##### Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost includes the acquisition price and costs directly related to the acquisition until the time at which the asset is ready for use.

##### Impairment of fixed assets

The carrying amount of property, plant and equipment is subject to an annual test for indications of impairment other than the decrease in value reflected by depreciation or amortisation.

Impairment tests are conducted on assets or groups of assets when there is evidence of impairment. The carrying amount of impaired assets is reduced to the higher of the net selling price and the value in use (recoverable amount).

The recoverable amount is the higher of the net selling price of an asset and its value in use. The value in use is calculated as the present value of the expected net cash flows from the use of the asset or the group of assets and the expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Previously recognised impairment losses are reversed when the reason for recognition no longer exists. Impairment losses on goodwill are not reversed.

##### Receivables

Receivables are measured at amortised cost. Write-down to net realisable value is made for expected losses.

##### Prepayments

Prepayments comprise costs incurred in relation to subsequent financial years.

### Notes to the financial statements

#### 1 Accounting policies (continued)

##### Income taxes

Current tax liabilities are recognised in the balance sheet as the calculated tax charge in respect of the calculated taxable income for the year, adjusted for tax on prior year's taxable income and tax paid in advance.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax value of assets and liabilities. Where alternative tax rules can be applied to determine the tax value, deferred tax is measured based on Management's planned use of the asset or the settlement of the liability, respectively.

Deferred tax assets, including the tax value of tax loss carryforwards, are recognised under assets at the expected value of their utilisation, either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity.

Deferred tax is measured in accordance with the tax rules applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax.

##### Liabilities

Liabilities are measured at net realisable value.
