*) Key figures for 2020 have been restated due to the merger of Nets Holding A/S, Nassa A/S, NNI Norway AS and Nets Denmark A/S as the continuing company at January 1, 2021. The restating is completed by using the aggregation method of the companies (proforma).

**) Key figures for 2019 have been restated due to the merger of Nets Spectracard AB and Nets Denmark A/S as the continuing company at January 1, 2020. The restating is completed by using the aggregation method of the companies (proforma).

***) Key figures for 2018 have been restated due to the merger of Dibs Payment Services AB, Dibs Payment Services A/S, Dibs AS, Dibs Payment Services i Göteborg AB, Debitech AB, Verifyeasy AB and Nets Denmark A/S as the continuing company at January 1, 2019. The restating is completed by using the aggregation method of the companies (proforma).

****) Key figures for the years 2017 - 2016 have been restated due to the merger at 1 January 2017 of Nets Oy and Nets Finland Oy. The restating is completed by using the aggregation method of the companies (proforma).

Management's Review

Business foundation

Nets Denmark A/S' objective is to conduct business with payment and transmission of information, card and data service activities and other business related thereto as well as promote the development and use of a common infrastructure for the financial institutions.

2021 Highlights

2021 was a transformational year in the Nets Group story, as we took another major step towards becoming a European PayTech leader by closing the merger of Nets with the Italy-based Nexi Group, on 1 July.

The strength of the combined group was further boosted after year-end, when the additional merger with SIA – headquartered in Italy – was also concluded. As one of the largest digital payment service providers in Europe, Nets operates a deeply interconnected network which links merchants, financial institutions, public services and consumers, enabling them to make and receive payments, identify themselves, and use value-added services based on data and analytics.

Throughout 2021, Covid-19 continued to impact society, which affected Nets' business by suppressing overall volumes while, at the same time, accelerating changes in consumer behaviour away from cash and towards digital payment solutions. The pandemic also boosted e-commerce transactions, which continued to surge as consumers turned to internet stores in place of physical shops. In our Merchant Services business, this was clearly seen via an increased uptake of Nets Easy, our e-commerce payment solution, which saw substantial volume growth.

In January, Nets announced the acquisition of the fast-growing Finnish ecommerce player, Checkout Finland Oy. The Acquisition was completed on 30 April 2021 when Nets Denmark A/S' subsidiary Paytrail Oy acquired 100% of the shares in the company. Checkout Finland Oy has an annual revenue of around EUR 12 million and services around 8,000 eCommerce merchants.

In March, Nets completed the sale of its subsidiaries handling account-to-account services business, to Mastercard, following the successful conclusion of the remedy taker approval process stipulated by the European Commission in August 2020.

In July, Nets acquired the remaining 49 % of the minority shares in the Polish Group P24-Dotcard, to further strengthen the European footprint within fast-growing ecommerce.

In October, Denmark's new electronic identification (eID) solution, MitID, received a full public launch. Nets has been the principal developer of MitID, under contract to the Danish government's Agency for Digitisation and the Danish Banking Association.

Our Issuer & eSecurity business continued its track record of success in winning new customers, including Germany's Degussa Bank, which became our first issuing customer in the country after selecting Nets to provide a comprehensive suite of digital card services. There were also new customer agreements in Poland, the Baltic countries and the United Kingdom, while in the Nordics, Nets secured an agreement with Danske Bank to bring its domestic card scheme, Dankort, to Apple Pay, and prolonged its long-term partnership with Nordea in both Denmark and Finland.

In October, the merger of Nets Denmark A/S' subsidiary, Nets Norway Infrastructure AS, Nets Denmark A/S was completed.

In December, Nets published merger plans to merge the parent companies, Nets Holding A/S and Nassa A/S with Nets Denmark A/S. The merger was approved in February 2022, and the financial statements of Nets Denmark for 2021, is stated as fully completed merger.

Business model

Nets Denmark create value by delivering payments and digital services that are used by thousands of merchants, hundreds of financial institutions, thousands of corporates and millions of consumers across the Nordic countries, Poland and Baltic regions, and that benefit communities and society as a whole.

