Statement by the Board of Directors and the Executive Board

Today, the Board of Directors and the Executive Board have discussed and approved the annual report of Sitecore Danmark A/S for the financial year 1 July 2020 - 30 June 2021.

The annual report is prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 30 June 2021 and of the results of the Company's operations for the financial year 1 July 2020 - 30 June 2021.

Further, in our opinion, the Management's review gives a fair review of the matters discussed in the Management's review.

We recommend that the annual report be approved at the annual general meeting.

Independent auditor's report

To the shareholder of Sitecore Danmark A/S

Opinion

We have audited the financial statements of Sitecore Danmark A/S for the financial year 1 July 2020 - 30 June 2021, comprising income statement, balance sheet and notes, including accounting policies. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the Company's assets, liabilities and financial position at 30 June 2021 and of the results of the Company's operations for the financial year 1 July 2020 - 30 June 2021 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's responsibilities for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control that Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements in Denmark will always detect a material misstatement when it exists. Misstatements may arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of financial statement users made on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the company financial statements, whether
 due to fraud or error, design and perform audit procedures responsive to those risks, and obtain
 audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not
 detecting a material misstatement resulting from fraud is higher than for one resulting from error as
 fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of
 internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

Independent auditor's report

- conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.

Management's review

Business review

The company's primary activity has in line with previous years, consisted of the sale of Sitecore's CMS-systems in Denmark, Norway and Finland.

Recognition and measurement uncertainties

Recognition and measurement uncertainties has been specified in Note 2.

Financial review

The income statement for 2020/21 shows a profit of DKK 1,538 thousand against a profit of DKK 3,928 thousand last year, and the balance sheet at 30 June 2021 shows equity of DKK 14,737 thousand. Management considers the Company's financial performance in the year satisfactory.

The company's operations has not been significantly impacted by COVID 19.

The Company has received a letter of support, including subordination of intercompany debt, from the ultimate parent Sitecore Holding II A/S. Management assess no risks regarding the Company's going concern ability. Reference is made to note 3.

Events after the balance sheet date

There are no significant events after the balance sheet date.

Notes to the financial statements

1 Accounting policies

The annual report of Sitecore Danmark A/S for 2020/21 has been prepared in accordance with the provisions in the Danish Financial Statements Act applying to reporting class B entities and elective choice of certain provisions applying to reporting class C entities.

Effective from the financial year 2020/21, the Company has implemented amending act no. 1716 of 27 December 2018 to the Danish Financial Statements Act. The implementation of the amending act has not affected the Company's accounting policies on recognition and measurement of assets and liabilities but has solely entailed a requirement for further disclosures. The accounting policies used in the preparation of the financial statements are consistent with those of last year.

Reporting currency

The financial statements are presented in Danish kroner (DKK'000).

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rate at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables and payables and other monetary items denominated in foreign currencies are translated at the exchange rate at the balance sheet date. The difference between the exchange rates at the balance sheet date and the date at which the receivable or payable arose or was recognised in the most recent financial statements is recognised in the income statement as financial income or financial expenses.

Income statement

Revenue

Revenue is mainly derived from fees charged for software licenses fees, software maintenance fees, and other services comprised of hosting, consulting and education services. For software contracts, which are comprised of several components, the total contract fees or transaction price is allocated to the separate performance obligations for the purpose of revenue recognition.

Revenue recognition requires an agreement with the customer, which creates enforceable rights and obligations between the parties, has commercial substance, and identifies payment terms. In addition, it must be probable that the consideration determined in the contract will be collected.

Revenue is recognized when the customer has obtained control of the license or service and has the ability to use and obtain substantially all of the benefits from the license or service.

For multi-element contracts, the basis for revenue recognition is an assessment of the standalone selling prices for the identified performance obligations, including rebates, discounts, and allowances.

Software license:

Software license revenue represents fees earned from the sale or license of software to customers for use on the customer's premises. In other words, where the customer has the right to use and take

Notes to the financial statements

1 Accounting policies (continued)

possession of the software for installation on the customer's premises or on hardware of third-party hosting providers unrelated to Sitecore or hosted in Sitecore's managed cloud environment.

Software licenses are sold as perpetual licenses or as term subscription licenses, limiting access to the software to a specified term, typically a period of one to three years. Arrangements with the customers typically do not include general right of returns. Term subscription license is generally offered under renewable, fixed fee contracts where payments are typically due annually in advance and may have a term of one year or multiple years. Perpetual license is typically invoiced in full at contract signing. Invoice payment term for all revenue types typically ranges from 30 to 90 days of invoicing.

On premise software license revenue from term subscription or perpetual licenses is recognised upfront, as the performance obligation is satisfied at the point in time when the software is made available to a customer to download and use.

Maintenance services:

Maintenance revenue represents fees earned from providing customers with support services that comprise of technical product support and unspecified future software updates, upgrades, and enhancements for on-premise software products.

