# Statement by the Board of Directors and the Executive Board

Today, the Board of Directors and the Executive Board have discussed and approved the annual report of Lagkagehuset A/S for the financial year 1 January - 31 December 2022.

The annual report is prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2022 and of the results of the Company's operations for the financial year 1 January - 31 December 2022.

Further, in our opinion, the Management's review gives a fair review of the matters discussed in the Management's review.

We recommend that the annual report be approved at the annual general meeting.

# Independent auditor's report

#### To the shareholder of Lagkagehuset A/S

#### Opinion

We have audited the financial statements of Lagkagehuset A/S for the financial year 1 January - 31 December 2022, which comprise income statement, balance sheet, statement of changes in equity and notes, including accounting policies. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2022 and of the results of the Company's operations for the financial year 1 January - 31 December 2022 in accordance with the Danish Financial Statements Act.

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

#### Management's responsibilities for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

## Independent auditor's report

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

#### Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.

#### **Business review**

Our history dates back more than 30 years, when two bakers set out on a similar journey to revolutionise the bread experience in Denmark. Ole Kristoffersen and Steen Skallebæk opened their respective bakeries in Christianshavn, Copenhagen and Haderslev, Southern Jutland in the early 1990s. Ole and his wife Jane's first bakery was located in a building that since its origin in 1931 became renowned for its simplistic and functional style that looked like a layer cake – and hence the name Lagkagehuset or The Layer-cake-house in English was born. Ole and Steen both had a clear focus on quality based on principles of taste, edge and rustic baking style. They quickly became known in each their communities and in 2008 they joined forces in their pursuit of bringing exceptional bakery quality to more communities.

Today, 30 years later, we still bake for the local community of Christianshavn and Jane still serves thousands of guests every week – and we have taken the original passion for Danish bakery abroad with the ambition to become the most loved bakery. It is with this deep passion for Danish bakery that we continue to pursue our ambition by creating a better bakery for all – and why we named our international bakeries after our founding two bakers – Ole & Steen.

Heart-made: We believe that if something is worth doing, it's worth doing right - from hospitality to recipe development, to store design and sustainability initiatives - everything we do, we throw ourselves into 100% with love and attention.

Rustic, Refined: Born out of Ole & Steen's mission to revolutionise the bread experience in Denmark, we have always been dedicated to taking rustic recipes and refining them - it's simple done well.

Everyday special: From the feeling you get when you step foot through our doors, to the delicious treats you bring back for your loved ones, we want the experience to be that extra special spark in your day.

The Company is 100% owned by Danish Bake A/S and is a part of the consolidated financial statements of Danish Bake Holding ApS for the year ended 31 December 2022.

#### Financial review

The summary of 2022 is that it has been another year impacted by macro-economic upheavals. The COVID-19 pandemic impacting the start of the year with the Omicron variant, although the effect of this was relatively short lived and we started to see further normalisation in customer behaviour and continued return to the office. Unfortunately, just as we started to see the clear benefit of this normalisation Russia invaded Ukraine in late February and sparked the largest conflict seen in Europe in a generation. The war accelerated and exacerbated the post COVID and Brexit impact on the cost and supply of key raw materials particularly for a multinational artisan baker, flour, grain, sunflower products and eggs to name a few - within just weeks the price of flour increased by more than forty percent. Further to this energy prices soared as Russian energy was excluded from the market, raw material costs, distribution and in particular energy continued to increase throughout the year.

From a commercial point of view the general weakening in consumer confidence with these cost increases was of such materiality that despite trying to offset some of these via thoughtful and strategic revenue management including some price increases and a continued and unrelenting focus on operational delivery which has also produced excellent results there has been an impact on profits in 2022.

The transformation program entitled SCALE continued as planned to the end of 2022 and was finalised end year, with great achievements in creating tools and digital solutions to make the business from bakery to sales more structured and foreseeable. Reducing waste, planning better to create the foundation for our employees to succeed and eventually make better products and provide better service to our customers.

Our commitment to our purpose to create "a better bakery for all" has driven all thinking, planning and results again this year. All our stakeholders have seen the improvements delivered over the year, for our teams we have continued to invest in communication and engagement tools ensuring that all the more than 2,700 people that work in the business have real time feedback and communication tools to stay informed about the business and to feedback what is working and not working for them in being part of the Lagkagehuset team.

