Management's Statement

The Executive Board and the Board of Directors have today considered and adopted the Annual Report of Johnson Controls Denmark ApS for the financial year 1 October 2017 - 30 September 2018.

The Annual Report is prepared in accordance with the Danish Financial Statements Act.

In our opinion the Financial Statements give a true and fair view of the financial position at 30 September 2018 of the Company and of the results of the Company's operations for the financial year 1 October 2017 – 30 September 2018.

We recommend that the Annual Report be adopted at the Annual General Meeting.

Independent Auditors' Report

To the Shareholder of Johnson Controls Denmark ApS

Opinion

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company at 30 September 2018, and of the results of the Company's operations for the financial year 1 October 2017 - 30 September 2018 in accordance with the Danish Financial Statements Act.

We have audited the Financial Statements of Johnson Controls Denmark ApS for the financial year 1 October 2017 - 30 September 2018, which comprise income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies ("financial statements").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

Without qualifying our opinion, we point to note 14 in the Annual Report in which Management describes a material uncertainty relating to claim made by the Danish Tax Authorities and uncertainty related to the recognition of current tax derived from the Company's exit from the US "Check The Box" rules in 2010/11.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the financial statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Managements Responsibilities for the Financial Statements

Management is responsible for the preparation of Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Independent Auditors' Report

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

Independent Auditors' Report

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Management's Review

Operating Review

Principal activities

Johnson Controls Denmark ApS is the Parent Company in the Johnson Controls Denmark group.

The Johnson Controls Denmark group provides industrial and marine refrigeration systems, control systems, equipment, spare parts and services primarily for the food and process industries and for the commercial marine market. The Johnson Controls Denmark group delivers to customers all over the world.

Johnson Controls Denmark ApS is a part of Johnson Controls, International plc, which has its headquarters in Cork, Ireland. Johnson Controls International plc is a global market leader in batteries and building efficiency. The Johnson Controls Denmark group belongs to the building efficiency business.

Equity and Ownership

The entire share capital of the Company is held by Johnson Controls Luxembourg European Finance S.a.r.l. which again is owned by Johnson Controls International plc. Johnson Controls International plc is listed on the New York Stock Exchange. The consolidated financial statements are prepared according to US GAAP and include Johnson Controls Denmark ApS as a subsidiary.

Under reference to Section 112 of the Danish Financial Statements Act, it has been decided not to prepare separate consolidated statements for Johnson Controls Denmark ApS.

Development in activities and financial position

Profit and Loss

Our revenue and gross profit have increased versus last year which is attributable to growth in all business segments of the company.

The financial statements for 2017/18 shows a profit before tax of 48.3 million DKK compared to a profit before tax of 17.6 million DKK in 2016/17. The improvement is mainly due to increased profitability in the business segments. Affecting the result negatively are write downs of the investments in subsidiaries.

Tax on profit/ (loss) for the year was an expense of 15.7 million DKK compared to an expense of 26 thousand DKK in 2016/17 given the increased profit before tax.

Uncertainties regarding recognition and measurement

The Danish Tax Authorities have in the financial year 2011/12 made a claim that the taxable income for the assessment year 2006 should be increased. The Johnson Controls Group strongly disagrees with the claim that the Danish Tax Authorities have made. Consequently, the claim has been appealed to the Danish National Income Tax Tribunal. Please refer to note 14 Contingent liabilities.

Market Conditions

Sales to the European market, including Denmark, have increased by 9%, mainly driven by an increase in sales and service to the rest of Europe. Sales to the Asian market have increased with 18% mainly driven by our Marine activities.

In the Marine division we have seen a high order intake from the fishery industry. The orders are to be delivered within the next three years. A successful partnership with the Factory and Industrial refrigeration divisions have resulted in an order intake of 13 MUS\$ for projects to be delivered within the next 12 months.

During the past year we have seen a increased demand for compressor overhaul and replacement which resulted in the highest turnover ever in the Parts-division. The sales of components are stable but are showing a decreasing trend due to a smaller installed base. The e-commerce sales are now exceeding 63% of the total sales for the division.

Production and processes

The market continues to move towards more complex solutions thus our focus continues to be to keep the balance between complex solutions and standard products.

