<b>Financial Ratios</b>					
EBT margin before special items	9.8	7.2	5.5	3.7	3.8
Return on investments	14.1	10.4	7.7	2.3	(2.0)
Liquidity ratio	162	140	132	126	135
Equity ratio	54.7	45.8	44.8	43.0	48.9
Return on equity	19.0	14.9	9.9	1.0	(2.2)
<b>Average number of full-time employees</b>	<b>546</b>	<b>520</b>	<b>421</b>	<b>384</b>	<b>357</b>

\* Including framework agreements, e.g. the F-35 Joint Strike Fighter Program.

Financial ratios are calculated in accordance with "Recommendations and financial ratios" of the Danish Finance Society

### Definitions to Financial Ratios:

EBT margin before special items	$\frac{\text{EBT before special items} \times 100}{\text{Revenue}}$	Liquidity ratio:	$\frac{\text{Current assets} \times 100}{\text{Current liabilities other than provisions}}$
Return on investment:	$\frac{\text{Operating profit} \times 100}{\text{Average operating assets}}$	Equity Ratio:	$\frac{\text{Equity at the end of the year} \times 100}{\text{Total liabilities at year-end}}$
Return on equity:	$\frac{\text{Profit for the year} \times 100}{\text{Average equity}}$		

## Management's Review

### Results for 2021/22

2021/22 was a record year for Terma Aerostructures (TAE) with historically high order intake, revenue, and earnings. Revenue for the fiscal year was 838 MDKK, an increase of 12%. Earnings before tax were 82 MDKK, compared to 54 MDKK in 2020/21 equivalent to a growth of 52%. The order intake of 1,105 MDKK resulted in an unsurpassed order backlog at year-end of 1,320 MDKK.

The strong results were achieved through intense focus on meeting on-time delivery targets as well as efficiency initiatives within the production. TAE had several COVID-19 cases, especially during Q4. However, extra efforts from the staff safeguarded the strong on-time delivery performance.

Rising energy prices and supply chain disruptions have resulted in higher and more broad-based inflation in 2021/22 than experienced in many years. TAE has so far been able to largely mitigate the consequences.

The Board of Directors and Management greatly appreciate the dedication, commitment, and efforts of the employees throughout the year and thank the entire team for the extraordinarily good result achieved.

### Outlook for 2022/23

In 2022/23, revenue and earnings are expected to be on par with 2021/22 as current full-rate production of 170 aircraft per year has been reached.

Elevated inflation is expected to persist throughout 2022/23 and constitutes a risk to profitability and cash. Mitigating actions have been put in place.

### Strategy

TAE continues to work with and support Terma's Next Mission Strategy. The Business Excellence area is key for TAE, which is executed through these focus areas:

Safety

Quality

Delivery

Cost

People

TAE applies a strong and rigorous governance around strategy deployment and shop floor Daily Management.

In TAE, safety always comes first and keeping employees safe during the COVID-19 pandemic has been a key priority. TAE's LTI (Lost Time Injuries) of 8.3 per million working hours is below the average for the Danish Manufacturing Industries, yet still has room for improvement.

TAE will continue focusing on efficiency improvements thereby progressing on the learning curve, in agreement with our key accounts.

## Business Activities

### Market Conditions

TAE is a world-class partner for advanced composites and metal aerostructures and is a key supplier to the world's largest defense program – F-35 Joint Strike Fighter. Over 600 F-35s have been delivered to customers around the world with more countries expected to join the program in the coming years. Through multi-year agreements, TAE delivers aerostructures to Lockheed Martin, BAE Systems, General Dynamics, Marvin Engineering Company, and Northrop Grumman from our production facility in Grenaa, Denmark.

TAE produces parts and components for the aircraft industries at an international level with strict focus on delivering high quality products, on-time delivery, and with a constant strive for cost reduction to ensure a healthy and profitable business.

The F-35 program has grown significantly over the years, and TAE's strong value proposition on structural composite components and Alternate Mission Equipment (AME) across our five key accounts has become a fundamental enabler for our strategic growth ambitions.

### The business

Continuous investments have been made to increase and prepare the production capacity. New and major investments were made to ensure enough capacity to support the order intake increase.

As the strong demand for our products and services continues to increase, we are constantly monitoring our capacity with the objective of remaining an agile and available supplier to all aircraft in the program and to be able to respond to new business opportunities.

