PF Group A/S

Sverigesvej 2, 7480 Vildbjerg

Company reg. no. 35 24 21 47

Annual report

1 January - 31 December 2017

The annual report have been submitted and approved by the general meeting on the 22 February 2018.

Hans Lohmann
Chairman of the meeting

Contents

Notes to users of the English version of this document:

- To ensure the greatest possible applicability of this document, British English terminology has been used.
- Please note that decimal points remain unchanged from the Danish version of the document. This means that for instance DKK 146.940 is the same as the English amount of DKK 146,940, and that 23,5 % is the same as the English 23.5 %.

Management's report

The board of directors and the managing director have today presented the annual report of PF Group A/S for the financial year 1 January to 31 December 2017.

The annual report has been presented in accordance with the Danish Financial Statements Act.

We consider the accounting policies used appropriate, and in our opinion, the consolidated annual accounts and the annual accounts provide a true and fair view of the assets, the liabilities and the financial position, consolidated and for the company respectively as on 31 December 2017, and of the results of the activities, consolidated and of the company respectively and of consolidated cash flows in the financial year 1 January to 31 December 2017.

We are of the opinion that the management's review includes a fair description of the issues dealt with.

The annual report is recommended for approval by the general meeting.

Independent auditor's report

To the shareholders of PF Group A/S

Opinion

We have audited the consolidated annual accounts and the annual accounts of PF Group A/S for the financial year 1 January to 31 December 2017, which comprise accounting policies used, profit and loss account, balance sheet, statement of changes in equity and notes, consolidated and for the company respectively and consolidated cash flow statement. The consolidated annual accounts and the annual accounts are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated annual accounts and the annual accounts give a true and fair view of the assets, liabilities and financial position, consolidated and for the company respectively at 31 December 2017 and of the results of the company's operations, consolidated and for the company respectively and of consolidated cash flows for the financial year 1 January to 31 December 2017 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with international standards on auditing and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the below section "Auditor's responsibilities for the audit of the consolidated annual accounts and the annual accounts". We are independent of the company in accordance with international ethics standards for accountants (IESBA's Code of Ethics) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these standards and requirements. We believe that the audit evidence obtained is sufficient and appropriate to provide a basis for our opinion.

The management's responsibilities for the consolidated annual accounts and the annual accounts

The management is responsible for the preparation of consolidated annual accounts and annual accounts that give a true and fair view in accordance with the Danish Financial Statements Act. The management is also responsible for such internal control as the management determines is necessary to enable the preparation of consolidated annual accounts and annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated annual accounts and the annual accounts, the management is responsible for evaluating the group's and the company's ability to continue as a going concern, and, when relevant, disclosing matters related to going concern and using the going concern basis of accounting when preparing the consolidated annual accounts and the annual accounts, unless the management either intends to liquidate the group or the company or to cease operations, or if it has no realistic alternative but to do so.

Independent auditor's report

Auditor's responsibilities for the audit of the consolidated annual accounts and the annual accounts

Our objectives are to obtain reasonable assurance about whether the consolidated annual accounts and the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report including an opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with international standards on auditing and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements may arise due to fraud or error and may be considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions made by users on the basis of the consolidated annual accounts and the annual accounts.

As part of an audit conducted in accordance with international standards on auditing and the additional requirements applicable in Denmark, we exercise professional evaluations and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement in the consolidated annual accounts and the annual accounts, whether due to fraud or error, design and perform audit procedures in response to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting a misstatement resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of the internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's and the company's internal control.

- Evaluate the appropriateness of accounting policies used by the management and the reasonableness of accounting estimates and related disclosures made by the management.

- Conclude on the appropriateness of the management's preparation of the consolidated annual accounts and the annual accounts being based on the going concern principle and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may raise significant doubt about the group's and the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated annual accounts and the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group and the company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and contents of the consolidated annual accounts and the annual accounts, including the disclosures in the notes, and whether the consolidated annual accounts and the annual accounts reflect the underlying transactions and events in a manner that gives a true and fair view.

Independent auditor's report

- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or the business activities within the group to express an opinion on the consolidated annual accounts. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in the internal control that we identify during our audit.

Statement on the management's review

The management is responsible for the management's review.

Our opinion on the consolidated annual accounts and the annual accounts does not cover the management's review, and we do not express any kind of assurance opinion on the management's review.