For our customers, we have invested in coming to new communities, as well as our regular activity in new product development. We continue to enhance and add functionality to our App with more than half a million people in 2022 regularly engaging with us on news, offers, click & collect, delivery plus given us real time feedback on our offering via net promoter score measurement. Enabling thousands of customers a month to tell us all about their last visit to us. In 2022 features as gift cards and extended delivery to 14 cities across Denmark were added to the App. The Lagkagehuset App won several awards at Danish Digital Awards in 2022 and the continued journey with our loyalty members continues into 2023.

We began 2022 with a business that was in great health having delivered a result well in excess of our plan and we were well placed to capitalise on the growth opportunities presented. Despite the significant macro-economic challenges of 2022, we continued to invest in the long-term growth and capacity of the business. Lagkagehuset opened 4 new stores and closed 1 store, now having 109 stores.

Current plans for openings for 2023 will depend on the development of the inflation and private economy but current pipeline supports a similar level of expansion in the coming years.

Results for the year did not meet the expectations and considered unsatisfactory in a general sense but driven by the turmoil of the economical market situation with costs rising to unprecedented levels and consumers private budgets being strained.

The strategy plan developed in 2020 and revisited in late 2021 for 2022 has been pursued and executed to the letter, transforming in our Danish market, starting with the store operating model, improving the customer experience whilst freeing up time for the teams to spend more time with our customers, this has is evident in our customer Net Promoter Score (NPS) ending the year at a record high 60%. Centralising our ordering systems has enabled transparency and controls for product availability and minimum waste from our completely vertically integrated business.

Building upon our artisanal skill and heritage in baking and confectionary we continued to bring truly excellent products to our customers, and finally further expanding our digital footprint and loyalty customer program has brought even more value and improved services to our customers.

The Company revenue for the period 1 January - 31 December 2022 amounted to DKK 1,011 million (2021: DKK 905 million), while loss for the period amounted to DKK -144 million (2021: DKK -82 million). The balance sheet showed an equity of DKK 291 million at 31 December 2022 (2021: DKK 236 million). Gross profit for the period amounted to DKK 408 million (2021: DKK 409 million), and EBITDA for the period amounted to DKK -69 million (2021: DKK 0 million).

In December 2022, the credit facility was renewed by Lenders and extended. Our owners also remain confident in the management and the long-term growth and success of the business. In December 2022 they injected DKK 200 million to support the continued expansion across markets and in particularly in London and New York.

Management is confident of current cash holdings and profit controls, and the forecast is secured for the continued expansion strategy of the company balanced to how the market situation evolves in 2023. Expectations are modest organic growth and cost continuing downwards to levels post war by end of the year.

There is an overall credit facility of DKK 550 million at 31 December 2022. Covenant requirements for the credit facility have been reported on an ongoing basis, and all conditions have been met.

#### Non-financial matters

In Denmark, the bakery segment in 2022 was still characterized by a consumer wanting freshly and premium baked products rather than packaged products, which leads to higher growth rates within premium baked products and in particular cake. Café sales and coffee growing as lockdowns and restrictions was lifted through the year.

Both in Denmark and internationally, there are consumer trends within food moving towards on-thego solutions, which creates growth opportunities within food and coffee offerings. With the loyalty program and our App solution supporting easy use, in store, click and collect, or grab and go is a growth driver looking forward.

#### Special risks

Due to its operations, investments and financing, the Company is exposed to changes in interest rates. The parent Company manages the Company's financial risks and liquidity, including capital sourcing and investment of surplus liquidity, centrally. Under the Company's financial policy, the risk profile is kept low to ensure that interest rate and credit risks arise only because of commercial circumstances.

#### Knowledge resources

For the continued growth of the Company, it is important to attract and retain highly skilled employees, including bakers, pastry chefs and store managers. To meet customers' needs and to ensure the best possible customer experience, focus is on high product quality and a high level of service, which requires strong competencies of our employees, which are built up by ongoing training and education.

#### Financial risks and use of financial instruments

Due to its operations, investments and financing, the Company is exposed to changes in interest rates. The parent Company manages the Company's financial risks and liquidity, including capital sourcing and investment of surplus liquidity, centrally. Under the Company's financial policy, the risk profile is kept low to ensure that interest rate and credit risks arise only because of commercial circumstances.

#### Impact on the external environment

The Company's activities are not considered to have significant effect on the external environment and climate, and therefore, no separate policy has been prepared in this respect. For further description, see below under 'Statutory CSR report'.