### Risks

Elevated inflation is expected to persist throughout 2022/23 and constitutes together with supply chain disruptions a risk to profitability and cash flow. Mitigating actions have been put in place.

TAE's main long-term risk relates to the overall political environment within the F-35 program. TAE is highly dependent on the development of this program; however, the risk is countered through continuous financial management and planning of resources.

In general, there are no significant credit risks relative to individual customers.

TAE primarily sells and buys in DKK, EUR, and USD currencies. Risks relative to other currencies than EUR and DKK are hedged by entering forward exchange contracts in connection with the acceptance and conclusion of contracts.

### Corporate Social Responsibility and Equal Representations of Genders

The Group's CSR efforts are described in a separate Corporate Social Responsibility report, and TAE will support the initiatives accordingly. The report complies with the Danish Financial Statements Act section §99a and §99b. The report also serves as the Group's Communication on Progress to the UN Global Compact.

The CSR Report 2021/22 is available at: [https://www.terma.com/media/hjqjuzl0/terma-csreport\\_2021-2022.pdf](https://www.terma.com/media/hjqjuzl0/terma-csreport_2021-2022.pdf)

## Data Ethics Policy

Terma's policy on data ethics is integrated into the IT policy and GDPR set-up. The focus and handling of data ethics is handled through the following:

The IT Policy, which contains requirements for the handling of IT systems and data in Terma.

Terma's GDPR set-up, which supports the legislation's requirements for GDPR, including data collection and processing, data subjects' rights, and that there are requirements for subcontractors' use of data processing agreements.

Terma continuously educates employees on how to handle data and information entrusted to us by customers, suppliers and employees by continuously updating and informing employees about the above.

## Events after the Balance Sheet Date

Following the end of the fiscal year, no significant events have occurred which affect the assessment of the Company's financial position as reported on 28 February 2022, or the annual report 2021/22.

# Notes

## 1. Accounting Policies

The Annual Report of Terma Aerostructures A/S for 2021/22 has been prepared in accordance with the provisions in the Danish Financial Statements Act applying to large reporting class C entities. According to the derogation in § 86, section 4, a Cash Flow Statement has not been prepared. The Financial Statements of Terma Aerostructures A/S are included in the Consolidated Financial Statements of Terma A/S and of the Group Parent Company Thrigé Holding A/S, Lystrup.

Recognition and measurement of derivative financial instruments are made in accordance with International Financial Reporting Standards (IFRS), cf. the Danish Financial Statements Act, § 37 section 5.

The accounting policies are consistent with those of last year.

### Foreign currency translation

Transactions denominated in foreign currencies are translated at the exchange rates at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and at the date of payment are recognized in the Income Statement as financial income or financial costs.

Receivables, payables, and other monetary items denominated in foreign currencies, which are not settled on the Balance Sheet date, are translated at the exchange rates at the Balance Sheet date. The difference between the exchange rates at the Balance Sheet date and at the date at which the receivable or payable arose or was recognized in the latest Financial Statements is recognized in the Income Statement as financial income or financial costs.

### Derivative financial instruments

Derivative financial instruments are initially recognized in the Balance Sheet at cost and are subsequently measured at fair value. Positive and negative fair values of derivative financial instruments are included in other receivables and other payables, respectively.

Changes in the fair value of derivative financial instruments designated as and qualifying for recognition as a hedge of the fair value of a recognized asset or liability are recognized in the Income Statement together with changes in the fair value of the hedged asset or liability.

Changes in the fair value of derivative financial instruments designated as and qualifying for recognition as a hedge of future assets or liabilities are recognized directly in other receivables or other payables and in the equity. If the hedged forecast transaction results in the recognition of assets or liabilities, amounts which were previously recognized in the equity are transferred to the cost of the asset or liability, respectively. If the hedged forecast transaction results in income or costs, amounts previously recognized in the equity are transferred to the Income Statement in the period in which the hedge item affects the profit or loss.

Changes in the effective portion of the fair value of derivative financial instruments that are designated and qualify as hedge accounting are recognized in the hedging reserve within equity. When the hedged transaction materializes, amounts previously recognized in other comprehensive income are transferred to the same item as the hedged item.

For derivative financial instruments that do not qualify for hedge accounting, changes in fair value are recognized in the Income Statement on a regular basis.