In connection with our audit of the consolidated annual accounts and the annual accounts, our responsibility is to read the management's review and in that connection consider whether the management's review is materially inconsistent with the consolidated annual accounts and the annual accounts or our knowledge obtained during the audit, or whether it otherwise appears to contain material misstatement.

Furthermore, it is our responsibility to consider whether the management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we believe that the management's review is in accordance with the consolidated annual accounts or the annual accounts and that it has been prepared in accordance with the requirements of the Danish Financial Statement Acts. We did not find any material misstatement in the management's review.

The financial highlights for 2013 only comprise the period 15 Maj - 31 December.

Management's review

The principal activities of the group

The principal activity of the parent enterprise is the ownership, management and administration of subsidiaries.

The principal activity of PF Group is the manufacturing and processing of materials and products to the metal industry and the building industry.

The products are sold worldwide, and the major part of the turnover is exported from Denmark.

Development in activities and financial matters

A merger with the company`s parent enterprise has been completed in 2017. The merger is recognized by the book value method and thus without adjusting comparative figures. The merger affects the profit for the year negatively with TDKK 4.814 and direct positive transactions on the equity with TDKK 4.814. The merger has no net effect on equity 31 December 2017. We refer to the disclosures in the accounting policies for further information.

In several ways 2017 was a good but also challenging year to PF Group.

During the year, the group focused on selling to existing customers, however, attention was also give to the development of new markets; potential customers and possibilities in relation to products.

The Growth Strategy of PF Group has in 2017 been prolonged and updated in cooperation with external advisers, so that it today covers 2018-2020. The Strategy serves as guideline for the daily operation and as anchor for the direction of the group in the years to come.

In 2017 PF Group has finalized a group project implementing new common ERP-setup including a review and optimization at the administrative flows and procedures. The project went well, and today PF Group has new ERP solution based on a renewed and updated IT infrastructure.

In 2017, PF Group experienced a turnover of MDKK 401,9 (2016: MDKK 370,7) achieving a result before tax and merger cost of MDKK 44,0 compared to a result before tax of MDKK 42,1 in 2016. From year-end 2016 to year-end 2017, the balance sheet total went from MDKK 333,8 to MDKK 319,2.

Taking the challenges into account, the executive board and the board of directors consider the results for the year 2017 satisfying.

The future

Referring to The Growth Strategy, the future for PF Group is expected to show an increase in activities and a higher result before tax. Initiatives from 2017 and new opportunities in the future will support the positive forecasts. The common ERP-setup and the harmonized and updated administrative routines will supports the accomplishment of the strategic objectives, and allow PF Group to upscale activities.

Material business risks

The PF Group considers itself to be competitive on prices in the markets in which it operates. Still, there are and will continue to be a pressure regarding sales prices, which requires measures concerning automation and efficiency.

The application of raw materials like steel, aluminum etc. poses a particular risk, since fluctuation in purchasing prices of raw material does not always follow trends in the market prices of the finished goods.

The sales management is aware of the challenge and is working continuously to minimize the risk.

The group's credit risk on trade receivables is minimized by means of credit insurance, where it is considered profitable. The group also cooperates with collection agencies, so that the actual losses on bad debts are kept to a minimum. It is not, however, the group's general policy to hedge commercial foreign exchange risks.

Financial risk

The board continuously assesses whether the capital structure of PF Group is consistent with company interests and with the interests of company stakeholders. The main objective is to ensure a capital structure supporting the long-term profitable growth.

On 31 December 2017, the net interest-bearing debts of PF Group amounted to MDKK 100,7 and the solvency ratio was 43 %.

As the interest-bearing debt represents a significant amount, any major changes in interest rates will have a direct effect on the consolidated earnings. In 2017, no amendments have been made to guidelines or procedures of management and administration of this, and in order to minimize the interest risk, a part of the interest-bearing debts of PF Group has been incurred at fixed interest rates.

Statement of corporate social responsibility

PF Group has in 2015 implemented an overall policy for corporate social responsibility, including human rights, climate and environment. The signed "Business Principles & Corporate Social Responsibility" was reviewed by the Board in 2017. The policy is based on the ten principles of corporate social responsibility in the UN Global Compact: The Universal Declaration of Human Rights (principles 1-2), The International Labor Organization's Declaration on Fundamental Principles and Rights at Work (principles 3-6), The Rio Declaration on Environment and Development (principles 7-9) and The United Nations Convention Against Corruption (principle 10). PF Group does not make a dedicated COP-report (Communication On Progress), but long-term sustainability and to uphold responsible business ethics has always been part of "Good Praxis" by PF Group.