#### Statutory CSR report

Lagkagehuset A/S was founded for the purpose to run a premium concept within the bakery and café segment in Denmark. The Company strives to act socially responsible in a market that changes every day and has defined several focus areas that are directly linked to operations.

# Environment

As part of being socially responsible, the Group strives to limit the environmental impact of the operations.

An inherent part of operating a fresh food business is the risk of food waste. Reducing food waste is thus a continuous effort without also reducing customer experience. A part of the work is carried out in stores and productions where charity organisations supporting social responsibility can pick up excess products. Moreover, certain excess products are reused in production, e.g., for rye granola, rye bread chips or semi-finished products. Finally, some excess end of day products is reused for producing bioethanol and thus supporting both green energy as well as reusing product waste.

Continued efforts to optimize waste via assortment, digitalization and centralised order planning were initiated, still balancing the customer experience and product availability, the aim was to reduce overall waste in 2022 and end 2022 by 2%p. Despite significant efforts, the inflation, and general market fluctuations after the Russian invasion, made us unable to reach this target in 2022. Target for 2023 is to reduce by 2%p.

A major enabler to keep waste low is via Too Good To Go which was initiated across all markets in 2021 and continued into 2022 also in new store openings. Offering expected end of day products at very low price. Target was to save 1 million of products in 2022 and further reduce overall food waste. Total saved products amounted to 1.2 million and thus reduced unnecessary waste significantly via this cooperation. Target for 2023 is to still exceed minimum 1 million saved products.

#### Social and employee conditions

The Company employs both skilled and unskilled employees with more than 2,700 employees in total. Many apprentices are trained and educated each year, and focus is on having a great base of skilled bakers and pastry chefs in our bakeries to uphold the craftsmanship and product quality of the trade.

Our employees are our greatest assets; therefore, we work to create a safe and healthy working environment with a high level of employee satisfaction. To ensure a sound and safe working environment, the Group conducts workplace assessments for all employees in accordance with legislation, at least every third year. The outcome of the workplace assessments results in specific action plans to solve issues, if any.

An ongoing e-NPS was implemented across the group in 2020 and reported since and through 2022. The measurement is to continuously have employees report on whether they would recommend working with us to friends and families. This is a clear message to whether we succeed in making our company the best place to work and track and report the development over time. The reporting and feedback are conducted first monthly and then minimum at a quarterly basis for the leaders to act and interact based on the numerical development and the comments attached.

Whistle-blower (WB) policy and system supported by our Code of Conduct was implemented in early 2021 and continued, using an external WB platform supporting anonymous access, reporting to executive management, the Board and access to an external female representative. This is to secure that any critical matter is not restricted and reported in the best and most secure way for the employee or business partner.

The Company has assessed that there is a risk of occupational injuries and stress in both stores and bakeries. During 2022, there has been a small decrease in sickness absence of store staff, bakers and pastry staff. Workplace assessment and local initiatives are set in to improve areas identified.

Our focus on improving the working environment has entailed that employee job satisfaction increased during 2022.

#### Anticorruption

The most material risk was found to be employees within procurement and conclusion of contracts. As the Company has a zero-tolerance policy for corruption and bribery, and to minimize the risk thereof, the central management of procurement and conclusion of contracts has been a continued focus area and no violation of the Code of Conduct were detected in 2022.

The Company have asked all contracted suppliers to sign and commit to an updated Vendor Code of Conduct (the "VCOC") which sets out the overall principles which Lagkagehuset requires Lagkagehusets employees, suppliers, and vendors ("business partners") to operate, behave and live by. The Company will continue to ask current and new contracted suppliers to sign updated VCOC's in 2023.

The Company has after a materiality assessment not prepared a separate human rights policy or direct climate policy, as it is assessed that Company does not have a significant effect.

#### Corporate governance

The Board of Directors and the Executive Board of Lagkagehuset A/S continuously work to ensure that the Company's management structure and control systems are appropriate and work satisfactorily. Management regularly evaluates whether this is the case.

The framework for planning Management's duties is the Danish Companies Act, the Danish Financial Statements Act, the Company's articles of association and ethical guidelines as well as good practice for entities within the same industry. Being ultimately owned by private equity funds, the Company complies with the Danish Venture and Private Equity Association's (DVCA) guidelines on responsible ownership and corporate governance. Internal procedures have been drawn up to ensure active, effective, and profitable management of the Company.