Nets Denmark invest in, maintain and operate a considerable number of services critical to several national payment infrastructures, such as domestic debit card schemes, clearing systems, e-identity schemes and payment platforms, security, stability and high performance remain our top priorities.

As a leading provider of digital payment services and related technology solutions across the Nordic region and subsidiaries in Poland, Nets Denmark sits at the centre of the digital payments eco-system, and we operate a deeply entrenched network which connects merchants, financial institutions, corporate customers and consumers, enabling them to make and receive payments as well as, increasingly, utilise value-added services to help them improve their respective activities. Nets Denmark operates across the entire value chain from payment capture and authorisation through to processing, clearing and settlement.

Nets enables digital payments across all major channels – in person, online, and via a mobile device – and a large number of our services are used by a majority of consumers in the Nordic countries and Poland, such as direct debit payments, card payments, digital authentication and invoice solutions. While we offer merchants acquiring solutions, point-of-sale terminals and e-commerce directly to the merchants, services delivered to the corporates, such as direct debit and invoicing solutions, are offered in close co-operation with financial institutions. Other solutions, e.g. card payments and the national identity schemes NemID/MitID and BankID, are also offered in close co-operation with the financial institutions. In Denmark, we own some of our key services, such as Dankort and Betalingsservice, while we in Norway operate similar services, including invoice solutions, direct debit payments and BankAxept card payments, on behalf of and in close co-operation with our customers.

Financial performance

Operating result for the year was positive DKK 166 million, which was an increase of DKK 310 million compared to 2020. The increase was mainly driven by stronger topline performance in 2021 and strong cost management.

Result from subsidiaries decreased to DKK -161 million compared to DKK 3,183 million in 2020. 2021, was affected by the sale of the subsidiaries handling the nets account-to-account business and by increased business combination amortizations related to the acquisitions of Polish subsidiaries end-2020 and mid-2021.

Gain from sale of shares contained the gain from the completion of the sale of the account-to-account business to Mastercard, and amounted to DKK 19,412 million.

Net financials was a cost of DKK 263 million compared to a cost of DKK 16 million in 2020. The loss was primarely driven by exchange rate losses related to foreign currency intercompany positions and partly from adjustment of earn-outs and interests on tax liabilities.

Tax for the year was a cost of 2 million, compared to to a cost of DKK 2,679 million in 2020. In connection with the de-merger of Account-to-Account activities, a net payable tax of DKK 2,660 million was recognized in Nets Denmark A/S in 2020.

Net result for the year was DKK 19,175 million, which was an increase of DKK 18,797 million compared to 2020.
Result for the year, increased significatly following the gain from the completion of the sale of the account-to-account business to Mastercard.

Investments amounted to DKK 667 million and included primarily new issuing card platform as well as new innovative payment solutions in our Merchant service business.

Equity amounted to DKK 6,632 million, which is equivalent to a solvency ratio of 36% compared to 15% at the end of 2020. In Q2 2021 an interim dividend of DKK 15.200 million was declared. Proposed dividend for the full year 2021 amounts to DKK 0 million, (DKK 0 million in 2020.)

The Danish Payment Services Act requires that companies offering payment services must have authorisation from the Danish Financial Supervisory Authority to operate as a Payment Institution. Nets Denmark A/S has been approved as a Payment Institution, and the capital requirement in accordance with the rules of the Danish Financial Supervisory Authority has been calculated at DKK 230 million.

Merchant Services

Merchant Services provides our merchant customers with payment acceptance solutions across channels (in store, online and mobile) and with the broadest range of payment methods in the Nordic region, including Visa, MasterCard, JCB, and local payment brands. Merchant Services is present across Nordic countries, Poland and the Baltic countries and works with a broad set of value-adding partners across the region.

Merchant Services manages and simplifies merchants' payments flow. We enable merchants to accept payments, easily and without friction regardless of channels, receive the settlement in their bank account and get detailed reconciliation information and statistics, all in different currencies and frequencies depending on merchant needs and consumer preferences.

The acquiring revenue is primarily driven by a value-based fee per transaction with monthly subscription fees for additional services, while the terminal sales revenue is primarily driven by monthly subscription fees on terminals from rental fees, software fees and value-added services such as special support and/or payments from customers buying their terminals.