<u>Human rights and Fundamental Principles and Rights at Work (UN Global Compact principles 1-6):</u>

PF Group wish to develop its core business and to handle its strategic challenges in a financially and socially responsible manner. A part of the human attitude of PF Group is equal opportunities for all employees irrespective of gender or ethnicity. PF Group hire, remunerate and promote employees on a basis of skills, competences and performance - not according to gender (over- or under-represented), religion nor race. PF Group perform its business in a transparent and nondiscrimination manner - neither positive nor negative discriminating, and PF Group uphold the freedom of association and the effective recognition of the right to collective bargaining. PF Group continuously develops employees' competence and flexibility and provides safe and healthy working conditions in the same way as PF Group has entered into a cooperation with local authorities and language schools about activation of refugees and training of foreign workers. PF Group carries out voluntary activities and social actions to achieve its strategic goals. The working environment in general and social responsibilities against individuals in the factories and in the administration are on ongoing basis evaluated, and corrective actions are regularly implemented. Initiatives related to external parties such as suppliers and sub-contractors are also to be evaluated. PF Group complies with legislation in the countries and local societies in which it is operating.

<u>Environmental issues (UN Global Compact principle 7-9):</u>

PF Group is environmentally conscious and is engaged in targeted and systematic efforts to continuously protecting the environment through energy and material optimization, pollution prevention, waste minimization and environmental management. The goal is continually to reduce environmental impacts caused by the business operation. The ambition is to implement same or similar politics and principles in all PF Group entities, and will promptly develop and implement plans and programs to correct any non-compliant practices.

In 2017 PF Group has invested in further automatization in the factories among others to reduce energy consumption, implemented significant initiatives within optimization of material consumption and focused on developments within the CO2 neutral aluminum range. Recycling initiatives and new waste handling processes have been implemented.

All PF Group companies are environmentally approved if necessary in accordance with local requirements. There is no pending environmental cases within PF Group.

Management's review

Corruption (UN Global Compact principle 10):
PF Group works against corruption in all its forms, including extortion and bribery. PF Group conducts its business with high ethical standards, honesty and respect for others, and is in compliance with the laws and regulations in the countries PF Group operates.

Once per year CSR and the signed “Business Principles & Corporate Social Responsibility” is subject on the agenda for a board meeting.

Stakeholders and communication
PF Group continuously seeks to develop and maintain good relationships with relevant stakeholders as such relationships are considered to be of great value to the group in terms of positive development.

PF Group has drawn up a communications policy and additional policies on various key areas such as staff, environment and responsibility towards customers and society as a whole. The policies and related procedures are to ensure that information of importance for e.g. investors, employees and authorities is forwarded to same and published in accordance with current rules and agreements. Part of the responsibility of the board of directors is to ensure both compliance and current adaptation of the guidelines in accordance with the development within the group as well as in its environment.

Staff matters and know-how
During the year, the group has an increase in the number of competent and experienced employees, which has strengthened the group's base in terms of technical competence and managerial insight, while restructuring in minor legal entities has resulted in a reduction in the number of employees.

Development in the total workforce:

	Denmark	Abroad
Staff beginning 2017	171	111
Recruitments net during the year	4	11
Staff year-end 2017	175	122

On average, PF Group has employed 297 people during 2017. In 2016 the figure showed 281.

The production activity of PF Group requires special skills and knowledge of the techniques in this particular field of business. The objective of the group is to hold the latest knowledge in the field, as well as to ensure rapid adaptability.

In order to continue to maintain the high level of knowledge and its development, it is crucial that PF Group can recruit on a current basis and retain staff with the necessary professional skills in production and in administration at home as well as abroad.

Corporate governance

The board of directors and the executive board consistently seek to ensure that the company's management structure and control systems are appropriate and that they function satisfactorily. On an ongoing basis, the management also develops and maintains internal procedures, to achieve the active, safe and profitable management of the company.

The planning of management tasks is based on the Companies Act, the Danish Financial Statements Act, the Articles of Association of the group, as well as on good practice for companies of the same size and with the same international reach as PF Group.

By virtue of its status as a company owned by a private equity fund, PF Group aims to comply with the DVCA guidelines for responsible ownership and good corporate governance. The report refers to www.dvca.dk for further information on guidelines, and likewise, the group annual accounts shall be published by the usual channels.

Target figures and policies for the under-represented sex

Pursuant to Danish legislation on gender composition (Section 99b of the Danish Financial Statements Act) at various management level undertakings, the company has decided that the members of the board appointed by the general meeting should represent minimum 25 % of the under-represented gender by the ordinary general meeting in 2020, at the latest. In 2017, the gender balance of the company's board appointed by the general meeting showed: four men and no women, and does not yet meet the target for 2020. The company is not currently considering changing the composition of the board of directors; as there is a balance in respect of skills and capability. When a vacancy on the board occurs, the company will make sure that the law regarding the under-represented Gender is taken into account.

The business area of PF Group is a traditionally male-dominated field, and the company must make sure to get enough women into the organization at all levels. What is defined as ‘enough’, will always be influenced by the character of the position as well as the proportion of women with the right skills, education, ambitions, etc. who apply for the respective jobs.

The target of minimum 25 % of the under-represented gender reflects the policy of increasing the proportion of the under-represented gender. The breakdown in PF Group as a whole shows 16 % women and 84 % men in 2017, which corresponds to the distribution in 2015 and 2016. When new recruitments are relevant the target of minimum 25 % of the under-represented gender will be taken into consideration.

As regards the top management level one out of five C-level managers is a woman. On other management levels, the target is not completely met, but the ratio is around 10% end 2017. When recruiting new managers the first priority is competencies and skills, however, if two candidates have the same-level qualifications, any woman will be given priority.

Responsibilities of the board of directors

On a current basis, the board of directors of PF Group ensures that the executive board complies by the objectives, the strategies and the business procedures adopted. Information from the executive board is provided systematically at meetings and through written and oral reports. Such reporting includes developments in the outside world, the company's development and profitability and the financial position, including an evaluation of the business risks and of the financial risks.

In addition to the general meeting, the board of directors meets five times a year according to a scheduled meeting calendar. The agendas for the four meetings have been structured according to a rotation system ensuring that all relevant issues will be discussed by the board in the course of a calendar year. Between the ordinary board meetings, the board of directors are kept informed on a current basis of the company's results and financial position, and the board will be convened for extraordinary meetings if circumstances call for it. Further information concerning the board of directors appears in note 25.

No audit committee has been appointed, because such tasks are being handled by the board.

Fee to the board of directors

Directors' fees and remuneration to the executive employees comprise a fixed salary with no incentive pay.

Shareholding by the board of directors, the executive board and the executive employees

At year-end, Maj Invest Equity 4 K/S and the executive board (via Nila Invest Herning ApS) have been registered as owners of a minimum of 5 % of the voting rights or of the share capital (share-holders ownership interest and voting rights are identical) in PF Group. By means of an ownership interest of 73,7 %, the private equity fund Maj Invest Equity 4 K/S is controlling the company. The private equity fund is represented on the board of directors by partner Mr. Niels Garde Toft.

Dividend policy

Any distribution of dividend will take place with due consideration to the necessary consolidation of equity as a basis for the company's continued expansion.

Events subsequent to the financial year

No events have occurred subsequent to the balance sheet date that would have any material impact on the company’s financial position as per 31 December 2017.

Accounting policies used

The annual report for PF Group A/S is presented in accordance with those regulations of the Danish Financial Statements Act concerning companies identified as class C enterprises (large enterprises).

The accounting policies used are unchanged compared to last year, and the annual accounts are presented in Danish kroner (DKK).

On 15 December 2017, pursuant to section 237 of the Danish Companies Act, the board of directors of PF Group A/S and the executive board of Mie4 Holding 3 ApS prepared a merger plan for the merger of the companies PF Group A/S and Mie4 Holding 3 ApS with PF Group A/S as the continuing company.

At the merger, all assets and liabilities of the discontinuing company, Mie4 Holding 3 ApS, were transferred to the continuing company, PF Group A/S. Mie4 Holding 3 ApS is dissolved without liquidation. The merger has effect from 1 January 2017.

The share holders of Mie4 Holding 3 ApS are redeemed by converting the nominal capital of DKK 100.000 in Mie4 Holding 3 ApS to a nominal value of DKK 7.366.610 in PF Group A/S.
In the case of a reverse vertical merger, no capital increase has occurred in connection with the merger, but the shares held by the discontinuing company Mie4 Holding 3 ApS in the continuing company PF Group A/S are paid to the shareholders in the discontinuing company

The swap ratio is determined by the board of directors and the management of the merging companies on the basis of uniform valuation principles. Prior to the merger, Mie4 Holding 3 ApS has completed a cash capital increase of DKK 2.631.588, so that there is no change in the exchange rate. The valuation principles are defined by the board of directors and the executive board at the equity method. There have been no special difficulties in the assessment.

The merger is recognized by the book value method and thus without adjusting comparative figures. The merger affects the profit for the year negatively with TDKK 4.814 and direct positive transactions on the equity with TDKK 4.814. The merger has no net effect on equity 31 December 2017.

Recognition and measurement in general

Income is recognised in the profit and loss account concurrently with its realisation, including the recognition of value adjustments of financial assets and liabilities. Likewise, all costs, these including depreciation, amortisation, writedown, provisions, and reversals which are due to changes in estimated amounts previously recognised in the profit and loss account are recognised in the profit and loss account.

Assets are recognised in the balance sheet when the group is liable to achieve future, financial benefits and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when the group is liable to lose future, financial benefits and the value of the liability can be measured reliably.

Accounting policies used

At the first recognition, assets and liabilities are measured at cost. Later, assets and liabilities are measured as described below for each individual accounting item.

Certain fixed asset investments and liabilities are measured at amortised cost, by which method a fixed, effective interest is recognised during the useful life of the asset or the liability. Amortised cost is recognised as the original cost with deduction of any payments and additions/deductions of the accrued amortisation of the difference between cost and nominal amount. In this way capital losses and capital profits are spread over the useful life.

At recognition and measurement, such predictable losses and risks are taken into consideration, which may appear before the annual report is presented, and which concerns matters existing on the balance sheet date.

Translation of foreign currency

Transactions in foreign currency are translated by using the exchange rate prevailing at the date of the transaction. Differences in the rate of exchange arising between the rate at the date of transaction and the rate at the date of payment are recognised in the profit and loss account as an item under net financials.

Debtors, creditors, and other monetary items in foreign currency are translated by using the closing rate. The difference between the closing rate and the rate at the time of the occurrence or the recognition in the latest annual accounts of the amount owed or the liability is recognised in the profit and loss account under financial income and expenses.

Fixed assets and other non-monetary assets acquired in foreign currency and which are not considered to be investment assets purchased in foreign currencies are measured at the exchange rate on the transaction date.

In case the foreign group enterprises and associated enterprises meet the criteria for being independent units, the profit and loss accounts are translated by using an average exchange rate for the period in question, and the balance sheet items are translated by using the closing rate. Differences arising in connection with the translation of the equity of foreign group enterprises at the beginning of the year to the closing rate are recognised directly in the equity. The same goes for differences arising in connection with translation of the profit and loss accounts from average exchange rate to the closing rate.

At recognition of foreign group enterprises which are integrated units, the monetary items are translated by using the closing rate. Non monetary items are translated by using the exchange rate prevailing at the time of acquisition or at the time of the following depreciation or writedown of the asset. The items of the profit and loss account are translated by using the exchange rate prevailing at the date of the transaction. However, items in the profit and loss account deriving from non monetary items are translated by using historical prices.

Accounting policies used

Currency adjustment of balances with group enterprises abroad that are considered part of the total investment in group enterprises are recognised directly in the equity. Likewise, foreign exchange gains and losses on loans and derived financial instruments for currency hedging independent group enterprises abroad are recognised in the equity.

Derived financial instruments

At the first recognition, derived financial instruments are recognised at cost in the balance sheet. Afterwards they are measured at fair value. Positive and negative fair values of derived financial instruments are recognised under other debtors and other creditors respectively.

Changes in the fair value of derived financial instruments classified as and meeting the criteria for hedging the fair value of a recognised asset or a recognised liability are recognised in the profit and loss account together with any changes in the fair value of the hedged asset or the hedged liability.

Changes in the fair value of derived financial instruments classified as and meeting the criteria for hedging future cash flows are recognised under amounts owed or other debt in the equity.

If the future transaction results in the recognition of assets or liabilities, amounts which have been recognised in the equity previously, are transferred to the cost for the asset or the liability, respectively. If the future transaction results in income or costs, amounts which have been recognised in the equity currently, are transferred to the profit and loss account in the period in which the hedged item influenced the profit and loss account.

