Statement by the Executive Board

The Executive Board have today discussed and approved the annual report of Fairwind Holding ApS for the financial year 1 January – 31 December 2015.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

It is our opinion that the consolidated financial statements and the parent company financial statements give a true and fair view of the Group's and the Company's financial position at 31 December 2015 and of the results of the Group's and the Company's operations and consolidated cash flows for the financial year 1 January – 31 December 2015.

Further, in our opinion, the Management's review gives a fair review of the development in the Group's and the Company's operations and financial matters and the results of the Group's and the Company's operations and financial position.

We recommend that the annual report be approved at the annual general meeting.

Independent auditors' report

To the shareholders of Fairwind Holding ApS

Independent auditors' report on the consolidated financial statements and the parent company financial statements

We have audited the consolidated financial statements and the parent company financial statements of Fairwind Holding ApS for the financial year 1 January – 31 December 2015, which comprise income statement, balance sheet, statement of changes in equity and notes, including accounting policies, for the Group as well as for the parent company and consolidated cash flow statement. The consolidated financial statements and the parent company financial statements are prepared in accordance with the Danish Financial Statements Act.

Management's responsibility for the consolidated financial statements and the parent company financial statements

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control that Management determines is necessary to enable the preparation of consolidated financial statements and parent company financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on the consolidated financial statements and the parent company financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing and additional requirements under Danish audit regulation. This requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the consolidated financial statements and the parent company financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements and the parent company financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the consolidated financial statements and the parent company financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Company's preparation of consolidated financial statements and parent company financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Management, as well as evaluating the overall presentation of the consolidated financial statements and the parent company financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit has not resulted in any qualification.

Opinion

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the Group's and the parent company's financial position at 31 December 2015 and of the results of the Group's and the parent company's operations and consolidated cash flows for the financial year 1 January – 31 December 2015 in accordance with the Danish Financial Statements Act.

Independent auditors' report

Statement on the Management's review

Pursuant to the Danish Financial Statements Act, we have read the Management's review. We have not performed any further procedures in addition to the audit of the consolidated financial statements and the parent company financial statements. On this basis, it is our opinion that the information provided in the Management's review is consistent with the consolidated financial statements and the parent company financial statements.

Management's review

Operating review

Principal activities of the Group

The Group's principal activities are installation of wind turbines and other related services.

Development in activities and financial matters

The Group's share of profit for the year amounts to DKK 4.845 thousands (2014: DKK 4.671 thousands) and an equity of DKK 50.774 thousands (2014: DKK 41.412 thousands), which is in line with the expectations set forth in the annual report 2014.

Management considers the profit for the year as satisfactory.

Outlook

Management expects the Group to continue the positive development and expects a profit for 2016 which is equal to or better than 2015.

Risks

General risks

The Group is not exposed to specific risks which are not common for the type of business activities performed by the Group except for currency risks mentioned below.

Currency risks

The Group has activities in a variety of countries around the world. Some countries have volatile currencies, which exposes the Group to currency risks whether due to increase or decrease in local currencies compared to DKK.

During the year the Group has experienced a negative effect of especially the development of the Ukrainian currency.

Environmental issues

The Group's activities do not have a significant impact on the environment since the principal activities of the group are installation of wind turbines through sales of manpower.

Research and development activities

The Group has no significant research and development activities.

Subsequent events

No subsequent events have occurred post the balance sheet date which has a significant impact on the Group's financial position.

Consolidated financial statements and parent company financial statements for the period 1 January – 31 December

Notes to the financial statements

1 Accounting policies

The annual report of Fairwind Holding ApS for 2015 has been prepared in accordance with the provisions applying to reporting class C medium enterprises under the Danish Financial Statements Act.

The accounting policies used in the preparation of the consolidated financial statements and the parent company financial statements are consistent with those of last year.

Consolidated financial statements

The consolidated financial statements comprise the parent company, Fairwind Holding ApS, and subsidiaries in which Fairwind Holding ApS directly or indirectly holds more than 50% of the voting rights or which it, in some other way, controls.