#### Shareholders

On an ongoing basis, the Board of Directors reviews whether the Company's capital structure serves the best interests of both the Company and its stakeholders. The overriding goal is to ensure a capital structure that supports long- term profitable growth.

#### The Board of Directors' duties

The Board of Directors of Lagkagehuset A/S oversees that the Executive Board pursues the objectives, strategies and business procedures adopted by the Board of Directors. The Board of Directors receives systematic updates from the Executive Board at meetings and through written and oral reports provided on a regular basis.

#### **Remuneration for Management**

To attract and retain managerial skills, the Executive Board and other executive officers are paid according to duties, value creation and terms in comparable entities. Their remuneration includes incentives to ensure consistency between the interests of Management and the owners, and the incentive schemes reflect both short-term and long-term goals.

Management and some of the members of the Board of Directors of Lagkagehuset A/S and few key employees participate in the parent company's investment incentive program. Treasury shares are sold and acquired as part of the incentive program.

In addition to the incentive program, certain key employees are offered performance-based bonus. Remuneration of the Executive Board and the Board of Directors is disclosed in a note to the financial statements.

#### Dividend policy

Dividend is distributed with due regard to the consolidation of equity required to ensure the Company's continued expansion and existing agreements with sources of financing.

The Board of Directors proposes that no dividend is paid for the financial year 2022.

# The Danish Venture and Private Equity Association (DVCA) has issued guidelines on responsible ownership and corporate governance for private equity funds and entities controlled by private equity funds.

The Danish Venture and Private Equity Association (DVCA) has issued guidelines on responsible ownership and corporate governance for private equity funds and entities controlled by private equity funds.

These recommendations comprise guidelines on disclosures in the Management's review, including corporate governance, financial risks, employees, strategies, etc.

The guidelines have adopted a ""comply or explain"" approach to corporate governance that companies can follow by either complying with the recommendations or explaining why they have not complied. The Management of Lagkagehuset A/S, as described above, generally complies with the DVCA's recommendations with the one exception that the description of projected developments in revenue and earnings is limited due to the general uncertainty relating to market developments in 2020 and for competitive reasons.

#### **Business model**

The companies operating business model is described as above in the first section of the management review.

#### Human rights

The Group has after a materiality assessment not identified material risk in negatively affecting human rights. Therefore, we have not enacted any policies hereof.

#### Account of the gender composition of Management

The Company's policy is to always recruit the best qualified person for a given job, and diversity is considered a strength. The Company is continuously working on harmonizing the gender composition including the gender composition of senior managers.

Currently, one out of four board members is female. There were no changes in the board of directors in 2022. The target is to increase the number of female board members so that half are female at the end of 2025.

At other management levels, the Company has more female than male managers and thus not an equal gender composition. Other management levels are considered as any manager with leadership, from store/bakery/pastry managers to executive management. In connection with recruitment for senior positions, we are focused on seeing candidates of both genders, but qualifications will always be the decisive factor.

By the end of 2022 female managers comprised of 80%.

#### Data ethics

In the Danish business model, we use analytics and digital solutions where large amounts of data are processed. Our Data Ethics Policy confirms our commitment towards the respect of our customers and employees as a main pillar in our core values. The company wants to maintain high ethical standards for the protection of our data, especially our customers, why security measures include a variety of guidelines and processes as well as targeted training of our employees to prevent any unintended disclosure. The data which the company collects, and stores is mainly commercial data, beneficial and value-adding to our customers and stakeholders, and such commercial data includes trading patterns across our market.

#### Events after the balance sheet date

The war started in Ukraine late February 2022 and the effect on an already inflationary European economy, was a challenge in 2022. Energy prices and raw materials and general inflation was increasing to unprecedented levels and challenged both direct and indirect ability to reach expected profits levels. As we now have seen energy prices reduce again, in the first half of 2023 and commodity costs as well, it is expected that all markets will be experiencing reduced costs through the year. Expectations are that this should continue into 2024.

The Company feels confident that current cash holdings and profit controls are adequate, and the forecast is secured for continued inflation effects.

No other events have occurred after the balance sheet date that may materially affect the assessment of the Company's financial position.

#### Outlook

It is Management's expectation that 2023 will improve to 2022, even if still effected by macroeconomic challenges for some time. Expectations to sales is a minimum 5% sales growth and profits before tax to improve by minimum DKK 30 million.

