Statement by the Board of Directors and the Executive Board

The Board of Directors and the Executive Board have today discussed and approved the annual report of Danstoker A/S for the financial year 1 April 2016 - 31 March 2017.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

It is our opinion that the financial statements give a true and fair view of the Company's financial position at 31 March 2017 and of the results of the Company's operations for the financial year 1 April 2016 - 31 March 2017.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's operations and financial matters and the results of the Company's operations and financial position.

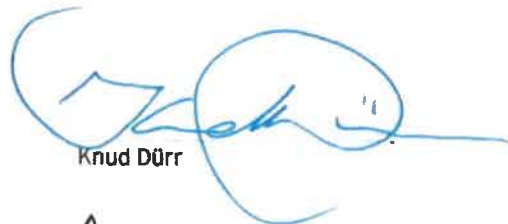

We recommend that the annual report be approved at the annual general meeting.

Independent auditor's report

To the shareholders of Danstoker A/S

Opinion

We have audited the financial statements of Danstoker A/S for the financial year 1 April 2016 - 31 March 2017, which comprise an income statement, balance sheet, statement of changes in equity and notes, including accounting policies. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 March 2017 and of the results of the Company's operations for the financial year 1 April 2016 - 31 March 2017 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's responsibilities for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

Independent auditor's report

- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusion is based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on our procedures, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.

Management's review

Operating review

Danstoker A/S, which has its registered address in the municipality of Herning, is a fully-owned subsidiary of Thermax Denmark ApS.

The ultimate parent company of the company is RDA Holdings Private Limited, Pune, India, which holds the majority through the listed company Thermax Ltd., Pune, India.

Danstoker A/S is the parent company of Boilerworks A/S.

The Danstoker Group designs, manufactures and sells boilers and associated equipment to the energy market, including also rebuilding and servicing of boilers. The Danstoker Group product range is continuously adapted to the 4 energy categories:

- ▶ Solid fuel market, mainly based on biofuels
- ▶ Combined heat and power market
- ▶ Exhaust gas market
- ▶ Oil/gas market

Development during the year under review

Danstoker A/S has had a lower level of activity than expected within the biomass segment but has nevertheless been able to maintain its position as the absolute market-leader within medium-sized biofuel boilers in Scandinavia.

Within the market segment of oil and gas-fired boilers, Danstoker has maintained its position in the primary markets, but no orders for the Russian market were received during the last year, due to the crises in Ukraine.

The market segments for combined heat and power boilers and for exhaust gas boilers have been more or less on budget in the year under review, and the after-sales services activities have developed positively.

The main activities of **Boilerworks A/S** are service jobs on water-tube boilers and the manufacture of economizers and high pressure boiler components of the water-tube design. Many service jobs have been put on hold, but optimism is clearly returning to the markets again.

This year, the Danstoker Group has achieved overall results that are lower than provided for in the budget. The result achieved is improved compared to last year, but not satisfactory.

Profit for the year before tax of DKK 6,290 thousand and after tax of DKK 4,261 thousand.

Management's review

Environmental conditions

Danstoker A/S is devoted to environmental issues and is constantly striving to reduce the environmental impact resulting from the operations of the Company. The Company has no outstanding issues with the environmental authorities in complying with environmental permits and other environmental regulations.

Events after the balance sheet date

The Management is of the opinion, that from the balance sheet date until today, no events have occurred which could substantially alter the assessment of the annual report.

Future outlook

The overall volume of orders of the Danstoker Group at the end of the financial year is at same level as last year and satisfactory.

The improved order fulfilment in Danstoker has resulted in significant improvements, and throughout the coming year, Danstoker will continue to focus on Lean optimisations, internal training and improvement of working processes.

It is the aim of the Danstoker Group to create 2 profitable, strong and individually independent sales companies in Danstoker A/S and Boilerworks A/S, both as an attractive workplace with competent employees, based on competitive products sold to professional co-operation partners and customers in selected markets where such products are supplied in the quality and at the time and price agreed.

It is also the Group's aim to achieve optimal utilisation of the production facilities.

The Management of Danstoker A/S is not of the opinion that the Company is facing special long-term risks, neither in its markets nor otherwise.

The growing, necessary, political focus on CO₂ on a global scale will in the long term contribute to making our CO₂-neutral products within biofuels even more relevant and will contribute to securing the Danstoker Group's continued positive development.

Satisfactory results are expected for the financial year 2017/18.

Financial statements 1 April 2016 - 31 March 2017

Notes to the financial statements

1 Accounting policies

The annual report of Danstoker A/S for the period 1 April 2016 - 31 March 2017 has been prepared in accordance with the provisions applying to reporting class C medium-sized enterprises under the Danish Financial Statements Act.

