## **Management 's statement**

---

The board of directors and the executive board have today presented the annual report of Atos IT Solutions and Services A/S for the period of 1 January 2018 - 31 December 2018 (now referred to as Atos).

The annual report has been presented in accordance with the Danish Financial Statements Act.

We consider the accounting policies used appropriate, and in our opinion the annual report provides a true and fair view of the assets and liabilities, the financial position, and the results of the company's activities and cash-flow for the financial period 1 January 2018 - 31 December 2018.

The Management review contains in our opinion a true and fair review of the development of the company's operations and financial matters and net income, and the company's financial position. Furthermore it is our opinion that the management review includes a description of the principal risks and uncertainties that the company faces.

Management's statement

The annual report is recommended for approval by the general meeting.

**To the shareholders of Atos IT Solutions and Services A/S**

**Opinion**

We have audited the annual accounts of Atos IT Solutions and Services A/S for the financial year 1 January to 31 December 2018, which comprise accounting policies used, profit and loss account, balance sheet and notes. The annual accounts are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the annual accounts give a true and fair view of the company's assets, liabilities and financial position at 31 December 2018 and of the results of the company's operations for the financial year 1 January to 31 December 2018 in accordance with the Danish Financial Statements Act.

**Basis for opinion**

We conducted our audit in accordance with international standards on auditing and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the below section "Auditor's responsibilities for the audit of the annual accounts". We are independent of the company in accordance with international ethics standards for accountants (IESBA's Code of Ethics) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these standards and requirements. We believe that the audit evidence obtained is sufficient and appropriate to provide a basis for our opinion.

**The management's responsibilities for the annual accounts**

The management is responsible for the preparation of annual accounts that give a true and fair view in accordance with the Danish Financial Statements Act. The management is also responsible for such internal control as the management determines is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the management is responsible for evaluating the company's ability to continue as a going concern, and, when relevant, disclosing matters related to going concern and using the going concern basis of accounting when preparing the annual accounts, unless the management either intends to liquidate the company or to cease operations, or if it has no realistic alternative but to do so.

**Auditor's responsibilities for the audit of the annual accounts**

Our objectives are to obtain reasonable assurance about whether the annual accounts accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report including an opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with international standards on auditing and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements may arise

## **Independent Auditor's report**

---

due to fraud or error and may be considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions made by users on the basis of the annual accounts

As part of an audit conducted in accordance with international standards on auditing and the additional requirements applicable in Denmark, we exercise professional evaluations and maintain professional scepticism throughout the audit. We also:

- ∞ Identify and assess the risks of material misstatement in the annual accounts, whether due to fraud or error, design and perform audit procedures in response to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting a misstatement resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ∞ Obtain an understanding of the internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- ∞ Evaluate the appropriateness of accounting policies used by the management and the reasonableness of accounting estimates and related disclosures made by the management.
- ∞ Conclude on the appropriateness of the management's preparation of the annual accounts being based on the going concern principle and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may raise significant doubt about the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- ∞ Evaluate the overall presentation, structure and contents of the annual accounts, including the disclosures in the notes, and whether the annual accounts reflect the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in the internal control that we identify during our audit.

### **Statement on the management's review**

The management is responsible for the management's review.

Our opinion on the annual accounts does not cover the management's review, and we do not express any kind of assurance opinion on the management's review.

In connection with our audit of the annual accounts, our responsibility is to read the management's review and in that connection consider whether the management's review is materially inconsistent with the annual accounts or our knowledge obtained during the audit, or whether it otherwise appears to contain material misstatement.

Furthermore, it is our responsibility to consider whether the management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we believe that the management's review is in accordance with the annual accounts and that it has been prepared in accordance with the requirements of the Danish Financial Statement Acts. We did not find any material misstatement in the management's review.

## ***Key figures***

---

The calculation of key figures and ratios does in all material respects follow the Danish Association of Finance Analysts' recommendations and does only in a few respects deviate from the recommendations.

The key figures appearing from the survey have been calculated as follows:

<b>Gross margin</b>	$\frac{\text{Gross results} \times 100}{\text{Net turnover}}$
<b>Profit margin (EBIT margin)</b>	$\frac{\text{Results from primary activities (EBIT)} \times 100}{\text{Net turnover}}$
<b>Equity ratio</b>	$\frac{\text{Equity less minority interests, closing balance} \times 100}{\text{Total liabilities, closing balance}}$
<b>Return on equity</b>	$\frac{\text{Results} \times 100}{\text{Average equity exclusive of minority interests}}$

### **Principal activities**

Atos S.E., the ultimate parent company, is a global digital services leader. Serving a global client base, the group is the European leader in Big Data, Cybersecurity, Digital Workplace and provides Cloud services, Infrastructure & Data Management, Business & Platform Solutions as well as transactional services through Wordline. Atos is focused on business technology that powers progress and helps organizations to create their firm of the future.