# Notes to the financial statements

#### 1 Accounting policies

The annual report of Lagkagehuset A/S for 2022 has been prepared in accordance with the provisions in the Danish Financial Statements Act applying to large reporting class C entities.

The accounting policies used in the preparation of the financial statements are consistent with those of last year.

#### Omission of a cash flow statement

With reference to section 86(4) of the Danish Financial Statements Act, no cash flow statement has been prepared. The Company's cash flows are reflected in the consolidated cash flow statement for the higher-ranking parent company Danish Bake Holding ApS.

#### Reporting currency

The financial statements are presented in Danish kroner (DKK'000).

#### External business combinations

Recently acquired entities are recognised in the financial statements from the date of acquisition. Entities sold or otherwise disposed of are recognised up to the date of disposal. Comparative figures are not restated to reflect newly acquired entities. Discontinued operations are presented separately, see below.

The date of acquisition is the date when the group actually obtains control of the acquiree.

The acquisition method is applied to the acquisition of new entities of which the group obtains control. The acquirees' identifiable assets, liabilities and contingent liabilities are measured at fair value at the date of acquisition. Identifiable intangible assets are recognised if they are separable or arise from a contractual right. Deferred tax related to the revaluations is recognised.

Positive differences (goodwill) between, on the one hand, the consideration for the acquiree, the value of non-controlling interests in the acquired entity and the fair value of any previously acquired equity investments and, on the other hand, the fair value of the assets, liabilities and contingent liabilities acquired are recognised as goodwill under "Intangible assets". Goodwill is amortised on a straight-line basis in the income statement based on an individual assessment of the economic life of the asset.

Negative differences (negative goodwill) are recognised in the income statement at the date of acquisition.

Upon acquisition, goodwill is allocated to the cash-generating units, which subsequently form the basis for impairment testing. Goodwill and fair value adjustments in connection with the acquisition of a foreign entity with a functional currency different from the presentation currency used in the consolidated financial statements are accounted for as assets and liabilities belonging to the foreign entity and are, on initial recognition, translated into the foreign entity's functional currency using the exchange rate at the transaction date.

The consideration paid for an entity consists of the fair value of the agreed consideration in the form of assets transferred, liabilities assumed and equity instruments issued. If part of the consideration is contingent on future events or compliance with agreed terms, such part of the consideration is recognised at fair value at the date of acquisition. Subsequent adjustments of contingent considerations are recognised in the income statement.

Expenses incurred to acquire entities are recognised in the income statement in the year in which they are incurred.

# Notes to the financial statements

#### 1 Accounting policies (continued)

Where, at the date of acquisition, the identification or measurement of acquired assets, liabilities or contingent liabilities or the determination of the consideration is associated with uncertainty, initial recognition will take place on the basis of provisional amounts. If it turns out subsequently that the identification or measurement of the consideration transferred, acquired assets, liabilities or contingent liabilities was incorrect on initial recognition, the statement will be adjusted retrospectively, including goodwill, until 12 months after the acquisition, and comparative figures will be restated. Hereafter, any adjustments are recognised as misstatements.

Gains or losses from disposal of subsidiaries which result in loss of control are calculated as the difference between, on the one hand, the fair value of the selling price less selling expenses and, on the other hand, the carrying amount of net assets.

#### Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rate at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables and payables and other monetary items denominated in foreign currencies are translated at the exchange rate at the balance sheet date. The difference between the exchange rates at the balance sheet date and the date at which the receivable or payable arose or was recognised in the most recent financial statements is recognised in the income statement as financial income or financial expenses.

#### Income statement

#### Revenue

The Company has chosen IFRS 15 as interpretation for revenue recognition.

Income from the sale of goods for resale and finished goods is recognised in revenue when a store sells the goods to the customer. Payment is usually due when the customer picks up the goods in the store.

For the customer loyalty program, a performance obligation is recognised at the date of recognition of the sale triggering the allocation of bonus points. The performance obligation is measured at the estimated fair value of the bonus points allocated. Revenue is recognised when the customer uses the bonus points.

Income from the rendering of services is recognised as revenue as the services are rendered.

Revenue is measured at the fair value of the agreed consideration excluding VAT and taxes charged on behalf of third parties. All discounts and rebates granted are recognised in revenue.

#### Other operating income

Other operating income and expenses comprise items of a secondary nature relative to the Company's core activities, including governmental furlough schemes, group contribution and losses on the sale of non-current assets.