As regards any derived financial instruments which do not meet the criteria for being treated as hedging instruments, changes in the fair value are recognised currently in the profit and loss account.

Changes in the fair value of derived financial instruments used for hedging net investments in independent foreign group enterprises or associated enterprises are recognised directly in the equity.

The consolidated annual accounts

The consolidated annual accounts comprise the parent company PF Group A/S and those group enterprises of which PF Group A/S directly or indirectly owns more than 50 % of the voting rights or in other ways has controlling interest.

By the consolidation, elimination of intercompany income and costs, shareholding, intercompany balances and dividends and realised and unrealised gains and losses from transactions among the consolidated enterprises takes place.

Equity interests in group enterprises are settled by the proportional share of the group enterprises' trade value of net assets and liabilities at the date of acquisition.

Newly acquired or newly established enterprises are recognised in the consolidated annual accounts as of the date of acquisition. Disposed or terminated enterprises are recognised in the consolidated annual accounts until the date of disposal. In relation to newly acquired, disposed or terminated enterprises, comparative figures are not adjusted.

Positive balances (goodwill) between cost and fair value of the acquired, identifiable assets and liabilities, including provisions for restructuring, are recognised under intangible fixed assets and in accordance with an individual evaluation allocated on a systematic basis over their useful lives in the profit and loss account. Negative balances (negative goodwill) is recognised as income in the profit and loss account at the date of acquisition when the general requirements for recognition of income are met.

Gains or losses from the disposal or termination of group enterprises or associated enterprises are recognised as the difference between the sales price or the termination sum and the book value of the net assets at the sales date and expected costs of sale or termination.

The profit and loss account

Net turnover

The net turnover is recognised in the profit and loss account if delivery and risk transfer to the buyer have taken place before the end of the year, and if the income can be determined reliably and is expected to be received. The net turnover is recognised exclusive of VAT and taxes and with the deduction of any discounts granted in connection with the sale.

Cost of sales

Costs of sales includes costs for the purchase of raw materials and consumables less discounts and changes in inventories.

Other operating income

Other operating income comprise accounting items of secondary nature in proportion to the principal activities of the enterprise, including gains on disposal of intangible and tangible fixed assets.

Other external costs

Other external costs comprise costs for distribution, sales, advertisement, administration, premises, loss on debtors, and operational leasing costs.

Staff costs

Staff costs include salaries and wages including holiday allowances, pensions and other costs for social security etc. for staff members. Staff costs are less public reimbursements.

Depreciation, amortisation and writedown

Depreciation, amortisation and writedown comprise depreciation on, amortisation of and writedown relating to intangible and tangible fixed assets respectively.

Net financials

Net financials comprise interest, realised and unrealised capital gains and losses concerning financial assets and liabilities, amortisation of financial assets and liabilities, additions and reimbursements under the Danish tax prepayment scheme, etc. Financial income and expenses are recognised in the profit and loss account with the amounts that concerns the financial year.

Results from equity investments in group enterprises

After full elimination of intercompany profit or loss and deduction of amortisation of consolidated goodwill, the equity investment in the individual group enterprises are recognised in the profit and loss account at a proportional share of the group enterprises' results after tax.

Tax of the results for the year

The tax for the year comprises the current tax for the year and the changes in deferred tax, and it is recognised in the profit and loss account with the share referring to the results for the year and directly in the equity with the share referring to entries directly on the equity.

The parent enterprise and the Danish group enterprises are subject to the Danish rules on compulsory joint taxation of the consolidated Danish enterprises. The parent enterprise acts as an administration company in relation to the joint taxation. This means that the total Danish tax payable of the income of the Danish consolidated companies is paid to the tax authorities by the company.

The current Danish corporate tax is allocated among the jointly taxed companies in proportion to their respective taxable income (full allocation with reimbursement of tax losses).

The balance sheet

Intangible fixed assets

Patents, and licences

Patents and licenses are measured at cost with deduction of accrued amortisation. Patents are amortised on a straight-line basis over the remaining patent period, and licenses are amortised over the contract period, however, for a maximum of 10 years.

Goodwill

Goodwill is amortised over its estimated useful life, which is determined on the basis of the management's experience with the individual business areas. Goodwill is amortised on a straight-line basis over the amortisation period, which is 20 years. The amortisation period is determined on the basis of an expected payback period, being the longer for strategical acquirees with a strong market position and an expected long-term earnings profile.