Issuer & eSecurity Services

Issuer & eSecurity Services provides processing services for issuers of payment cards, primarily banks, in the Nordic region as well as complementary services, including Consumer Management Services (CMS), Fraud & Dispute solutions, and Mobile Services.

The business segment also operates and/or processes the national debit card systems in Denmark and Norway, branded Dankort and BankAxept respectively. These schemes have been instrumental in the establishment of a modern Nordic electronic card payment infrastructure.

Issuer & eSecurity Services also offers national e-identity solutions in Denmark and Norway.

Corporate social responsibility (CSR)

Please find the statutory statement on Corporate Social Responsibility description of this subject in the Nets A/S consolidated financial statement for 2021.

With respect to the statutory statement on social responsibility in accordance with section 99a of the Danish Financial Statements Act, please refer to the report on Corporate Social Responsibility 2021 for Nets A/S.

Report on gender composition of management

With respect to the gender composition of board members elected by the General Assembly as well as the policy for the underrepresented gender on other managerial levels in accordance with the Danish Financial Statements Act section 99b, please refer to the report on Corporate Social Responsibility 2021 for Nets A/S.

Risk management

Risk management is an integral part of our way of doing business at Nexi Group and helps us understand and manage the uncertainties inherent in our strategy and the daily running of our business.

Risk management is anchored in the organisation and supported by continuous risk processes with quarterly reporting in business segments and group functions that results in a consolidated risk picture providing a clear and complete overview of all identified risks at Nets to the Executive Management.

The Board of Directors of Nets Denmark A/S is responsible for the overall governance and oversees our risk landscape and approves strategies and policies within the areas of risk management, security, business continuity, GDPR, merchant acquiring credit risk, treasury risk, anti-money laundering and competition law compliance.

A "three lines of defence" model is implemented throughout the organisation and forms the basis for risk decision-making within Nets. The model is used to structure roles, responsibility and accountability for decision-making concerning risk and internal controls, and to ensure good collaboration between the three lines.

- **First line** – Business segments and Group units
  The business and group units perform the day-today risk-bearing activities and are responsible for identifying, assessing and treating risks within those activities. The business segments and group units are responsible for compliance with legal, contractual and regulatory requirements.

- **Second line** – Risk management and Compliance & Regulatory
  The Risk Management function is responsible for defining policies, standards and procedures for risk-based decision-making, internal control and reporting. Risk Management facilitates the risk assessment process, maintains Nets' enterprise-wide risk landscape and ensures that risk mitigation plans are progressing in the business segments and group units.

  The Compliance & Regulatory function is responsible for monitoring and assessing Nets' compliance with current legislation, market standards and internal policies. Compliance & Regulatory prepares management reporting and advises on how to prevent and mitigate identified compliance risks, including creating awareness and providing training as required to business units.

- **Third line** – Independent assurance
  The third line is maintained by Nets' internal auditors, providing independent assurance concerning the risk and control functions performed by the first and second lines. Internal Systems Audit coordinates and performs the audit of the general IT controls in Nets, the IT-based user systems and applications and the IT systems offered for the exchange of data with the connected data centres and associated financial enterprises. Additionally, the core business processes in Nets and projects, which are important to Nets' customers or internally within Nets, are audited.

The risks described below are those currently considered the most material to our business.

The risks are the result of risk assessments and workshops within the different business segments and group units in Nets. Top management review the risks and prioritise, approve and follows up on mitigation actions. The mitigation to the risks set out below are examples described in summary form to further the understanding of the risk in question and how it may be mitigated.

The risks described below are not listed in any particular order of priority as to significance or probability, and only contain selected example mitigations

Industry and market transformation

The market transformation from cash to digital payments is impacting consumer behaviour. The underlying market development is driven by technological evolution, regulatory changes and new market participants, such as innovative independent software vendors. This trend is accelerated by the Covid-19 pandemic where digital payments are preferred over cash. The payments eco-system is, as a result, developing at a high pace and market participants must evolve with it if they want to claim part of the underlying market growth.