## Income Statement

### ***Revenue***

Revenue comprises the deliveries for the year and the value of construction contracts in process with significant customization.

Revenue from contract work in process with an insignificant degree of customization is recognized in the Income Statement when the transfer of risk to the customer has taken place. Any discounts allowed are deducted from the revenue.

Construction contracts with significant customization are recognized as revenue by reference to the percentage of completion method, which means that revenue corresponds to the selling price of work performed during the year.

### ***Production costs***

Production costs comprise costs, including depreciation, amortization, and salaries, incurred in generating the revenue for the year. Such costs include direct and indirect costs for raw materials and consumables, wages and salaries, depreciation of production plants, and other production costs.

Production costs also comprise research and development costs that do not qualify for capitalization and amortization of capitalized development costs.

Production costs also comprise provisions for losses on construction contracts.

### ***Distribution costs***

Costs incurred in distributing goods sold during the year and in conducting sales campaigns, etc. during the year are recognized as distribution costs. Also, costs relating to sales staff, advertising, exhibitions, and depreciation are recognized as distribution costs.

### ***Administrative costs***

Administrative costs comprise costs incurred during the year for the Management and administration, including costs related to administrative staff, office premises and office expenses, and depreciation.

### ***Other operating income and costs***

Other operating income and costs comprise items secondary to the principal activities, including gains and losses on disposal of intangibles, plant, and equipment.

### ***Financial income and costs***

Financial income and costs comprise interest income and costs, gains and losses on receivables, payables, and other transactions denominated in foreign currencies, amortization of financial assets and liabilities as well as surcharges and refunds under the on-account tax scheme, etc.

### ***Tax on profit for the year***

Terma Aerostructures A/S is subject to the compulsory Danish joint taxation method and therefore taxed jointly

with Thrige Holding A/S and the Group's Danish subsidiaries.

Thriges Holding A/S is the administrative company for the joint taxation, and as a consequence, it settles all tax payments with the authorities.

The current Danish corporate income tax is allocated by payment of the joint taxation contribution between the jointly taxed companies relative to the taxable income. In this respect, companies with tax loss receive joint taxation contributions from companies which have used this loss to reduce their own tax profit.

Tax for the year which comprises current tax for the year, the joint taxation contribution, and changes in deferred tax. The tax expense relating to the profit for the year is recognized in the Income Statement, and the tax expense relating to amounts directly recognized in the equity is recognized directly in the equity.

## **Balance Sheet**

### **Intangibles**

Development projects comprise cost, salaries, and amortization directly attributable to the development activities.

Development projects that are clearly defined and identifiable, where the technical feasibility, sufficient resources, and a potential future market or development opportunities can be evidenced, and where it is intended to produce, market, or use the project, are recognized as intangibles, provided that the cost can be measured reliably, and that there is sufficient assurance that future earnings can cover production costs, selling costs, administrative costs, and development projects. Other development projects in process are recognized in the Income Statement when incurred.

Capitalized development projects are recognized at cost less accumulated amortization and impairment losses.

Following the completion of development projects, capitalized development costs are amortized concurrently with the sale of the developed products, alternatively on a straight-line basis over the estimated useful life. The amortization period is usually 6-15 years.

Software licenses are measured at cost less accumulated depreciation and impairment loss. Software licenses are depreciated over the contract period, however, not longer than 10 years.

Gains and losses on the disposal of development projects and software licenses are determined as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains and losses are recognized in the Income Statement under other operating income and other operating costs,

### **Plant and equipment**

Plant and machinery, and fixtures and fittings, tools and equipment are measured at cost less accumulated depreciation and impairment losses. Cost comprises the purchase price and any costs directly attributable to the acquisition until the date when the asset is available for use. The cost of self-constructed assets comprises direct and indirect costs of materials, components, subcontractors, and wages and salaries. No interest is included.

The cost of a total asset is divided into separate elements which are depreciated separately if the useful life of the individual elements varies.

Depreciation is provided on a straight-line basis over the expected useful lives of the assets as follows:

Plant and machinery: 3-20 years

Fixtures and fittings, tools and equipment 3-7 years

The basis of depreciation is based on cost reduced by the residual value of the asset at the end of its useful life and impairment losses, if any. The depreciation period and the residual value are determined at the time of acquisition and are reassessed every year. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognized.

