Income statement

Gross profit

With reference to section 32 of the Danish Financial Statements Act, revenue has not been disclosed in the Annual Report.

Revenue

Income from the sale of services is recognised in the income statement provided that delivery and transfer of risk to the buyer have taken place, the income may be reliably measured and is expected to be received.

Revenue is measured at fair value of the agreed remuneration excluding VAT and taxes charged on behalf of third parties. All forms of discounts granted are deducted from revenue.

Other operating costs

Financial income and expenses

Financial income and expenses are recognised in the income statement at the amounts relating to the financial year. Financial items comprise interest income and interest expense.

Dividends from investments in subsidiaries are recognised in the income statement in the year when the dividends are declared.

Tax on profit/loss for the year

The Company is comprised by the Danish rules on compulsory joint taxation of the Group's Danish companies. The Company serves as the administrative company for the joint taxation and consequently settles all payments of corporation tax with the tax authorities. Current Danish corporation tax is allocated by the settlement of joint taxation contributions between the jointly taxed enterprises in proportion to their taxable income. In relation thereto, enterprises with tax losses receive joint taxation contributions from enterprises, which have been able to use this loss to reduce their tax loss.

Tax for the year comprises current tax and changes in deferred tax, including changes in tax rates. The tax expense relating to the profit/loss for the year is recognised in the income statement at the amount attributable to the profit/loss for the year and directly in equity at the amount attributable to entries directly in equity.

Balance sheet

Investments

Equity investments in group entities and associates are measured at cost. In case of indication of impairment, an impairment test is conducted. When the cost exceeds the recoverable amount, write-down is made to this lower value.

Other receivables and deposits are recognised at amortised cost.

Receivables

Receivables are measured at amortised cost, which corresponds to nominal value. The value is reduced by write-down for bad debts.

Corporation tax

Current tax payable and receivable is recognised on the balance sheet as tax computed on the taxable income for the year, adjusted for tax on the taxable income of prior years and for tax paid on account.

Liabilities

Financial liabilities are recognised at cost at the date of borrowing, equivalent to proceeds received less transaction costs paid. Other liabilities are measured at net realisable value.