Consolidated financial statements and cash flow statements have not been prepared as the same are not required as per section 86(4) and 112(1) of the Danish Financial Statements Act. The annual report of Danstoker A/S and related subsidiaries forms part of the consolidated financial statements of the Danish parent company, Thermax Denmark ApS.

Effective 1 April 2016, the Company has adopted act no. 738 of 1 June 2015. This implies changes in the recognition and measurement in relation to yearly reassessment of residual values of property, plant and equipment. In future, residual values of property, plant and equipment are subject to annual reassessment. The Company has no significant residual values relating to property, plant and equipment other than those relating to the Company's land. Consequently, the change is made in accordance with section 4 of the executive order on transitional provisions with future effect only as a change in accounting estimates with no impact on equity.

The above changes have no effects on the income statement or the balance sheet for 2016/17 or the comparative figures.

Apart from the above changes as well as new and changed presentation and disclosure requirements, which follow from act no. 738 of 1 June 2015, the accounting policies are consistent with those of last year.

General comments on recognition and measurement

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the Company and the value of such assets can be reliably measured.

Liabilities are recognised in the balance sheet when an outflow of economic benefits is probable and the value of such liabilities can be reliably measured.

On initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described below for each individual item.

In recognising and measuring assets and liabilities, any gains, losses and risks occurring prior to the presentation of the annual report that evidence conditions existing at the balance sheet date are taken into account.

Income is recognised in the income statement as earned. Moreover, costs incurred to generate the year's earnings are recognised, including depreciation, amortisation, impairment losses and provisions as well as reversals as a result of changes in accounting estimates of amounts that were previously recognised in the income statement.

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated into Danish kroner at the exchange rates at the transaction date. Exchange rate differences arising between the exchange rates at the transaction date and the exchange rate at the date of payment are recognised as a financial income or financial expenses in the income statement.

Receivables, payables and other monetary items denominated in foreign currencies are translated at the exchange rates at the balance sheet date. The difference between the exchange rates at the balance sheet date and the exchange rates at the date at which the receivable or payable arose or was recognised in the latest financial statements is recognised as financial income or financial expenses in the income statement.

Financial statements 1 April 2016 - 31 March 2017

Notes to the financial statements

1 Accounting policies (continued)

Derivative financial instruments

Derivative financial instruments are initially recognised in the balance sheet at cost and are subsequently measured at fair value. Positive and negative fair values of derivative financial instruments are included in other receivables and payables, respectively.

Changes in the fair value of derivative financial instruments designated as and qualifying for recognition as a hedge of the fair value of a recognised asset or liability are recognised in the income statement together with changes in the fair value of the hedged asset or liability.

Changes in the fair value of derivative financial instruments designated as and qualifying for recognition as a hedge of future assets and liabilities are recognised in other receivables or other payables and in equity. If the forecast transaction results in the recognition of assets or liabilities, amounts previously recognised in equity are transferred to the cost of the asset or liability, respectively. If the forecast transaction results in income or expenses, amounts previously recognised in equity are transferred to the income statement in the period in which the hedged item affects profit or loss.

For derivative financial instruments that do not qualify for hedge accounting, changes in fair value are recognised in the income statement on a regular basis.

Income statement

Revenue

Revenue from the sale of goods for resale and finished goods is recognised in the income statement provided that delivery and transfer of risk to the buyer have taken place by the end of the year and that the income can be reliably measured and is expected to be received. Revenue is recognised ex. VAT and taxes charged on behalf of third parties.

Work in progress concerning customised production is recognised as revenue by reference to the stage of completion. Accordingly, revenue corresponds to the selling price of work performed during the year (the percentage of completion method).

Production costs

Production costs comprise costs, including depreciation and amortisation and salaries, incurred in generating revenue for the year. Such costs include direct and indirect costs related to raw materials and consumables, wages and salaries, rent and leases as well as impairment losses on production plant.

Sales and distribution costs

Sales and distribution costs comprise costs incurred for the distribution of goods sold during the year and for sales campaigns, etc., carried out during the year. Also, costs relating to sales staff, advertising, exhibition and depreciation are recognised as sales and distribution costs.

Administrative expenses

Administrative expenses comprise expenses incurred during the year for management and administration of the Company, including expenses for administrative staff, office premises and office expenses as well as depreciation.

Financial statements 1 April 2016 - 31 March 2017

Notes to the financial statements

1 Accounting policies (continued)

Profit/loss from investments in subsidiaries

The Company's proportional share of the results after tax of the subsidiaries is recognised in the income statement after full elimination of intra-group gains/losses and after deduction of amortisation of goodwill.

Financial income and expenses

Financial income and expenses comprise interest income and expense, capital gains and capital loss on securities, payables and transactions denominated in foreign currencies and amortisation of financial assets and liabilities.

Tax on profit/loss for the year

The Company is covered by the Danish rules on compulsory joint taxation of the Thermax Denmark ApS. Subsidiaries form part of the joint taxation from the date on which they are included in the consolidation and up to the date on which they exit the consolidation.

The Danish parent company, Thermax Denmark ApS, is the administrative company for the joint taxation and therefore settles all payments of corporation tax with the tax authorities.

The current Danish corporation tax is allocated between the jointly taxed enterprises in proportion to their taxable income. In this relation, enterprises with tax loss carry-forwards receive joint taxation contribution from enterprises which have used these losses to reduce their own taxable profits. The jointly taxed enterprises are taxed under the tax prepayment scheme.

Tax for the year which comprises joint taxation contributions, tax for the year and any changes in deferred tax is recognised in the income statement. The tax expense relating to the profit/loss for the year is recognised in the income statement, and the tax expense relating to amounts directly recognised in equity is recognised directly in equity.

Balance sheet

Intangible assets

Licences, software are measured at cost less accumulated amortisation and impairment losses. Amortisation takes place on a straight-line basis over the expected useful life which has been fixed at three years.

Gains or losses in connection with the disposal of software are stated as the difference between the selling price less selling costs and the carrying amount at the time of the sale. Gains or losses are recognised in the income statement under other operating income or other operating expenses, respectively.

Property, plant and equipment

Plant and machinery and fixtures and fittings, tools and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost comprises the purchase price and any costs directly attributable to the acquisition until the date when the asset is ready for use.

Financial statements 1 April 2016 - 31 March 2017

Notes to the financial statements

1 Accounting policies (continued)

Depreciation is provided on a straight-line basis over the expected useful lives and estimated residual values of the assets. The expected useful lives are as follows:

Plant and machinery	3-10 years
Fixtures and fittings, tools and equipment	3-5 years

Assets with a cost of less than DKK 13 thousand per unit are recognised as costs in the income statement in the year of acquisition.

Depreciation is recognised in the income statement as production costs, sales and distribution costs and administrative expenses, respectively.

Gains and losses on the disposal of property, plant and equipment are determined as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains or losses are recognised in the income statement as other operating income or other operating expenses, respectively.

Leases

Leases for non-current assets that transfer substantially all the risks and rewards incident to ownership to the Company (finance leases) are initially recognised in the balance sheet at cost, corresponding to the lower of fair value and the net present value of future lease payments. In calculating the net present value of the future lease payments, the interest rate implicit in the lease or the incremental borrowing rate is used as the discount factor. Assets held under finance leases are subsequently depreciated as the Company's other non-current assets.

The capitalised residual lease obligation is recognised in the balance sheet as a liability, and the interest element of the lease payment is recognised in the income statement over the term of the lease.

All other leases are treated as operating leases. Payments relating to operating leases and any other leases are recognised in the income statement over the term of the lease. The Company's total obligation relating to operating leases and other leases is disclosed in contingent liabilities, etc.

Investments in subsidiaries

Investments in subsidiaries are measured according to the equity method.

Investments in subsidiaries are measured at the proportionate share of the equity value of the enterprises calculated in accordance with the Group's accounting policies minus or plus unrealised intra-group gains and losses and plus or minus the residual value of positive or negative goodwill determined in accordance with the purchase method.

Investments in subsidiaries with negative book values are measured at DKK 0 (nil), and any receivables from these companies are written down if the receivables are irrecoverable. If the parent company has any legal or constructive obligation to cover a deficit exceeding the receivables, the remaining amount is recognised under provisions.

Net revaluation of investments in subsidiaries is recognised in the net revaluation reserve in equity according to the equity method to the extent that the carrying amount exceeds cost. Dividends from subsidiaries that are expected to be decided on prior to the adoption of the annual report of Danstoker A/S are not recognised in the net revaluation reserve.

On acquisition of new companies, the purchase method is applied.

Financial statements 1 April 2016 - 31 March 2017

Notes to the financial statements

1 Accounting policies (continued)

Impairment of assets

The carrying amount of intangible assets and property, plant and equipment as well as investments in subsidiaries is subject to an annual test for indications of impairment other than the decrease in value reflected by depreciation or amortisation.

Impairment tests are conducted of individual assets or groups of assets when there is an indication that they may be impaired. Write-down is made to the recoverable amount if this is lower than the carrying amount.

The recoverable amount is the higher of an asset's net selling price and its value in use. The value in use is determined as the present value of the expected net cash flows from the use of the asset or the group of assets and expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Inventories

Inventories are measured at average cost. Where the net realisable value is lower than cost, inventories are written down to the net realisable value.

