## Statement by the Board of Directors and the Executive Board

The Board of Directors and the Executive Board have today discussed and approved the annual report of P-LP 2014 A/S for the financial year 1 January - 31 December 2015.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

It is our opinion that the consolidated financial statements and the parent company financial statements give a true and fair view of the Group's and the Company's financial position at 31 December 2015 and of the results of the Group's and the Company's operations and consolidated cash flows for the financial year 1 January - 31 December 2015.

Further, in our opinion, the Management's review gives a fair review of the development in the Group's and the Company's operations and financial matters and the results of the Group's and the Company's operations and financial position.

We recommend that the annual report be approved at the annual general meeting.

Copenhagen, 11 April 2016

## Independent auditors' report

To the shareholders of P-LP 2014 A/S

### Independent auditors' report on the consolidated financial statements and the parent company financial statements

We have audited the consolidated financial statements and the parent company financial statements of P-LP 2014 A/S for the financial year 1 January - 31 December 2015, which comprise income statement, balance sheet, statement of changes in equity and notes, including accounting policies, for the Group as well as for the parent company and consolidated cash flow statement. The consolidated financial statements and the parent company financial statements are prepared in accordance with the Danish Financial Statements Act.

### *Management's responsibility for the consolidated financial statements and the parent company financial statements*

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control that Management determines is necessary to enable the preparation of consolidated financial statements and parent company financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditors' responsibility*

Our responsibility is to express an opinion on the consolidated financial statements and the parent company financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing and additional requirements under Danish audit regulation. This requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the consolidated financial statements and the parent company financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements and the parent company financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the consolidated financial statements and the parent company financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Company's preparation of consolidated financial statements and parent company financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Management, as well as evaluating the overall presentation of the consolidated financial statements and the parent company financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit has not resulted in any qualification.

### *Opinion*

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the Group's and the parent company's financial position at 31 December 2015 and of the results of the Group's and the parent company's operations and consolidated cash flows for the financial year 1 January - 31 December 2015 in accordance with the Danish Financial Statements Act.

## Independent auditors' report

### Statement on the Management's review

Pursuant to the Danish Financial Statements Act, we have read the Management's review. We have not performed any further procedures in addition to the audit of the consolidated financial statements and the parent company financial statements. On this basis, it is our opinion that the information provided in the Management's review is consistent with the consolidated financial statements and the parent company financial statements.

### Management's review (continued)

The consolidated financial statements comprise the parent company, P-LP 2014 A/S and subsidiaries and are incorporated in the annual report for P-LP 2014 A/S. The consolidated accounts include profit and loss for all subsidiaries.

#### Group structure:

The private equity fund Polaris owns 69 % of Louis Poulsen Holding A/S through P-LP A/S. Polaris is a member of the Danish Venture and Private Equity Association ("DVCA") and hence compliant with the DVCA-guidelines; please see [www.DVCA.dk](http://www.DVCA.dk). These guidelines, published in June 2008, recommend a thorough review in particular regarding corporate governance, financial risks, employee relations and strategy.

The financial ratios have been prepared in accordance with the Danish Financial Society's guidelines on the calculation of financial ratios "Recommendations and Financial Ratios 2015". For terms and definitions, please see the accounting policies.

## Management's review (*continued*)

### Principal activities of the Group

The Louis Poulsen group produces markets and sells lighting fixtures to private consumers and professionals at home and abroad. The group is internationally recognized for providing exclusive lighting fixtures of high quality and functional design. The products thus serve the upper segments of the professional and private consumer markets that attach great importance to the unique lighting and the high quality levels guaranteed by Louis Poulsen. Louis Poulsen's products fulfil the most stringent international demands for energy optimisation and at the same time they meet the demand for a unique design as well as comfortable and glare free lighting for people.

### Organisation and structure

Louis Poulsen's sales organisation is based in Copenhagen, whereas the group's production facilities are based in Vejen. The management of the group is carried out from Denmark in close cooperation between the executive management and the group's Board of Directors.

Sales and distribution outside Denmark are carried out through the 10 subsidiaries or through agents and distributors operating on behalf of Louis Poulsen A/S globally.

The Louis Poulsen Group employs 420 persons of which app. 280 work in Denmark and 140 works in the foreign subsidiaries.

Development in staff:	Denmark	Subsidiaries
Number of employees beginning of 2015	290	151
Recruited during 2015	42	17
Resigned during 2015	(56)	(30)
Number of employees end of 2015	276	138

### Financial development

The consolidated revenue amounts to 715,5 million DKK. The gross profit came to 280,9 million DKK in 2015 which is above expectations. The positive development derives from profitability improvements in the production and a shift in the sales mix.

Operating profit (EBIT) reached 32,4 million DKK. Structural changes carried out within 2015 have a negative impact on operating profit and the consolidated result of approximately 11 million DKK. These costs are mainly included in administrative expenses. The result of 12,9 million DKK is in line with expectations.

The management considers the financial development to be satisfactory.

Further information on the financial development for the subsidiaries is available in the annual report for Louis Poulsen A/S.

As of 10 December 2014 the Louis Poulsen Holding A/S acquired Louis Poulsen A&S from Targetti Sankey. Further the acquisition involved Louis Poulsen US Inc. and Louis Poulsen Asia Pte. Ltd., which was subsequently sold to Louis Poulsen A/S. The purchase price (including transaction costs and subsequent adjustment to purchase price) amounts to 66.5 million EUR equal to 494.4 million DKK. In accordance with the Danish Financial Statements Act the purchase price was allocated to the fair value of the acquired assets and liabilities.

### **Management's review (*continued*)**

Following the original purchase price allocation management has identified that a need for further 8.2 million DKK in inventory provision was present at the time of the acquisition.

This conclusion is primarily based on the fact that part of the acquired inventory related to LED-products which has been subject to a rapid development in the past years and therefore did not represent, at the time of the acquisition, products with technological adequate capabilities which could be sold in the market.

Management has also identified an adjustment related to the calculation of internal gain on inventory at the date of the acquisition. The adjustment, which amounts to an overstatement of inventory by 3.9 million DKK has been evaluated in combination with the identified further need for inventory provision. The total effect on inventory at the acquisition date is -12.1 million DKK which management has assessed as a necessary adjustment to the original purchase price allocation.

The total purchase price remains unchanged hence the increased inventory provision and adjustment of internal gain (12.1 million DKK) are offset against deferred tax asset (1.8 million DKK) and goodwill (10.3 million DKK).

### **Expectations for 2016**

P-LP 2014 A/S expects an increase in turnover in 2016 followed by increasing capacity costs to cover new initiatives. Increased activities in sales are expected to deliver a positive development in the primary result.

### **Special Risks**

#### ***Market risks***

The group's products are strongly positioned in the high end markets. The results therefore very much depend on the economic development in the professional and private consumer markets.

#### ***Currency risks***

Due to activities in foreign markets cash flow and equity are influenced by the development in interest and exchange rates for a series of currencies. It is group policy to cover commercial exchange risks. Hedging is primarily used to cover the open foreign exchange positions in the coming year's budget. The group does not use speculative hedging.

#### ***Credit risks***

The group's credit risks are primarily linked to trade receivables included in the balance sheet.

The group has no vital risks related to a single customer or business partner. As a consequence of the group's credit risk policy the creditworthiness of all major customers and business partners is regularly rated.

### **Financial resources**

At year-end 2015 cash and non-utilized drawing facilities in credit institutions amounted to app. 68 million DKK.

### **Events after closing of the year-end accounts**

No essential events have occurred, which could significantly affect the financial position of the group.

## Management's review (*continued*)

### Development activities

The group continuously invests in development, updates and improvements of its product portfolio. Costs related to development activities are in general listed in the income statement and balance sheet - please see the accounting policies regarding development activities.

### Intellectual capital

The group has a both experienced and competent staff working with lighting technology. It will continue to attract and retain highly skilled staff with expertise in the development of lighting to ensure future growth. Great demand is placed on the employees' technical and craftsman skills and their ability to engage in a logistically demanding production process.

To ensure high product quality and competitive production the group continuously optimizes production. This demands a high level of competence, and the group therefore continuously invests in competency development. It is however just as important for the group to attract and retain both skilled and unskilled workers and employees with medium to higher education level.

During 2015 the group has recruited competencies within the area of business development with focus on growth and the development of new products. A professional executive board and a new board of directors is in place. In addition, the group has increased its competencies within the area of Idea and design and R&D.

### Reporting on CSR

#### Policies

The policies of the group in relation to CSR contain an environmental policy and various employment policies.

The environmental policy is split into a product philosophy and an operational philosophy. The product philosophy is to develop lighting fixtures of high quality, long life time and long product cycles. The operational philosophy is built on continuous improvement of the daily operation with focus on waste, scrapping, energy losses and consumption.

The employment policies contain a list of initiatives to improve the working environment, health and staff retention. The policies comprise diversity policies, drug/alcohol, staff, smoking, senior and health policies. Furthermore the company is conscious of its obligation to educate trainees and apprentices.

The group wants to create a healthy and desirable physical and psychological working environment with focus on the well-being of the employees including sickness absenteeism. The policy regarding sickness absenteeism covers on the one hand follow up on the presence and behaviour of the employee and on the other hand expression of the company's compassionate interest in the employee.

The group is continuously working on a formal policy for human rights. Within the above-mentioned policies, there are areas of focus on maintaining a positive working environment and avoidance of harassment of any kind.

#### Gender diversity

The group wants to give equal access to leadership positions for members of both sexes.

The share of women in leadership positions with staff responsibility represented 19% as of 1st January 2009. This share was 22% in 2015. The group wishes to continue increasing the share of women in leadership positions. To facilitate this development a recruitment policy has been implemented in relation to leadership positions according to which at least one female applicant must be admitted to job interview assuming qualified female applicants are available.

## Management's review (*continued*)

Through this policy and an ongoing focus on development of employees at all levels of the organisation irrespective of age and sex the group wishes to contribute to the education and development of potential female board members.

### Target figure for the share of the under-represented sex / women in the Board of Directors

Today the Board of Directors of P-LP 2014 A/S is made up of 3 members elected at the annual general meeting, of whom none are women. At present, the gender representation in the Board of Directors in Louis Poulsen Holding A/S is 6 members, of whom none are women. It is the company's objective that at least one of the members will be a woman in 2017.

### Corporate governance

The Board of Directors and the Executive Board constantly strive to ensure that appropriate and sufficient control systems are in place managed by a robust management team structure. The Board of Directors and the Executive Board have a number of duties being defined in, amongst others, the Companies Act, the Annual Accounts Act, the Articles of Association and good practice for companies of the same size and with the same international scope as the Louis Poulsen group. On this basis, an ongoing series of internal procedures are developed and maintained to ensure active, reliable and profitable management of the group.

### Board of directors

The Board of Directors ensures that the Executive Board complies with the approved objectives, strategies and business procedures. The information to the Executive Board is provided systematically before and during meetings as well as through written and oral reports. These reports includes market development, the company's development and profitability. The Board of Directors and Executive Management have overall responsibility for risk management and internal controls related to financial reporting.

The Board of Directors of the company meet at least four times a year. Furthermore, information about the company and the Group's results and financial position is shared with the Board of Directors on a regular basis (monthly). If relevant, extraordinary meetings are held.

### Audit Committee

There is not established an audit committee due to the modest size and complexity of the company.

### Remuneration to management

To attract and retain the groups management competencies, the remuneration of management and senior employees is based on tasks, value creation and conditions in comparable companies. An incentive program is implemented in the form of bonus schemes and share and warrant-based incentive programs.

### Environmental issues

#### Activities

Within the environmental area the group regularly carries out projects to reduce energy consumption in the production facilities. In 2014 the group made substantial investments to reduce the consumption of heat and electricity. As a consequence the group's overall emission of CO<sub>2</sub> was expected to reduce by 175 tons/year, hence reducing negative effects on climate. During 2015 focus has continuously been to reduce energy consumption, and the group has materialised a substantial reduction in CO<sub>2</sub> emission, just as the consumption of heating, and water has been successfully reduced.

Products from the existing product portfolio are continuously being adapted to the new energy efficient LED light sources without compromise on the company's lighting philosophy. Furthermore, there is a daily focus on test and development of products with prolonged lifetime.