Information security and operational stability

Every day, Nets processes and stores large amounts of data related to the processing of financial transactions and digital authentication schemes, connecting merchants, financial institutions, corporate customers, and consumers, and enabling them to make and receive digital payments and verify identities. Due to the high value and sensitive nature of such information assets, and the systemic importance to several national financial infrastructures, Nets faces a range of threats from different threat agents such as hacktivists, organised crime, and nation states. Relevant security threats include social engineering such as phishing and spear-phishing, hacking, distributed denial-of-service (DDoS) or supply chain attacks, as well as system malware or ransomware attacks.

Equally important is the stability of those platforms as they are critical for broader society as well as for our customers, government organisations and authorities. Potential risk causes include insufficient application deployment and testing processes, incident management issues, failing infrastructure components or data centre transitions.

Merchant Service credit risk

Nets is selling acquiring services to merchants, who receive immediate payment as well as pre-payments for their goods and services. In case the merchant is not able or willing to deliver the prepaid goods or services to their customers due to, e.g., insolvency or fraud, the customer's bank will charge-back the amount from Nets who will claim the amount from the merchant. If this proves unsuccessful, Nets will bear the loss.

COVID-19

The Covid-19 pandemic continues to have an impact across the world, resulting in regional and national restrictions for periods of time which negatively impact society and businesses. Below are the main areas in Nets that are impacted:

Revenue – The payments industry generates revenue from transaction volumes. Covid-19 restrictions reduce the amount of payments thereby negatively impacting transaction volumes and thus revenue.

Merchant acquiring credit risk exposure – Covid-19 restrictions especially impact the prepayments segment, e.g., airlines, travel, lodging, etc. which is part of Nets' merchants portfolio.

Business continuity – New surges in the pandemic require workplace adaptability to address concerns for personal safety, governmental working from home instructions, as well as the need to continue secure and stable business operations.

Regulatory environment

Nets is subject to laws and regulations in the different jurisdictions in which it operates. The European Payment Services Directive (PSD2), General Data Protection Regulation (GDPR), Anti-Money Laundering/Counter Terrorism Financing (AML/CTF) and Outsourcing legislation are examples of requirements where Nets is investing time and resources to maintain its adherence across the company.

Outlook for 2022

In 2021, we saw again that the COVID-19 pandemic made a significant impact on the payments industry in midst of cancellations, restrictions and lockdowns causing a lower level in the number of payment transactions performed. Assuming a gradual recovery and return to normal circumstances from the beginning of Q2 2022, Nets expects a year with higher revenue and increasing operating result margins compared to 2021. Nets will continue to streamline operations and processes and invest in innovative solutions with an ambition to create value for our customers, partners and shareholders, and deliver on stability, security and integrity to build the future of Nets.

Statement by the Board of Directors and the Executive Board

The Board of Directors and the Executive Board have today considered and adopted the Annual Report of Nets Denmark A/S for the financial year 1 January – 31 December 2021.

The Annual Report is prepared in accordance with the Danish Financial Statements Act.

It is our opinion that the Financial Statements give a true and fair view of the Company's financial position as at 31 December 2021 and of the results of the Company's operations for the financial year 1 January – 31 December 2021.

In our opinion, Management's Review includes a true and fair account of the matters addressed in the Review.

We recommend that the Annual Report be adopted at the Annual General Meeting.

Ballerup, 9 March 2022

Executive Board

Torsten Hagen Jørgensen CEO	Robert Hoffmann

Board of Directors

Bo Nilsson Chairman	Klaus Pedersen	Pia Jørgensen
Federico Gallo	Francesca Paramico Renzulli	

Independent Auditor's report

To the Shareholder of Nets Denmark A/S

Opinion

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company at 31 December 2021, and of the results of the Company's operations for the financial year 1 January - 31 December 2021 in accordance with the Danish Financial Statements Act.

We have audited the Financial Statements of Nets Denmark A/S for the financial year 1 January - 31 December 2021, which comprise income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies ("financial statements").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the financial statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Management's Responsibilities for the Financial Statements

Management is responsible for the preparation of Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

*) Equity for 2020 have been restated due to the merger of Nets Holding A/S, Nassa A/S, NNI Norway AS and Nets Denmark A/S as the continuing company at January 1, 2021. The numbers cannot be directly reconciled to the respective annual reports for 2020.

Notes to the Financial Statements

Amounts in DKKm

1. Accounting policies

The annual report has been prepared in accordance with the provisions applying to reporting class C large enterprises under the Danish Financial Statements Act.

The functional currency is Danish kroner (DKK).

The accounting policies used are consistent with last year.

From 1 January 2021 Nets Denmark A/S, Ballerup was merged with Nets Holding A/S, Nassa A/S and Nets Norge Infrastruktur AS with Nets Denmark A/S, Ballerup being the continuing company. The merger was completed using the aggregating method, according to which assets and liabilities from the subsidiaries are included at book value. Consequently, the comparable numbers have been restated. The balance sheet does not reflect goodwill or badwill.

Pursuant to section 112 of the Danish Financial Statements Act, no consolidated financial statements have been prepared for Nets Denmark A/S and subsidiaries as the companies are included in the consolidated financial statements of Nets A/S, Klausdalsbrovej 601, 2750 Ballerup.

Pursuant to section 86(4) of the Danish Financial Statements Act, no cash flow statement is prepared as the Company is included in the consolidated financial statements of Nets A/S, Klausdalsbrovej 601, 2750 Ballerup.

Recognition and measurement

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the Company and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow from the company, and the value of the liabilities can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described below for each individual financial statement item.

In recognising and measuring assets and liabilities, any gains, losses and risks occurring prior to the presentation of the Annual Report that evidence conditions existing at the balance sheet date are taken into account.

Income is recognised in the income statement as earned. Equally, costs incurred to generate the year's earnings are recognised, including depreciation, amortisation, impairment losses and provisions as well as reversals as a result of changes in accounting estimates of amounts which were previously recognised in the income statement.

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rates at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and at the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables and payables and other monetary items denominated in foreign currencies are translated at the exchange rates at the balance sheet date. The difference between the exchange rates at the balance sheet date and at the date at which the receivable or payable arose or was recognised in the latest financial statements is recognised in the income statement as financial income or financial expenses.

On recognition in the financial statements of subsidiaries with another functional currency than DKK, the income statements are translated at the exchange rates at the transaction date and the balance sheet items are translated at the exchange rates at the balance sheet date. The average exchange rate for the individual month is used as the exchange rate at the transaction date to the extent that this does not differ significantly. Exchange rate differences arisen when translating foreign subsidiaries' equity at the beginning of the year using the exchange rate at the balance sheet date and when translating income statements from average exchange rates at the transaction date to the exchange rate at the balance sheet date are recognised directly in equity.

On recognition of foreign branches which are integrated entities, monetary items are translated at the exchange rates at the balance sheet date. Non-monetary items are translated at the exchange rates at the acquisition date or at the date of any subsequent revaluation or impairment of the asset. Income statement items are translated at the exchange rates at the transaction date, although items derived from non-monetary items are translated at the historical exchange rates applying to the non-monetary items.

Income statement

Revenue

Nets Denmark earns revenue on a transactional basis and on a non-transactional basis:

Transaction-based revenue – includes revenue generated through a combination of (a) a fee per transaction processed (which represents the primary revenue model in the Corporate Services and the Financial & Network Services segments) and (b) an ad valorem fee based on the value of transactions acquired (which represents the primary revenue model of the Merchant Services segment).

Non-transaction-based revenue – includes revenue generated through provision of subscription-based fees related to the sale and rental of point-of-sale (POS) and related solutions and fees related to the sale of value-added services and revenue from development projects across all three business segments.

Revenue from transaction service charges, transaction processing and similar services is recognised as revenue when services are performed.

Revenue from the sale of products is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods. Revenue from the sale of products is measured at the fair value of the consideration received or receivable, net of returns and allowances.

Rental income arising from leases of terminals is accounted for on a straight-line basis over the lease terms and is included in revenue due to its operating nature.

Revenue from services obligations to be provided over a period of time are initially deferred and then recognised on a straight-line basis over the period during which the services are provided.

Revenue is recognised as the gross amount excluding VAT, taxes and duties, interchange fees and processing fees and discounts in relation to the sale.

External Costs

External costs incurred in generating the revenue for the year comprise IT operation, operating leases of software, external production costs, loss and fraud, development costs, maintenance and development costs that do not qualify for capitalisation, postage, envelopes and other costs incurred in distributing goods as well as marketing and other sales costs and administration costs and lease agreements.

