Statement by the Board of Directors and the Executive Board

Today, the Board of Directors and the Executive Board have discussed and approved the annual report of Danitech A/S for the financial year 1 January - 31 December 2021.

The annual report is prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Company at 31 December 2021 and of the results of the Group's and the Company's operations and of the consolidated cash flows for the financial year 1 January - 31 December 2021.

Further, in our opinion, the Management's review gives a fair review of the development in the Group's and the Company's operations and financial matters and the results of the Group's and the Company's operations and financial position.

We recommend that the annual report be approved at the annual general meeting.

Independent auditor's report

To the shareholders of Danitech A/S

Opinion

We have audited the consolidated financial statements and the parent company financial statements of Danitech A/S for the financial year 1 January - 31 December 2021, which comprise income statement, balance sheet, statement of changes in equity and notes, including accounting policies, for the Group and the Parent Company, and a consolidated cash flow statement. The consolidated financial statements and the parent company financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2021, and of the results of the Group's and Parent Company's operations as well as the consolidated cash flows for the financial year 1 January - 31 December 2021 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements and the parent Company financial statements" (hereinafter collectively referred to as "the financial statements") section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

Management's responsibilities for the financial statements

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

Independent auditor's report

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- ▶ Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Independent auditor's report

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the Management's review.

Management's review

Business review

The parent company's activities consist of the development, production and integration of motion control systems, as well as the sale of stand-alone components and servicing of electrohydraulic and electromechanical equipment.

Danitech Group's activities consist of the development, production and integration of motion control systems, as well as the sale of stand-alone components and servicing of electrohydraulic and electromechanical equipment.

Financial review

The income statement for 2021 shows a profit of DKK 19,902 thousand against a profit of DKK 12,650 thousand last year, and the group's balance sheet at 31 December 2021 shows equity of DKK 137,615 thousand.

As we entered 2021, we knew the year would present many challenges, primarily incrementally increasing raw materials as well as a continuation of 2020 where delivery times just kept getting longer and longer.

That situation has basically continued throughout 2021 just a lot worse than we imagined. Delivery times ended up for most of our suppliers in 30 weeks and for some from 40 to 60 weeks which is extremely difficult to maneuver in.

The reason is still that the Corona situation has negatively affected the companies' capacity in the region of 10-20% and when demand is 30-40% above normal, the bottlenecks we see are created and which we unfortunately still expect will be in force for most of 2022 as well.

The suppliers' massive price increases, which were also executed for ongoing orders, we have tried to execute in the market. Products with a high proportion of iron - copper and aluminum have increased significantly, and the global electrification will keep the raw materials at a high level and therefore some of the products will probably not come down to the previous levels again.

We have depreciated the necessary in inventories, and due to the shortage situation, customers have bought good portions of these goods to a good extent, so we have sold well of them, which has increased our earnings.

Another not insignificant reason for improved earnings is that we have increased our turnover by DKK 23 million without having additional employees and significantly fewer costs for activities such as traveling expenses, marketing costs and cost for expensive exhibitions. Over the period, our suppliers have raised their prices from 8 to 58% depending on the product, which came into force immediately on the products due to the increasing raw material prices as well as increased expenses for transport, energy, packaging, and insurance, etc.

The annual result is slightly better than expected and thus satisfactory.

Knowledge resources

The staff's thorough knowledge of product properties and product application and prices is of crucial importance to the Group's position in the market and to future earnings.

Financial risks and use of financial instruments

The Group is not exposed to any particular business or financial risks other than those which are normal within the line of business.

Impact on the external environment

Only the heating of the Company's premises and the transportation of goods, etc have an impact on the external environment.

Since 2021 we have an internal project in relation to the sustainability and we will up to summer 2022 have a complete picture and plan to reduce our footprint to a minimum.

Management's review

Foreign branches

Danitech A/S has a sales branch in Sweden.

Events after the balance sheet date

No events materially affecting the Group's and the Company's financial position have occurred subsequent to the financial year-end.

Outlook

Outlook for 2022 - we expect a difficult year due to the lack of materials and products, which will limit our growth in sales to 3 -8 %.

For 2022, we expect a reduction in profit of approximately 15-20%, as we expect to be 5-7 more employees, further increasing investments on the development of new products and services.