On consolidation, intra-group income and expenses, shareholdings, intra-group balances and dividends, and realised and unrealised gains and losses on intra-group transactions are eliminated.

Investments in subsidiaries are set off against the proportionate share of the subsidiaries' fair value of net assets or liabilities at the acquisition date.

Business combinations

Enterprises acquired or formed during the year are recognised in the consolidated financial statements from the date of acquisition or formation. Enterprises disposed of are recognised in the consolidated income statement until the date of disposal. The comparative figures are not adjusted for acquisitions or disposals.

Gains or losses on disposal of subsidiaries are stated as the difference between the sales amount and the carrying amount of net assets at the date of disposal plus non-amortised goodwill and anticipated disposal costs.

Acquisitions of enterprises are accounted for using the acquisition method, according to which the identifiable assets and liabilities acquired are measured at their fair values at the date of acquisition. Provision is made for costs related to adopted and announced plans to restructure the acquired enterprise in connection with the acquisition. The tax effect of the restatement of assets and liabilities is taken into account.

Any excess of the cost over the fair value of the identifiable assets and liabilities acquired (goodwill), including restructuring provisions, is recognised as intangible assets and amortised on a systematic basis in the income statement based on an individual assessment of the useful life of the asset, not exceeding 20 years. Any excess of the fair values of the identifiable assets and liabilities acquired over the cost of the acquisition (negative goodwill), representing an anticipated adverse development in the acquired enterprises, is recognised in the balance sheet as deferred income and recognised in the income statement as the adverse development is realised. Negative goodwill not related to any anticipated adverse development is recognised in the balance sheet at an amount corresponding to the fair value of non-monetary assets. The amount is subsequently recognised in the income statement over the average useful lives of the non-monetary assets.

Goodwill and negative goodwill from acquired enterprises can be adjusted until the end of the year following the year of acquisition.

Consolidated financial statements and parent company financial statements for the period 1 January – 31 December

Notes to the financial statements

1 Accounting policies (continued)

Intra-group business combinations

In connection with business combinations such as acquisition and disposal of equity investments, mergers, demergers, addition of assets and exchange of shares, etc., involving enterprises controlled by the parent company, the uniting-of-interests method is used. Differences between the agreed consideration and the carrying amount of the acquired enterprise are recognised in equity. Moreover, comparative figures for previous financial years are restated.

Non-controlling interests

In the consolidated financial statements, the items of subsidiaries are recognised in full. The non-controlling interests' proportionate shares of the subsidiaries' results and equity are adjusted annually and recognised separately in the income statement and balance sheet.

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rates at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and at the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables and payables and other monetary items denominated in foreign currencies are translated at the exchange rates at the balance sheet date. The difference between the exchange rates at the balance sheet date and at the date at which the receivable or payable arose or was recognised in the latest financial statements is recognised in the income statement as financial income or financial expenses.

Foreign subsidiaries and associates are considered separate entities. The income statements are translated at the average exchange rates for the month, and the balance sheet items are translated at the exchange rates at the balance sheet date. Foreign exchange differences arising on translation of the opening equity of foreign subsidiaries at the exchange rates at the balance sheet date and on translation of the income statements from average exchange rates to the exchange rates at the balance sheet date are recognised directly in equity.

Foreign exchange adjustments of intra-group balances with independent foreign subsidiaries which are considered part of the investment in the subsidiary are recognised directly in equity. Foreign exchange gains and losses on loans and derivative financial instruments designated as hedges of foreign subsidiaries are also recognised directly in equity.

On recognition of foreign subsidiaries which are integral entities, monetary items are translated at the exchange rates at the balance sheet date. Non-monetary items are translated at the exchange rates at the acquisition date or at the date of any subsequent revaluation or impairment of the asset. Income statement items are translated at the exchange rates at the transaction date, although items derived from non-monetary items are translated at the historical exchange rates applying to the non-monetary items.

Income statement

Revenue from sale of services

Revenue from the rendering of services comprising service contracts are recognised on a straight-line basis as the services are rendered.