New Products and product improvements

The strive for low energy and reuse of waste heat has grown dramatically, pipe line growth of +100 % within 6 month period has been seen in the energy sector. We have also launched to the market in coloration with our Marine sector a new solution aiming into this speciality sector driven which is driven by Legislation

Moving into 2019 and 2020 we will continue this direction and will be seen in coming launches and exhibitions.

Environmental Policy

Johnson Controls Denmark has developed an environment policy supporting the development of new sustainable products and taking the environment into consideration in our production plant.

Zero Waste to Landfill

As part of Johnson Controls' continued commitment to reduce the impact on the environment and thus contribute to protect the world for future generations, Johnson Controls Denmark was in August 2018 recognized as attaining zero waste to landfill.

Before being certified as landfill free facility, the company participated in an independent review and demonstrated that 100 percent of the waste being produced are either recycled, reused or converted to energy.

Investments

All investments in the Company aim at supporting the future manufacturing, market and product strategies which pursue increased sustainability and environment awareness.

Capital resources

The capital resources of Johnson Controls Denmark ApS consist of e.g. unused credit facilities in Denmark as well as abroad.

The capital resources are unchanged compared to previous year and estimated to be fully sufficient to ensure the continued operations of the Company.

Outlook

It is expected that the activity level for 2018/19 will remain on the same level as for 2017/18 resulting in a profit before financial income and expenses at the same level as in 2017/18.

Risk factors

General risks

The general risks relate to the global world economy, as the Johnson Controls Denmark group deliver to customers worldwide.

Financial risks

Due to its equity ratio, the Company's exposure to financial risk of interest rate fluctuations is limited.

Currency risks

As a considerable part of the revenue is achieved through export sales, and as a not insignificant part of the purchase is made in foreign currencies (primarily EUR and USD), the Company is exposed to exchange risks.

To minimize the effects of the foreign currency exposure the legal entity works continuously with the Corporate Treasury office, in Belgium, who is responsible for the consolidation all foreign exchange transactions for Johnson Controls. The legal entities are not allowed to hedge with external financial institutions, but if this is needed Corporate Treasury will do this on behalf of the legal entity.

Credit risks

It is the policy of the Company that payments from external customers must always be hedged either by bank guarantees, letters of credit or by current credit rating of the customer.

Intellectual capital

Ensuring the correct composition of the staff's competences and training is obviously essential to the Company. Therefore, the performance of the employees compared to the specified objectives is subject to current evaluation.

Report on Corporate Social Responsibility, Cf. Section 99 a of the Danish Financial Statements Act

Johnson Controls Denmark ApS does not have its own local policy on Corporate Social Responsibility, but refer to the Johnson Controls global policy, which can be found on www.johnsoncontrols.com.

Report on Gender Composition in Management, Cf. Section 99 b of the Danish Financial Statements Act

Composition of the Board of Directors

The Board of Directors consists of 4 members, and the composition is 25% females. This means that the Board of Directors have achieved an equal gender distribution

The Board of Directors believes that the appropriate competencies and qualifications must be ensured when appointing new members of the Board. The competences include e.g.: International and industry insight; legal insight; and financial insight.

When recommending new candidates for the Board of Directors, we seek to safeguard the principles of diversity and representation of all important qualifications so that the Board can continue to carry out its work in the best possible way. The members of the BoD is elected by our owners, Johnson Controls International plc.

Management Training and Recruitment of Leaders

Our policy

We have a policy for equality, and the purpose is to have a more even share of male and female leaders. This includes leaders within operations as well as functional support teams. We want to be an attractive place to work for both genders.

Our initiatives

We have talent reviews on a yearly basis, to identify and develop for our organisation overall. We review succession and pipeline for future leaders coming up from performance reviews held with all employees.

When open manager positions are advertised, we urge all candidates to apply irrespective of gender, age etc. If a male and a female candidate are equally qualified, the female candidate will be given preferential treatment.

We participate in career fairs, and by joining these events, we get a unique opportunity to present our company directly to students who are about to complete their studies as well as with graduates ready to enter the job market. On top of that, we are also part of a network with "Naturvidenskabernes hus" (house of natural sciences), where we are working with students at public schools aiming at given the students an understanding of all the different kind of jobs within a company like ours.