Tangible fixed assets

Tangible fixed assets are measured at cost with deduction of accrued depreciation and writedown. Land is not depreciated.

The basis of depreciation is cost with deduction of any expected residual value after the end of the useful life of the asset. The amortisation period and the residual value are determined at the acquisition date and reassessed annually. If the residual value exceeds the book value, the amortisation discontinues.

If the amortisation period or the residual value is changed, the effect on amortisation will in the future be recognised as a change in the accounting estimates.

The cost comprises the acquisition cost and costs directly attached to the acquisition until the time when the asset is ready for use.

The cost of a total asset is divided into separate components. These components are depreciated separately, the useful lives of each individual components differing.

Depreciation takes place on a straight line basis and based on an evaluation of the expected useful life:

Buildings	20-50 years
Technical plants and machinery	3-10 years
Other plants, operating assets, fixtures and furniture	3-5 years

Minor assets with an expected useful life of less than 1 year are recognised as costs in the profit and loss account in the year of acquisition.

Profit or loss deriving from the sales of tangible fixed assets is measured as the difference between the sales price reduced by the selling costs and the book value at the time of the sale. Profit or losses are recognised in the profit and loss account as other operating income or other operating expenses.

As regards assets of own production, the cost comprises direct and indirect costs for materials, components, deliveries from subsuppliers, payroll costs, and borrowing costs form specific and general borrowing concerning the construction of each individual asset.

Leasing contracts

At the first recognition in the balance sheet, leasing contracts concerning tangible fixed assets by which the group holds all essential risks and advantages attached to the proprietary right (financial leasing) are measured either at fair value or at the present value of the future leasing services, whichever value is lower. When calculating the present value, the internal interest rate of the leasing contract or alternatively the borrowing rate of the enterprise is used as discount rate. Afterwards, financially leased assets are treated in the same way as other similar tangible assets.

The capitalised residual leasing liability is recognised in the balance sheet as a liability, and the interest part of the leasing contract is recognised in the profit and loss account over the term of the contract.

All other leasing contracts are considered operational leasing. Payments in connection with operational leasing and other rental agreements are recognised in the profit and loss account over the term of the contract. The group's total liabilities concerning operational leasing and rental agreements are recognised under contingencies etc.

Writedown of fixed assets

The book values of both intangible and tangible fixed assets as well as equity investments in subsidiaries and associated enterprises are subject to annual impairment tests in order to disclose any indications of impairment beyond those expressed by amortisation and depreciation respectively.

If indications of impairment are disclosed, impairment tests are carried out for each individual asset or group of assets respectively. Writedown takes place to the recoverable amount, if this value is lower than the book value.

The recoverable value is equal to the value of the net selling price or the value in use, whichever is higher. The value in use is determined as the present value of the expected net cash flow deriving from the use of the asset or the group of assets.

Previously recognised writedown is reversed when the condition for the writedown no longer exist. Writedown relating to goodwill is not reversed.

Financial fixed assets

Equity investments in group enterprises

Equity investments in group enterprises are recognised in the balance sheet at a proportional share under the equity method, the value being calculated on the basis of the accounting policies of the parent company by the deduction or addition of unrealised intercompany profits and losses, and with the addition or deduction of residual value of positive or negative goodwill measured by applying the acquisition method.

To the extent the equity exceeds the cost, the net revaluation of equity investments in group enterprises are transferred to the reserves under the equity for net revaluation as per the equity method. Dividends from group enterprises expected to be decided before the approval of this annual report are not subject to a limitation of the revaluation reserves. The reserves are adjusted by other equity movements in group enterprises.

Positive differences (goodwill) between cost and fair value of identifiable, acquired assets and liabilities, inclusive of liability provisions for restructuring, are recognised under equity investments in group enterprises, and they are amortised over their estimated useful life. The useful life is determined on the basis of the management's experience with the individual business areas. The amortisation period is maximum 20 years, being the longer for strategical acquirees with a strong market position and a long-range earnings potential. The book value of goodwill is evaluated currently and written down in the profit and loss account in those cases where the book value exceeds the expected future net income from the enterprise or the activity, to which the goodwill is attached.

Accounting policies used

Inventories
Inventories are measured at cost on basis of the FIFO method. In case the net realisable value of the inventories is lower than the cost, writedown takes place to this lower value.