Consolidated financial statements and parent company financial statements for the period 1 January – 31 December

Notes to the financial statements

1 Accounting policies (continued)

Revenue from construction contracts

Construction contracts concerning assembly of windmills are recognised as revenue by reference to the stage of completion. Accordingly, revenue corresponds to the selling price of work performed during the year (the percentage of completion method). When income from a construction contract cannot be estimated reliably, revenue is recognised only corresponding to the costs incurred to the extent that it is probable that they will be recovered.

The stage of completion is determined by reference to the proportion of costs incurred to the latest cost estimate.

Other external charges

Other external charges comprise costs incurred during the year that are primary in relation to the Company's principal activities.

Staff costs

Staff costs comprise wages and salaries, remuneration, pensions and other staff costs in relation to the employees of the Company, including the Supervisory and Executive Boards.

Other operating income

Other operating income comprises items secondary to the activities of the enterprises, including gains on disposal of intangible assets and property, plant and equipment.

Other operating costs

Other operating costs comprise items secondary to the activities of the enterprises, including losses on disposal of intangible assets and property, plant and equipment.

Profits/losses from investments in subsidiaries and associates

The proportionate share of the results after tax of the individual subsidiaries is recognised in the income statement of the parent company after full elimination of intra-group profits/losses.

The proportionate share of the results after tax of the associates is recognised in both the consolidated income statement and the parent company income statement after elimination of the proportionate share of intra-group profits/losses.

Financial income and expenses

Financial income and expenses comprise interest income and expense, gains and losses on securities, payables and transactions denominated in foreign currencies, amortisation of financial assets and liabilities as well as surcharges and refunds under the on-account tax scheme, etc.

Consolidated financial statements and parent company financial statements for the period 1 January – 31 December

Notes to the financial statements

1 Accounting policies (continued)

Tax on profit/loss for the year

The parent company is covered by the Danish rules on compulsory joint taxation of the Fairwind Holding ApS Group's Danish subsidiaries. Subsidiaries form part of the joint taxation from the date on which they are included in the consolidation of the consolidated financial statements and up to the date on which they exit the consolidation.

The parent company is the administrative company for the joint taxation and consequently settles all corporation tax payments with the tax authorities.

The current Danish corporation tax is allocated by settlement of joint taxation contribution between the jointly taxed companies in proportion to their taxable income. In this relation, companies with tax loss carryforwards receive joint taxation contribution from companies that have used these losses to reduce their own taxable profits.

Tax for the year comprises current tax, joint taxation contributions for the year and changes in deferred tax for the year – due to changes in the tax rate. The tax expense relating to the profit/loss for the year is recognised in the income statement, and the tax expense relating to amounts directly recognised in equity is recognised directly in equity.

Balance sheet

Intangible assets

Goodwill

Goodwill is amortised over its estimated useful life determined on the basis of Management's experience of the specific business areas. Goodwill is amortised on a straight-line basis over a maximum amortisation period of 20 years, longest for strategically acquired enterprises with strong market positions and long-term earnings profiles.

Depreciation is recognised in the income statement under depreciations of intangible and tangible fixed assets.

Property, plant and equipment

Land and buildings, plant and machinery and fixtures and fittings, tools and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated.

Cost comprises the purchase price and any costs directly attributable to the acquisition until the date when the asset is available for use. The cost of self-constructed assets comprises direct and indirect costs of materials, components, subsuppliers, and wages and salaries.

Where individual components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items, which are depreciated separately.

Depreciation is provided on a straight-line basis over the expected useful lives of the assets. The expected useful lives are as follows:

Fixtures and fittings, tools and equipment 2-10 years

Consolidated financial statements and parent company financial statements for the period 1 January – 31 December

Notes to the financial statements

1 Accounting policies (continued)

Depreciation is recognised in the income statement under depreciations of intangible and tangible fixed assets.

Gains and losses on the disposal of property, plant and equipment are determined as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains or losses are recognised in the income statement as other operating income or other operating costs, respectively.

Leases

Leases for non-current assets that transfer substantially all the risks and rewards incident to ownership to the Company (finance leases) are initially recognised in the balance sheet at cost, corresponding to the lower of fair value and the net present value of future lease payments. In calculating the net present value of the future lease payments, the interest rate implicit in the lease or the incremental borrowing rate is used as the discount factor. Assets held under finance leases are subsequently depreciated as the Company's other non-current assets.