#### Cost of sales

Cost of sales includes the cost of goods used in generating the year's revenue.

#### Other external expenses

Other external expenses include the year's expenses relating to the Company's core activities, including expenses relating to distribution, sale, advertising, administration, premises, bad debts, payments under operating leases, etc.

## Notes to the financial statements

#### 1 Accounting policies (continued)

#### Staff costs

Staff costs include wages and salaries, including compensated absence and pension to the Company's employees, as well as other social security contributions, etc. The item is net of refunds from public authorities.

#### Amortisation/depreciation and impairment

The item comprises amortisation/depreciation and impairment of intangible assets and property, plant and equipment.

The cost net of the expected residual value for completed development projects and other acquired intangible assets is amortised over the expected useful life.

Goodwill is amortised over the expected economic life of the asset, measured by reference to Management's experience in the individual business, profitability, market position, business segment and dependency on key employees.

The basis of amortisation, which is calculated as cost less any residual value, is amortised on a straight line basis over the expected useful life. The expected useful lives of the assets are as follows:

Completed development projects	5-7 years
Acquired intangible assets	5-10 years
Goodwill	10 years

The expected useful life of the Company's investments in software and completed development projects is 5-7 years, which is considered to be the expected use of the asset.

The Company's investments in other acquired intangible assets are considered to be of strategic importance to future operations. Taking into consideration the Company's plans to increase activities, the economic life has been assessed to be 10 years.

The residual value of all intangible assets is assessed to be DKK 0.

Depreciation is based on the residual value of the asset and is reduced by impairment losses, if any. The depreciation period and the residual value are determined at the acquisition date and are reassessed annually. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognised.

In the case of changes in the depreciation period or the residual value, the effect on the depreciation charges is recognised prospectively as a change in accounting estimates.

# Notes to the financial statements

#### 1 Accounting policies (continued)

The basis of depreciation, which is calculated as cost less any residual value, is depreciated on a straight line basis over the expected useful life. The expected useful lives of the assets are as follows:

Plant and machinery	5-15 years
Other fixtures and fittings, tools and	3-5 years
equipment	
Leasehold improvements	5-10 years

The residual value of all items of property, plant and equipment is assessed to be 0 DKK.

The basis of depreciation is calculated taking into account the residual value of the asset and is reduced by any impairment.

The residual value is determined at the time of acquisition and is reassessed every year. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognised. In case of changes in the residual value, the effect on the depreciation charges is recognised prospectively as a change in accounting estimates.

In the case of changes in the depreciation period or the residual value, the effect on the depreciation charges is recognised prospectively as a change in accounting estimates.

#### Other operating expenses

Other operating income and expenses comprise items of a secondary nature relative to the Company's core activities, including governmental furlough schemes, group contribution and losses on the sale of non-current assets.

#### Financial income and expenses

Financial income and expenses are recognised in the income statement at the amounts that relate to the financial reporting period. The items comprise interest income and expenses, e.g. from group entities and associates, dividends declared from other securities and investments, financial expenses relating to finance leases, realised and unrealised capital gains and losses relating to other securities and investments, exchange gains and losses and amortisation of financial assets and liabilities.

#### Тах

Tax for the year includes current tax on the year's expected taxable income and the year's deferred tax adjustments. The portion of the tax for the year that relates to the profit/loss for the year is recognised in the income statement, whereas the portion that relates to transactions taken to equity is recognised in equity.

The entity and its Danish group entities are taxed on a joint basis. The Danish income tax charge is allocated between profit-making and loss-making Danish entities in proportion to their taxable income (full allocation method).

Jointly taxed entities entitled to a tax refund are reimbursed by the management company based on the rates applicable to interest allowances, and jointly taxed entities which have paid too little tax pay a surcharge according to the rates applicable to interest surcharges to the management company.

# Notes to the financial statements

1 Accounting policies (continued)

#### Balance sheet

#### Intangible assets

Goodwill is measured at cost less accumulated amortisation and impairment losses.

Other intangible assets include development projects and other acquired intangible rights, including software licences, distribution rights and development projects.

Other intangible assets are measured at cost less accumulated amortisation and impairment losses.

Development costs comprise expenses, salaries and amortisation directly or indirectly attributable to development activities.