Consolidated financial statements and parent company financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies

The annual report of Danitech A/S for 2021 has been prepared in accordance with the provisions in the Danish Financial Statements Act applying to medium-sized reporting class C entities.

The accounting policies used in the preparation of the financial statements are consistent with those of last year.

Omission of a cash flow statement

With reference to section 86(4) of the Danish Financial Statements Act, no cash flow statement is prepared for the parent company, as its cash flows are reflected in the consolidated cash flow statement.

Reporting currency

The financial statements are presented in Danish kroner (DKK).

Consolidated financial statements

Control

The consolidated financial statements comprise the Parent Company and subsidiaries controlled by the Parent Company. Subsidiaries comprise Danitech Production A/S (Stake: 55,72 %).

Control means a parent company's power to direct a subsidiary's financial and operating policy decisions. Besides the above power, the parent company should also be able to yield a return from its investment.

In assessing if the parent company controls an entity, de facto control is taken into consideration as well.

The existence of potential voting rights which may currently be exercised or converted into additional voting rights is considered when assessing if an entity can become empowered to direct another entity's financial and operating decisions.

Preparation of consolidated financial statements

The consolidated financial statements are prepared as a consolidation of the parent company's and the individual subsidiaries' financial statements, which are prepared according to the group's accounting policies. On consolidation, intra-group income and expenses, shareholdings, intra-group balances and dividends, and realised and unrealised gains on intra-group transactions are eliminated. Unrealised gains on transactions with associates are eliminated in proportion to the group's interest in the entity. Unrealised losses are eliminated in the same way as unrealised gains if they do not reflect impairment.

In the consolidated financial statements, the accounting items of subsidiaries are recognised in full. Non-controlling interests' share of the profit/loss for the year and of the equity of subsidiaries which are not wholly-owned are included in the group's profit/loss and equity, respectively, but are disclosed separately.

Acquisitions and disposals of non-controlling interests which are still controlled are recognised directly in equity as a transaction between shareholders.

Investments in associates and joint ventures are recognised in the consolidated financial statements using the equity method.

The group's activities in joint operations are recognised on a line-by-line basis.

Non-controlling interests

On initial recognition, non-controlling interests are measured at the fair value of the non-controlling interests' equity interest.

Consolidated financial statements and parent company financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rate at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables and payables and other monetary items denominated in foreign currencies are translated at the exchange rate at the balance sheet date. The difference between the exchange rates at the balance sheet date and the date at which the receivable or payable arose or was recognised in the most recent financial statements is recognised in the income statement as financial income or financial expenses.

Income statement

Revenue

Income from the sale of goods for resale and finished goods, is recognised in revenue when the most significant rewards and risks have been transferred to the buyer and provided the income can be measured reliably and payment is expected to be received. The date of the transfer of the most significant rewards and risks is based on standardised terms of delivery based on Incoterms® 2010.

Revenue is measured at the fair value of the agreed consideration excluding VAT and taxes charged on behalf of third parties. All discounts and rebates granted are recognised in revenue.

Gross profit

The items revenue, cost of sales, other operating income and external expenses have been aggregated into one item in the income statement called gross profit in accordance with section 32 of the Danish Financial Statements Act.

Other operating income

Other operating income comprise items of a secondary nature relative to the Company's core activities, including gains on the sale of fixed assets.

Cost of sales

Cost of sales includes the cost of goods used in generating the year's revenue.

Other external expenses

Other external expenses include the year's expenses relating to the Company's core activities, including expenses relating to distribution, sale, advertising, administration, premises, bad debts, payments under operating leases, etc.

Staff costs

Staff costs include wages and salaries, including compensated absence and pension to the Company's employees, as well as other social security contributions, etc. The item is net of refunds from public authorities.

Amortisation/depreciation and impairment

The item comprises amortisation/depreciation and impairment of intangible assets and property, plant and equipment.

Consolidated financial statements and parent company financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

The basis of amortisation/depreciation, which is calculated as cost less any residual value, is amortised/depreciated on a straight line basis over the expected useful life. The expected useful lives of the assets are as follows:

Goodwill	10-15 years
Buildings	50 years
Fixtures and fittings, other plant and equipment	5 - 7 years
Leasehold improvements	5 years

Land is not depreciated.

