MANAGEMENT'S STATEMENT

Today the Executive Board have discussed and approved the Annual Report of Hillary Denmark ApS for the financial year 1 January - 31 December 2021.

The Annual Report is presented in accordance with the Danish Financial Statements Act.

In my opinion the Consolidated Financial Statements and the Annual Financial Statements of the Company give a true and fair view of Group's and the Company's assets, liabilities and financial position at 31 December 2021 and of the results of Group's and the Company's operations and cash flows for the financial year 1 January - 31 December 2021.

The Management Commentary includes in my opinion a fair presentation of the matters dealt with in the Commentary.

I recommend the Annual Report be approved at the Annual General Meeting.

Copenhagen, 5 August 2022

INDEPENDENT AUDITOR'S REPORT

To the Shareholder of Hillary Denmark ApS

AUDITORS OPINION ON THE CONSOLIDATED FINANCIAL STATEMENTS AND THE ANNUAL FINANCIAL STATEMENTS OF THE COMPANY

Opinion
We have audited the Consolidated Financial Statements and the Annual Financial Statements of the Company of Hillary Denmark ApS for the financial year 1 January - 31 December 2021, which comprise income statement, Balance Sheet, statement of changes in equity, cash flows, notes and a summary of significant accounting policies for both the Group and the Parent Company. The Consolidated Financial Statements and the Annual Financial Statements of the Company are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the Consolidated Financial Statements and the Annual Financial Statements of the Company give a true and fair view of the assets, liabilities and financial position of the Group or the Company at 31 December 2021 and of the results of the Group and the Parent Company's operations and cash flows for the financial year 1 January - 31 December 2021 in accordance with the Danish Financial Statements Act.

Basis for Opinion
We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the “Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements and the Annual Financial Statements of the Company” section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants’ International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), together with the ethical requirements that are relevant to our audit of the financial statements in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Management's Responsibilities for the Consolidated Financial Statements and the Annual Financial Statements of the Company
Management is responsible for the preparation of Consolidated Financial Statements and the Annual Financial Statements of the Company that give a true and fair view in accordance with the Danish Financial Statements Act and for such Internal control as Management determines is necessary to enable the preparation of Consolidated Financial Statements and the Annual Financial Statements of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the Consolidated Financial Statements and the Annual Financial Statements of the Company, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the Consolidated Financial Statements and the Annual Financial Statements of the Company unless Management either intends to liquidate the Group or the Company or to cease operations, or has no realistic alternative but to do so.

Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements and the Parent Company Financial Statements
Our objectives are to obtain reasonable assurance about whether the Consolidated Financial Statements and the Annual Financial Statements of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated Financial Statements and the Annual Financial Statements of the Company.

INDEPENDENT AUDITOR'S REPORT

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated Financial Statements and the Annual Financial Statements of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the Consolidated Financial Statements and the Annual Financial Statements of the Company and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated Financial Statements and the Annual Financial Statements of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the Consolidated Financial Statements and the Annual Financial Statements of the Company, including the disclosures, and whether the Consolidated Financial Statements and the Annual Financial Statements of the Company represent the underlying transactions and events in a manner that gives a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on Management Commentary

Management is responsible for Management Commentary.

Our opinion on the Consolidated Financial Statements and the Annual Financial Statements of the Company does not cover Management Commentary, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Consolidated Financial Statements and the Annual Financial Statements of the Company, our responsibility is to read Management Commentary and, in doing so, consider whether Management Commentary is materially inconsistent with the Consolidated Financial Statements and the Annual Financial Statements of the Company or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management Commentary provides the information required under the Danish Financial Statements Act.

INDEPENDENT AUDITOR'S REPORT

Based on the work we have performed, we conclude that Management Commentary is in accordance with the Consolidated Financial Statements and the Annual Financial Statements of the Company and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of Management Commentary.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Violation of the Deadline stated in the Danish Financial Statements Act Relating to Submission ofthe Financial Statements

In our opinion, the Company has not complied with the provisions of the Danish Financial Statements Act to submit the Financial Statements to the Danish Business Authority within the deadline of six months specified in the Danish Financial Statements Act, and the Company's Management may incur liability in this respect.