The capitalised residual lease obligation is recognised in the balance sheet as a liability, and the interest element of the lease payment is recognised in the income statement over the term of the lease.

All other leases are considered operating leases. Payments relating to operating leases and any other leases are recognised in the income statement over the term of the lease. The Company's total obligation relating to operating leases and other leases is disclosed in contingencies, etc.

Investments in subsidiaries and associates

Investments in subsidiaries are measured under the equity method.

Investments in subsidiaries measured at the proportionate share of the enterprises' net asset values calculated in accordance with the Group's accounting policies minus or plus unrealised intra-group profits and losses and plus or minus any residual value of positive or negative goodwill determined in accordance with the acquisition method.

Investments in subsidiaries with negative net asset values are measured at DKK 0 (nil), and any amounts owed by such enterprises are written down if the amount owed is irrecoverable. If the parent company has a legal or constructive obligation to cover a deficit that exceeds the amount owed, the remaining amount is recognised under provisions.

Net revaluation of investments in subsidiaries is recognised in the reserve for net revaluation in equity under the equity method to the extent that the carrying amount exceeds cost. Dividends from subsidiaries which are expected to be adopted before the approval of the annual report of Fairwind A/S are not recognised in the reserve for net revaluation.

On acquisition of subsidiaries, the acquisition method is applied; see Consolidated financial statements above.

Impairment of non-current assets

The carrying amount of intangible assets and property, plant and equipment as well as investments in subsidiaries and associates is subject to an annual test for indications of impairment other than the decrease in value reflected by depreciation or amortisation.

Consolidated financial statements and parent company financial statements for the period 1 January – 31 December

Notes to the financial statements

1 Accounting policies (continued)

Impairment tests are conducted of individual assets or groups of assets when there is an indication that they may be impaired. Write-down is made to the recoverable amount if this is lower than the carrying amount.

The recoverable amount is the higher of an asset's net selling price and its value in use. The value in use is determined as the present value of the expected net cash flows from the use of the asset or the group of assets and expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Inventories

Inventories are measured at cost in accordance with the FIFO method. Where the net realisable value is lower than cost, inventories are written down to this lower value.

Goods for resale are measured at cost, comprising purchase price plus delivery costs.

The net realisable value of inventories is calculated as the sales amount less costs of completion and costs necessary to make the sale and is determined taking into account marketability, obsolescence and development in expected selling price.

Receivables

Receivables are measured at amortised cost.

Write-down is made for bad debt losses where there is an objective indication that a receivable or a receivable portfolio has been impaired. If there is an objective indication that an individual receivable has been impaired, a write-down is made based on an individual assessment.

Receivables with no objective indication of individual impairment are assessed for objective indication of impairment on a portfolio basis. The portfolios are primarily based on the debtors' registered offices and credit rating in accordance with the Company's and the Group's credit risk management policy. The objective indicators used in relation to portfolios are determined based on historical loss experience.

Write-downs are calculated as the difference between the carrying amount of receivables and the present value of the expected cash flows, including the realisable value of any collateral received. The effective interest rate for the individual receivable or portfolio is used as discount rate.

Construction contracts

Construction contracts are measured at the selling price of the work performed. The selling price is measured by reference to the stage of completion at the balance sheet date and total expected income from the contract.

When the selling price of a construction contract cannot be measured reliably, the selling price is measured at the lower of costs incurred and net realisable value.

Individual construction contracts are recognised in the balance sheet under either receivables or payables. Net assets are determined as the sum of construction contracts where the selling price of the work performed exceeds progress billings. Net liabilities are determined as the sum of construction contracts where progress billings exceed the selling price.

Selling costs and costs incurred in securing contracts are recognised in the income statement when incurred.

Consolidated financial statements and parent company financial statements for the period 1 January – 31 December

Notes to the financial statements

1 Accounting policies (continued)

Prepayments

Prepayments comprise costs incurred concerning subsequent financial years.

Equity

Reserve for net revaluation according to the equity method

Net revaluation of investments in subsidiaries and associates is recognised at cost in the reserve for net revaluation according to the equity method.