Through these co-operations, we are aiming at a more versatile knowledge of future career opportunities for females, as there is still a large share of males within the natural sciences educations.

Selected female leaders have participated in a thesis at the University of Aarhus with the aim to highlight the difference between female leaders in a male-dominated versus a female-dominated organization. Moreover to clarify how perception inflicts on their self-image as leaders. Furthermore, focus have been on leadership styles to clarify the qualities that women bring to the board room, according to themselves.

Our outcome and expectations

In the last year, we have seen an increasing interest for management amongst our female employees. We therefore expect the share of female leaders to increase in the coming years.

Financial Statements 1 October – 30 September

Accounting Policies

Basis of preparation

The Annual Report of Johnson Controls Denmark ApS for 2017/18 has been prepared in accordance with the provisions applying to large enterprises of reporting class C under the Danish Financial Statements Act.

As the Company's ultimate parent company Johnson Controls International plc., Cork, Ireland, I.R.S. Employer Identification No.: 39-0380010, is listed in the USA and prepares consolidated financial statements according to US GAAP, in which Johnson Controls Denmark ApS is included as a subsidiary, it has been decided, under reference to Section 112 of the Danish Financial Statements Act, not to prepare separate consolidated financial statements for Johnson Controls Denmark ApS.

Under reference to Section 86 Paragraph 4 of the Danish Financial Statements Act, it has been decided not to prepare a separate cash flow statement for Johnson Controls Denmark ApS.

The accounting policies applied remain unchanged from previous years.

The Annual Report for 2017/18 is presented in DKK thousands.

Recognition and measurement

The financial statements have been prepared under the historical cost method.

Revenues are recognised in the income statement as earned. Furthermore, value adjustments of financial assets and liabilities measured at fair value or amortised cost, are recognised.

Moreover, all expenses incurred to achieve the earnings for the year are recognised in the income statement, including depreciation, amortisation, impairment losses and provisions as well as reversals due to changed accounting estimates of amounts that have previously been recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future economic benefits attributable to the asset will flow to the Company, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow out of the Company, and the value of the liability can be measured reliably.

Assets and liabilities are initially measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

Financial Statements 1 October – 30 September

Accounting Policies

Certain financial assets and liabilities are measured at amortised cost, which involves the recognition of a constant effective interest rate over the maturity period. Amortised cost is calculated as original cost less any repayments and with addition/deduction of the cumulative amortisation of any difference between cost and the nominal amount. In this way, capital losses and gains are allocated over the maturity period.

Recognition and measurement take into account predictable losses and risks occurring before the presentation of the Annual Report which confirm or invalidate affairs and conditions existing at the balance sheet date.

Danish kroner are used as the measurement currency. All other currencies are regarded as foreign currencies.

Translation policies

Transactions in foreign currencies are translated at the exchange rates at the dates of transaction. Gains and losses arising due to differences between the transaction date rates and the rates at the dates of payment are recognised as financial income and expenses in the income statement.

Receivables, payables and other monetary items in foreign currencies that have not been settled at the balance sheet date are translated at the exchange rates at the balance sheet date. Any differences between the exchange rates at the balance sheet date and the transaction date rates are recognised as financial income and expenses in the income statement.

Hedge accounting

Changes in the fair value of derivative financial instruments designated as and qualifying for recognition as a hedge of the fair value of a recognised asset or liability are recognised in the income statement together with changes in the value of the hedged asset or liability.

Changes in the fair value of derivative financial instruments designated as and qualifying for recognition as a hedge of future assets or liabilities are recognised directly in equity. Income and expenses relating to such hedging transactions are transferred from equity on realisation of the hedged item and recognised in the same item of account as the hedged item.

Segment reporting

The report includes information on sales distributed on activities and geographical markets.

Financial Statements 1 October – 30 September

Accounting Policies

Income Statement

Revenue

Revenue from the sale of goods for resale and finished goods is recognised in the income statement when the sale is considered effected based on the following criteria;

- delivery has been made before the balance sheet date;
- a binding sales agreement has been made;
- the sales price has been determined; and payment has been received or may with reasonable certainty be expected to be received.