Staff costs

Staff costs comprise wages and salaries and remuneration, pension contributions, social security costs and other salary-related costs.

The all Employee Share programme (2019) are accounted for on an accrual basis over the vesting period. Employee Share programme has been measured at the fair value of the Nets Group at the launch date of the programme times the probability of vesting. Share options issued were measured at fair value at the date of granting times the probability of vesting. The total amount expensed over the vesting period is determined by reference to the value of the shares and options granted, excluding the impact of any non-market vesting conditions. The value was fixed at grant date. Non-marked vesting conditions is included in assumptions about the number of shares and options that is expected to vest. Any impact of adjustments to estimates is recognised in the income statement and in a corresponding adjustment to Equity over the remaining vesting period. Adjustments relating to prior years are included in the Income statement in the year of adjustment.

Depreciation, amortisation and impairment losses

Depreciation, amortisation and impairment losses comprise the year's depreciation on property, plant and equipment, amortisation of intangible assets and impairment losses.

Result from investments in subsidiaries and associates

The proportionate share of the results after tax of the individual subsidiaries is recognised in the income statement after elimination of intra-company results.

Financial income and expenses

Financial income and expenses comprise interest income and expense, realised and unrealised exchange gains and losses on payables and transactions denominated in foreign currencies, etc.

Tax

Nets Denmark A/S and Danish subsidiaries are jointly taxed with other Danish companies in the Nets Group. The current Danish corporation tax allocated between the jointly taxed companies in proportion to their taxable income is recognised in the income statement. The tax saving as a result of losses is also refunded proportionately.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. The change in deferred tax liabilities is also recognised in the income statement.

Tax assets are recognised if they can be set off against deferred tax in other consolidated enterprises or if it is probable that it can be utilised in future earnings.

Current and deferred tax is computed at the tax rates applicable.

The Group’s entities are taxed under the on-account tax scheme. Interest/refund relating to the tax payment is included in interest income and expense and similar items.

Balance sheet

Intangible assets

Customer agreements

Customer agreements acquired are measured at historical cost less accumulated amortisation and any impairment loss. Amortisation is calculated using the straight-line method to allocate the cost over estimated useful life, which is up to 15 years.

Goodwill	Goodwill represents the value of the current workforce and know-how and also the operational synergies expected from integration within the company. Goodwill is measured at historical cost less accumulated amortisation and any impairment loss. Amortisation is calculated using the straight-line method to allocate the cost over estimated useful life of 5-10 years.
Software	Capitalised software is amortised over their estimated useful lives of 3–7 years.

Development projects in progress

Development costs that are directly attributable to the design and testing of identifiable and unique projects including software products controlled by the company are recognised as intangible assets when the following criteria are met:

- It is technically feasible to complete the asset so that it will be available for use
- Management intends to complete the asset and there is an ability to use or sell it
- The asset will generate probable future economic benefits Expenditure attributable to the asset during its development can be reliably measured.

Costs associated with maintaining the assets are recognised as an expense as and when incurred.

Directly attributable costs that are capitalised as part of the assets include employee costs.

Development projects in progress are tested for impairment at least annually.

Property, plant and equipment

Property, plant and equipment are stated at their purchase price, including incremental expenses on acquisition less accumulated depreciation and any recognised impairment loss.

Depreciation is provided on a straight-line basis over the expected useful economic life of the assets concerned.

The estimated useful life for this purpose is:

Leasehold improvements	up to 10 years
Terminals	3 years
Plant and machinery	2-5 years

The useful life of property, plant and equipment is determined based on periodic assessments of actual useful life and the intended use for those assets.

Impairment losses

The carrying amount of intangible assets as well as property, plant and equipment is subject to an annual test for indications of impairment other than the decrease in value reflected by depreciation or amortisation.

Impairment tests are conducted of individual assets or groups of assets when there is an indication that they may be impaired. The carrying amount of impaired assets is reduced to the lower of the net selling price and the value in use (recoverable amount).

The recoverable amount is the higher of an asset's net selling price and its value in use. The value in use is determined as the present value of the anticipated net income from the use of the asset or group of assets.

Investments in subsidiaries and associates

Investments in subsidiaries and associates are measured according to the equity method.

Investments in subsidiaries are measured at cost and subsequently at the proportionate share of the enterprises' net asset values calculated in accordance with the Parent Company's accounting policies minus or plus unrealised intra-group profits and losses and plus or minus any residual value of positive or negative goodwill.

Subsidiaries with a negative net asset value are measured at DKK 0, and any receivable is written down by the parent company’s share of the negative net asset value to the extent that it is considered irrecoverable. If the negative equity value exceeds the receivable, the balance is recognised under ’Provisions’ to the extent the parent company has a legal or constructive obligation to cover a deficit in the subsidiary.

Acquisitions of enterprises – other than intra-group mergers - are accounted for using the acquisition method, according to which the identifiable assets and liabilities acquired are measured at their fair values at the date of acquisition. Provision is made for costs related to adopted and announced plans to restructure the acquired enterprise in connection with the acquisition. The tax effect of the restatement of assets and liabilities is taken into account.

Inventories

Inventories are measured at cost in accordance with the FIFO method. Where the net realisable value is lower than cost, inventories are written down to this lower value.

The net realisable value of inventories is calculated as the sales amount less costs of completion and costs necessary to make the sale and is determined taking into account marketability, obsolescence and development in expected selling price.

Goods for resale are measured at cost, comprising purchase price plus delivery costs.

Receivables

Receivables are measured at amortised cost and necessary provisions are made for bad debt losses based on an assessment of the individual receivables.

Prepayments and accrued income

Prepayments comprise costs incurred, including operating leases concerning subsequent financial years.

Visa shares

Listed shares are initially measured at cost and subsequently at the fair value.

Cash at banks

Cash and cash equivalents comprise cash and bank deposits.

Equity

Proposed dividends are disclosed as a separate item under equity. Dividends are recognised as a liability at the date when they are adopted at the annual general meeting.

Borrowings

After initial recognition borrowings are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Pension obligations

Nets has entered into defined benefit plans and defined contribution plans with its employees.

In a defined benefit plan, Nets is obliged to pay a specific benefit to certain employees from the time of retirement. A pension asset or pension obligation corresponding to the present value of the obligations less the defined pension plan's assets at fair value is recognised for these benefit plans.

The costs of providing benefits under the defined benefit plan are determined annually by independent actuaries using the projected unit credit method.

The defined pension plans' assets are estimated at fair value at the balance sheet date.

Remeasurements, comprising actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings in the period in which they occur.

Pension assets recognised are limited to the present value of future repayments from the pension plan or reduced future funding commitments. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

In case of changes in benefits relating to employees' previous service period, a change in the estimated present value of the pension obligations will occur, which will be recognised immediately if the employees have acquired a final right to the changed benefits. If not, the change is recognised over the period in which the employees become entitled to the changed benefit.

Net periodic pension income/(cost) from defined benefit plans consists of the items: service costs, interest expenses and interest income on assets. Service costs are recognised in wages, salaries and pension costs. Interest expenses and interest income on assets, net, are recognised in pension costs.

For the defined contribution plans, Nets will pay in a fixed periodic contribution to separate legal entities and will have no further obligations after the payment has been made.

Costs regarding defined contribution plans are recognised as incurred within staff costs.

Other provisions

Other provisions are measured at net realisable value. Other provisions are recognised when, as a result of past events, the company has a legal or a constructive obligation and it is probable that there may be an outflow of resources embodying economic benefits to settle the obligation.

Liabilities

Financial liabilities are measured at amortised cost. Other liabilities are measured at net realisable value.

Accruals and deferred income

Accruals and deferred income comprise payments received concerning income in subsequent years.

Leases

Leases are recognised and measured based on IFRS 16 Leases to align with the accounting policies for the Group. In general, IFRS 16 requires that all leases are recognised in the balance sheet. Rights-of-use assets and lease liabilities have therefore been recognised in the balance sheet for leases previously disclosed as operational leases. In accordance with IFRS 16, short-term leases are however not recognised in the balance sheet. These lease payments are expensed on a straight-line basis over the lease term.

Segment information

Information is provided on revenue by business segments. Segment information is based on internal financial management.