Development projects that are clearly defined and identifiable, where the technical feasibility, sufficient resources and a potential future market or development opportunities areidentifiable and where the Company intends to produce, market or use the project, are recognised as intangible assets provided that the cost can be measured reliably and that there is sufficient assurance that future earnings can cover production costs, selling costs and administrative expenses and development costs. Other development costs are recognised in the income statement as incurred.

Development costs that are recognised in the balance sheet are measured at cost less accumulated amortisation and impairment losses.

#### Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost includes the acquisition price and costs directly related to the acquisition until the time at which the asset is ready for use.

The cost of a total asset is divided into separate components, which are depreciated separately if the useful life of the individual components is different.

Gains or losses are calculated as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains and losses from the disposal of property, plant and equipment are recognised in the income statement as other operating income or other operating expenses.

#### Leases

The Company has chosen IAS 17 as interpretation for classification and recognition of leases.

On initial recognition, leases for assets that transfer substantially all the risks and rewards incident to the ownership to the Company (finance leases) are measured in the balance sheet at the lower of fair value and the present value of the future lease payments. In calculating the net present value, the interest rate implicit in the lease or the incremental borrowing rate is used as the discount factor. Assets held under finance leases are subsequently accounted for in the same way as the Company's other assets.

The capitalised residual lease liability is recognised in the balance sheet as a liability, and the interest element of the lease payment is recognised in the income statement over the term of the lease.

Leases that do not transfer substantially all the risks and rewards incident to the ownership to the Company are classified as operating leases. Payments relating to operating leases and any other rent agreements are recognised in the income statement over the term of the lease. The Company's aggregate liabilities relating to operating leases and other rent agreements are disclosed under "Contingent liabilities".

# Notes to the financial statements

#### 1 Accounting policies (continued)

#### Impairment of fixed assets

The carrying amount of intangible assets, property, plant and equipment and investments in subsidiaries is assessed for impairment on an annual basis.

Impairment tests are conducted on assets or groups of assets when there is evidence of impairment. The carrying amount of impaired assets is reduced to the higher of the net selling price and the value in use (recoverable amount).

The recoverable amount is the higher of the net selling price of an asset and its value in use. The value in use is calculated as the present value of the expected net cash flows from the use of the asset or the group of assets and the expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Previously recognised impairment losses are reversed when the reason for recognition no longer exists. Impairment losses on goodwill are not reversed.

#### Inventories

Inventories are measured at cost in accordance with the FIFO method. Where the net realisable value is lower than cost, inventories are written down to this lower value. The net realisable value of inventories is calculated as the sales amount less costs of completion and costs necessary to effect the sale and is determined taking into account marketability, obsolescence and development in the expected selling price.

The cost of raw materials and consumables comprises the cost of acquisition plus delivery costs.

The cost of finished goods and work in progress includes the cost of raw materials, consumables, direct labour and indirect production overheads.

#### Receivables

Receivables are measured at amortised cost.

The Company has chosen IFRS 9 as interpretation for impairment of financial receivables.

Write-downs on trade receivables are based on the simplified expected credit loss model. Credit loss allowances on individual receivables are provided for when objective indications of credit losses occur such as customer bankruptcy and uncertainty about the customers' ability and/or willingness to pay, etc. In addition to this, allowances for expected credit losses are made on the remaining trade receivables based on a simplified approach.

#### Prepayments

Prepayments recognised under "Assets" comprise prepaid expenses regarding subsequent financial reporting years.

#### Cash

Cash and cash equivalents comprise cash and short-term marketable securities which are subject to an insignificant risk of changes in value.

# Notes to the financial statements

#### 1 Accounting policies (continued)

#### Equity

#### Reserve for development costs

The reserve for development costs comprises recognised development costs. The reserve cannot be used to distribute dividend or cover losses. The reserve will be reduced or dissolved if the recognised development costs are amortised or are no longer part of the Company's operations by a transfer directly to the distributable reserves under equity.

#### Proposed dividends

Dividend proposed for the year is recognised as a liability once adopted at the annual general meeting (declaration date). Dividends expected to be distributed for the financial year are presented as a separate item under "Equity".

#### Provisions

Provisions relate to refurbishment obligations relating to the Group's leased premises. The refurbishment obligation is calculated as the present value of the estimated net costs of refurbishment when leased premises are vacated. This will occur no earlier than at the end of the expected useful life.

#### Income taxes

Current tax payables and receivables are recognised in the balance sheet as the estimated income tax charge for the year, adjusted for prior-year taxes and tax paid on account.