In case of changes in the depreciation period or the residual value, the effect on the amortization charges is recognized prospectively as a change in accounting estimates.

Depreciation is recognized in the Income Statement as production costs, distribution costs, and administrative costs, respectively.

Gains and losses on the disposal of plant and equipment are determined as the difference between the selling price less selling costs and the carrying amount at the date of disposal. The gains or losses are recognized in the Income Statement as other operating income or other operating costs, respectively.

### **Impairment of non-current assets**

The carrying amount of intangibles, plant, and equipment is subject to an annual test for indications of impairment other than the decrease in value reflected by depreciation or amortization.

Impairment tests are conducted of individual assets or groups of assets when there is an indication that they may be impaired. Write-down is made to the recoverable amount if this is lower than the carrying amount.

The recoverable amount is the higher of an asset's net selling price and its value in use. The value in use is determined as the present value of the expected net income from the use of the asset or the group of assets and expected net cash flows from the disposal of the asset or the group of assets after the end of the useful

Raw materials and consumables are measured at cost, comprising purchase price plus delivery costs.

Finished goods and work in process are measured at cost, comprising the cost of raw materials, consumables, direct wages and salaries, and indirect production overheads. Indirect production overheads comprise indirect materials and wages and salaries as well as maintenance and depreciation of production machinery and equipment as well as factory administration and Management. Borrowing costs are not included in the cost.

The net realizable value of inventories is calculated as the sales amount less costs of completion and costs necessary to make the sale, and is determined taking into account marketability, obsolescence, and development in expected selling price.

### **Receivables**

Receivables are recognized initially at fair value and subsequently measured at amortized cost less impairment losses. The impairment assessment is based on the Expected Credit Loss model (ECL).

The ECL model involves a three-stage approach under which financial assets move through the stages as their credit quality changes.

The stages determine how impairment losses are measured and the effective interest is applied. For trade receivables, the company applies the simplified approach, which permits the use of lifetime ECL. Provision rates are determined based on grouping of trade receivables sharing the same credit risk characteristics and days past due.

Regarding Group intercompany loans, impairment losses will be recognized based on 12-month or lifetime ECL depending on whether a significant increase in credit risk has arisen since initial recognition.

### ***Construction contracts***

Construction contracts are measured at the selling price of the work performed. The impairment assessment is based on the ECL model, cf. above.

The selling price is measured on the basis of the stage of completion at the Balance Sheet date and total expected income from the individual contract work. When the selling price of a contract cannot be measured reliably, the selling price is measured at the costs incurred or at net realizable value, if this is lower.

The individual construction contract is recognized in the Balance Sheet under either receivables or liabilities, depending on the net amount of the selling price less payables. Net assets are constituted by the sum of the construction contracts where the selling price of the work performed exceeds the amount which has been invoiced on account. Net liabilities are constituted by the sum of the construction contracts where the amount which has been invoiced on account exceeds the selling price.

Selling costs and costs incurred in securing contracts are recognized in the Income Statement when incurred.

### ***Prepayments***

### ***Equity***

#### ***Reserve for development costs***

The reserve for development costs comprises recognized development costs reduced by amortizations and taxes. The reserve cannot be used to distribute dividend or cover losses. The reserve will be reduced or dissolved if the recognized development costs are no longer part of the Company's operations by a transfer directly to the distributable reserves under equity.

#### ***Exchange rate adjustment and hedging instrument reserve***

The reserve contains the accumulated net change in the fair value of hedging transactions that meet the criteria for hedging future cash flows and for which the hedged transaction has yet to be realised. The tax effect on these transactions has also been included.

#### ***Proposed dividend***

Dividend proposed is recognized as a liability at the date when they are adopted at the general meeting (declaration date). Dividend during the year (extraordinary) or dividend expected to be distributed for the year are disclosed separately under equity.

#### ***Current tax and deferred tax***

Current tax payable and receivable is recognized in the Balance Sheet as tax computed on the taxable income for the year, adjusted for tax on the taxable income of prior years and for tax paid on account.

Payable and receivable joint tax contributions are recognized in the Balance Sheet under balances for the Parent Company.

Deferred tax is measured using the Balance Sheet liability method on all temporary differences between the carrying amount and the tax value of assets and liabilities. Where different tax rules can be applied to determine the tax base, deferred tax is measured on the basis of the planned use of the asset or settlement of the liability, respectively.