Profit/loss from investments in subsidiaries

A proportionate share of the underlying entities' profit/loss after tax is recognised in the income statement according to the equity method. Shares of profit/loss after tax in subsidiaries are presented as separate line items in the income statement. Full elimination of intra-group gains/losses is made for equity investments in subsidiaries.

Financial income and expenses

Financial income and expenses are recognised in the income statements at the amounts that concern the financial year. Net financials include interest income and expenses as well as allowances and surcharges under the advance-payment-of-tax scheme, etc.

Tax

The parent company is covered by the Danish rules on mandatory joint taxation of the Group's Danish subsidiaries. Subsidiaries are included in the joint taxation arrangement from the date at which they are included in the consolidated financial statements and up to the date when they are no longer consolidated.

The parent company acts as management company for the joint taxation arrangement and consequently settles all corporate income tax payments with the tax authorities.

Tax for the year, which comprises the current income tax charge, joint taxation contributions and deferred tax adjustments, including adjustments arising from changes in tax rates, is recognised in the income statement as regards the portion that relates to the profit/loss for the year and directly in equity as regards the portion that relates to entries directly in equity.

Consolidated financial statements and parent company financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Balance sheet

Intangible assets

Goodwill is measured at cost less accumulated amortisation. Goodwill is amortised over the expected economic life of the asset, measured by reference to Management's experience in the individual business segments. Goodwill is amortised on a straight-line basis over the amortisation period, which is 10-15 years. The amortisation period is higher than 10 years, which is explained by strategically acquired activities with a long-term earnings profile.

Gains and losses on the sale of intangible assets are recognised in the income statement under "Other operating income" or "Other operating expenses", respectively. Gains and losses are calculated as the difference between the selling price less selling expenses and the carrying amount at the time of sale.

Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost includes the acquisition price and costs directly related to the acquisition until the time at which the asset is ready for use.

Gains or losses are calculated as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains and losses from the disposal of property, plant and equipment are recognised in the income statement as other operating income or other operating expenses.

Leases

On initial recognition, leases for assets that transfer substantially all the risks and rewards incident to the ownership to the Company (finance leases) are measured in the balance sheet at the lower of fair value and the present value of the future lease payments. In calculating the net present value, the interest rate implicit in the lease or the incremental borrowing rate is used as the discount factor. Assets held under finance leases are subsequently accounted for in the same way as the Company's other assets.

The capitalised residual lease liability is recognised in the balance sheet as a liability, and the interest element of the lease payment is recognised in the income statement over the term of the lease.

Leases that do not transfer substantially all the risks and rewards incident to the ownership to the Company are classified as operating leases. Payments relating to operating leases and any other rent agreements are recognised in the income statement over the term of the lease. The Company's aggregate liabilities relating to operating leases and other rent agreements are disclosed under "Contingent liabilities".

Investments in subsidiaries

Equity investments in subsidiaries are measured according to the equity method. Equity investments in joint ventures are also measured according to the equity method in the consolidated financial statements.

On initial recognition, equity investments in subsidiaries are measured at cost, i.e. plus transaction costs. The cost is allocated in accordance with the acquisition method; see the accounting policies regarding business combinations.

The cost is adjusted by shares of profit/loss after tax calculated in accordance with the Group's accounting policies less or plus unrealised intra-group gains/losses.

Identified increases in value and goodwill, if any, compared to the underlying entity's net asset value are amortised in accordance with the accounting policies for the assets and liabilities to which they can be attributed. Negative goodwill is recognised in the income statement.

Consolidated financial statements and parent company financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Dividend received is deducted from the carrying amount.

Equity investments in subsidiaries measured at net asset value are subject to impairment test requirements if there is any indication of impairment.

Gains and losses on disposal of subsidiaries and associates are made up as the difference between the sales price and the carrying amount of net assets at the date of disposal including non-amortised goodwill and anticipated costs of disposal. Gains or losses are recognised in the income statement as financial income or financial expenses.

Other securities and investments

Securities and investments consisting of listed shares and bonds are measured at fair value (market price) at the balance sheet date. Investments not admitted to trading on an active market are measured at cost.

Impairment of fixed assets

The carrying amount of intangible assets, property, plant and equipment and investments in subsidiaries is assessed for impairment on an annual basis.

Impairment tests are conducted on assets or groups of assets when there is evidence of impairment. The carrying amount of impaired assets is reduced to the higher of the net selling price and the value in use (recoverable amount).

The recoverable amount is the higher of the net selling price of an asset and its value in use. The value in use is calculated as the present value of the expected net cash flows from the use of the asset or the group of assets and the expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Previously recognised impairment losses are reversed when the reason for recognition no longer exists. Impairment losses on goodwill are not reversed.

Inventories

Inventories are measured at cost in accordance with the FIFO method. Where the net realisable value is lower than cost, inventories are written down to this lower value. The net realisable value of inventories is calculated as the sales amount less costs of completion and expenses required to effect the sale and is determined taking into account marketability, obsolescence and development in the expected selling price.

Goods for resale are measured at cost, which comprises the cost of acquisition plus delivery costs as well as other expenses directly attributable to the acquisition.

Consolidated financial statements and parent company financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Receivables

Receivables are measured at amortised cost.

An impairment loss is recognised if there is objective evidence that a receivable or a group of receivables is impaired. If there is objective evidence that an individual receivable has been impaired, an impairment loss is recognised on an individual basis.

Prepayments

Prepayments recognised under "Assets" comprise prepaid expenses regarding subsequent financial reporting years.

Securities and investments

Securities and investments consisting in listed shares and bonds are measured at fair value (market price) at the balance sheet date. Investments not admitted to trading on an active market are measured at cost.

Cash

Cash comprise bank balances.

Equity

Proposed dividends

Dividend proposed for the year is recognised as a liability once adopted at the annual general meeting (declaration date). Dividends expected to be distributed for the financial year are presented as a separate item under "Equity".

Income taxes

Current tax payables and receivables are recognised in the balance sheet as the estimated income tax charge for the year, adjusted for prior-year taxes and tax paid on account.

Deferred tax is measured according to the liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is not deductible for tax purposes and on office premises and other items where temporary differences, apart from business combinations, arise at the date of acquisition without affecting either profit/loss for the year or taxable income. Where alternative tax rules can be applied to determine the tax base, deferred tax is measured based on Management's intended use of the asset or settlement of the liability, respectively.

Deferred tax is measured according to the tax rules and at the tax rates applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax. Deferred tax assets are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Changes in deferred tax due to changes in the tax rate are recognised in the income statement.

Consolidated financial statements and parent company financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Liabilities

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. On subsequent recognition, financial liabilities are measured at amortised cost, corresponding to the capitalised value, using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan. Financial liabilities also include the capitalised residual lease liability in respect of finance leases.

Other liabilities are measured at net realisable value.

Lease liabilities

Lease liabilities are measured at the net present value of the remaining lease payments including any guaranteed residual value based on the interest rate implicit in the lease.

Deferred income

Deferred income recognised as a liability comprises payments received concerning income in subsequent financial reporting years.

Cash flow statement

The cash flow statement shows the Company's net cash flows broken down according to operating, investing and financing activities, the year's changes in cash and cash equivalents as well as the cash and cash equivalents at the beginning and the end of the year.

Cash flows from operating activities are calculated as the profit/loss for the year adjusted for non cash operating items, changes in working capital and paid corporate income tax.

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of entities and activities and of intangible assets, property, plant and equipment and investments.

Cash flows from financing activities comprise changes in the size or composition of the Company's share capital and related expenses as well as raising of loans, repayment of interest bearing debt and payment of dividends to shareholders.

Cash and cash equivalents comprise cash, short term bank loans and short term securities which are readily convertible into cash and which are subject only to insignificant risks of changes in value.

Financial ratios

The financial ratios stated under "Financial highlights" have been calculated as follows:

Operating profit/loss	Profit/loss before financial items adjusted for other operating income and other operating expenses
Return on assets	$\frac{\text{Profit/loss from operating activites} \times 100}{\text{Average assets}}$
Equity ratio	$\frac{\text{Equity excl. non-controlling interests, year-end} \times 100}{\text{Total equity and liabilities, year-end}}$
Return on equity	$\frac{\text{Profit/loss for the year after tax ex. non-controlling interests} \times 100}{\text{Average equity excl. non-controlling interests}}$