Revenue is recognised exclusive of VAT, taxes and net of discounts relating to sales.

For large contract work in progress, the percentage-of-completion method is used. Accordingly, the value of the performed part of the orders is recognised as revenue at the estimated value of the work performed.

Production costs

Production costs include depreciation and salaries incurred for the purpose of generating the revenues for the year. Production costs also comprise research and development costs that do not qualify for capitalisation and amortisation of capitalised development costs.

Distribution costs

Distribution costs comprise costs of sales staff, advertising and exhibition expenses, including depreciation.

Administrative costs

Administrative costs comprise costs regarding administrative staff, management, office premises and office expenses etc. including depreciation.

Financial Statements 1 October – 30 September

Accounting Policies

Results from investments in subsidiaries and associates

Dividend from investments in subsidiaries and associated companies are recognised in the income statement in the financial year in which the dividend is declared. To the extent that dividend exceeds accumulated earnings after the date of acquisition, the dividend is however recognised as write-down of the cost of the investment. Profit and loss resulting from divestment of subsidiaries and associated companies are recognised in the divestment year.

Financial income and expenses

Financial income and expenses comprise interest income and expenses, realised and unrealised exchange rate gains and losses regarding receivables and payables denominated in foreign currencies.

Tax on profit/(loss) for the year

Johnson Controls Denmark ApS is jointly taxed with its wholly-owned Danish subsidiaries. The Company acts as the administration company for the joint taxation and consequently settles all payments of corporation tax with the tax authorities.

Tax for the year comprises current tax and changes in deferred tax for the year. The tax expense relating to the profit/(loss) for the year is recognised in the income statement, and the tax expense relating to changes directly recognised in equity is recognised directly in equity.

Balance Sheet

Intangible assets

Goodwill is recognised at cost less accumulated amortisation and less any accumulated impairment losses. Amortisation is provided on a straight-line basis over the expected useful lives of the assets, which are 5 years. In the case of large-scale strategic acquisitions with long-term earnings profiles, goodwill is amortised over a maximum of 20 years.

The estimated useful life has been determined by taking into consideration the business platform acquired, including a strong brand and reputation as well as very loyal customers.

Development projects and software that are clearly defined and identifiable and in respect of which technical feasibility, sufficient resources and a potential future market or development opportunity in the enterprise can be demonstrated, and where it is the intention to manufacture, market or use the project, are recognised as intangible assets. This applies if sufficient certainty exists that the value in use of future earnings can cover cost of sales, distribution and administrative expenses involved as well as the development costs.

Costs of development projects and software comprise salaries, amortisation and other expenses directly or indirectly attributable to the Company's development activities and software. Borrowing costs are not recognised.

Financial Statements 1 October – 30 September

Accounting Policies

Development projects and software that do not meet the criteria for recognition in the balance sheet are recognised as expenses in the income statement as incurred.

Capitalised development costs and software are measured at cost less accumulated amortisation and impairment losses or at a lower recoverable amount.

As of the date of completion, capitalised development costs and software are amortised on a straight-line basis over the period of the expected economic benefit from the development work, but not exceeding 5 years.

Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and less any accumulated impairment losses.

Cost comprises the cost of acquisition and expenses directly related to the acquisition up until the time when the asset is ready for use. In the case of assets of own construction, cost comprises direct and indirect expenses for labour, materials, components and sub-suppliers. Borrowing costs are not recognised.

Depreciation based on cost reduced by any residual value is calculated on a straight-line basis over the expected useful lives of the assets, which are in years:

Buildings	15-40
Plant and machinery	3-12
Fixtures and fittings, tools and equipment	3-12

Land is not depreciated.

Assets costing less than approx. DKK 25,000 are expensed in the year of acquisition.

Fixed asset investments

Subsidiaries are enterprises that are controlled by the Parent Company. The Parent Company is considered to be in control when the Company directly or indirectly holds more than 50% of the votes or otherwise is able to exercise or actually exercise control.

Enterprises that are not subsidiaries, but in which Johnson Controls Denmark ApS directly or indirectly holds 20% or more of the voting rights or exercises a significant influence are considered associates.