Maintenance revenue is typically recognized ratably over the term of the support arrangement, as the performance obligation is satisfied over time. Maintenance services are a stand ready performance obligation to provide technical product support and unspecified updates, upgrades, and enhancements on a when-and-if-available basis. The Company's customer simultaneously receives and consumes the benefits of these support services as the Company performs. Subsequent annual maintenance related to perpetual license is invoiced annually in advance.

Services and other:

Other services revenue primarily represents fees earned from hosting services, consulting services and education services. Time and material contracts are generally invoiced based upon hours incurred on a monthly basis and fixed fee contracts may be invoiced up-front or as milestones are achieved throughout the project. Services revenue is generally recognised as the services are delivered and performance obligation is satisfied over time.

Transaction price allocation:

Fixed term license and perpetual license performance obligations are sold for a broad range of amounts (that is, selling price is highly variable) and a representative standalone selling price is not discernable from past transactions or other observable evidence. As a result, the standalone selling price for fixed term and perpetual licenses included in a contract with multiple performance obligations is determined by applying a residual approach whereby performance obligations with observable standalone selling prices are first allocated a portion of the transaction price based on their respective standalone selling prices, with the residual amount of the transaction price allocated to the fixed term or perpetual license. Standalone selling price for all maintenance services and other services are determined based on observable pricing.

License maintenance contracts are generally priced as a percentage of the net fees paid by the customer to access the license.

Notes to the financial statements

1 Accounting policies (continued)

Costs to obtain a contract:

The Company recognises an asset for the incremental costs of obtaining contracts with customers that are directly associated with the contract if those costs are expected to be recoverable, and records them in Other receivables in the balance sheet. The current portion of the deferred commissions balances are included in other current assets and the non-current portion of the deferred commissions balances are included in other non-current assets as at 30 June 2021. Incremental costs of obtaining contracts are those costs that the Company incurs to obtain a contract with a customer that would not have been incurred if the contract had not been obtained. Incremental costs of obtaining contracts are those costs that the Company incurs to obtain a contract with a customer that would not have been incurred if the contract had not been obtained.

The costs capitalized under the new revenue standard are primarily sales commissions paid to our sales force personnel. Capitalized costs may also include portions of fringe benefits and payroll taxes associated with compensation for incremental costs to acquire customer contracts and incentive payments to partners.

Capitalized costs to obtain a contract are amortized over the expected period of benefit, which we have determined, to be 4 years. Amortization of capitalized costs are presented in external expenses in income statement.

Revenue is measured at the fair value of the agreed consideration excluding VAT and taxes charged on behalf of third parties. All discounts and rebates granted are recognised in revenue.

Gross profit

The items revenue, cost of sales and external expenses have been aggregated into one item in the income statement called gross margin in accordance with section 32 of the Danish Financial Statements Act.

Cost of sales

Cost of sales includes the costs used in generating the year's revenue.

External expenses

Other external expenses include the year's expenses relating to the entity's core activities, including expenses relating to sale, advertising, administration, bad debts etc.

Staff costs

Staff costs include wages and salaries, including compensated absence and pensions, as well as other social security contributions, etc. made to the entity's employees.

Notes to the financial statements

1 Accounting policies (continued)

Depreciation

The item comprises depreciation of property, plant and equipment.

Where individual components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items, which are depreciated separately.

The basis of depreciation, which is calculated as cost less any residual value, is depreciated on a straight line basis over the expected useful life. The expected useful lives of the assets are as follows:

Other fixtures and fittings, tools and equipment 3-5 years

Depreciation is based on the residual value of the asset and is reduced by impairment losses, if any. The depreciation period and the residual value are determined at the acquisition date and are reassessed annually. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognised.

In the case of changes in the depreciation period or the residual value, the effect on the depreciation charges is recognised prospectively as a change in accounting estimates.

Financial income and expenses

Financial income and expenses are recognised in the income statement at the amounts that relate to the financial reporting period. The items comprise interest income and expenses, e.g. from group entities, exchange gains and losses.

Tax

Tax for the year includes current tax on the year's expected taxable income and the year's deferred tax adjustments. The portion of the tax for the year that relates to the profit/loss for the year is recognised in the income statement, whereas the portion that relates to transactions taken to equity is recognised in equity.

The entity is jointly taxed with other Danish group entities. The total Danish income tax charge is allocated between profit/loss-making Danish entities in proportion to their taxable income (full absorption).

Jointly taxed entities entitled to a tax refund are reimbursed by the management company based on the rates applicable to interest allowances, and jointly taxed entities which have paid too little tax pay a surcharge according to the rates applicable to interest surcharges to the management company.

Balance sheet

Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost includes the acquisition price and costs directly related to the acquisition until the time at which the asset is ready for use.

Notes to the financial statements

1 Accounting policies (continued)

Impairment of non-current assets

The carrying amount of property, plant and equipment is assessed for impairment on an annual basis.

Impairment tests are conducted on assets or groups of assets when there is evidence of impairment. The carrying amount of impaired assets is reduced to the higher of the net selling price and the value in use (recoverable amount).