Deferred tax is measured according to the liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is not deductible for tax purposes and on office premises and other items where temporary differences, apart from business combinations, arise at the date of acquisition without affecting either profit/loss for the year or taxable income. Where alternative tax rules can be applied to determine the tax base, deferred tax is measured based on Management's intended use of the asset or settlement of the liability, respectively.

Deferred tax is measured according to the tax rules and at the tax rates applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax. Deferred tax assets are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Changes in deferred tax due to changes in the tax rate are recognised in the income statement.

#### Liabilities

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. On subsequent recognition, financial liabilities are measured at amortised cost, corresponding to the capitalised value, using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan. Financial liabilities also include the capitalised residual lease liability in respect of finance leases.

Other liabilities are measured at net realisable value.

#### Deferred income

Deferred income recognised as a liability comprises payments received concerning income in subsequent financial reporting years.

# Notes to the financial statements

# 1 Accounting policies (continued)

## **Financial ratios**

The financial ratios stated under "Financial highlights" have been calculated as follows:

Operating profit/loss	Profit/loss before financial items adjusted for other operating income and other operating expenses
Operating margin	Operating profit (EBIT) x 100 Revenue
Return on assets	Profit/loss from operating activites x 100 Average assets
Current ratio	Current assets x 100 Current liabilities
Equity ratio	Equity, year-end x 100 Total equity and liabilities, year-end
Return on equity	Profit/loss after tax x 100 Average equity

#### 2 Events after the balance sheet date

As we saw Omicron and COVID-19 restriction being lifted, it is expected that the markets will be normalizing during first half 2022 and end year being close to pre COVID levels except for specific locations like airports and heavy business/tourist traffic areas which we expect to take longer to normalize

The war started in Ukraine late February and the effect on an already inflationary European economy, is a risk factor we see in to for 2022. Energy prices and raw materials and general inflation is increasing to unprecedented levels and will challenge both direct and indirect ability to reach expected profits levels short term. Initiatives are set in place to support still the original expansion plans for 2022 including reaching the budgeted profit levels. The Company feels confident though that current cash holdings and profit controls are adequate, and the forecast is secured for inflation effects and an in-year normalisation across the markets.

No other events have occurred after the balance sheet date that may materially affect the assessment of the Company's financial position.

## Notes to the financial statements

#### 3 Segment information

The Company only operates within one business segment, operation of bakeries, only in Denmark. Therefore, no separate segment information has been provided.

# Notes to the financial statements

#### 16 Non-current liabilities other than provisions

DKK'000	Total debt at 31/12 2022	Repayment, next year	Long-term portion	Outstanding debt after 5 years
Other payables	60,284	5,024	55,260	42,828
	60,284	5,024	55,260	42,828

Together with the group entities, Danish Bake A/S and Danish Bake Group ApS, the Company had credit facilities of DKK 550 million as of 31 December 2022. Only Danish Bake A/S has debt to credit institutions in relation to this credit facility. The debt to the credit institutions totalled DKK 410 million, including bank guarantees at 31 December 2022. The agreement expires in May 2024. The agreement includes covenants.

#### 17 Provisions

Other provisions comprise provisions for refurbishment obligations, totalling DKK 13,756 thousand.

In total DKK 13,756 thousand, whereof DKK 0 thousand is expected to fall due within one year.

Provision covering refurbishment obligations is viewed per individual lease contracts. Any estimates are based on quotes for the different types of leases or previous terminations, where applicable.

#### 18 Deferred income

..

~ . .

Deferred income, DKK 8,867 thousand (2021: DKK 10,364 thousand), consists of payments received from customers in giftgards and loyalty programs that may not be recognised until the subsequent financial year.

#### 19 Contractual obligations and contingencies, etc.

. .. . .....

Other contingent liabilities		
DKK'000	2022	2021
Other contingent liabilities	12,555	15,490
	12,555	15,490

Other contingent liabilities include bank guarantees in relation to leaseholds.

The Company has provided a guarantee of DKK 275 million to the credit institutions for the parent company Danish Bake A/S.

The Company is jointly taxed with its parent, Danish Bake Holding ApS, which acts as management company, and is jointly and severally liable with other jointly taxed group entities for payment of income taxes as well as withholding taxes on interest, royalties and dividends.

#### Other financial obligations

Other rent and lease liabilities:
