## Statement by the Board of Directors and the Executive Board

The Board of Directors and the Executive Board have today discussed and approved the annual report of Maersk Drilling Services A/S for the financial year 1 January – 31 December 2019.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the Company's assets, liabilities and financial position at 31 December 2019 and of the results of the Company's operations for the financial year 1 January – 31 December 2019.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's operations and financial matters, of the results for the year and of the Company's financial position.

We recommend that the annual report be approved at the annual general meeting.

Lyngby, 17 June 2020

Executive Board:

Morten Kelstrup

Board of Directors:

Jesper Ridder Olsen Chairman Thomas Lysgaard Falk

### Independent auditor's report

#### To the Shareholder of Maersk Drilling Services A/S

#### Opinion

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company at 31 December 2019, and of the results of the Company's operations for the financial year 1 January - 31 December 2019 in accordance with the Danish Financial Statements Act.

We have audited the Financial Statements of Maersk Drilling Services A/S for the financial year 1 January - 31 December 2019, which comprise income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies ("financial statements").

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Statement on the Management's Review**

Management is responsible for the Management's Review.

Our opinion on the financial statements does not cover the Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

#### Management's Responsibilities for the Financial Statements

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

### Independent auditor's report

#### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

### Independent auditor's report

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Financial ratios are calculated in accordance with the guidelines "Recommendations & Ratios" issued by the Danish Society of Financial Analysts. The financial ratios have been calculated as follows:

Operating margin

Return on invested capital

Current ratio

<u>Current assets x 100</u> Current liabilities

Operating profit/loss x 100

Revenue

Operating profit/loss x 100

Average invested capital

Return on equity

Profit/loss from ordinary activities after tax x 100 Average equity

Solvency ratio

Equity ex. non-controlling interests at year end x 100 Total equity and liabilities at year end

### **Management's review**

### **Operating review**

#### **Principal activities**

The Company and its subsidiaries are operators of high-technology drilling rigs, and provide offshore drilling services to oil and gas companies.

The Company has activities through branches in The Netherlands and Brunei.

#### Development in activities and financial position

Profit for the year was USD 12,651 thousand (2018: USD 1,916 thousand). The underlying earnings are in line with Management expectations.

#### Outlook

As set out in the note disclosure around events after the balance sheet date, the oil price has dropped substantially subsequent to year-end which may lead the oil and gas companies to cancel or defer projects and exert pressure for lower rates, more contract flexibility and low cost solutions, which could negatively impact the Company's future profitability.

In addition, the Company's operations may be impacted by COVID-19 either directly or through the restrictions imposed by governments in response to COVID-19.

The Company is yet unable to estimate the potential impact of these factors and the Company's expectations for 2020 are therefore subject to increased uncertainty.

Prior to the outbreak of COVID-19 and the increased oil price volatility, Management expected results for 2020 to be lower compared to 2019.

The results for 2020 are furthermore subject to risks and uncertainties, as various factors, many of which are beyond the Company's control, may cause the actual development and results to differ materially from expectations. The results for 2020 are primarily sensitive to the level of contracting of additional days to the current backlog and the day rates thereon.

#### **Particular risks**

#### **Operating risks**

A fundamental factor in driving demand for offshore drilling rigs is the level of spending by oil and gas companies on exploration, development, production and maintenance as well as decommissioning activities. This level is to a large extent a function of project sanctioning, which is based on oil and gas companies' long-term assessment of oil and gas prices impacting their cash flow generation as well as the economics of the offshore exploration and development projects in their portfolios.

Over the past years, oil and gas companies have optimised their business models to structurally reduce offshore project costs through project optimisation, standardisation, digitisation, simplification and service cost deflation. As a result of the lower cost levels, more than 90% of offshore oil and gas projects are today economically feasible at an oil price around USD 60 per barrel. Combined with the oil and gas companies' increasing positive cash flows, this has provided them with the opportunity to invest in new offshore projects.

The price of Brent crude oil averaged USD 64 per barrel in 2019, representing a decrease of 11% compared to the average of USD 72 per barrel in 2018. Subsequent to year-end, the oil price has dropped substantially to a level of around USD 25-40 per barrel. This may lead the oil and gas companies to cancel or defer projects and exert pressure for lower rates, more contract flexibility and low- cost solutions, which could impact the Company negatively in 2020 and future years.

### **Management's review**

### **Operating review**

#### **Financial risks**

#### Currency risks

Currency risk is the risk that future cash flows will fluctuate because of changes in foreign exchange rates. The currency exposure arises from the Company operating in countries with different local currencies. Revenue is primarily denominated in USD, which is also the presentation currency of the Company, while related operating expenses are incurred in both USD and local currencies.

The exposure to changes in foreign exchange rates is generally mitigiated by entering into customer contracts where an element of the contract value is in local currency to create a natural hedge between the contracted revenue and local operating costs. The Maersk Drilling Group uses foreign exchange forward contracts to hedge any excess exposure, but such hedges are generally not entered into by individual subsidiaries.

The currency exposure is not considered to be significant.

#### Interest rate risks

Interest rate risk is the risk that future cash flows from financial instruments will fluctuate because of changes in market interest rates. The interest rate exposure arises from loans and other credit facilities carrying floating interest rates.

The Maersk Drilling Group mitigates the exposure towards interest rates by entering into fixed rate loans or interest rate swaps at the parent company level whereas individual subsidiaries generally are funded through loans carrying floating interest rates.

#### Credit risks

For drilling contracts, credit risk is minimised by undertaking a credit assessment of the counterparty prior to entering into the contracts. Depending on the creditworthiness, the Company may seek protection, in form of parent company guarantees, pre-payments or other type of security.

The Company has a concentration of customers, but is not considered to have a material credit risk, as the customers are major international oil companies.

#### Safety

For the Company, safety is a top priority. It is an unwavering commitment, rooted in our Core Values. Safety permeates everything we do and stand for, onshore and offshore, and it is the foundation for delivering reliable and efficient operations to our customers. Our ambition is to have zero serious incidents.

In 2019, the Company made it one of its top four strategic priorities to develop and implement new approaches to safety in the entire organisation. In addition to our tried and tested safety practices and management systems, we have shared the learnings and results of this new approach with the wider industry as we consider safety to be a priority that transcends commercial interests.

### **Management's review**

### **Operating review**

#### **Environmental matters**

The Company's ambition is to provide responsible drilling services, and reducing the environmental impact of our operations is an important part of this. We mainly target impacts relating to spills, waste and the use of chemicals onboard our rigs. Our Health, Safety, Security and Environment (HSSE) function works in close cooperation with our rigs to optimise activities governed by our HSSE Policy as well as our Corporate Major Accident Prevention Policy.

#### **Corporate social responsibility**

At the Company, we firmly believe that by conducting our operations through sustainable practices, we ensure a sound and viable business for the future. We have a responsibility to the people who work for the Company, but also to the people and the environment which are affected by our company.

Please refer to our full report on sustainability pursuant to section 99a of the Danish Financial Statements Act, which can be found online at https://www.maerskdrilling.com/who-we-are/sustainability

#### Goals and policies for the underrepresented gender

The Board believes that its members should be elected on the basis of their combined qualifications and at the same time recognises the advantages of a board comprising a wide range of backgrounds such as global experience, style, culture and gender.

The Company's overall ambition is to work towards an equal gender distribution of its Board of Directors. On the basis of this ambition, the target is therefore to have at least one representative of each gender out the presently three shareholder-appointed board members. At 31 December 2019, there were no women on the Board and the target has therefore not been met. Members of the Board of Directors of subsidiaries in the Maersk Drilling Group typically comprise senior executives of the parent company, The Drilling Company of 1972 A/S, which at present are all male. However, it remains the ambition to have at least one female Board member by 2021.

The Company adheres to the Policy on Diversity and Inclusion in Maersk Drilling, which was adopted at the board meeting of The Drilling Company of 1972 A/S on 2 April 2019. Maersk Drilling does not discriminate based on age, gender, nationality, socioeconomic background, disability, religion or sexual orientation. We believe that diversity and inclusion can contribute to improved performance and high quality decision-making, and is essential to innovation and organisational learning; critical elements to maintaining our position as a leading player in the offshore drilling industry.

In the oil and gas industry, diversity can be a challenge, and women continue to be underrepresented. The Petroleum Equipment and Services Association in 2018 found that only 15% of the worldwide oil and gas workforce is female, and even fewer hold technical and management roles. With a traditional stronghold in the North Sea, the majority of Maersk Drilling's workforce is Scandinavian or British nationals.

Our share of female employees increased from 10% in 2018 to 13% in 2019, and the share of female leaders rose slightly from 10% to 11%. Offshore, women only make up 2% of the workforce, all employed in non-managerial positions. Onshore, women represent 37% of our workforce. Female leaders made up 23% of our onshore leadership in 2019 compared to 24% in 2018. Our ambition is to ensure that more women progress into senior leadership positions.

We believe that strengthening our pipeline of female talent and leadership, on- and offshore, will improve diversity. In order to achieve this, we aim to address structural and cultural barriers by:

• Enhanced recruitment – through awareness of biases in candidate selection and by applying a structured assessment process.

### **Management's review**

### **Operating review**

- Promotions through consideration of a broader and more diverse candidate field for leadership positions.
- Succession planning through identifying diverse successors with a special view to senior management positions.
- Acceleration programmes through putting a diverse selection of employees on a targeted career path.

In 2020, we will initiate a process to further explore the cultural and behavioural barriers to diversity in Maersk Drilling's leadership on- and offshore, with the aim of identifying additional responses to the diversity challenges. Our ambition extends beyond gender to include other diversity parameters, such as nationality and age. Alongside these efforts, we will continue to build awareness of the benefits of an inclusive culture through training and communication.

#### Events after the balance sheet date

Subsequent to year-end, the oil price has dropped substantially to a level of around USD 25-40 per barrel. Combined with the implications of the global outbreak of COVID-19, the lower oil price environment will have negative implications for the Company's activities, as oil and gas companies have cancelled or deferred projects and exert pressure for lower rates, more contract flexibility and low cost solutions. This could negatively impact the Company's future profitability.

### Financial statements 1 January – 31 December

#### Notes

#### 1 Accounting policies

The annual report of Maersk Drilling Services A/S for 2019 has been prepared in accordance with the provisions applying to reporting class C large entites under the Danish Financial Statements Act.

The accounting policies used in the preparation of the financial statements are consistent with those of last year.

#### **Omission of consolidated financial statements**

Pursuant to section 112(1) of the Danish Financial Statements Act, no consolidated financial statements have been prepared. The financial statements of Maersk Drilling Services A/S and group entities are included in the consolidated financial statements of The Drilling Company of 1972 A/S, CVR no. 40404716

#### **Omission of cash flow statement**

Pursuant to section 86(4) and 96(3) of the Danish Financial Statements Act, cash flow statement and note concerning fee to auditors appointed by the Company in the Annual General Meeting are omitted as this information is included in the consolidated Financial Statements for The Drilling Company of 1972 A/S.

#### Omission of audit fee disclosure

Pursuant to section 96(3) of the Danish Financial Statements Act, audit fee disclosures have been ombittes as this information is included in the consolidated financial statements of The Drilling Company of 1972 A/S, Lyngby Hovedgade 85, 2800 Kgs Lyngby, CVR no. 40404716.

#### Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rates at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables, payables and other monetary items denominated in foreign currencies are translated at the exchange rates at the balance sheet date. The difference between the exchange rates at the balance sheet date and the date at which the receivable or payable arose or was recognised in the latest financial statements is recognised in the income statement as financial income or financial expenses.

Fixed assets acquired in foreign currencies are measured at the exchange rates at the transaction day.

USD is used as functional currency and as presentation currency because the majority of transactions are in USD. At 31 December 2019, the exchange rate DKK/USD was 667.33 (2018: 652.13).

#### Income statement

#### Revenue

Income from drilling activities, which are typically carried out under long-term agreements with fixed day rates, is recognised under revenue for the operating time related to the financial year.

Revenue from sale of goods is recognised upon the transfer of risk to the buyer.

### Financial statements 1 January – 31 December

### Notes

#### **1** Accounting policies (continued)

#### Other external costs

Other external costs comprise costs incurred during the year for bareboat hire of the rigs (operating lease), repair and maintenance, catering, hired crew and administrative expenses.