The deferred tax is measured according to the tax rules and tax rates applicable at the Balance Sheet date.

## **Provisions**

Provisions comprise anticipated costs related to losses related to construction contracts in process. Provisions are recognized when, as a result of past events, the Company has a legal or a constructive obligation, and it is probable that settlement of the obligation will result in an outflow of financial resources.

If it is probable that the total costs related to a construction contract will exceed the total income, the expected total loss of the construction contract is recognized as a provision.

## **Liabilities other than provisions**

Other liabilities are measured at amortized cost, which in general match net realizable value.

## **Fair value**

Fair value measurements are based on the principal market. If no principal market exists, the measurement is based on the most advantageous market, i.e. the market that maximizes the price of the asset or liability less transaction and/or transport costs.

All assets and liabilities which are measured at fair value, or whose fair value is disclosed, are classified based on the fair value hierarchy, see below:

- Level 1: Value in an active market for similar assets/liabilities
- Level 2: Value based on recognized valuation methods on the basis of observable market information
- Level 3: Value based on recognized valuation methods and reasonable estimates (non-observable market information).

## **Segment information**

Revenue has been allocated according to business segments and geographical markets. Segment information complies with accounting policies, risks, and internal financial management of the Group.

## 2.

## Special items

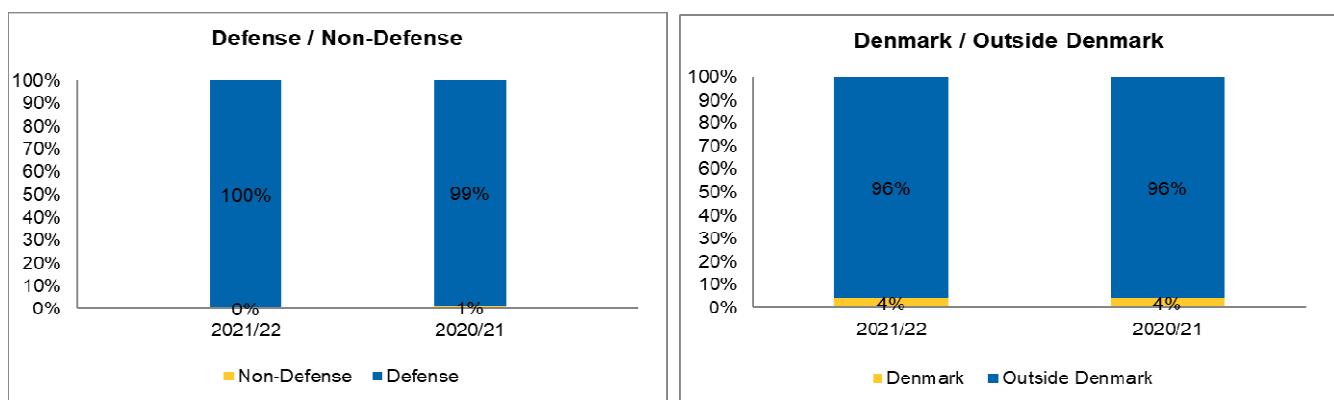

Special items comprise significant income and cost of a special character in relation to the Company's operating activities generating income, i.e. costs in connection with comprehensive restructuring of processes and fundamental structural modifications and related gains and losses on disposals which will be of significance over a period of time.

Special items also comprise other significant one-off expenses which according to the Management are not a part of the operating activities of the Company.

The profit for this year, and last year, have not been impacted by circumstances which according to the Management deviate from being a part of the operating activities.

## 3

### Development projects

Development projects comprise large and small projects in all Terma Aerostructures' Business Areas. Investments are made in the development of:

- Physical products or product platforms based on a set of technologies
- Production processes with future profitability, supporting provision of one or more of the other assets.

A development project is initiated based on an assessment of the business potential described in a business case. Terma uses a gateway model ensuring ongoing follow-up of the development projects.

#### Recognition and measurement in the financial statements

It is a prerequisite for capitalization

- that an explicit sales evaluation exists describing whether the asset in itself or in a modified form may form the basis of repeated sales to one or more customers*
- that the technological challenges are described and that resource requirements of the development projects are described*
- that a financial impact analysis is made.*

Development projects are valued at cost less accumulated amortization and write-downs, or recoverable amount if this is lower.

