# Statement by the Management

The Board of Directors and the Executive Board have today reviewed and approved the Annual Report of Ekspres Bank A/S for 2015. The Annual Report has been prepared in accordance with the Danish Financial Business Act.

In our opinion, the Annual Report gives a true and fair view of the bank's assets, liabilities and financial position at the 31 December 2015 as well as the result of operations for the period 1 January – 31 December 2015.

Moreover, in our opinion, the management's review gives a true and fair view of the development of the bank's activities and financial position and describes the most significant risks and uncertainties that may affect the company.

# Independent Auditors' Report

To the Shareholders of Ekspres Bank A/S

## Report on financial statements

We have audited the financial statements of Ekspres Bank A/S for the financial year 1 January – 31 December 2015, which comprise income statement, statement of comprehensive income, balance sheet, statement of changes in equity, notes and summary of significant accounting policies. The financial statements are prepared in accordance with the Danish Financial Business Act.

## Management's responsibility for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Business Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

## Auditor's responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing and additional requirements under Danish audit regulation. This requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing audit procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to

fraud or error. In making those risk assessments, the auditor considers internal control relevant to the bank's preparation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the bank's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

The audit has not resulted in any qualification.

## Opinion

In our opinion, the financial statements give a true and fair view of the bank's financial position at 31 December 2015 and of the results of the bank's operations for the financial year 1 January - 31 December 2015 in accordance with the Danish Financial Business Act.

## Statement on management's review

We have read management's review in accordance with the Danish Financial Business Act. We have not performed any procedures additional to the audit of the financial statements. On this basis, in our opinion, the information provided in management's review is consistent with the financial statements.

# Board of Directors

## Board of Directors

# Our business

## Business introduction

Ekspres Bank was established in 1987 as a result of a cooperation between Handelsbanken and Dansk Supermarked. Today, 28 years later, our company has revolutionised itself into being a modern bank providing financial services directly and indirectly via sales relationships with more than 2.000 partners.

Ekspres Bank offers a range of consumer finance products for private individuals to support them in their projects. The product portfolio includes loans, credit cards, debt consolidation, credit insurance and accident insurance.

Ekspres Bank entered the Norwegian market in 2008. Our shared head office is located in Taastrup, where we:

- Employ 127 FTEs
- Process >450.000 applications annually
- Manage >350.000 accounts in our customer portfolio

## Our values

Ekspres Bank runs its business based on three values:

- Customer-centric - we put our customers first
- Commitment - we take ownership
- Credibility - we do what we say

### High customer satisfaction

Rating level was 5.27 out of 6.0 in our 2015 customer satisfaction survey

ekspresbank.dk  
ekspresbank.no

## Our CSR policy

Ekspres Bank does not have an explicit CSR policy. However, we follow some fundamental rules and principles to pursue the position as a more responsible and society oriented bank. We practice this by:

- Following a group charter on the protection of customer interest protection ensuring sufficient and transparent information and guidance to our existing and potential customers
- Collaborating with competitors via the sectoral association, "Finance and Leasing" on the tool "KreditStatus" to ensure responsible lending
- Practicing a non-biased employment culture in terms gender, religion, race etc.

## International support base

Ekspres Bank has an international support base, which was reinforced in 2014, when BNP Paribas - Personal Finance achieved 100% ownership of Ekspres Bank. BNP Paribas - Personal Finance is a large global player within consumer finance, and the company is represented in more than 30 countries. The Group employees >20.000 people and manage approximately 27 million customers' accounts.

2015 has been a period of transition for our bank, getting fully integrated in the group – a process that continues in 2016.

# Highlights of 2015

# Risk factors

The bank's strategy is to offer a competitive full range of financial products and services, designed to meet the customers' needs, thus improving customer satisfaction and loyalty for a long-term business growth and profitability. The bank's core business consists of providing unsecured loans and credit facilities to customers. In order to support the business model a number of policies have been defined as part of the risk assessment process; policies considered to be in line with industry standards of the Nordic financial market.

## Financial risks and policies

The bank's exposure to a wide range of financial risks is managed at different levels in the company. The bank's financial risks include credit risk, market risk and liquidity risk, respectively:

### Credit risk

The bank's primary risk is the credit area. The maximum loan amount granted to private individuals is DKK 500.000. In order to mitigate risk resulting from the exposure within the credit area, the bank executes on a defined strategy of operating geographically and demographically diversified loan portfolio in the Nordic countries and furthermore the average loan size per debtor is limited.

The bank has well-documented policies and procedures for handling its segmented loan portfolio. This means that the bank performs a systematic monitoring of the loan portfolio at all stages. Furthermore, the bank performs an automated credit scoring of all new loans based on historical performance and the information received from its customers.

The bank applies an effective internal control system on all delinquent accounts. The bank continuously adjusts its credit scoring setup and approval conditions in order to adapt to the underlying trends of the current economic climate.

If a loan enters into arrears, it will go through a well-defined debt collection process performed by the bank's internal collection department. Impairment losses on loans are applied systemically when there is objective indication of impairment (OEI) i.e. an event or more events which may lead to losses due to customers' inability to pay or unwillingness to do so. Non-performing loans and distressed loans are individually impaired, and the recoverable amounts are calculated based on individual assessments where customers' ability to pay or unwillingness to do so has been evaluated given a collective statistical method.

At any time and in accordance with the existing credit policies, guidelines and procedures, reports on the portfolio segmentation of the bank are regularly prepared for local committees, with the participation of the bank's Management. Moreover, monthly reports are prepared for the Corporate Risk Department and a separate reporting is performed and presented during scheduled Board meetings.

### Market risk

The bank's market risk is related to interest-rate risks and currency risks.

### Market risk; Interest-rate risk

Initially, the bank's interest-rate risk derives from the difference between interest terms and loan terms on the bank's loan portfolio in relation to funding. The bank's policy is to match the funding interest and loan interest in order to mitigate the interest-rate risk. Ekspres Bank tries, as far as possible, to hedge its portfolio by means of derivative financial instruments.

### Market risk; Currency risk

With the aim of reducing exchange-rate risks to the lowest possible level, it is the bank's policy to obtain funding in the same currency as loans. Thus, the bank is exposed to no or very limited exchange-rate risks.

### Liquidity risk

Since the bank is exclusively funded by the parent company with whom Ekspres Bank has sufficient credit line agreements - for both the Danish market and the Norwegian market - the liquidity risk is limited.

The bank's liquidity position is continuously monitored to ensure that the bank meets its payment obligations at all times.

If liquidity drops below the established limits of the excess liquidity coverage, the necessary actions will be initiated immediately in order to restore the agreed excess liquidity coverage ratio.

Necessary measures are prioritised as follows:

- Increase in current credit lines
- Establishment of more irrevocable money market lines

At least once a year, the Board of Directors reviews the bank's liquidity policy and performs all necessary adjustments on the recommendation of the Executive Board.

### **Operational risk**

Operational risk is the risk of loss due to inadequate or incomplete internal processes, human errors or actions, system faults and external events, including legal risks. Operational risk and, hence, potential losses can be minimised, but not eliminated, and the bank's operational risk must be minimised and closely monitored.

Ekspres Bank considers the following elements as operational incidents: Losses due to financial risks; risks related to the staff function and management; risks related to outsourcing arrangements with external suppliers and insufficient insurance coverage.

The bank's policy regarding operational risks details the risk profile with the aim of the bank's business model to the benefit of the business.

Operational incidents and losses are registered and reported monthly based on a materiality concept. The Board of Directors reviews this policy, at least once a year, performing the necessary adjustments on the recommendation of the Executive Board.

### **IT security**

Ekspres Bank operates on a high standard of IT security to ensure that the bank is a reliable, trustworthy and respectable. Emergency plans for the IT area are to minimise losses in case of a lack of IT facilities or similar crisis. Therefore, Ekspres Bank has drawn up an emergency plan, making sure that the requirements for service providers comply with the executive order on outsourcing.

### **In general**

Procedures covering all the above risk areas have been specified. Ekspres Bank has estimated that the current number of employees is appropriate, and substantial financial resources are used to ensure that the staff and the bank's cooperative partners are fully trained and updated, on a continuous basis, in order to comply with applicable legislation and the bank's policies.

# Management review

## Financial review

In 2015, the bank continues to grow in a highly competitive market and delivers a solid result with a return on equity before tax of 24,1%.

The bank reported a pre-tax profit of DKK 149m, which is in line with expectations and considered satisfactory compared with the pre-tax profit of DKK 166m the year before given that the 2014 result is partially achieved by non-recurrent events, and particularly the divestment of a share of the written-off portfolio in Norway.

## Macroeconomic development

Relevant macroeconomic ratios have remained stable or improved during 2015. No drastic changes are expected and these ratios will be closely monitored during 2016.

## Loans and receivables

The outstanding loans amount to DKK 3.517m, compared with DKK 3.166m at the end of 2014, which corresponds to an increase of 11,1%. This increase of DKK 351m is partly driven by the acquisition of an external healthy portfolio for a total value of DKK 148m. The remaining increase is due to organic growth both in the Danish and the Norwegian market.

## New loans

Globally the amount of new loans and credit facilities increased by 28,4% in 2015 compared with 2014. This increase can be assigned to both the Danish and the Norwegian market.

## Credit risk

Impairment losses recognised in 2015 amounted to DKK 129m against DKK 91m in 2014. The 2014 impairment losses were positively impacted by the divestment of a share of the written-off portfolio in Norway. A similar transaction has taken place in 2015 but with a less significant impact. The net impairment ratio for 2015 is 3,4 which is at the expected level for the bank.

## Results of operations

The increase in outstanding loans of 11,1% and the change in our product portfolio mix have resulted in higher net interest income whereas fee and commission income remains stable as a result of a changed product mix.

The bank's operating expenses and depreciation charges increased by 1,8% and totaled DKK 188m against DKK 184m in 2014, which is mainly driven by increased staff costs for DKK 6m. Depreciation charges decreased by DKK 4m which is explained by part of the intangible assets fully amortised during the year.

## Balance sheet

During 2015, the bank's balance sheet increased from DKK 3.286m to DKK 3.769m, which corresponds to a rise of 14.7% compared with the end of 2014. The increase is primarily due to the development of the loan portfolio and increased receivables from credit institutions. The bank has increased its amount of highly liquid assets in order to fulfill the LCR (Liquidity Coverage Ratio) requirements applicable from 2015. Equity totaled DKK 649m against DKK 587m at the end of 2014. Dividends distributed in 2015 to the parent company amounted to DKK 40m.

## Capital adequacy ratio

The bank's capital base, less deductions, amounted to DKK 590m and the capital adequacy ratio amounted to 17,5%, at the end of 2015.

The bank's solvency need was estimated to account for DKK 356m, at the end of 2015, corresponding to 10,6% of the risk-weighted assets. Compared with the actual capital base and the capital adequacy ratio of DKK 590m (17,5%), the excess solvency was of DKK 234m (6,9%). The excess capital adequacy is estimated to be satisfactory, and will ensure the continuous operations of the business as well as the development of the bank.

## Gender under-representation

As both genders are equally represented in the board, the Board of Directors has not set a target for the under-represented gender.

At other managerial positions, there are no under-representation of one gender and consequently the bank has not set a policy for increasing the under-represented gender in these positions.

## CSR

Please refer to page 7 for description of our CSR policy.

## Post balance sheet events

No other events have occurred after the end of the financial year which could affect the assessment of the annual report.

## Outlook for 2016

Provided that there are no significant changes in the market, profit for the year is expected to be at the same level as in 2015. The bank expects moderate growth in 2016 in the Danish market and a continued growth in the Norwegian market. In addition, the bank will continue to investigate opportunities for more global Nordic solutions.

# Supervisory diamond

The Danish FSA has created a monitoring tool called the "Supervisory diamond" consisting of five benchmarks on specific risk areas, stating limit values which the bank should basically observe.

The five benchmarks are as follows:

1. Sum of large exposures
2. Lending growth
3. Concentration of commercial property exposures
4. Funding ratio
5. Excess liquidity coverage

Ekspres Bank does not have any current deposit accounts, therefore, the benchmark as to the funding ratio will exceed the limit value fixed by the Danish FSA, if the calculation of the bank's business model is not adjusted. The table below shows the calculation of both funding ratios, in order to get a quick insight into the bank's real value.

As of 31 December 2015, the bank was complying with the four other benchmarks set up by the Danish FSA.

SUPERVISORY DIAMOND	EKSPRES BANK	REQUIRED
1. benchmark -> Sum of large exposures < 125%	0%	< 125%
2. benchmark -> Lending growth < 20%	11,1%	< 20%
3. benchmark -> Concentration on commercial property exposures < 25%	0%	< 25%
4. benchmark -> Funding ratio < 1	5,42	< 1,00
4. benchmark -> Funding ratio < 1 *	0,66	< 1,00
5. benchmark -> Excess liquidity coverage > 50 pct	1,84	> 0,50

White lines = Ekspres Bank \*

Green area = Limit values

\* The funding ratio uses the internal model for the diamond

# Notes to the financial statements

## NOTE

### **Basis of preparation**

The annual report has been prepared in accordance with the Danish Financial Business Act and the Executive Order on Financial Reports for Credit Institutions and Investment Companies, etc. ('the Executive Order').

The accounting policies are consistent with those of last year.

### **Recognition and measurement**

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the bank and the value of the assets can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow out of the bank and the value of the liability can be measured reliably.

### **Significant accounting estimates**

The measurement of certain assets and liabilities requires the management to estimate the influence of future events on the value of these assets and liabilities. The estimate most critical to the financial reporting is the impairment charges for loans.

The estimates are based on assumptions which, according to management, are reasonable, but inherently uncertain.

### **Foreign currencies**

Foreign currency transactions are translated using the exchange rate at the transaction date. Receivables, liabilities and other monetary items are translated using the rate of exchange at the balance sheet date. Exchange rate differences between the transaction date and the settlement date or the balance sheet date, respectively, are recognised in the income statement as value adjustments.

Exchange rate differences arising at the balance sheet date in the Norwegian branch are taken directly to equity.

### **Interest income and expenses**

Income and expenses are accrued over the lifetime of the transactions and recognised in the income statement at the amounts relevant to the financial reporting period.

### **Fees**

Fees are normally recognised as income when received.

Establishment fees received and commissions paid for loans arranged are accrued over the term of the related loans based on the effective interest method.

Collection fees are taken to the income statement when entered in the customers' accounts, since debt collection procedures are performed internally in Ekspres Bank.

### **Staff costs and administrative expenses**

Wages, salaries and other types of remuneration are expensed in the income statement as earned. Compensated absence commitments are expensed as the actual number of holidays are earned and spent.

### **Derivatives**

Derivatives are measured at fair value at the settlement date. Fair value adjustments of unsettled financial instruments are recognised from the trading date to the settlement date. The gross value is stated in "Other assets" and "Other liabilities" considering any netting agreements.

Fair value adjustments of derivatives which do not qualify for being treated as hedging instruments are recognised in the income statement.

Interest in connection with interest-rate swaps is recognised as "Interest income". Calculated fair value adjustments are recognised as value adjustments in the income statement.

### **Loans and advances**

After initial recognition, amounts due to the bank are measured at amortised cost less impairment losses.

Impairment losses on loans are recognised regularly when there is objective evidence of impairment (OEI) i.e. an event or more events which may lead to losses due to customers' inability to pay or unwillingness to do so. It is primarily non-performing loans and distressed loans that are individually impaired, and the recoverable amounts are calculated based on

# Notes to the financial statements

## NOTE

### **Significant accounting estimates (continued)**

individual assessments where customers' ability to pay or unwillingness to do so has been evaluated given a collective statistical method. The resulting impairment losses are recognised in the income statement under "Impairment losses on loans and receivables, etc."

Impairments of loans not in arrears are estimated collectively on the basis of a model developed by The Association of Local Banks. The model is adjusted to Ekspres Bank's loan portfolio.

### **Intangible assets**

Licenses and software are recognised in the balance sheet at cost less straight-line amortisation. Amortisation is based on the estimated useful lives of the assets, however maximum three years.

IT development costs are recognised in the balance sheet at cost with the addition of production overheads less straight-line amortisation. Amortisation is based on the estimated useful lives of the assets, however maximum eight years. Assets in progress are recognised in the balance sheet at cost.

An impairment test is performed for intangible assets if there is evidence of impairment. The impairment test is made for the activity or business area to which the intangible assets relate. Intangible assets are written down to the higher of the value in use and the net selling price for the activity or the business area to which the intangible assets relate (recoverable amount) if it is lower than the carrying amount.

### **Property, plant and equipment**

Operating equipment is recognised in the balance sheet at cost less straight-line depreciation. Depreciation is based on the estimated useful lives of the assets, however maximum three years.

### **Other assets**

In addition to the positive market value of derivatives, this item comprises accrued interest income on loans.

### **Prepayments / Deferred income**

Prepayments recognised under assets comprise accumulated expenses settled and distributed over the expected terms of the loans. This item also includes prepaid expenses.

Deferred income comprises income received in advance; establishment fees and trade commission.

### **Debt to credit institutions and central banks**

Financial liabilities are recognised on inception and measured at the proceeds received net of transaction costs incurred. Interest-bearing debt is subsequently measured at amortised cost using the effective interest-rate method. Other payables is subsequently measured at nominal unpaid debt.

### **Other liabilities**

Other liabilities include trade payables, other accrued expenses and interest payable.

### **Income taxes**

Current tax charges are recognised in the balance sheet as the estimated tax charge in respect of the expected taxable income for the year, adjusted for tax on prior years' taxable income and tax paid in advance.

### **Deferred tax**

Provisions for deferred tax are calculated at 22% of all temporary differences between carrying amounts and tax values, with the exception of temporary differences occurring at the time of acquisition of assets and liabilities neither affecting the results of operations nor the taxable income, and temporary differences on non-amortisable goodwill.

Deferred tax assets are measured at the value at which they are expected to be utilised, either through elimination against tax on future earnings or as a set-off against deferred tax liabilities.

### **Dividends**

Proposed dividends are recognised as a liability once approved by the annual general meeting of shareholders (date of declaration). Until the proposal is approved, dividends payable for the year are shown in equity.

**Credit risk**

The bank's primary risk is the credit area. The maximum loan granted to private individuals is DKK 500,000. Consequently, the bank has a geographically diversified loan portfolio in order to spread its risk exposure.

The bank has well-documented policies and processes for handling its segmented loan portfolio. This means that the bank performs a systematic monitoring of the loan portfolio at all stages. Furthermore, the bank performs a credit scoring of all new loans based on experience and information received from its customers. Documentation in form of salary slips is requested on applications exceeding DKK 30,000 in Denmark and exceeding NOK 20,000 in Norway. The delivery of the yearly tax statement is a prerequisite on Danish credit applications exceeding DKK 75,000 and on Norwegian credit applications exceeding NOK 50,000.

If a loan falls into arrears, it will go through a well-defined debt collection process performed by the bank's collection department. The bank applies an effective internal control system on loans falling into arrears. The bank continuously adjusts its credit scoring and planning of outstanding amounts to match the market conditions.

Impairment losses on loans are recognised regularly when there is objective indication of impairment (OEI) i.e. an event or more events which may lead to losses due to customers' inability to pay or unwillingness to do so. It is primarily non-performing loans and distressed loans that are individually impaired, and the recoverable amounts are calculated based on individual assessments where customers' ability to pay or unwillingness to do so has been evaluated given a collective statistical method.

At any time and in accordance with the existing credit policies, guidelines and procedures, reports on the portfolio segmentation of the bank are regularly prepared for local committees, with the participation of the bank's Management. Moreover monthly reports are prepared for the Corporate Risk Department in France and a separate reporting is prepared for scheduled Board of Directors meetings.

# Notes to the financial statements

## NOTE

(DKK '000)

19 *Interest-rate risk**Derivative financial instruments*

SWAPS	2015				2014	
	Nominal value	Net market value	Positive market value	Negative market value	Nominal value	Net market value
<i>Interest-rate agreement</i>	2.304.001	-3.405	716	-4.121	2.136.257	-1.303

CAPS	2015				2014	
	Nominal value	Net market value	Positive market value	Negative market value	Nominal value	Net market value
<i>Interest-rate agreement</i>	0	0	0	0	0	0

According to the definition by the Danish Financial Supervisory Authority (DFSA) the bank's interest-rate risk amounts to -4,5% (2014: -1,4%) of the core capital less all deductions, cf. overview of financial highlights.

The bank's interest-rate risk derives from the difference between interest terms and loan terms on the bank's loan portfolio in relation to funding. The bank's policy is to match the funding interest and loan interest in order to mitigate the interest-rate risk. Ekspres Bank tries, as far as possible, to hedge its portfolio by means of derivative financial instruments.

# Notes to the financial statements

## NOTE

(DKK '000)

### 20 Cash flow risk

Since the bank is exclusively funded by the parent company BNP Paribas with whom Ekspres Bank has sufficient contractually committed credit line agreements - for both the Danish market and the Norwegian market - the liquidity risk is minimised.

The bank's liquidity position is continuously monitored to ensure that the bank meets its payment obligations at all times.

If liquidity drops below the established limits of the excess liquidity coverage, the necessary actions must be initiated immediately in order to restore the agreed excess liquidity coverage ratio.

Necessary measures are prioritised as follows:

- Increase in current credit lines
- Establishment of more irrevocable money market lines

At least once a year, the Board of Directors reviews the bank's liquidity policy and performs all necessary adjustments on the recommendation of the Executive Board.

### 21 Foreign exchange risk

With the aim of reducing exchange rate risk to the widest possible extent, it is the bank's policy to obtain funding in the same currency as loans. Thus, the bank has no or a very limited exchange rate risk.

22 Contingent liabilities	2015	2014
Unused credit and loan commitments	377.777	269.525
Other contingent liabilities	13.819	1.125
<b>Total</b>	<b>391.596</b>	<b>270.650</b>

Contingent liabilities are related to unused credit and loan commitments to customers who have not yet signed the loan agreement.

Other contingent liabilities include obligations such as rent of premises and other significant contracts.