Financial Statements 1 October – 30 September

Accounting Policies

Investments in subsidiaries and associated companies are measured at cost. If the cost exceeds the recoverable amount, the investment is written down to its lower recoverable amount. The cost is reduced to the extent that dividend received exceeds accumulated earnings after the date of acquisition.

Other investments are valued at cost less any write-downs.

Impairment of fixed assets

The carrying amounts of intangible assets, property, plant and equipment and fixed asset investments are reviewed on an annual basis to determine whether there is any indication of impairment other than that expressed by amortisation and depreciation. If so, an impairment test is carried out to determine whether the recoverable amount is lower than the carrying amount, and the asset is written down to its lower recoverable amount. This impairment test is performed on an annual basis for development projects in progress irrespective of any indication of impairment.

The recoverable amount of the asset is calculated as the higher of net selling price and value in use. Where a recoverable amount cannot be determined for the individual asset, the assets are assessed in the smallest group of assets for which a reliable recoverable amount can be determined based on a total assessment.

Goodwill, head office buildings and other assets for which a separate value in use cannot be determined as the asset does not on an individual basis generate future cash flows are reviewed for impairment together with the group of assets to which they are attributable.

Leases

Payments in connection with operating leases and other lease agreements are recognised in the income statement over the lease period. The Company's total liabilities regarding operating leases are disclosed under contractual obligations.

Inventories

Raw materials and consumables are valued at cost.

Finished goods and work in progress are measured at cost, comprising the cost of raw materials, consumables, direct wages and salaries and indirect production overheads. Indirect production overheads comprise indirect materials and wages and salaries as well as maintenance and depreciation of production machinery, buildings and equipment as well as factory administration and management. Borrowing costs are not recognised.

Write-down to net realisable value is made for goods where the expected sales price less any completion costs and costs necessary to make the sale (net realisable value) is lower than cost.

Cost is computed on the basis of the FIFO method.

Financial Statements 1 October – 30 September

Accounting Policies

Receivables

Receivables are measured in the balance sheet at the lower of amortised cost and net realisable value, which corresponds to nominal value less provisions for bad debts. Provisions for bad debts are determined on the basis of an individual assessment of each receivable.

Contract work in progress

Contract work in progress with a total contract value of more than 3.0 million DKK is measured at the sales value of the work performed at the balance sheet date (the percentage-of-completion method). The stage of completion is measured by the proportion of contract expenses incurred to date to the estimated total contract expenses. Other contract work in progress is measured at cost comprising direct and indirect expenses. Provisions are made for loss-making orders.

Payments received on account from customers are set off against contract work in progress to the extent that these payments on account correspond to the value of work in progress.

Prepayments

Prepayments recognised as assets comprise costs incurred concerning subsequent financial years.

Equity – Proposed dividend

Proposed dividends are recognised as a liability at the date when they are adopted at the Annual General Meeting (declaration date). The expected dividend payment for the year is disclosed as a separate item under equity.

Provisions

Provisions are recognised when - in consequence of an event occurred before or on the balance sheet date - the Company has a legal or constructive obligation and it is probable that economic benefits must be given up to settle the obligation.

Warranty provisions comprise obligations in respect of repair work within the warranty period. The general provisions for warranties are recognised and measured based on past experience.

Deferred tax assets and liabilities

Deferred tax is recognised in respect of all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised in respect of temporary differences concerning goodwill not deductible for tax purposes and other items - apart from business acquisitions - where temporary differences have arisen at the time of acquisition without affecting the profit/(loss) for the year or the taxable income.

Financial Statements 1 October – 30 September

Accounting Policies

Deferred tax is measured on the basis of the tax rules and at tax rates applicable in the respective countries at the balance sheet date when the deferred tax is expected to crystallise as current tax. In cases where the computation of the tax base may be made according to alternative tax rules, deferred tax is measured on the basis of the intended use of the asset and settlement of the liability, respectively.

Any changes in deferred tax due to changes to tax rates are recognised in the income statement.

Deferred tax assets, including the tax base of tax loss carry-forwards, are measured at the value at which the asset is expected to be realised, either by elimination in tax on future earnings or by set-off against deferred tax liabilities.

Deferred tax assets and liabilities are set off within the same legal tax entity.