The reserve may be eliminated in case of losses, realisation of investments or a change in accounting estimates.

The reserve cannot be recognised at a negative amount.

Dividends

Proposed dividends are recognised as a liability at the date when they are adopted at the annual general meeting (declaration date). The expected dividend payment for the year is disclosed as a separate item under equity.

Corporation tax and deferred tax

Current tax payable and receivable is recognised in the balance sheet as tax computed on the taxable income for the year, adjusted for tax on the taxable income of prior years and for tax paid on account.

Joint taxation contribution payable and receivable is recognised in the balance sheet as "Corporation tax receivable" or "Corporation tax payable".

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax value of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is not deductible for tax purposes and on office premises and other items where temporary differences, apart from business combinations, arise at the date of acquisition without affecting either profit/loss for the year or taxable income. Where different tax rules can be applied to determine the tax base, deferred tax is measured based on Management's planned use of the asset or settlement of the liability, respectively.

Deferred tax assets, including the tax value of tax loss carryforwards, are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity and jurisdiction.

Adjustment is made to deferred tax resulting from elimination of unrealised intra-group profits and losses.

Deferred tax is measured in accordance with the tax rules and at the tax rates applicable in the respective countries at the balance sheet date when the deferred tax is expected to crystallise as current tax.

1 Accounting policies (continued)

Liabilities other than provisions

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. In subsequent periods, the financial liabilities are measured at amortised cost, corresponding to the capitalised value using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan.

Financial liabilities also include the capitalised residual obligation on finance leases.

Other liabilities are measured at net realisable value.

Cash flow statement

The cash flow statement shows the Group's cash flows from operating, investing and financing activities for the year, the year's changes in cash and cash equivalents as well as the Group's cash and cash equivalents at the beginning and end of the year.

The cash flow effect of acquisitions and disposals of enterprises is shown separately in cash flows from investing activities. Cash flows from acquisitions of enterprises are recognised in the cash flow statement from the date of acquisition. Cash flows from disposals of enterprises are recognised up until the date of disposal.

Cash flows from operating activities

Cash flows from operating activities are calculated as the Group's share of the profit/loss adjusted for non-cash operating items, changes in working capital and corporation tax paid.

Cash flows from investing activities

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of enterprises and activities and of intangible assets, property, plant and equipment and investments.

Cash flows from financing activities

Cash flows from financing activities comprise changes in the size or composition of the Group's share capital and related costs as well as the raising of loans, repayment of interest-bearing debt and payment of dividends to shareholders.

Cash and cash equivalents

Cash and cash equivalents comprise cash and short-term marketable securities with a term of three months or less which are subject to an insignificant risk of changes in value.

Financial ratios

The financial ratios stated in the survey of financial highlights have been calculated as follows:

Return on invested capital	$\frac{\text{Operating profit} \times 100}{\text{Average invested capital}}$
Invested capital	Operating intangible assets and property, plant and equipment plus net working capital
Solvency ratio	$\frac{\text{Equity at year end} \times 100}{\text{Total equity and liabilities at year end}}$
Results for analytical purposes	Profit from ordinary activities after tax less non-controlling interests' share
Return on equity	$\frac{\text{Profit from ordinary activities after tax} \times 100}{\text{Average equity}}$

14 Contractual obligations and contingencies, etc.

Contingent liabilities

The parent company is jointly taxed with Danish subsidiaries. Together with the subsidiaries, the Company has joint and several unlimited liability for Danish corporation taxes and withholding taxes on dividends, interest and royalties in the joint taxation unit. At 31 December 2015, the net taxes payable to SKAT by the companies included in the joint taxation amounted to DKK 0 thousand. Any subsequent corrections of the taxable income subject to joint taxation or withholding taxes on dividends, etc., may entail that the companies' liability will increase. The Group as a whole is not liable to others.

Operating lease obligations

The Group's companies have entered into operating leases with a combined lease payment of DKK 1.372 thousand. The remaining term of the leases is 1 to 38 months.

Guarantees

The Group has issued work guarantees of DKK 781 thousands for services delivered.