Atos headquarters are based in Bezons (France). Atos IT Solutions and Services A/S is part of the Global Business Unit Benelux & The Nordics.

With the goal of being the preferred digital IT partner in the Nordics. Atos Nordics is bundling technological expertise and a wide range of solutions of the Atos operating companies of Denmark, Finland, Estonia and Sweden. Atos Nordics supports companies in their digital transformation and helps them future-proof their business.

During 2018, no major changes have been generated with existing customer agreements, contract renewals are signed with existing customers. The company continued the focus on customer satisfaction, increasing market share and leveraging global and local capabilities.

### **Development in activities and financials**

In 2018 the company continued the path of continuous performance improvement and finalized the year with a, non-satisfying, loss of 13.343 DKKK. The result is, partly, influenced of provision for loss on contracts of 4,1 MDKK. As in 2017, in 2018 the company continued programs to improve efficiency and customer satisfaction.

2018 generated a change in the executive board; Peter Vermehren-Poulsen decided to pursue his career outside Atos and was replaced by Claus Henrik Larsen. In May 2019 Daniela Bünger replaced Lambertus van de Ven in the board of directors.

The net turnover for 2018 declined compared to 2017 due to ending projects.

Atos had on average 97 employees in 2018.

### **Knowledge resources**

The Atos group is committed to developing and deploying new and innovative digital solutions to address our customers' challenges.

It is a key parameter for competitive advantage to have the right competencies and knowledge-resources. Atos has a large number of highly specialized employees, and emphasizes ongoing training and development to maintain this level.

Atos' knowledge-resources are shared worldwide.

Atos is committed to increasing the Atos GreatPlaceToWork Trust Index® reflecting employee's satisfaction to Top 10% Industry benchmark.

## **Management review**

---

In the Atos group great emphasis is made on developing new and highly specialized solutions to address our customers' challenges.

### **Corporate social responsibility and diversity**

Atos Denmark is using the same set of corporate values as the parent company is using.

We refer to the following link where the report for the company's responsibility report for 2016 can be found.

<https://labrador.cld.bz/Atos-Registration-Document-2016/52>

### **Expectations for the future**

The Company will continue supporting its clients with high quality services and cost effective solutions, leveraging the Atos Group's global capabilities in Europe and in emerging countries (offshore centers). The company remains ready to react fast and respond to a change in the economic environment in Denmark.

### **Events after the year end closing**

There have not been any events after the year ends closing, which significantly could influence the company's financial position.

**Market risks**

Atos IT Solutions and Services A/S is facing continuous development and growth of competition in different segments of its business. This is likely to result in increased competitive pressure on pricing and volumes. The company considers these factors when determining its overall business strategy and operating plans while monitoring the execution continuously. The company is prepared to take moderate risks to realize its strategic ambitions.

**Risks related to contracts and performance**

The main risks and uncertainties Atos IT Solutions and Services A/S is facing, includes the adequate execution of business contracts with continuous pressure on pricing and operational excellence, while continuously considering a low risk appetite. Atos IT Solutions and Services A/S is continuously focusing on ensuring the continuity of its service delivery, regardless of circumstances.

Atos IT Solutions and Services A/S aims at reducing risks that threatens the continuity as much as possible. The risk acceptance in this regard is very low. Regarding employees, the risk of technical knowledge is mitigated by training.

Atos IT Solutions and Services A/S does not have significant concentrations of credit risk.

Regarding currency risk, the adopted policy for managing foreign exchange position is to hedge any material exposure as soon as it occurs.

## **Accounting policies used**

---

The annual report for Atos is presented in accordance with those regulations of the Danish Financial Statements Act concerning companies identified as class C enterprises (medium enterprises).

The accounting policies used are unchanged compared to last year, and the annual accounts are presented in Danish kroner (DKK).

Pursuant to section 86(4) of the Danish Financial Statements Act, no cash flow statement for the enterprise has been prepared, as the relevant information is included in the consolidated annual accounts of Atos SE.

### ***Changes in the accounting policies used***

#### **Other changes to the accounting policies used**

The company financial statements used to be presented in accordance with provisions of the Danish Financial Statement Act in regards large – sized reporting class C entities but are for 2018 presented in accordance with the provisions of the Danish Financial Statements Act as regards medium reporting class C entities.

The transition from large-sized reporting class C to medium reporting class C has not occasioned in any changes regarding recognition and measurement, only a decrease of the disclosure requirements in the notes to the financial statements.

#### **Recognition and measurement in general**

Income is recognised in the income statement concurrently with its realisation, including the recognition of value adjustments of financial assets and liabilities. Likewise, all costs, including depreciation, write down, provisions, and reversals which are due to changes in estimated amounts previously recognised in the income statement are recognised in the income statement.

Assets are recognised in the balance sheet when the company is likely to achieve future, financial benefits and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when the company is likely to lose future, financial benefits and the value of the liability can be measured reliably.

At initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described below for each individual accounting item.

Certain financial assets and liabilities are measured at amortised cost, by which method a fixed, effective interest is recognised during the useful life of the asset or the liability. Amortised cost is recognised as the original cost with deduction of any payments and additions/deductions of the accrued amortisation of the difference between cost and nominal amount. In this way capital losses and capital profits are spread over the useful life.

At recognition and measurement, such predictable losses and risks are taken into consideration, which may appear before the annual report is presented, and which concerns matters existing on the balance sheet date.

## **Accounting policies used**

---

### **Translation of foreign currency**

Transactions in foreign currency are translated by using the exchange rate prevailing at the date of the transaction. Differences in the rate of exchange arising between the rate at the date of transaction and the rate at the date of payment are recognised in Income statement account as a financial item.

Debtors, creditors, and other monetary items in foreign currency, which are not settled at the date of the balance sheet, are translated by using the closing rate. The difference between the closing rate and the rate at the time of establishment of the receivable or the payable is recognised in the Income statement under financial income and financial expenses.

Fixed assets acquired and paid for in foreign currency are translated by using the exchange rate prevailing at the date of transaction.

**Income statement**

**Net turnover**

The net turnover is recognised in the profit and loss account if delivery and risk transfer to the buyer have taken place before the end of the year, and if the income can be determined reliably and is expected to be received. The net turnover is recognised exclusive of VAT and taxes and with the deduction of any discounts granted in connection with the sale.

Work in progress on contract work is recognised concurrently with the progress of the production. Thus the net turnover corresponds to the sales value of the completed productions of the year (percentage of completion). The net turnover is recognised when the total income and costs of the contract and the percentage of completion on the balance sheet date can be determined reliably, and when it is likely that the financial benefits will be received by the company.

The company has one geographic and one business segment, and segment information is therefore not disclosed in the financial statements.

**Production costs**

The production costs comprise costs, including salaries, wages and depreciations, which are incurred in order to achieve the net turnover of the year. These costs include direct and indirect costs for raw materials and consumables, salaries and wages, rent and leasing, and depreciations on the production plant.

Furthermore, the production costs comprise research costs, development costs which do not meet the criteria for capitalisation, and depreciation of capitalised development costs.

Additionally, write down in connection with expected losses on contracts are recognised.

## **Accounting policies used**

---

### **Sales cost**

The sales costs comprise costs which have been incurred for sales of goods sold during the year and for sales campaigns carried out during the year.

### **Administration costs**

Administration costs comprise costs which have been incurred during the year for management and administration of the company, including costs for the administrative staff, the executive board, offices, stationery and office supplies, and depreciation.

### **Net financials**

Net financials comprise interest income and interest costs, realised and unrealised capital profits and losses concerning transactions in foreign currency, amortising of financial assets and liabilities, and additions and reimbursements of interest concerning tax payment. Net financials are recognised with the amounts concerning the financial year.

Interest and other costs concerning loans for financing the production of intangible and tangible fixed assets and concerning the production period are not recognised in the cost of the fixed asset.

### **Tax of the results for the year**

The tax of the year comprises the current tax of the year and the changes in deferred tax, and it is recognised in the profit and loss account with the share referring to the results for the year and directly in the equity with the share referring to entries directly on the equity.

**The balance sheet**

**Tangible fixed assets**

Machinery, and other plants, operating assets, fixtures and furniture are measured at cost with deduction of accrued depreciation and write down.

The basis of depreciation is cost with deduction of expected residual value after the end of the useful life of the asset.

The cost comprises the acquisition cost and costs directly attached to the acquisition until the time when the asset is ready for use. As regards assets of own production, the cost comprises costs for materials, components, deliveries from sub-suppliers, direct wages expenditure, and indirect production costs.