Capitalized development costs are amortized concurrently with the sale of the developed products and platforms or on a straight-line basis over the estimated useful life.

The amortization profile is determined based on a business case, and the amortization base comprises both existing and expected orders. An estimated useful life of usually no more than 10 years is attached to the amortization profile, adjusted according to the investment amount. The amortization profile is reevaluated on an annual basis.

All development projects are evaluated to ensure that future earnings justify the carrying amount. An annual impairment test of the individual development project will ensure this, in which the discounted expected cash flow is compared with the carrying amount. Ongoing projects are discounted with a WACC of 13-15% after tax, and finished projects are discounted with a WACC of 11-13% after tax.

#### *Sensitivity analysis*

An increase in the WACC percentage of 1% will decrease the discounted value of the projects, but they will all remain within the carrying amount.

#### **10. Plant and equipment**

	Plant and machinery	Fixtures and fittings, tools and equipment	Plant and equipment under construction	Total
DKK 1,000				
Cost at 1 March 2021	351,883	13,719	38,896	404,498

1-5 years	9,282	12,868
>5 years	11,323	9,730
	<b>24,344</b>	<b>27,493</b>

### 14. Non-current liabilities other than provisions

	Liabilities	Fair value	Nominal value	Long-term liabilities	Short-term liabilities	Loans outstanding after 5 years
DKK 1,000						
Other non-current liabilities	24,508	24,508	24,508	24,508	-	24,508
<b>28 February 2022</b>	<b>24,508</b>	<b>24,508</b>	<b>24,508</b>	<b>24,508</b>	<b>-</b>	<b>24,508</b>

### 15. Lease commitments

	2022	2021
<b>Lease commitments</b>		
Operational lease falling due within 5 years	5,150	2,862
Operational lease falling due after 5 years	<b>617</b>	<b>-</b>

The Company has entered into a rent agreement with the Parent Company Terma A/S, valid until 1 March 2023. The annual rent amounts to 8,346 tDKK (2020/21: 7,513 tDKK), and as of 28 February 2022, the total commitment amounts to 8,346 tDKK (2020/21: 15,026 tDKK).

### 16. Events after the balance sheet date

Following the end of the fiscal year, no significant events have occurred which affect the assessment of the Company's financial position as reported on 28 February 2022, or the annual report 2021/22.

### 17. Charges and security

No assets have been charged or otherwise provided as security for bankers or others.

### 18. Contingent liabilities

The Company is jointly taxed with Thrigé Holding A/S and the other Danish subsidiaries in the Group. Within the taxation group, the Company is jointly and severally liable in line with the other Group members for payment of corporate income tax and withholding tax in Denmark. The net obligations of the jointly taxed companies towards the Danish Central Tax Administration (SKAT) appear from the Thrigé Holding A/S (CVR No. 26 31 16 83) annual accounts. Any corrections to the joint taxation income and withholding tax appearing at a later time may result in the Company being liable for a larger amount.

## 19. Related parties

Related parties of Terma Aerostructures A/S consist of:

### Constituting control

Terma A/S, 8520 Lystrup, 100% ownership.

Terma A/S is a 100% owned subsidiary of Thrige Holding A/S (CVR no. 26 31 16 83), Lystrup, which again is 100% owned by Thomas B. Thriges Fond (CVR-no. 10 15 62 11), Herlev.

### Other related parties

The Company's related parties exercising significant influence comprise the Board of Directors, Management, managerial staff, and their family members. Further, related parties comprise companies in which the above-mentioned persons have substantial interests.

### Transactions with related parties

	2021/22	2020/21
DKK 1,000		
Sale to Parent Company	74,306	17,440
Purchase from Parent Company	29,480	25,792
Purchase from Group companies	13,085	14,065
Purchase of services from Parent Company	45,891	43,859
Rent paid to Parent Company	8,346	7,513
Interest paid to Parent Company	1,616	1,430
Interest paid to Group company	150	120
Reinvoicing of cost to Parent Company	560	1,160
Reinvoicing of cost from Parent Company	3,475	3,272
Reinvoicing of cost from Group company	146	424
Receivable from parent company	171,215	118,448
Debt to Group company	1,225	3,832

## 20. Financial instruments and financial risk

Through its operations, Terma Aerostructures A/S is exposed to certain financial risks; these financial risks relate to and are defined as follows:

Liquidity risk	The risk that the Company is not able to meet its future cash flow needs
Credit risk	The risk of incurring a financial loss if a customer or counterpart fails to fulfill its contractual obligations
Market risk	The risk of losses in financial positions arising from movements in interest, raw material prices, and currency rates

Policies and objectives for handling financial risks are regularly assessed and approved by the Board of Directors.

Sensitivity analyses and stress tests are performed. Sensitivity information reported is calculated at Balance Sheet date and comprises only sensitivity relating to financial instruments, so the amounts disclosed do not necessarily give a complete picture of the Company's risk relating to changes in currency rates and interest rates.

## Liquidity risk

<u>Related business activity</u>	<u>Implication</u>	<u>Risk mitigation</u>	<u>Impact</u>
The Group is exposed to <i>Effect:</i> liquidity risk due to ongoing normal business activities, and repayment of loans.	<i>Medium</i>	Liquidity is managed at Group level.	The Company has entered into a cash pool arrangement with the Parent Company Terma A/S, and a current liquidity surplus or deficit will be lent to or borrowed from Terma A/S on market conditions.

Investments are classified as financial assets at fair value through profit or loss (financial derivatives) or as loans and receivables. The classification depends on the purpose for which the investments were acquired. Financial assets classified at fair value through profit or loss are investments that are measured and reported at fair value in the internal management reporting. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are included in trade receivables and other receivables in the statement of financial position.

Below is a maturity analysis of the financial liabilities at year-end, 28 February 2022 and 28 February 2021:

	2022			2021				
	Carrying amount/ contractual cash flow	<1 year	>1 year <5 years	>5 years	Carrying amount/ contractual cash flow	<1 year	>1 year <5 years	>5 years
DKK 1,000								
Liabilities other than provisions	274,904	250,396	-	24,508	345,070	320,001	-	25,069

## Credit risk

<u>Related business activity</u>	<u>Implication</u>	<u>Risik mitigation</u>	<u>Impact</u>
The Company is exposed to credit risk from receivables and from balances with associated companies and Parent Company.	<i>Effect:</i> Medium	The Company conducts credit assessments of new customers and partners.	In general, there is no significant credit risk relative to individual customers.
Risks related to receivables occur when customers do not pay as agreed.	<i>Threat:</i> Low	Customers outside Europe and North America are individually assessed and based on the assessment, the trade may be handled on letter of credit.  Credit insurance from EKF is used if deemed necessary.	In 2021/22, the Company has not incurred any financial loss on debtors.  The Company does not expect any loss on trade receivables, construction contracts, or amounts owed by associated companies.

In 2021/22, there was no impairment of receivables. 7% of the receivables exceeded payment terms with more than one month.

Accounts receivable from sales are specified as follows:

DKK 1,000	2022	2021
Europe	4,047	4,085
North and central Amerika	43,434	22,437
<b>Accounts receivable at 28 February</b>	<b>47,481</b>	<b>26,522</b>

Overdue accounts receivable:

DKK 1,000	2022	2021
Up to 1 month	13,888	927
Between 1 and 2 months	2,627	1,332
More than 2 motnhs	855	834
<b>Overdue accounts receivable at 28 February</b>	<b>17,370</b>	<b>3,093</b>

## Interest rate risk

The Company has entered into a cash pool arrangement with the Parent Company Terma A/S, and a current liquidity surplus or deficit will be loaned to or borrowed from Terma A/S on market conditions.

### Sensitivity to interest rate risk

The calculated effect of a 1%-point increase in the interest rate would affect the profit/loss by 1.7 MDKK (2020/21: 1.1 MDKK) and the equity by 1,3 MDKK (2020/21: 0.9 MDKK).

A 1%-point decrease of the interst rate would have a corresponding inverse effect. However, not below zero interest rates.

## Currency risk

The financial statement is reported in DKK.

<u>Related business activity</u>	<u>Implication</u>	<u>Risik mitigation</u>	<u>Impact</u>
The Company is exposed to currency risk primarily related to buying and selling in DKK, EUR, and USD.	Effect: High Threat: Low	It is the Company's policy to use derivative instruments to hedge currency risks, especially USD cash flows, and forward exchange contracts are entered into in connection with the acceptance and conclusion of contracts.	The effect from currency risk originates mainly from cash flows in connection with buying and selling in USD. The Company has hedged these currency risks in accordance with the Group's policy. As in 2020/21, the Company has only used derivative financial instruments to hedge exchange rate risks.