## Management's review (*continued*)

As the only company in Denmark, Louis Poulsen offers training of metal spinners. In 2015 the company employed the country's only apprentice.

### Results

A proactive approach to sickness absenteeism combined with ongoing support and guidance of the employees to develop and maintain a healthy lifestyle has contributed to a decline in absenteeism for production workers from 5.2% in 2011 to 4.4% in 2014. Absenteeism for office workers has declined from 2.3% in 2011 to 1.4% in 2014.

The employees are offered dietary counselling and assistance to abandon smoking. Also a number of joint physical exercise activities are offered. The company continuously supports new health promoting initiatives from the employees. Work place exercise has become a natural part of the working day.

In 2014 the factory was inspected by the Danish Working Environment Authority as part of their special focus on the electronic industry. On the basis of this visit Louis Poulsen's working environment organisation initiated a project with special focus on ergonomics. The project was funded by The Fund for Better Working Environment and Labour Retention and was used by the fund as a model case on the annual "Working Environment Conference 2014" and in articles about working environment. During the Danish Working Environment Authority's follow-up inspection visit Louis Poulsen received credit for the specific ergonomics initiatives and for the company's general approach to working environment related activities.

Louis Poulsen's working environment organisation continuously works to secure a sound working environment and to minimize the number of work related injuries. In 2014 a total of 6 work related injuries were recorded of which 3 resulted in 1-7 days' absenteeism. The company has thus successfully avoided injuries resulting in extended absenteeism.

## Accounting policies

### Generally

The Annual Report and the consolidated financial statements are prepared in accordance with the provisions of the Danish Financial Statements Act regarding large class C companies.

The accounting policies are consistent with those of last year.

Management has assessed that an adjustment of the purchase price allocation related to the acquisition of Louis Poulsen Group in 2014 is needed. It has become clear that inventory in the purchase price allocation was overstated by 12,1 million DKK. Management has assessed that the total value of the acquisition remain unchanged and therefore the adjustment of inventory is offset towards goodwill and deferred tax. The adjustment has no effect on the parent company financial statements but has been incorporated in the comparison figures with the following effect on the consolidated financial statements:

- Profit for the year 2014 remain unchanged
- Total assets as at 31 December 2014 remain unchanged but goodwill has been increased by 10,3 million DKK, inventory has been reduced by 12,1 million DKK and deferred tax asset has been increased by 1,8 million DKK
- Equity as at 31 December 2014 remain unchanged

### Consolidated financial statements

The consolidated financial statements comprise the parent company, P-LP 2014 A/S, and subsidiaries in which P-LP 2014 A/S directly or indirectly holds more than 50 % of the voting rights or which it, in some other way controls.

On consolidation, intra-group income and expenses, shareholdings, intra-group balances and dividends, and realised and unrealised gains and losses on intra-group transactions are eliminated.

### Business combinations

Enterprises acquired or established during the year are recognised in the consolidated financial statements from the date of acquisition or establishment. Enterprises disposed of are recognised in the consolidated income statement until the date of disposal. The comparative figures are not adjusted for acquisitions or disposals.

Gains or losses on disposal of subsidiaries and associates are stated as the difference between the sales amount and the carrying amount of net assets at the date of disposal plus non-amortised goodwill and anticipated disposal costs. Gains or losses related to transactions with non-controlling interests are recognized directly in equity.

Acquisitions of enterprises are accounted for using the acquisition method, according to which the identifiable assets and liabilities acquired are measured at their fair values at the date of acquisition. Provision is made for costs related to adopted and announced plans to restructure the acquired enterprise in connection with the acquisition. The tax effect of the restatement of assets and liabilities is taken into account.

Any excess of the cost over the fair value of the identifiable assets and liabilities acquired (goodwill), including restructuring provisions, is recognised as intangible assets and amortised on a systematic basis in the income statement based on an individual assessment of the useful life of the asset, not exceeding 20 years. Any excess of the fair values of the identifiable assets and liabilities acquired over the cost of the acquisition (negative goodwill), representing an anticipated adverse development in the acquired enterprises, is recognised in the balance sheet as deferred income and recognised in the income statement as the adverse development is realised. Negative goodwill not related to any anticipated adverse development is recognised in the balance sheet at an amount corresponding to the fair value of non-monetary assets. The amount is subsequently recognised in the income statement over the average useful lives of the non-monetary assets.

## Accounting principles (*continued*)

Goodwill and negative goodwill from acquired enterprises can be adjusted until the end of the year following the year of acquisition.

### Intra-group business combinations

In connection with business combinations such as acquisition and disposal of equity investments, mergers, demergers, addition of assets and exchange of shares, etc., involving enterprises controlled by the parent company, the uniting-of-interests method is used. Differences between the agreed consideration and the carrying amount of the acquired enterprise are recognised in equity. Moreover, comparative figures for previous financial years are restated.

### Recognition and measurement

In the Income Statement, income is recognised as earned, including value adjustments of financial assets and liabilities. All costs, including writing down/depreciation and amortisation, are also recognised in the Income Statement.

Assets are recognised in the balance sheet when it's likely that future financial benefits will flow to the Company and when reliable measurement of the value of the assets is possible.

Liabilities are recognised in the balance sheet when an outflow of future financial benefits is likely, and when reliable measurement of the value of the liabilities is possible.

On initial recognition, assets and liabilities are measured at cost price. Subsequently, assets and liabilities are measured as described below for each individual item.

Some financial assets and liabilities are measured at amortised cost price, where a constant effective interest rate is recognised over the maturity. Amortised cost price is calculated as original cost price, deducted possible repayments and added allowances/discounts of the accumulated amortisation of the difference between cost price and nominal amount.

### Foreign exchange and interest

Transactions in foreign currencies are translated at the standard exchange rates, representing the approximate rates of exchange on the transaction date. Differences between the rates of exchange on the transaction date and on the date of payment are recognised in the Income Statement.

Receivables, payables and other financial items in foreign currencies, available at the balance sheet day, are translated based on the exchange rates at the balance sheet day. Both realised and unrealised exchange differences are recognised as financial items in the Income Statement.

### Derivative financial instruments

Derivative financial instruments are stated at cost prices on initial recognition in the balance sheet and subsequently measured at current values. Positive and negative current values from the derivative financial instruments are recognised as cut off items under assets or liabilities.

Change in the current value from derivative financial instruments, classified as and fulfilling the criteria for hedging the current value of recognised assets and liabilities, is included in the Income Statement, together with any changes in the current value of the hedged assets or liabilities respectively.

Any change in the current value from the derivative financial instruments, classified as and fulfilling the obligations for hedging future assets and liabilities, is recognised directly in equity.

If the future transaction results in recognition of assets or liabilities, amounts, which are deferred under the equity, are to be transferred from equity and recognised in the cost prices of the assets or liabilities.

## Accounting principles (*continued*)

If the future transaction results in earnings or costs, amounts, which are deferred under the equity, are to be transferred to the Income Statement in the period, where the hedged item affects the Income Statement.

### Income Statement

#### Revenue

Revenue is recognised in the Income Statement if delivery and the transfer of risk to the buyer has been accomplished by the end of year and if the income can be calculated reliably and its receipt expected. Revenue comprises the invoiced sales of the year, deducted duties, returned goods and volume discounts.

#### Distribution costs

Distribution costs comprise costs assigned to distribution and sale of the Company's products, including distribution and marketing costs, salaries within the sales and marketing functions, advertising and exhibition costs, depreciations and other indirect overheads. Furthermore, costs related to write downs on debtors are included in the distribution costs.

#### Administrative expenses

Administrative expenses comprise costs, which are assigned to the administrative functions including management remuneration and other common overheads.

#### Other operating income

Other operating income comprises earnings from secondary operation compared to the company's core business.

#### Profit/loss, capital investments in subsidiaries

The proportional share of the results of the individual subsidiary, after tax, amortisation of goodwill and elimination of intercompany profit, is included in the Income Statement of the company.

#### Financial income and expenses

Financial income and expenses comprise e.g. items from interest, realised and unrealised exchange gains and losses from foreign currencies and amortisation of financial assets and liabilities.

#### Income tax and deferred tax assets

Tax on profit or loss on ordinary activities comprises actual tax and change in deferred tax of the year.

Current tax comprises the tax payable of the year's expected taxable profit and allowances, deductions and repayments from the Danish payment-on-account tax scheme.

Apart from differences on capital investments in subsidiaries, provision is made for deferred tax of every difference between accounting and fiscal estimates. Deferred tax assets are calculated based on quoted tax rates, and the effect from the deferred tax of any tax rate changes is recognised in the Income Statement.

Deferred tax assets are recognised at their expected value in use within the same legal tax entity.

## Accounting principles *(continued)*

Tax, paid on account, and other prepaid taxes appear from the balance sheet as tax receivable.

### Balance sheet

#### Intangible fixed assets

Intangible fixed assets are measured at cost less accumulated amortisation.

#### Goodwill

Goodwill is amortised on a straight-line basis through the expected lifetime up to 20 years, as the company's acquisition is estimated to have a long-term earning effect based on the very long life cycle of the products. The accounting value of goodwill is currently subject to evaluation and written down to replacement cost in the Income Statement, if the accounting value exceeds the expected future capitalized net earnings or a realised sales value from the company or activity, to which the goodwill belongs.

#### Acquired trademarks and customer relations

Acquired trademarks and customer relations are measured on initial recognition at cost, as part of the business combinations, at their fair value at the date of acquisition. Following initial recognition, Acquired trademarks and customer relations are carried at cost less any accumulated amortisation and accumulated impairment losses. Acquired trademarks are amortised on a straight-line basis through the expected lifetime from 8 to 20 years. Acquired customer relationships are amortised on a straight-line basis through the expected lifetime up to 12 years.

#### Amortisation

Acquired trademarks and customer relations, as well as goodwill is amortised over their estimated useful lives (maximum of 20 years) determined on the basis of Management's experience of the specific markets. Amortisation over 5 years relates to strategic acquired business/trademarks with strong market positions, and long-term earning profiles.

#### Development projects

Development projects comprise salaries and other costs, which directly or indirectly relate to the development projects of the company.

If sufficient security is available so that the capital value of the future earnings can cover production, sales, and administration costs and the development costs as well - development projects, clearly definable and identifiable, are recognised as intangible fixed assets when the technical rate of utilisation, sufficient resources and a potential future market or development opportunity within the company appear, and when the intention is to produce, market or use the project.

Development projects, which do not fulfil the criteria for recognition in the balance sheet, are recognised as costs in the Income Statement, when realised.

Capitalised development costs are measured at cost prices, less accumulated amortisation or write-downs at replacement cost, if lower.

Capitalised development costs are written off on the project finalisation according to the straight-line method and over the period when it is expected to gain financial advantages. The write off period is 5 years.

## Accounting principles (*continued*)

### Software and rights

Software, rights and its expenses are measured at cost price, less accumulated amortisations and are written down according to the straight-line method over the expected financial lifetime of 3 - 5 years.

### Property, plant and equipment

Property, plant and equipment are measured at purchase price or at cost price less accumulated depreciation and write downs.

Property, plant and equipment are depreciated under the straight-line method over the expected useful lives of the assets, i.e.:

- Major leasehold improvements	14 years
- Technical and fixed installations and leasehold improvements	5 years
- Other installations, operating equipment, furniture and fixtures	5 years

Property, plant and equipment are depreciated at their recoverable value, if this value is lower than the accounting amount, based upon the above depreciation periods.

Public grants, provided to fund purchase of property, plant and equipment, are settled in the purchase price.

Earnings or losses in connection with sale or scrapping are calculated as the difference between the sales price and the booked value and are recognised in the Income Statement under the same items as the pertaining write-downs.

Operational lease costs are expensed continuously. The residual obligations are disclosed under contingent liabilities.

### Investments in subsidiaries

Investments in subsidiaries are measured under the equity method.

Investments in subsidiaries are measured at the proportionate share of the enterprises' net asset values calculated in accordance with the Group's accounting policies minus or plus unrealised intra-group profits and losses and plus or minus any residual value of positive or negative goodwill determined in accordance with the acquisition method.

Investments in subsidiaries with negative net asset values are measured at DKK 0 (nil), and any amounts owed by such enterprises are written down if the amount owed is irrecoverable. If the parent company has a legal or constructive obligation to cover a deficit that exceeds the amount owed, the remaining amount is recognised under provisions.

Net revaluation of investments in subsidiaries is recognised in the reserve for net revaluation in equity under the equity method to the extent that the carrying amount exceeds cost. Dividends from subsidiaries which are expected to be adopted before the approval of the annual report are not recognised in the reserve for net revaluation.

### Inventories

Raw materials, consumables and commodities are measured at cost price, calculated according to the FIFO principle or the net realization value, if lower.

Cost price for commodities, raw materials and consumables is equal to the landed cost price.

## Accounting principles (*continued*)

The cost price for manufactured finished goods and work in progress comprises the costs for raw materials, consumables, and direct payroll cost and production overheads. Borrowing costs are not included.

Obsolete and slow-moving products are written down to net realisable value.

### Receivables

Receivables are measured at amortised cost price, which normally corresponds to the nominal value. Write-downs are made to meet the risk for losses, calculated on the basis of an individual estimate of the debtors' creditworthiness.

### Prepayments

Prepayments, recognised under assets, include spent costs related to the subsequent financial year.

### Provisions

Provisions include estimated cost for warranty. The provision is based on individual judgment on registered claims.

### Equity

Dividend, expected to be paid for the year, is presented as a separate item under equity.

Dividend is recognised as a liability at the time for decision at the annual general meeting.

### Liabilities

Liabilities are measured at amortised cost price. Proceeds, received less spent costs, are recognised when raising the loans. In the periods to come, the financial liabilities are recognised at amortised cost price corresponding to the capitalised value, using the effective interest method so that the difference between the proceeds and the nominal value is recognised in the Income Statement over the loan period.

In respect of financial leasing, the capitalised residual liability under the lease is recognised.

Other liabilities, comprising accounts payable, group companies and other debts, are measured at amortised cost price, which usually corresponds to the nominal value.

### Warrants

The value of warrants is not recognized in the Profit and loss statement. Payments received from the issue of warrants have been recorded as received prepayments under liabilities and will be recorded in equity along with the exercise price in the event of execution.

## Accounting principles (continued)

### Cash flow statement

The cash flow statement, calculated on the indirect method, shows the cash flows from operating activities, investing activities, financing activities and the funds, available at the beginning and at the end of the year.

Cash flows from operating activities are stated as the EBIT result, adjusted for write-downs and other non-cash operating items, changes in the working capital, dividends received and paid income taxes and dividend.

Cash flow from investing activities comprises payments in connection with acquisition and sale of companies and or acquisition and sale of tangible and financial assets, respectively.

Cash flow from financing activities comprises rising of loan and payments on interest-bearing debts.

Funds comprise cash and securities portfolio, stated as current assets.

### Segment information

The Group has only one business segment.

### Financial ratios

The financial ratios stated in the survey of financial highlights have been calculated as follows:

Profit-ratio	$\frac{\text{EBIT} \times 100}{\text{Revenue}}$
Primary profit	$\frac{\text{EBIT}}{\text{Average invested capital}}$
Gross profit	$\frac{\text{Gross profit} \times 100}{\text{Revenue}}$
Solvency ratio	$\frac{\text{Equity at year end} \times 100}{\text{Total equity and liabilities at year end}}$
Equity ratio	$\frac{\text{Profit/loss for the year after tax} \times 100}{\text{Average equity}}$

Remuneration of the parent company Executive Board and Board of Directors amounts to 0.0 million DKK.

#### 19 Contractual obligations and contingencies, etc.

##### Contingent liabilities

P-LP 2014 A/S is jointly taxed with the other Danish subsidiaries. Together with the subsidiary, P-LP 2014 A/S has joint and several unlimited liability for Danish corporation taxes and withholding taxes on dividends, interest and royalties in the joint taxation unit. At 31 December 2015, the net taxes payable to SKAT by the companies included in the joint taxation will be no higher than 1 million DKK. Any subsequent corrections of the taxable income subject to joint taxation or withholding taxes on dividends, etc., may entail that the companies' liability will increase. The Group is not liable to others.

At 31 December the Group has work guarantees amounting to 5.1 million DKK.

##### Operating lease obligations

The Group's companies have entered into operating leases. The remaining total nominal residual lease payment amounts to 100.2 million DKK.