The cost for trade goods, raw materials, and consumables comprises the acquisition cost with the addition of the delivery costs.

The cost for manufactured goods and works in progress comprises the cost for raw materials, consumables, direct wages, and indirect production costs. Indirect production costs comprise indirect materials and wages, maintenance of and depreciation on machinery, factory buildings and equipment applied during the production process, and costs for factory administration and factory management. Borrowing costs are not recognised in cost.

The net realisable value for inventories is recognised as the market price with deduction of completion costs and selling costs. The net realisable value is determined taking into consideration the negotiability, obsolescence, and development of the expected market price.

Debtors
Debtors are measured at amortised cost which usually corresponds to face value. In order to meet expected losses, writedown takes place at the net realisable value.

Accrued income and deferred expenses
Accrued income and deferred expenses recognised under assets comprise incurred costs concerning the next financial year.

Available funds
Available funds comprise cash at bank and in hand.

Equity
Reserves for net revaluation as per the equity method
Reserves for net revaluation as per the equity method comprise net revaluation of equity investments in subsidiaries and associates in proportion to cost.

The reserves may be eliminated in case of losses, realisation of equity investments or changes in the financial estimates.

It is not possible to recognise the reserves with a negative amount.

Dividend
Dividend expected to be distributed for the year is recognised as a separate item under the equity. Proposed dividend is recognised as a liability at the time of approval by the general meeting (the time of declaration).

Corporate tax and deferred tax

Current tax receivable and tax liabilities are recognised in the balance sheet at the amount calculated on the basis of the expected taxable income for the year adjusted for tax on previous years' taxable income and prepaid taxes. Tax receivable and tax liabilities are set off to the extent that legal right of set-off exists and if the items are expected to be settled net or simultaneously.

PF Group A/S is jointly taxed with the Danish group companies and acts in this respect as the administration company. According to the rules of joint taxation, PF Group A/S is unlimited, jointly and severally liable towards the Danish tax authorities for the total corporation tax, including withholding tax on interest, royalties and dividends, arising within the jointly taxed group of companies.

Deferred tax is measured on the basis of all temporary differences in assets and liabilities with a balance sheet focus.

Deferred tax is measured based on the tax rules and tax rates applying under the legislation on the balance sheet date and prevailing when the deferred tax is expected to be released as current tax.

Liabilities

Financial liabilities related to borrowings are recognised at the received proceeds with the deduction of transaction costs incurred. In following periods, the financial liabilities are recognised at amortised cost, corresponding to the capitalised value by use of the effective interest. The difference between the proceeds and the nominal value is recognised in the profit and loss account during the term of the loan.

Mortgage debt and bank debt are for instance measured at amortised cost. As to cash loans, this corresponds to the outstanding debt of the loan. For bond loans, the amortised cost corresponds to an outstanding debt calculated as the underlying cash value at the date of borrowing adjusted by amortisation of the market value adjustment on the date of the borrowing carried out over the repayment period.

Also capitalised residual leasing liabilities in connection with financial leasing contracts are recognised in the financial liabilities.

Other liabilities are measured at amortised cost which usually corresponds to the nominal value.

Accrued expenses and deferred income

Received payments concerning income during the following years are recognised under accrued expenses and deferred income.

The cash flow statement

The cash flow statement shows the cash flow of the group for the year, divided in cash flows deriving from operating activities, investment activities, and financing activities respectively, the changes in the liabilities, and the available funds at the beginning and the end of the year respectively.

Cash flow from operating activities

Cash flow from operating activities are calculated as the results for the year adjusted for non-cash operating items, the change in the working capital, and corporate tax paid.

Cash flow from investment activities

Cash flow from investment activities comprises payments in connection with the acquisition and sale of enterprises and activities as well as the acquisition and sale of intangible and tangible fixed assets and fixed asset investments respectively.

Cash flow from financing activities

Cash flow from financing activities comprises changes in the size or the composition of the share capital and the costs in this connection. Furthermore, these activities comprise borrowings, instalments on interestbearing debt, and payment of dividend to the shareholders.

Available funds

Available funds comprise cash funds with deduction of short-term bank debt and short-term securities with a term of less than 3 months which can easily be converted into cash funds and on which only an insignificant risk of value changes exists.

Segment information

Information on activity and geographical markets is provided. The segment information follows the consolidated accounting policies, risks and internal financial control systems.