Financial ratios

Financial ratios stated in the survey of financial highlights are calculated in accordance with the Danish Society of Financial Analysts' guidelines on the calculation of financial ratios "Recommendations and Financial Ratios 2015".

$$\text{Operating margin} = \frac{\text{Operating result x 100}}{\text{Revenue}}$$

$$\text{Liquidity ratio} = \frac{\text{Current assets x 100}}{\text{Current liabilities}}$$

$$\text{Solvency ratio} = \frac{\text{Equity at year end x 100}}{\text{Total assets at year end}}$$

$$\text{Return on equity} = \frac{\text{Result from ordinary activities after tax x 100}}{\text{Average equity}}$$

2. Revenue

	2021	2020
Total revenue is specified as follows:		
Merchant Services	2,380	2,260
Issuer & eSecurity Services	2,270	2,241
	4,650	4,501
Of this amount, revenue outside Denmark	2,186	2,285

3. Staff costs

	2021	2020
Total staff costs are specified as follows:		
Wages and salaries and remuneration	1,490	1,465
Pension contributions	155	150
Other salary-related costs	218	247
Total employee costs for the year	1,863	1,862
Employee costs included in development projects	-263	-211
Total employee costs expensed in the income statement	1,600	1,651

	2021	2020
Remuneration to the Executive Board:		
Salaries and remuneration	4	4
Pension contributions	-	-
Other salary-related costs	-	-
Total costs for the year	4	4

No remuneration was paid to the Board of Directors.

Average number of full-time employees:	1,773	1,853
Number of full-time employees year-end:	1,785	1,800

Employee share programme

In August 2019 an all Employee share program was announced with the purpose of giving all employees of the Nets Group, the ultimate parent of Nets Denmark A/S, the opportunity to become co-owners of the Nets Group. Under the program employees could invest in the Nets Group and have their investment matched with two free shares if participating employees are employed when the Nets Group is either sold or if its shares are offered in an Initial Public Offering. The matching shares were granted at 13 December 2019 and are expected to vest 36 months from grant date.

In connection with the merger with the Italy-based Nexi, a change of control clause was triggered and the remaining value of the programme was recognized in the period until closing. The total value of the program for Nets Denmark A/S and subsidiaries amounts to DKK 54 million.

4. Financial income and financial expenses

	2021	2020
Financial income:		
Group enterprises	81	34
Capital gains	11	57
Other interest income	101	60
Foreign exchange gain, net	-	88
	193	239
Financial expenses:		
Group enterprises	81	91
Capital losses	10	15
Other interest expenses	199	123
Other financial items	51	28
Foreign exchange loss, net	117	-
	458	257

5. Proposed profit appropriation

	2021	2020
Classified as follows:		
Deferred tax asset	50	52
Deferred tax liability	128	208
	-78	-156

16. Pension obligations

Nets Denmark A/S's defined benefit pension in Norway, was settled in 2021.

17. Other provisions

	2021	2020
Deferred consideration OP	30	59
Deferred consideration Poplatek	70	56
Carrying amount at 31 December	100	115

18. Contract liabilities

This includes prepayments received from customers in Merchant Services mainly related to POS services and Dankort.

19. Contingent liabilities

The Company is jointly taxed with other Danish companies in the Nets Group. Together with the other companies included in the joint taxation, the Company has joint and several unlimited liabilities for Danish corporation taxes and withholding taxes on dividends, interest and royalties.

The Company has deposited an amount of DKK 12 million (2020: DKK 13 million) related to withholding taxes on payroll in Norway to a restricted bank account.

The Company has entered into a number of long-term agreements on purchase of services.

The Company is party to a number of pending lawsuits and disputes. In Management's opinion, apart from the receivables and payables recognised in the balance sheet at 31 December 2021, the outcome of these lawsuits will not further affect the Company's financial position.

Nets Denmark A/S is guarantor under the senior notes by Nassa Topco AS and have certain of assets, including selected bank accounts, pledged to the lenders. All such arrangements strictly observe applicable laws and regulations. This has no effect on daily business and excludes all settlement assets.

20. Related party transactions

All transactions with related parties are made on an arm's length basis.

21. Events after the balance sheet date

No significant events affecting the annual report for 2021 have occurred subsequently to 31 December 2021.