Raw materials and consumables are measured at cost, comprising purchase price plus delivery costs. Semi-finished goods are measured at cost, comprising the cost of raw materials, consumables, direct wages and salaries and indirect production overheads. Indirect production overheads comprise indirect materials and wages and salaries as well as maintenance and depreciation of production machinery, buildings and equipment as well as factory administration and management.

The net realisable value of inventories is calculated as the selling price less costs of completion and costs necessary to make the sale and is determined in consideration of marketability, obsolescence and development in expected selling price.

Receivables

Receivables are measured at amortised cost. Write-down to net realisable value is made for expected losses.

Work in process (customised orders)

Work in progress (customised orders) are measured at the selling price of the work performed, less any payments received on account of the customer and expected losses. The orders are characterized by the fact that the orders contain high levels of individualization of the design. Moreover, it is a requirement that before the execution of the order is initiated, a binding order has been entered, which will result in penalty or replacement by later removal.

The selling price is measured by reference to the stage of completion at the balance sheet date and total expected income from the contract. The stage of completion is determined on the basis of an estimate of the work, usually calculated as the ratio between the costs incurred and total estimated costs of the order or hours worked and the total estimated hours worked for that order.

When it is probable that total costs for an order will exceed total revenue, the expected loss on the order is immediately recognised as an expense and a provision.

When the selling price of an individual order cannot be measured reliably, the selling price is measured at the lower of costs incurred and net realisable value.

Net assets are determined as the sum of orders where the selling price of the work performed exceeds progress billings. Net liabilities are determined as the sum of orders where progress billings exceed the selling price.

Financial statements 1 April 2016 - 31 March 2017

Notes to the financial statements

1 Accounting policies (continued)

Prepayments from customers are recognised as liabilities.

Selling costs and costs incurred in securing contracts are recognised in the income statement when incurred.

Prepayments

Prepayments comprise costs incurred in relation to subsequent financial years.

Equity

Reserve for net revaluation according to the equity method

Net revaluation of investments in subsidiaries and associates is recognised at cost in the reserve for net revaluation according to the equity method.

The reserve may be eliminated in case of a loss, realisation of investments or changes in accounting estimates.

The reserve cannot be recognised at a negative amount.

Dividends

Proposed dividends are recognised as a liability at the date of adoption by the annual general meeting (declaration date). The expected dividend payment for the year is disclosed as a separate item under equity.

Corporation tax and deferred tax

According to the joint taxation rules, the enterprises' liability for their own corporation tax payments to the tax authorities is settled concurrently with payment of the joint taxation contribution to the administrative company.

Joint taxation contributions payable and receivable are recognised in the balance sheet under balances with group enterprises.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax value of assets and liabilities. Where alternative tax rules can be applied to determine the tax value, deferred tax is measured based on Management's planned use of the asset or the settlement of the liability, respectively.

Deferred tax assets, including the tax value of tax loss carry-forwards, are recognised under assets at the expected value of their utilisation, either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity.

Adjustment is made to deferred tax resulting from elimination of unrealised intra-group profits and losses.

Deferred tax is measured in accordance with the tax rules applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax.

Financial statements 1 April 2016 - 31 March 2017

Notes to the financial statements

1 Accounting policies (continued)

Other provisions

Provisions comprise anticipated costs related to warranties, losses on work in progress, guarantees etc. Provisions are recognised when - as the result of past events - the Company has a legal or constructive obligation and it is probable that there may be an outflow of resources embodying economic benefits to settle the obligation.

Warranties comprise obligations to compensate any defects within the warranty period of 1-5 years. Provisions are measured and recognised on the basis of past experience with warranty work.

If it is likely that total costs will exceed total income from contract work in progress, a provision is made for the total loss anticipated on the contract. The provision is recognised in production costs.

Liabilities other than provisions

Financial liabilities other than provisions are recognised at the proceeds received less the transaction costs paid at the date of borrowing. In subsequent periods, the financial liabilities are recognised at amortised cost, corresponding to the capitalised value when applying the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan.

Financial liabilities also include the capitalized residual obligation on finance leases.

The remaining liabilities are measured at net realisable value.

Financial ratios

Financial ratios are calculated in accordance with the Danish Society of Financial Analysts' guidelines on the calculation of financial ratios "Recommendations and Financial Ratios 2015".

The financial ratios stated in the survey of financial highlights have been calculated as follows:

Equity ratio	$\frac{\text{Equity at year end} \times 100}{\text{Total equity and liabilities at year end}}$
Return on equity	$\frac{\text{Profit from ordinary activities after tax} \times 100}{\text{Average equity}}$

Financial statements 1 April 2016 - 31 March 2017