The recoverable amount is the higher of the net selling price of an asset and its value in use. The value in use is calculated as the present value of the expected net cash flows from the use of the asset or the group of assets and the expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Previously recognised impairment losses are reversed when the reason for recognition no longer exists. Impairment losses on goodwill are not reversed.

Receivables

Receivables are measured at amortised cost.

The Company has chosen IAS 39 as interpretation for impairment of financial receivables.

An impairment loss is recognised if there is objective evidence that a receivable or a group of receivables is impaired. If there is objective evidence that an individual receivable has been impaired, an impairment loss is recognised on an individual basis.

Receivables in respect of which there is no objective evidence of individual impairment are tested for objective evidence of impairment on a portfolio basis. The portfolios are primarily based on the debtors' domicile and credit ratings in line with the Company's risk management policy. The objective evidence applied to portfolios is determined based on historical loss experience.

Impairment losses are calculated as the difference between the carrying amount of the receivables and the present value of the expected cash flows, including the realisable value of any collateral received. The effective interest rate for the individual receivable or portfolio is used as discount rate.

Contract assets

Contract assets represent revenue recognised for contracts that have not yet been invoiced to customers, typically for multi-year arrangements. When we have unconditional rights to consideration, except for the passage of time, a receivable will be recorded on the balance sheets.

Prepayments

Prepayments recognised under "Assets" comprise prepaid expenses regarding subsequent financial reporting years.

Equity

Proposed dividends

Dividend proposed for the year is recognised as a liability once adopted at the annual general meeting (declaration date). Dividends expected to be distributed for the financial year are presented as a separate item under "Equity".

Notes to the financial statements

1 Accounting policies (continued)

Income taxes and deferred taxes

Current tax payables and receivables are recognised in the balance sheet as the estimated income tax charge for the year, adjusted for prior-year taxes and tax paid on account.

Deferred tax is measured according to the liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is not deductible for tax purposes and on office premises and other items where temporary differences, apart from business combinations, arise at the date of acquisition without affecting either profit/loss for the year or taxable income. Where alternative tax rules can be applied to determine the tax base, deferred tax is measured based on Management's intended use of the asset or settlement of the liability, respectively.

Deferred tax is measured according to the tax rules and at the tax rates applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax. Deferred tax assets are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Changes in deferred tax due to changes in the tax rate are recognised in the income statement.

Liabilities

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. On subsequent recognition, financial liabilities are measured at amortised cost, corresponding to the capitalised value, using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan.

Other payables are measured at net realisable value.

Deferred income

Deferred income consist of contract liabilities and reflect invoices due or payments received in advance of revenue recognition. Our contract balances will be reported as net contract assets or liabilities on a contract-by-contract basis at the end of each reporting period.

Notes to the financial statements

2 Recognition and measurement uncertainties

The Company makes estimates, and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below. The judgments, estimates, and assumptions made are based on historical experience and other factors that Management considers tobe reliable, but which by their very nature are associated with uncertainty and unpredictability. These assumptions may prove incomplete or incorrect, and unexpected events or circumstances may arise. The most critical judgments, estimates, and assumptions for the individual items are described below.

The Company is also subject to risks and uncertainties that may lead to actual results differing from these estimates, both positively and negatively.

Revenue recognition:

Revenue recognition requires management to make judgements which are based on assumptions onhistorical and forecast information, as well as on regional and industry economic conditions in which we or our clients operate. A short description of main judgments made in relation to revenue recognition follows:

- Assessing whether it is probable that the consideration from contract with clients will be collected requires judgement and might impact the timing and amount of revenue recognition.
- Establishing whether distinct goods or services are considered to be separate performance obligation requires judgement and might impact the timing and amount of revenue recognition.
- The allocation of total transaction fee of a client contract to the distinct deliverables requires judgment in determining an apportionment which reflects the fair value measurement of each performance obligation. This may impact the timing and amount of revenue recognized.
- Determining whether different contracts with the same client are accounted for as one agreement involves the use of judgment as it requires us to assess whether the contracts are negotiated together or linked in any other way. The timing and amount of revenue recognition can vary depending on whether two contracts are accounted for separately or as one single arrangement.

3 Capital matters

Intercompany payables as reflected on the balance sheet will be repaid to group entities as funds become available, and do not have to be repaid sooner than the company has liquidity to do so. Intercompany receivables may not be repaid to the Company until the respective counterparty has the liquidity to do so. The Company has received a declaration of financial support from its ultimate parent, Sitecore Holdings II A/S committing to provide sufficient resources to settle any liabilities as they fall due if the Company does not have sufficient resources of its own. All internal debt of the Company and other group entities is subordinated to other liabilities, and no internal debt will be called or required to be repaid between the Company of any group entities unless and until the individual entity has sufficient liquidity to do so. This declaration is effective for at least 12 months from approval of the Company's annual report.

Notes to the financial statements

	DKK'000	2020/21	2019/20
4	Staff costs Wages/salaries Pensions Other social security costs Other staff costs	14,132 640 5 69 14,846	10,677 572 27 104 11,380
