the asset or the liability, respectively. If the hedged transaction results in an income or an expense, the amount deferred in equity is transferred from equity to the income statement in the period in which the hedged transaction is recognised. The amount is recognised in the same item as the hedged transaction.

23 Accounting Policies (continued)

Revenue

Information on geographical segments is based on the Companys internal financial reporting system.

Income Statement

Revenue

The Company has chosen IFRS 15 as interpretation for revenue recognition.

Revenue from the sale of goods is recognised when the risks and rewards relating to the goods sold have been transferred to the purchaser, the revenue can be measured reliably and it is probable that the economic benefits relating to the sale will flow to the Company.

Contract work in progress (construction contracts) is recognised at the rate of completion, which means that revenue equals the selling price of the work completed for the year (percentage-of-completion method). This method is applied when total revenues and expenses in respect of the contract and the stage of completion at the balance sheet date can be measured reliably, and it is probable that the economic benefits, including payments, will flow to the Company. The stage of completion is determined on the basis of the ratio between the expenses incurred and the total expected expenses of the contract.

Revenue is measured at the consideration received and is recognised exclusive of VAT and net of discounts relating to sales.

Expenses for raw materials and consumables

Expenses for raw materials and consumables comprise the raw materials and consumables consumed to achieve revenue for the year.

Other external expenses

Other external expenses comprise expenses relating to distribution, sale, advertising, administration, premises, bad debts, payment under operation leases, etc.

Staff expenses

Staff expenses comprise wages and salaries, including compensated absence and pensions, as well as other social security contributions, etc. made to the Company's employees. The item is net of refunds made by public authorities.

Amortisation, depreciation and impairment losses

Amortisation, depreciation and impairment losses comprise amortisation, depreciation and impairment of property, plant and equipment.

23 Accounting Policies (continued)

Other operating income and expenses

Other operating income and other operating expenses comprise items of a secondary nature to the main activities of the Company, including gains and losses on the sale of property, plant and equipment.

Income from investments in associates

The item "Income from investments in associates" in the income statement includes the proportionate share of the profit for the year.

Financial income and expenses

Financial income and expenses comprise interest, realised and unrealised exchange adjustments as well as extra payments and repayment under the onaccount taxation scheme.

Tax on profit for the year

Tax for the year consists of current tax for the year and changes in deferred tax for the year. The tax attributable to the profit for the year is recognised in the income statement, whereas the tax attributable to equity transactions is recognised directly in equity.

The Company is jointly taxed with its Danish Group entities. The tax effect of the joint taxation is allocated to Danish enterprises in proportion to their taxable incomes.

Jointly taxed companies entitled to a tax refund are, as a minimum, reimbursed by the management company according to current rates applicable to intereset allowances, and jointly taxed companies havind paid too little tax pay, as a maximum, a surcharge according to the current rates applicable to interest surcharges to the management company.

Balance Sheet

Intangible assets

Goodwill

Goodwill is amortised on a straight-line basis over the estimated useful life of 10 years determined on the basis of Management's experience with the individual business areas and the business case for the acquired business.

23 Accounting Policies (continued)

Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and less any accumulated impairment losses.

Cost comprises the cost of acquisition and expenses directly related to the acquisition up until the time when the asset is ready for use.

Depreciation based on cost reduced by any residual value is calculated on a straight-line basis over the expected useful lives of the assets, which are:

Plant and machinery 5-10 years

Other fixtures and fittings, tools

and equipment 2-6 years

Depreciation period and residual value are reassessed annually.

Impairment of fixed assets

The carrying amounts of property, plant and equipment and investments are reviewed on an annual basis to determine whether there is any indication of impairment.

If so, an impairment test is carried out to determine whether the recoverable amount is lower than the carrying amount. If so, the asset is written down to its lower recoverable amount.

The recoverable amount of the asset is calculated as the higher of net selling price and value in use. Where a recoverable amount cannot be determined for the individual asset, the assets are assessed in the smallest group of assets for which a reliable recoverable amount can be determined based on a total assessment.

Assets for which a separate value in use cannot be determined as the asset does not on an individual basis generate future cash flows are reviewed for impairment together with the group of assets to which they are attributable.