The ratios stated in the list of key figures and ratios have been calculated as follows:

Invested capital:	NWC + intangible and tangible assets (ex goodwill) - provisions - other operating liabilities, non-current
Return on invested capital:	Operating Profit/loss adjusted for goodwill amortisation x 100 / Average invested capital
Equity ratio:	Equity (ex. minorities), at year-end x 100 / Total assets, at year-end
Return on equity:	Profit/loss after tax x 100 / Average equity

MANAGEMENT COMMENTARY

Principal activities
The principal activities comprise as in previous years in that of a holding company. The holdings are today focused on companies recycling plastic and the manufacturing plastic products.

The group companies main activities are in the recycling of post-consumer plastic waste, manufacturing of plastic (LDPE & LLDPE) bags, sacks and films and the sale of these products.
In addition to these main activities the group contains a company focused on renting property as well as another company that performs engineering activities and relating technical consultations.

The products are sold mainly in Northern Europe (Scandinavia, Baltics, Germany and Benelux).

Unusual matters
The global Covid-19 Pandemic and subsequent supply chain issues has had an impact on the subsidiary companies. For a period the demand for products decreased somewhat due to lock downs. This was a temporary situation and demand returned. Supply chain issues have caused prices for necessary raw materials and supplies to increase. Lock-downs and Covid regulations where the group has manufacturing meant that staffing has been short during certain periods.

Development in activities and financial and economic position
On a Hillary level the development has been in the new structure of group holdings together with the investment from outside source AMC.

The group is constantly trying to develop its activities with further developments in recycling technology and new product offers. Focus during 2021 has been on the development and sales of thin gauge bin liners from recycled post-consumer waste plastic .

Profit/loss for the year compared to the expected development
The results of Hillary Denmark were in line with the expected results.

The group companies results performed worse then expected and were not satisfactory.

The year has been challenging with significant impacts from Covid-19 and the consequences of a global pandemic. Cost of raw material and input materials has increased steadily and often. Even though the group companies have increased its prices to the market it has proven difficult to stay in front of the raw material price increases. Similarly less staff due to Covid has left production outputs lower than expected.

Significant events after the end of the financial year
No events have occurred after the end of the financial year of material importance for the Company's financial position.

The war in Ukraine and consequent sanctions on Russia clearly impact the global economic situation, in particular the European economic situation. It is still early to assess any possible impact and the scope this will have on Hilary Denmark and the group but we are closely monitoring the situation and aim to comply with all sanctions. The group does not have any subsidiaries in any sanctioned countries or the Ukraine.

In 2022 the group employed a new group CEO, Mr. Maciej Plamieniak.
Mr. Vytas Poderis retired as group CEO but remains on the Plasta Holdings board of directors.

Financial risks
Hillary Denmark enjoys a good financial position in terms of liquidity and expects to collect on outstanding loans during 2022, further improving its liquidity. The assessment of the holding investments is positive and that the companies are well positioned to increase profitability in the coming years.

The group companies have considerable sales and purchase activities, gives credit to customers, sees the likely probability of increasing interest on loans and is in a high investment faze. This means that there is a substantial need for working capital. A plan for the group to re-plan the group debt is

Financial risks (continued)
progress. One of the group companies has significant purchases in foreign currency without any current hedging mechanism. The group management is working on a foreign currency risk management strategy.

Special risks
The group main risks are in the competitive environment between producers of similar profile, costs of input mate-rials and energy.

The current global economic situation has created a increased price volatility in raw material, energy costs and oth-er necessary input materials. The rapid speed of the increases has made it difficult for the group companies to ad-just the sales pricing to its clients accordingly and simultaneously causing a gap in liquidity and profitability.

Lack of necessary raw materials is special risk of note. New regulations in certain EU-countries have increased the demand for recycled PE meaning that the market for post-consumer waste plastic and granulated post-consumer plastic has tightened. This is both a risk and opportunity for the group. The opportunity lies in the fact that the group has a significant understanding and capability in recycling of post-consumer waste plastic and manufacturing of granules. Therefore it is well placed to take advantage of the increased demand for such products.

The risk is the sourcing of material for recycling. With an extensive network of suppliers this risk is handled well during 2021. Actions are being taken to use alternative streams of post-consumer waste plastics to further mitigate the risks involved in sourcing of raw material.

Environmental situation
In Hillary Denmark ApS itself there are no significant environmental or climate risks. The investment strategy is with a focus on environmental positive investments.

The group focus is on the recycling of post-consumer waste plastics and is in its core devoted to making a positive contribution to the environment by decreasing the CO2 through burning of plastic, depletion of natural resources and pollution. There is currently no master plan for environmental impact but this is, as it has always been, a key part of the ethos of the group companies. Work is conducted to develop kpi’s for the environmental impact of the group companies and its products but this is still in an early stage and no information is ready to be presented.

In the group there is a very clear and outspoken objective to use as much post usage (collected) recycled plastic as possible with a minimal CO2 footprint compared to alternatives. When considering any type of investment, the pos-sibility for usage or production of recycled collected plastic is a very important factor in the decision-making pro-cess. A clear example of this is the latest group acquisition, Rullpack AB, that has decreased its usage of virgin petro-leum based plastic and increased its usage of post-consumer plastic from 30% to 60%.

All major subsidiaries are ISO 9001 certified, and one has ISO 140001 certification.

Knowledge resources
Knowledge and skill are the foundation to any successful business. In Hillary Denmark there is a significant trust placed in its trusted consultants to offer expertise in potential investment areas.

With regards to the group companies it is key to continuously improve the ability, skill and qualifications of employ-ees. This is achieved through on-site training sessions during which practical skills shares are developed and oppor-tunities for participating in off-site new skill development.

Focus will in the coming year be on recruiting senior staff with extensive industrial knowledge that can further enhance the skill dissipation within the group companies.

Research and development activities
The group companies are expanding the scope of their activities and modernizing the production processes. Great attention is paid to projects that will lead to more cost and production efficient ways

MANAGEMENT COMMENTARY

Research and development activities (continued)
of handling raw materials. The implementation of such project will allow for reducing labor costs and accessing alternative streams of secondary raw materials that has not been possible to access to date.

In response to a constant growing market demand for granulate from recycled secondary raw material, influenced by changes in the legal framework in the EU and rapidly growing prices of primary granulate the group is to devel-oping and increasing granulate sales. Investments will increase the company's capacity in production of granules.

The group companies are constantly developing its markets both through expansion within already existing geographical markets and segments but also with new product development through the development of new products for various applications within the scope of waste bags and films.

Future expectations
The management expects that inflation, supply chain issues and a general economic down-turn and possible reces-sion will be apparent in 2022.

For Hillary Denmark the future expectations are a stable year with less activity than in 2021.

The group companies are expected to be exposed to higher costs in 2022 as a result of inflation and continued supply chain issues. The addition of the above previously mentioned developments and investments in are expected to help manage the cost increases and start adding to the group results in 2022.

The sales prices are expected to be further renegotiated and increased, resulting in improved margins and an increased turn-over as compared with 2021. Focus on the development of certain higher priced markets with more capacity allocations of all the group resources for these market for will assist in achieving higher sales prices and an increased profitability.

Changes in managerial personnel with a focus on optimizing production processes should result in additional out-puts of finished products in areas where there have performance has been lacklustre performance, adding to the client satisfaction and turn-over.

The main risks foreseen for the group activities in 2022 is the volatility in cost prices.

The Company’s foreign branches
The group has branches in Lithuania, Germany, Sweden and Norway.

Corporate social responsibility (CSR) report

Business model

- The main activities of Hillary Denmark is as a holding company with a focus on recycled plastics.
- The main activities of the group companues are in recycling of post-consumer plastic waste through mechanical recycling, the manufacturing of plastic bags and films and the sale of bags and films.
- The group conducts the bulk of its activities in northern Europe (Baltics, Scandinavia, Germany and Benelux)

Environmental and climate matters

The main risks associated with the business activities performed by Hillary Denmark is that the company invests in companies that have a negative environmental and climate impacts. The company manages these risks by carefully evaluating all investments and conducting detailed due diligence through documentation and legal research prior to investments to determine the likelihood of such risks.

No official policy in implemented as the rules and regulations of the governing bodies where the company is active are judged to offer adequate guidance and control.

On a group level the principal risks associated with the business activities are the impact of the production and products on the environment and climate. Being that plastics, mainly derived from petroleum, is the main compo-nent of the groups products the group companies have a great responsibility and opportunity to impact the envi-ronment. Through the extensive recycling efforts and usage of post-consumer waste plastic instead of virgin plastics the group companies take on this responsibility and decreases or improves the environment rather than deteriorat-ing through its activities to decrease the burning of plastics and avoidance of landfill build up. The recycling activi-ties also decreases the need for petroleum extraction.

In the group there is a very clear and outspoken objective to use as much post-consumer recycled plastic as possi-ble with a minimal CO2 footprint compared to alternatives. Today the vast majority (approximately 90%) of the products produced are from recycled post-consumer waste plastic. When considering any type of investment, the possibility for usage or production of recycled collected plastic is a very important factor in the decision-making process.

Further to the extensive usage of recycled post-consumer waste plastics the group always aims for resource savings to reduce pollution and choosing the most environmentally considerate alternative possible for its processes such as the usage of green energy.

Other risks associated with the business activities are the handling of waste material from the production. The group companies work with governmental and municipal agencies to ensure the best possible handling and control of such risks.

There are no group wide environmental policies, each group company / subsidiary is free to adopt its own policy or statement for environmental responsibility. An example of a environmental policy statement for a group company can be seen here
https://www.plasta.lt/en/terms-conditions/

All group companies are required to uphold the laws and regulations of the countries in which they operate.

Social and employee matters

The main risks associated with the business activities performed by Hillary Denmark is that the company invests in companies that have a negative social and employment impacts. The company manages these risks by carefully evaluating all investments and conducting detailed due diligence through documentation and legal research prior to investments to determine the likelihood of such risks.

No official policy in implemented as the rules and regulations of the governing bodies where the

Corporate social responsibility (CSR) report (continued)
company is active are judged to offer adequate guidance and control.

On a group level the principal risks associated with the business activities are that a group company would breach the rights and responsibilities it / they have towards employees and their working conditions. As all group compa-nies conduct its activities and adheres to regulation within EU-countries with stringent regulation and follow up of treatment of employees the risks are managed. There is limited usage of subcontractors outside of the EU but it does occur. In such cases the group companies make sure to investigate and require documentation supporting that social and employee matters are handled in a satisfactory way.

All group companies follow at a minimum the regulations set out in the ILO convention.

There are no group wide social and employee policies, each group company / subsidiary is free to adopt its own policy or statements. An example of a policy statement for a group company can be seen here https://www.plasta.lt/en/terms-conditions/

All group companies are required to uphold the laws and regulations of the countries in which they operate.

Respect for human rights
The main risks associated with the business activities performed by Hillary Denmark is that the company invests in companies that have a negative human rights impacts. The company manages these risks by carefully evaluating all investments and conducting detailed due diligence through documentation and legal research prior to investments to determine the likelihood of such risks.

No official policy in implemented as the rules and regulations of the governing bodies where the company is active are judged to offer adequate guidance and control.

On a group level the principal risks associated with the business activities are that a group company would breach human rights in association with demands placed on the work force or through action caused by subcontractors.

As all group companies conduct its activities and adheres to regulation within EU-countries with stringent regulation with regards to human rights the risks are managed. There is limited usage of subcontractors outside of the EU but it does occur. In such cases the group companies make sure to investigate and require documentation supporting that social and employee matters are handled in a satisfactory way.

All group companies follow at a minimum the regulations set out in the ILO convention.

There are no group wide human rights policies, each group company / subsidiary is free to adopt its own policy or statement. An example of a policy statement for a group company can be seen here
https://www.plasta.lt/en/terms-conditions/

All group companies are required to uphold the laws and regulations of the countries in which they operate.

Anti-corruption and bribery matters
The main risks associated with the business activities performed by Hillary Denmark is that the company invests in companies that has or is engaged in corruption and or bribery. The company manages these risks by carefully eval-uating all investments and conducting detailed due diligence through documentation and legal research prior to in-vestments to determine the likelihood of such risks.

No official policy in implemented as the rules and regulations of the governing bodies where the company is active are judged to offer adequate guidance and control.

Corporate social responsibility (CSR) report (continued)
On a group level the principal risks associated with the business activities are that a group company would engage in corruption or bribery in order to further it possibilities for sales alternatively other social and environmental re-sponsibilities. As all group companies conduct its activities and adheres to regulation within EU-countries with strin-gent regulation and control with regards to corruption and bribery the risks are managed.

There are no group wide anti-corruption and bribery policies, each group company / subsidiary is free to adopt its own policy or statement. An example of a policy statement for a group company can be seen here https://www.plasta.lt/en/terms-conditions/

All group companies are required to uphold the laws and regulations of the countries in which they operate.

Target figures and policy for the underrepresented gender
The board only consists of one member why the company does not have such policy.

Data ethics
Hillary Denmark and its holdings are aware and mindful of data collected and make sure that all data is secure and protected. There is no group wide policy on data ethics (as per the principles from Jan 2021) or data protection but the companies have data and privacy policies in accordance with GDPR that they adhere to (example can be found here https://www.plasta.lt/en/privacy-policy/). These policies include statements on dealing with data collected that can be deemed sensitive from a personal standpoint.

The companies data mainly relates to employees and business partners and none of the companies use data to track movements, gender, ethnicity, consumer preferences, machine learning or similar that could impact or be used to impact on an individual or entities freedom of choice or privacy. With regards to the type of data that is collected we do not feel a need for a formal data ethics policy at this time as the company regards the ethics covered in the GDPR legislation.

The group companies constantly monitor and improve IT security and guidelines and should the it see an area where the ethics of data collected could be under question a policy for the management of such data will be developed.

NOTES

Note

Charges and securities 14

As security for bank debt of T.EUR 4.978.444, the Group has provided a corporate pledge of T.EUR 19.653. The corporate pledge includes the following assets:

Buildings - T.EUR 1.144
Equipment & other non-current assets - T.EUR 9.743
All inventories in use - T.EUR 3.253
Shares (Rullpack, AB) - T.EUR 5.487
Working capital in Swedbank, AB - T.EUR 26

Related parties 15

Parties are considered to be related parties when one of them is able to control the other party or exert significant influence on the other party in the latter's financial and operating decisions. These comprise the following legal entities and natural persons:

- Members of management of the Company
- Shareholders of the Company
- Group companies;

Plasta Holdings UAB
PLASTA AB
Plasta Business Park, AB
Rullpack AB
GelPod UAB
Plasta GmbH
Rullpack Norge AS
Pingvin Hushallsprodukter AB
Veiklos spektras UAB
Replasta UAB
Ramigna UAB

Transactions with related parties

The company did not carry out any material transactions that were not concluded on market conditions. According to section 98c, subsection 7 of the Danish Financial Statements Act information is given only on transactions that were not performed on common market conditions.

ACCOUNTING POLICIES

The Annual Report of Hillary Denmark ApS for 2021 has been presented in accordance with the provisions of the Danish Financial Statements Act for enterprises in reporting class C, large-size enterprises.

The Annual Report is prepared consistently with the accounting principles applied last year.

Consolidated Financial Statements
The Consolidated Financial Statements include the Parent Company Hillary Denmark ApS and the subsidiaries in which Hillary Denmark ApS directly or indirectly holds more than 50% of the voting rights or in any other way has a controlling influence. Enterprises in which the Group holds between 20% and 50% of the voting rights and exercises significant, but not controlling influence, are considered associates, see the Group structure.

The Consolidated Financial Statements consolidate the Financial Statements of the Parent Company and the subsidiaries by combining uniform accounts items. Intercompany income and expenses, shareholdings, intercompany accounts and dividend, and realised and unrealised gains and losses arising from transactions between the consolidated enterprises are fully eliminated in the consolidation.

Newly acquired or newly formed entities within the Group are recognised in the Consolidated Financial Statements as if the entity has been combined from the earliest financial period included in the Consolidated Financial Statements. Consolidated or wound up entities are recognised in the Consolidated Income Statement from the earliest financial period included in the Financial Statements. Comparative figures are corrected for newly acquired, sold or wound-up entities.

Acquired entities within the Group are recognised in the Consolidated Financial Statements according to the combination method, the combination being regarded as completed as from the earliest financial period included in the Consolidated Financial Statements, and by using the carrying amounts of the assets and liabilities acquired.

Positive and negative differences between the acquisition cost and the carrying amounts of acquired and identified assets and liabilities are recognised in equity at the acquisition.

Transaction costs incurred in relation to acquisition of entities are recognised in the Income Statement in the year they were paid.

Investments in subsidiary enterprises are set off by the proportional share of the subsidiaries' fair value of net assets and liabilities at the acquisition date.

Investments in associates are measured in the Balance Sheet at the proportional share of the equity value of the enterprises, calculated under the accounting policies of the Parent Company and eliminating proportionally any unrealised intercompany gains and losses. The proportional share of the results of the associates is recognised in the Income Statement after elimination of the proportional share of internal gains and losses.

Minority interests
The accounting items of the subsidiaries are recognised in full in the Consolidated Financial Statements. The minority interests' proportional share of the results and equity of the subsidiaries is stated as separate items in the allocation of profit/loss and equity, respectively.

INCOME STATEMENT

Net revenue
Net revenue from the sale of merchandise and finished goods is recognised in the Income Statement if supply and risk transfer to purchaser has taken place before the end of the year and if the income can be measured reliably and is expected to be received.

Net revenue is recognised exclusive of VAT and less duties and discounts related to the sale.

ACCOUNTING POLICIES

Production costs
Production costs comprise the costs of manufacture and procurement paid to achieve the net revenue for the year, including costs of raw materials and consumables, wages and salaries, energy, maintenance, leasing and depreciation of production plant, and adjusted for changes in inventory of finished goods and work in progress.

Distribution costs
The costs paid for the distribution of goods sold during the year and for sales campaigns, etc. carried out during the year are recognised in distribution costs. The cost of sales personnel, advertising and exhibition costs and amortisation of distribution and sales related assets are also recognised in distribution costs. Common losses on bad debts are also recognised.

Administrative expenses
Administrative expenses recognise costs incurred during the year regarding management and administration, inclusive of costs relating to the administrative staff, Executives, office premises, office expenses, etc., and related amortisation.

Other operating income
Other operating income includes items of a secondary nature in relation to the Group's and the Company's activities. In addition, profit from sale of intangible and tangible fixed assets as well as business interruption and conflict compensations are included. Compensations are recognised when the income is deemed to be realisable.

Other operating expenses
Other operating expenses include items of a secondary nature in relation to the Group's and the Company's activities. Losses from sale of intangible and tangible fixed assets are also included.

Income from investments in subsidiaries
Dividend from equity interests is recognised in the financial year in which the dividend is declared. In connection with transfers, potential profits are recognised when the economic rights related to the sold equity interests are transferred, however, at the earliest when the profit has been realised or is regarded as realisable. Moreover, realised losses other than impairments are included where identified.

Financial income and expenses
Financial income and expenses include interest income and expenses, financial expenses of finance leases, realised and unrealised gains and losses arising from securities, debt and transactions in foreign currencies, as well as charges and allowances under the tax-on-account scheme, etc. Financial income and expenses are recognised by the amounts that relate to the financial year. Interest income and expenses are calculated on amortised cost prices.

Tax
The tax for the year, which consists of the current tax for the year and changes in deferred tax, is recognised in the Income Statement by the share that may be attributed to the profit for the year, and is recognised directly in equity by the share that may be attributed to entries directly to equity.

BALANCE SHEET

Intangible fixed assets
Acquired goodwill is measured at cost less accumulated amortisation. Goodwill is amortised on a straight-line basis over the expected useful life which is estimated to 5 years. The period of amortisation is determined based on an assessment of the acquired company's position in the market and earnings profile, and the industry-specific conditions.

Patents and licences are measured at the lower of cost less accumulated amortisation and the recoverable amount. Patents are amortised over the remaining patent period and licences are amortised over the period of the agreement, however, no more than 8 years.

Development projects comprise costs, including wages and salaries, and amortisation, which directly or indirectly can be related to the Company's development activities and which fulfil the criteria for recognition in the Balance Sheet.

The accounting item is measured at the lower of the capitalised costs less accumulated amortisation and recoverable amount.
Capitalised development costs are amortised on a straight-line basis over the estimated useful life after completion of the development work. The amortisation period is normally 5 years.

Intangible fixed assets are generally written down to the recoverable amount if this is lower than the carrying amount.

Profit or loss from sale of intangible fixed assets is calculated at the difference between the sales price and the carrying amount at the time of the sale. Profit and loss are recognised in the Income Statement under other operating income or other operating expenses.

Tangible fixed assets
Land and buildings, production plant and machinery, other plant, fixtures and equipment are measured at cost less accumulated depreciation and impairment losses.

The depreciation base is cost less estimated residual value after end of useful life.

The cost includes the acquisition price and costs incurred directly in connection with the acquisition until the time when the asset is ready to be used.

Straight-line depreciation is provided on the basis of an assessment of the expected useful lives of the assets and their residual value:

	Useful life	Residual value
Production plant and machinery..	5-10 years	0 %
Other plant, fixtures and equipment..	3-5 years	0 %

Profit or loss on sale of tangible fixed assets is stated as the difference between the sales price less selling costs and the carrying amount at the date of sale. Profit or loss is recognised in the Income Statement as other operating income or other operating expenses.

Lease contracts
Lease contracts relating to tangible fixed assets
for which the Company bears all material risks and benefits attached to the ownership (finance lease, see IAS 17) are recognised as assets in the Balance Sheet. The assets are at the initial recognition measured at the lower of cost stated at fair value and the and present value of the future lease payments. The internal interest rate of the lease contract, or alternatively the Company's loan interest, is used as discounting factor when calculating the present value. Finance lease assets are hereafter treated as the Group's and the Company's other similar tangible fixed assets.

The capitalised residual lease liability is recognised in the Balance Sheet as a liability and the interest portion of the lease payment is recognised in the Income Statement over the contract period.

Financial non-current assets
Equity investments in are measured at cost. If the cost exceeds the net realisable value, this is written down to the lower value.

The combination method is applied when acquiring enterprises within the Group, where the combination is regarded as completed from the earliest financial period included in the Financial Statements, and by using the carrying amounts of the assets and liabilities acquired.

ACCOUNTING POLICIES

Impairment of fixed assets
The carrying amount of intangible fixed and tangible assets together with fixed assets, which are not measured at fair value,, are assessed annually for indications of impairment other than that reflected by amortisation and depreciation.

In the event of impairment indications, an impairment test is made for each asset or group of assets, respectively. If the recoverable amount is lower than the carrying amount, the asset is written down to the recoverable amount.

The recoverable amount is calculated at the higher of the capital value and the sales value less expected costs of a sale. The capital value is determined as the Company's share in the current value of the net cash flows which the subsidiary is expected to generate through its activities and from sale of assets after the end of their useful lives. A discount rate is used which reflects the risk-free market rate and the owners' minimum return on interest requirements for similar assets. The growth rate in the terminal period is determined in accordance with the standards within the industry.

Inventories
Inventories are measured at cost using the FIFO-principle. If the net realisable amount is lower than cost, the inventories are written down to the lower amount.

The cost of merchandise as well as raw materials and consumables is calculated at acquisition price with addition of transportation and similar costs.

The cost of finished goods and work in progress includes the cost of raw materials, consumables, direct payroll cost and other direct and other indirect production costs include indirect materials and payroll and maintenance and depreciation of the machines, factory buildings and equipment used in the production process, the cost of factory administration and management and capitalised development costs relating to the products.

The net realisable value of inventories is stated at the expected sales price less direct completion costs and costs incurred to execute the sale and is determined with due regard to marketability, obsolescence and development in expected sales price of the inventories.

Receivables
Receivables are measured at amortised cost which usually corresponds to nominal value. The value is written down to meet expected losses.

Accruals, assets
Accruals recognised as assets include costs incurred relating to the subsequent financial year.

Cash and cash equivalents
Cash and cash equivalents include cash at bank.

Other provisions for liabilities
Other provisions for liabilities include the expected cost of warranty commitments, loss on work in progress, restructurings etc. and deferred tax.

Warranty commitments include liabilities for improvement of work within the warranty period of 1 to 5 years. The provision for liabilities is measured and recognised on the basis of experience with warranty work.

When it is likely that the total costs will exceed the total income on the contract work in progress, a provision is made for the total loss that is anticipated on the contract.

ACCOUNTING POLICIES

Tax payable and deferred tax
Current tax liabilities and receivable current tax are recognised in the Balance Sheet as the calculated tax on the taxable income for the year, adjusted for tax on the taxable income for previous years and taxes paid on account.

Deferred tax is measured on the temporary differences between the carrying amount and the tax value of assets and liabilities.

Deferred tax assets, including the tax value of tax loss carryforwards, are measured at the amount at which the asset is expected to be used within a reasonable number of years, either by setoff against tax on future earnings or by setoff against deferred tax liabilities within the same legal tax entity.

Deferred tax is measured on the basis of the tax rules and tax rates that under the legislation in force on the Balance Sheet date will be applicable when the deferred tax is expected to crystallise as current tax. Any changes in the deferred tax resulting from changes in tax rates, are recognised in the income statement, except from items recognised directly in equity.

Liabilities
Financial liabilities are recognised at the time of borrowing by the amount of proceeds received less transaction costs. In subsequent periods, the financial liabilities are measured at amortised cost equal to the capitalised value when using the effective interest, the difference between the proceeds and the nominal value being recognised in the Income Statement over the loan period.

The amortised cost of current liabilities corresponds usually to the nominal value.

Accruals, liabilities
Accruals recognised as liabilities include payments received regarding income in subsequent years.

Foreign currency translation
Transactions in foreign currencies are translated at the rate of exchange on the transaction date. Exchange differences arising between the rate on the transaction date and the rate on the payment date are recognised in the Income Statement as a financial income or expense.

Receivables, payables and other monetary items in foreign currencies that are not settled on the Balance Sheet date are translated at the exchange rate on the Balance Sheet date. The difference between the exchange rate on the Balance Sheet date and the exchange rate at the date when the receivables or payables come into existence recognised in the Income Statement as financial income or expenses.

Fixed assets acquired in foreign currencies are translated at the rate of exchange on the transaction date.

CASH FLOW STATEMENT

The cash flow statement shows the Company's cash flows for the year for operating activities, investing activities and financing activities in the year, the change in cash and cash equivalents of the year and cash and cash equivalents at beginning and end of the year.

Cash flows from operating activities:
Cash flows from operating activities are computed as the results for the year adjusted for non-cash operating items, changes in net working capital and corporation tax paid.

Cash flows from investing activities:
Cash flows from investing activities include payments in connection with purchase and sale of intangible and tangible fixed asset and fixed asset investments.

ACCOUNTING POLICIES

Cash flows from financing activities:
Cash flows from financing activities include changes in the size or composition of share capital and related costs, and borrowings and repayment of interest-bearing debt and payment of dividend to shareholders.

Cash and cash equivalents:
Cash and cash equivalents include bank overdraft and cash in hand.