#### **Financial income and expenses**

Financial income and expenses are recognised in the income statement at the amounts relating to the financial year.

#### Tax on profit/loss for the year

Tax for the year comprises current corporation tax for the year and changes in deferred tax, including changes in tax rates. The tax expense relating to the profit/loss for the year is recognised in the income statement, and the tax expense relating to amounts directly recognised in equity is recognised directly in equity. The Company is part of A.P. Møller Holding A/S' joint taxation. The current Danish income tax is allocated among the jointly taxed companies proportionally to their taxable income (full allocation with refund for tax losses).

#### **Balance sheet**

#### Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost comprises the purchase price and any costs directly attributable to the acquisition until the date on which the asset is available for use. Indirect production overheads and borrowing costs are not recognised in cost.

The basis of depreciation is cost less any projected residual value after the end of the useful life. Depreciation is provided on a straight-line basis over the estimated useful life. The estimated useful lives are as follows:

Fixtures and fittings, tools and equipment

3-5 years

The useful life and residual value are reassessed annually. Changes are treated as accounting estimates, and the effect on depreciation is recognised prospectively.

Fixed assets under construction are recognised and measured at cost at the balance sheet date. Upon entry into service, the cost is transferred to the relevant group of property, plant and equipment.

#### Investments

Investments in subsidiaries and associates are recognised at cost. Where cost exceeds the recoverable amount, write-down is made to this lower value.

### Financial statements 1 January – 31 December

### Notes

#### **1** Accounting policies (continued)

#### Impairment of fixed assets

The carrying amount of intangible assets and property, plant and equipment as well as equity investments in group entities and associates is subject to an annual test for indications of impairment other than the decrease in value reflected by depreciation or amortisation.

Impairment tests are conducted of individual assets or groups of assets when there is an indication that they may be impaired. Write-down is made to the recoverable amount if this is lower than the carrying amount.

The recoverable amount is the higher of an asset's net selling price and its value in use. The value in use is determined as the present value of the forecast net cash flows from the use of the asset or the group of assets, including forecast net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

#### Receivables

Receivables are measured in the balance sheet at the lower of amortised cost and net realisable value, which corresponds to nominal value less write-down for bad debts. Write-down for bad debts is determined on the basis of an individual assessment of each receivable.

#### Prepayments

Prepayments comprise prepayment of costs incurred concerning rent, insurance premiums, subscriptions and interest relating to subsequent financial years.

#### Equity

#### Dividends

The expected dividends payment for the year is disclosed as a separate item under equity.

#### Corporation tax and deferred tax

Current tax payable and receivable is recognised in the balance sheet as tax computed on the taxable income for the year, adjusted for tax on the taxable income of prior years and for tax paid on account.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax value of assets and liabilities based on the planned use of the asset or settlement of the liability. However, deferred tax is not recognised on temporary differences relating to goodwill non-deductible for tax purposes and on office premises and other items where the temporary differences arise at the date of acquisition without affecting either profit/loss or taxable income.

Deferred tax assets, including the tax value of tax loss carryforwards, are recognised at the expected value of their utilisation within the foreseeable future; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Any deferred net assets are measured at net realisable value.

### Financial statements 1 January – 31 December

### Notes

#### **1** Accounting policies (continued)

Deferred tax is measured in accordance with the tax rules and at the tax rates applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax. Changes in deferred tax as a result of changes in tax rates are recognised in the income statement or equity, respectively.

#### Liabilities

Financial liabilities are measured at amortised cost, which essentially corresponds to nominal value.

#### Segment information

Segment information is provided on geographical markets. The segment information is in line with the Group's accounting policies, risks and internal financial management.

### Financial statements 1 January – 31 December

#### **Notes**

#### 15 Events after balance sheet date

Subsequent to year-end, the oil price has dropped substantially to a level of around USD 25-40 per barrel. Combined with the implications of the global outbreak of COVID-19, the lower oil price environment will have negative implications for the Company's activities, as oil and gas companies have cancelled or deferred projects and exert pressure for lower rates, more contract flexibility and low cost solutions. This could negatively impact the Company's future profitability.