Investments in associates

Investments in associates are recognised and measured under the equity method.

The item"Investments in associates" in the balance sheet include the proportionate ownership share of the net asset value of the enterprises calculated on the basis of the fair values of identifiable net assets at the time of acquisition with deduction or addition of unrealised intercompany profits or losses and with addition of the remaining value of any increases in value and goodwill calculated at the time of acquisition of the enterprises.

23 Accounting Policies (continued)

The total net revaluation of investments in associates is transferred upon distribution of profit to "Reserve for net revaluation under the equity method" under equity. The reserve is reduced by dividend distributed to the Parent Company and adjusted for other equity movements in the associates.

Associates with a negative net asset value are recognised at DKK o. Any legal or constructive obligation of the Parent Company to cover the negative balance of the enterprise is recognised in provisions.

Inventories

Inventories are measured at the lower of cost under the FIFO method and net realisable value.

The cost of goods for resale, raw materials and consumables equals landed cost.

The cost of finished goods and work in progress comprises the cost of raw materials, consumables and direct labour with addition of indirect production costs.

Receivables

Receivables are measured at amortised cost, which usually corresponds to the nominal value.

The Company has chosen IAS 39 as interpretation for impairment write-down provisions of financial receivables.

Provisions are made for bad debts on the basis of objective evidence that a receivable or a group of receivables are impaired. Provisions are made to the lower of the net realisable value and the carrying amount.

Contract work in progress

Contract work in progress is measured at selling price of the work performed calculated on the basis of the stage of completion. The stage of completion is measured by the proportion that the contract expenses incurred to date bear to the estimated total contract expenses. Where it is probable that total contract expenses will exceed total revenues from a contract, the expected loss is recognised as an expense in the income statement.

Where the selling price cannot be measured reliably, the selling price is measured at the lower of expenses incurred and net realisable value.

Payments received on account are set off against the selling price. The individual contracts are classified as receivables when the net selling price is positive and as liabilities when the net selling price is negative.

Expenses relating to sales work and the winning of contracts are recognised in the income statement as incurred.

23 Accounting Policies (continued)

Prepayments

Prepayments comprise prepaid expenses concerning subsequent financial reporting years.

Equity

Dividend

Dividend distribution proposed by Management for the year is disclosed as a separate equity item.

Provisions

Provisions are recognised when - in consequence of an event occurred before or on the balance sheet date - the Company has a legal or constructive obligation and it is probable that economic benefits must be given up to settle the obligation.

Other provisions include warranty obligations in respect of repair work within the warranty period of typically 1-5 years. Provisions are measured and recognised based on experience with guarantee work. The company makes provisions for warranty obligations on the basis of a risk assessment of the nature of delivery.

Provisions expected to be settled after more than one year after the balance sheet date are measured at the net present value of the expected payments. Other provisions are measured at net realisable value.

Deferred tax assets and liabilities

Deferred tax is recognised in respect of all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised in respect of temporary differences concerning goodwill not deductible for tax purposes and other items - apart from business acquisitions - where temporary differences have arisen at the time of acquisition without affecting the profit for the year or the taxable income.

Deferred tax is measured on the basis of the tax rules and tax rates that will be effective under the legislation at the balance sheet date when the deferred tax is expected to crystallise as current tax. In cases where the computation of the tax base may be made according to alternative tax rules, deferred tax is measured on the basis of the intended use of the asset and settlement of the liability, respectively.

Deferred tax assets are measured at the value at which the asset is expected to be realised, either by elimination in tax on future earnings or by set-off against deferred tax liabilities.

Deferred tax assets and liabilities are offset within the same legal tax entity.

23 Accounting Policies (continued)

Current tax receivables and liabilities

Current tax liabilities and receivables are recognised in the balance sheet as the expected taxable income for the year adjusted for tax on taxable incomes for prior years and tax paid on account. Extra payments and repayment under the on-account taxation scheme are recognised in the income statement in financial income and expenses.

Financial debts

Loans are recognised initially at the proceeds received net of transaction expenses incurred. Subsequently, the loans are measured at amortised cost; the difference between the proceeds and the nominal value is recognised as an interest expense in the income statement over the loan period.

Other debts are measured at amortised cost, substantially corresponding to nominal value.