At year-end the company held the following derivative financial instruments:

2021/22		Payable / maturity date	Receiv-ables	Liabilities other than provisions	Hedged by forward exchange contracts	Net position
Currency (DKK 1,000)		<1 year	27,377	(16,324)	(12,278)	(1,225)
USD		<1 year	26	(9,800)	-	(9,774)
EUR		<1 year	11	(2,002)	1,991	-
GBP			<u>27,414</u>	<u>(28,126)</u>	<u>(10,287)</u>	<u>(10,999)</u>
2020/21		Payable/ maturity date	Receiv-ables	Liabilities other than provisions	Hedged by forward exchange contracts	Net position
Currency (DKK 1,000)		<1 year	22,437	(26,521)	340	(3,744)
USD		<1 year	212	(7,761)	0	(7,549)
EUR		<1 year	10	(1,964)	1,954	-
GBP			<u>22,659</u>	<u>(36,246)</u>	<u>2,294</u>	<u>(11,293)</u>

### Sensitivity of currency risk

To measure currency risk in accordance with IFRS 7, sensitivity is calculated as the change in fair value of future cash flows from financial instruments as a result of fluctuations in exchange rates on the Balance Sheet date. Other things being equal and after tax, sensitivity to fluctuations in USD at Balance Sheet date based on a 10% decrease in currency translation rates against DKK would result in a net profit/(loss) of 0 MDKK (2020/21: 0 MDKK) and affect equity by 0 MDKK (2020/21: 0 MDKK). The effect of a 10% increase in the currency translation rates against DKK would also result in a net profit/(loss) of 0 MDKK.

## Exchange rate contracts

DKK 1,000	Contractual value		Fair value		Gains and losses recognized in the equity		
	Period	2022	2021	2022	2021	2022	2021

Derivative financial instruments	<b>8,520</b>	<b>-</b>

## Raw material price risk

<u>Related business activity</u>	<u>Implication</u>	<u>Risk mitigation</u>	<u>Impact</u>
The Company is exposed to risk concerning raw material as aluminium and composite materials forming part of the products sold.	Effect: Low Threat: Medium	Raw material price risk has until now not been hedged. The impact on the financial result is immaterial as major parts of raw materials are bought in accordance with customers' requirement and their "Right to buy" agreements. These agreements are firm fixed prices in USD in 3-5 years.	The developments in raw material prices have had an immaterial impact on the Company's financial results in 2020/21 and 2021/22.  The development in raw material prices is followed continuously.

**21. Proposed profit appropriation**

## Statements and Reports

### Statement by the Board of Directors and Management

The Board of Directors and Management have today discussed and approved the Annual Report of Terma Aerostructures A/S for the 2021/22 fiscal year.

The Annual Report has been prepared in accordance with the Danish Financial Statements Act.

In our opinion, the Financial Statements give a true and fair view of the Company's financial position at 28 February 2022 and of the results of the Company's operations for the 2021/22 fiscal year.

Further, we consider the Management's Review to present a fair disclosure of the development in the Company's operations and financial conditions, the results for the year, and financial position as well as a description of the most significant risks and uncertainty factors that the Company face.

We recommend that the Annual Report be approved at the annual general meeting.

# Statements and Reports

## Independent Auditor's Report

### To the stockholder of Terma Aerostructures A/S

#### Opinion

We have audited the Financial Statements of Terma Aerostructures A/S for the fiscal year 1 March 2021 – 28 February 2022 which comprise Income Statement, Balance Sheet, Statement of Changes in Equity and Notes, including Accounting Policies. The Financial Statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company at 28 February 2022 and of the results of the Company's operations for the fiscal year 1 March 2021 – 28 February 2022 in accordance with the Danish Financial Statements Act.

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the Company Financial Statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### *Independence*

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

#### Management's responsibilities for the Financial Statements

Management is responsible for the preparation of the Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of the Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the Financial Statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

## Auditor's responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance as to whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the Financial Statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and contents of the Financial Statements, including the note disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## **Statement on the Management's Review**

Management is responsible for the Management's Review.

Our opinion on the Financial Statements does not cover the Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the Management's Review and, in doing so, consider whether the Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the Management's Review.