Current tax receivables and liabilities

Current tax receivables and liabilities are recognised in the balance sheet at the amount calculated on the basis of the expected taxable income for the year adjusted for tax on taxable incomes for prior years. Tax receivables and liabilities are set off if there is a legally enforceable right of set-off and an intention to settle on a net basis or simultaneously.

Liabilities

Other liabilities are measured at amortised cost, substantially corresponding to nominal value.

DKK '000	2017/18	2016/17
Performance guarantees	0	67,751
	0	67,751

The Danish Tax Authorities have in the financial year 2011/12 made a claim that the taxable income for the assessment year 2006 should be increased equaling an additional tax payment of 1.1 billion DKK before interest. The Johnson Controls Group strongly disagree with the claim that the Danish Tax Authorities have made. Consequently, the claim has been appealed to the Danish Income Tax Tribunal. If the Danish Tax Authorities, contrary to what management expects, should win the case, it is management's assessment that the final payment will be significantly lower than the initial claim made by the Danish Tax Authorities.

Due to the nature of the situation it is not immediately possible to assess the monetary implication or the development over time and therefore no amount relating to this claim has been recognized in the balance sheet as at 30 September 2018.

If the matter is closed in accordance with the allegations presented by the Danish Tax Authorities, this will materially affect the Company's financial position. In case the Danish Tax Authorities' claim will have to be paid in full, which is not the expectation of management, it will be necessary for the Company to obtain significant liquid funds to be able to continue as a going concern. In this case Management expects that the amount will be funded by the ultimate parent company Johnson Controls, Inc.

As mentioned in the Annual Report for 2010/11 the Company's ultimate parent company, Johnson Controls, Inc. has at 29 September 2011 terminated the American "Check The Box" rules for Johnson Controls Denmark ApS. Uncertainties still exist regarding the estimated market value of the net assets in Johnson Controls Denmark ApS in relation to the termination of "Check The Box" rules and therefore the calculated current tax for 2010/11.

The Danish tax authorities has disputed the valuations used in connection with the termination of "Check the box" and increased the taxable income for the assessment year 2011, which has resulted in an additional tax payment including interest of DKK 45 mill. Management has disputed it and appealed the claim to the Danish Income Tax Tribunal. Johnson Controls ApS has made an agreement with the tax authorities to postpone the tax payment until the dispute is resolved. However, the tax authorities have deducted the deferred tax payment in other tax and vat receivables that Johnson Controls were supposed to receive from the tax authorities. Consequently, DKK 45 mill. is recognized in the balance sheet as a receivable from the tax authorities. Based on this there is uncertainty regarding the valuation of the amount.

The Company is under a claim from KN Products Polska in relation to termination of cooperation. KN Products Polska has claimed an amount of 8.6 million DKK incl interest. An accrual has been recognized in the annual accounts to partly cover the claim. Management does not agree in the size of the claim and it is Management's opinion, that the claim will not have a negative effect on the result for the Company in excess of the recognized amount. KNI Products Polska has rejected the use of Danish law to settle the dispute and the case will now be handled under Polish law.

The Danish group companies are jointly and severally liable for tax on the Group's jointly taxed income.

15 Staff

DKK '000	2017/2018	2016/2017
Fee to the Board of Directors	150	150
Remuneration to the Executive Board	7,297	5,201
Wages and salary	348,028	347,191
Pensions	26,456	26,232
Other social security expenses	2,741	2,668
	384,672	381,442
Average number of employees	616	626

The Executive Board and other key management personnel have been awarded Stock Appreciation Rights in the parent Company, Johnson Controls, Inc. When certain conditions are fulfilled this gives the participants the possibility to exercise their Stock Appreciation Rights at a fixed price used in the program. The value of these rights depends on the market value of the shares of Johnson Controls, Inc., that are traded at NYSE. The current market value of outstanding Stock Appreciation Rights issued to the Danish Executive Board and other Danish key management personnel is 1.3 million DKK at 30 September 2018 (2.8 million DKK at September 30 2017).

16 Fee to auditors appointed by the General Meeting

DKK '000	2017/2018	2016/2017
Statutory audit fee	1,183	1,183
	1,183	1,183
