Special risks

Financial risks

The objective of Danske PEP V (USD-A) is to supply risk capital to the portfolio funds, and also to their investments in competitive companies in the North American Small and Mid Market. The highest factor of risk is therefore the changes in the value of the companies in which Danske PEP V (USD-A)'s portfolio funds invest in, which to a significant extent depend on the valuations of comparable listed companies. The valuation of investment in portfolio funds is an accounting estimate and could be connected with some uncertainty.

Interest rate risks

Danske PEP V (USD-A) is less sensitive to the changes in interest rate levels.

Foreign exchange currency risks

Danske PEP V (USD-A)'s investments in portfolio funds have been made in USD. As the capital in Danske PEP V (USD-A) is in USD, the currency risk is considered insignificant.

Investment activity

In the period from inception to September 30, 2016 Danske PEP V (USD-A) has invested in five portfolio funds and one co-investment.

The portfolio funds have in general performed well.

Management's review

Cash resources

Danske PEP V (USD-A)'s cash resources as of September 30, 2016, include cash and cash equivalents, undrawn credit facilities and outstanding commitments from the Limited Partners, and are estimated as satisfactory to cover Danske PEP V (USD-A)'s liabilities including investment obligations, management fees etc.

Expectations for 2016/17

During the financial year, the valuations of the portfolio funds' investments have developed positively. American companies are generally enjoying a continued strong economy and the private equity market is characterized by relatively high exit activity. This development is expected to carry on in 2017, particularly with the economy benefiting from the anticipated increase in financial stimulus.

The development in valuations of the portfolio funds' investments will still be influenced mainly by the development of the individual portfolio companies' results and their ability to generate cash as well as the valuations of comparable listed companies.

The above-mentioned development along with the general economic development will affect the result for 2016/17.

Despite the positive outlook the result is expected to be lower than the current year.

Post balance sheet events

No events have occurred, after the balance sheet date and to the signing of the annual report which is considered of significance to the annual report.