Depreciation takes place on a straight-line basis and based on an evaluation of the expected useful life and the residual value of the individual assets:

	<u>Useful life</u>
Other plants, operating assets, fixtures and furniture	3-5 years

Profit or loss deriving from the sales of tangible fixed assets is recognised as the difference between the sales price reduced by the selling costs and the book value at the time of the sale. Profit or loss is recognised in the profit and loss account under other operating income / expenses.

The company's total liabilities concerning operational leasing and rent agreements are recognised under contingencies etc.

**Write down of fixed assets**

The booked values of intangible as well as tangible fixed assets are subject to annual reviews in order to disclose any indications of impairment beyond those expressed by depreciation.

If indications of impairment are disclosed, impairment tests are carried out for each individual asset or group of assets respectively. Write down takes place to the recoverable amount, if this value is lower than the booked value.

The recoverable value is equal to the value of the net selling price or the value in use, whichever is the highest. The value in use is determined as the present value of the expected net income deriving from the use of the asset or the group of assets.

## **Accounting policies used**

---

### **Trade debtors**

Trade debtors are measured at amortised cost which usually corresponds to face value. In order to meet expected losses, write down takes place at the net realisable value.

### **Work in progress**

Work in progress is measured at the market value of the work performed. The market value is measured on basis of the percentage of completion on the balance sheet date and the total expected income from the individual work in progress.

When the market value of a contract cannot be determined reliably, the sales value is measured at the costs incurred or at the net realisable value, if this is lower.

The individual work in progress is recognised in the balance sheet under debtors or liabilities, depending on the net value of the sales price with deduction of prepayments and amounts invoiced on account.

Costs in connection with sales work and the achievement of contracts are recognised in the profit and loss account when incurred.

### **Prepayments**

Prepayments recognized under assets comprise incurred costs concerning the next financial year.

### **Equity - dividend**

Dividend expected to be distributed for the year is recognised as a separate item under the equity. Proposed dividend is recognised as a liability at the time of approval by the general meeting.

### **Corporate tax and deferred tax**

Current tax liabilities and receivable current tax are recognised in the balance sheet as calculated tax of the taxable income of the year adjusted for tax of previous years' taxable income and for tax paid on account.

Deferred tax is measured on the basis of all temporary differences in assets and liabilities with a balance sheet focus.

Deferred tax assets, including the tax value of tax losses eligible for carry-over, are recognised at the value at which they are expected to be realisable, either by settlement against tax of future

## **Accounting policies used**

---

earnings or by setoff in deferred tax liabilities within the same legal tax unit.

Deferred tax is measured on the basis of the tax regulations and tax rates which with the legislation of the balance sheet date will be prevailing when the deferred tax is expected to become a current tax.

### **Other provisions**

Provisions comprise expected costs for loss on work in progress, restructurings, etc. Provisions are recognised when the company has a legal or actual liability which is due to a previous event and when it is likely that the settlement of the liability will result in expenditure of the financial resources of the company.

If the settlement of the liability is expected to take place in some remote future, provisions are measured at the net realisable value or at fair value.

When it is likely that the total costs will exceed the total income of work in progress for the account of others, provisions are made for the total loss expected on the contract. Provisions are recognized as costs under production costs.

### **Liabilities**

Financial liabilities related to borrowings are recognised at the received proceeds with the deduction of transaction costs incurred. In following periods, the financial liabilities are recognised at amortised cost, corresponding to the capitalised value by use of the effective interest. The difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan.

Other liabilities comprising debts to suppliers, subsidiaries, and associates and other debts are measured at amortised cost which usually corresponds to the nominal value.

### **Deferred income**

Received payments concerning income during the following years are recognised under deferred income.

**1 Uncertainties in estimation and judgements**

**Uncertainty of estimation**

When calculating the financial value of certain assets, an estimate is needed, of how future events can affect the value of these assets in this report.

The used estimates are based on expectations, which the management believes to be reasonable, but in the course of events are unsure and unpredictable.

These estimates can be incomplete or uncertain, and unexpected events or circumstances may arise. Apart from this the company is subject to risks and and uncertainties, which may lead to deviations in the estimates.

It might be necessary to change former estimates in relation to changes in circumstances, which were basis for these expectations or due to new knowledge or change in subsequent events.

Estimates that are of significance for the presentation of the financial report, are mainly measured on the sales value of work in progress.

Uncertainties of estimation are also mentioned in the management review.

**Work in progress**

The measurement and valuation of work in progress is based on an evaluation of the project and an expectation to the future development.

Estimates that are linked to future development of the contracts depend on a number of factors.

The actual result may therefore deviate from the estimated over the lifecycle of the contract.

The uncertainty described relates to note 7, work in progress, and is also described in the management review.
