Profile

Aalborg Portland

A leading cement producer in the Nordic region

Produces grey and white cement at its plant in Aalborg.
The products are sold in Denmark, USA and neighbouring countries.

Grey cement

is the most important construction material for strengthening infrastructure, building homes and bridges, creating harbours and expanding airports

1,525,000

tonnes of grey cement

White cement

is for solutions ranging from aesthetics to safety - from terrazzo or bathroom tile grouts to highway safety barriers whose whiteness ensures high visibility night and day in all weathers.

705,000

tonnes of white cement

Part of the Aalborg Portland Holding Group

Aalborg Portland A/S, Denmark is part of the Aalborg Portland Holding Group, which is part of the Cementir Group, an international supplier of cement and concrete.

Cementir Holding S.p.A. has its head office in Rome, is listed on the Italian Stock Exchange in Milan (code CEM) and is part of the listed Caltagirone Group.

The financial ratios have been computed in accordance with the Guidelines issued by the Danish Finance Society in 2015. Cf. definitions in accounting policies note 25, page 33.

* The financial highlights for 2015 comprise the cement activity in the period from 27 June to 31 December 2015 due to the restructuring carried through in 2015.

Based at the Aalborg plant in Denmark, Aalborg Portland develops, produces and distributes grey and white cement. The main markets are Denmark, the North European region and USA.

At end-June 2015 the Group was restructured through a legal spin-off of the cement operations from the parent company, Aalborg Portland Holding A/S (formerly Aalborg Portland A/S).

In the new structure the activities relating to cement production in Aalborg have been transferred to a new subsidiary, named Aalborg Portland A/S, which also includes the sales subsidiaries in Iceland, Poland and Russia.

The parent company subsequently became purely a holding company and was renamed Aalborg Portland Holding A/S. Besides its shareholdings in i.a. Unicon A/S (Denmark), Cimentas A.S. (Turkey), CCB S.A. (Belgium) and the enterprises in Egypt, Malaysia, China and USA, the holding company owns all of the shares in the new Aalborg Portland A/S.

With this change, a simpler and clearer operational and financial structure was created.

As the results in 2015 for Aalborg Portland A/S comprise the cement activity in the period from 27 June to 31 December, the 2015 numbers are not directly comparable.

Activities are carried out through Aalborg Portland A/S and its sales subsidiaries Aalborg Portland Íslandi ehf., Aalborg Portland OOO, Russia, Aalborg Portland Polska Sp. z o.o and the newly established Aalborg Portland France S.A.S.

Aalborg Portland's strategic objective is to maintain its market position in Denmark, to expand its position in neighbouring countries and to consolidate a position as global leader on white cement through customised solutions and competitive prices.

This is achieved by means of ongoing focus on customer requirements including technical services, specialised product development, optimised processes, and investment in continuous development of production facilities and employee resources.

Earnings in 2016 are reflecting the increase in sales volumes to all main markets and the ability to benefit on the low energy prices in first half of 2016. Sales have also been supported by favourable weather conditions during the winter.

Sales – Domestic and export

Sales increased by 12% in 2016 compared to 2015 due to market growth in both Denmark and the export markets.

Export of grey cement was above 2015 level, as both the Icelandic and Norwegian markets increased significantly while sales to other markets remained stable.

Finally, export of white cement increased strongly partially due to market growth in Northern Europe, United Kingdom and USA, and partially due to sales to new markets in South America. Aalborg Portland continues to be the market leader of white cement in a number of European markets.

Subsidiaries

Iceland – Grey cement

Given an increase in market demand and a positive development in the exchange rate on the Icelandic Krona, the result for 2016 was improved compared to 2015, resulting in the subsidiary's best result since the Icelandic economic collapse in 2008.

Poland – White cement

In continuation of the positive market development in previous years, sales continued to increase in Poland and surrounding countries during 2016 which also was reflected in the earnings.

Russia – White cement

After a positive development in the previous 2-3 years, sales in Russia have come to a halt in 2016 due to new official requirements of cement re-certification.

France – White cement

During 2016 the French subsidiary was established simultaneously with the erection of a new terminal in Rochefort. The terminal will be commissioned in 2017 ensuring better logistic set-up and shorter delivery time to the French customers.

Continued customer focus

Together with security and sustainability, customer focus is paramount in Aalborg Portland's long term strategic development as well as in the day to day business.

Our customers have eligible high expectations on timely deliveries, quality and consistency, which we strive to meet at all time. Equally important is our obligation and ability to support customers on any technical issue they might experience, and also in a close dialogue to develop new products and services with the goal of enabling better solutions towards the end user.

A number of established activities are in place in this respect: The customer day under the name Portland Open was held for the third year in a row where the newest findings on relevant subjects were presented by Aalborg Portland's technicians and external peers. Furthermore, each year a domestic customer satisfaction survey is carried out by an independent consultancy company which apart from invaluable customer feedback in 2016 resulted in a very good evaluation of Aalborg Portland from the customers' side.

In addition, specific product development projects on both grey and white cement were launched in 2016 resulting in a successful completion of the first phase to be followed by subsequent projects now in pipeline for 2017.

Finally, the level of re-investments into the factory in Denmark was increased in 2016. This included customer oriented improvements as for instance a dynamic wind separator for white cement ensuring even higher quality performance consistency of the product, and re-investments in existing facilities including re-commissioning a white production line in order to meet customer demands.

Reporting on society responsibility and gender equality

Aalborg Portland has a long tradition for socially and environmentally responsible behaviour in the countries in which it operates. The Aalborg Portland is committed to make a strong contribution to realising society's climate goals and therefore invests significantly in continued environmental improvements.

In 2016, as in previous years, Aalborg Portland achieved a number of environmental goals through innovation and production management. By way of example, CO₂, and SO₂ emissions were relatively compared to the production level further reduced, underlining the Aalborg Portland's environmental stance and leadership.

Furthermore, cement production in Aalborg takes place in symbiosis with city and society. For example, heat from production provides district heating for 23,500 households in Aalborg, and almost 600,000 tonnes of industrial and household wastes are recycled in cement production in resource-efficient partnerships

Aalborg Portland publishes a detailed annual environmental report. Besides setting out policies and results achieved, the report describes the company's environmental, energy and health & safety management systems and its certifications.

Aalborg Portland's Statutory Report on Corporate Social Responsibility, cf. Section 99(a) of the Danish Financial Statements Act, can be found in "Sustainability Report 2016" from Cementir Holding, the owner of Aalborg Portland Holding. The report is available at www.cementirholding.it. Aalborg Portland Holding has not prepared a separate policy on human rights.

Goals and policies for the underrepresented gender

In accordance with Danish regulations governing the gender composition of management in large companies, cf. Section 139(a) of the Danish Companies Act and Section 99(b) of the Danish Financial Statements Act, the Group's policy on gender equality is being extended to recruitment and promotion, the decisive consideration being to find the best qualified people for all company positions. Focus is placed on increasing the number of female managers to provide for a balanced gender composition. Furthermore, it has been an aim of the Board of the Group's parent company to have at least one female AGM-elected member before the end of 2017. In December 2016 a female was elected as member of the board and hereby the aim of having at least one female AGM-elected member before the end of 2017 has been met.

Payments to authorities

In accordance with Danish regulations governing payments to authorities in large companies, cf. Section 99(c) of the Danish Financial Statements Act, Aalborg Portland has direct and indirect tax payments in relation to raw materials for cement production at EUR 0.8m and total payments incl. income tax on profit at EUR 21.6m.

Expectations to 2017

Sales volumes in 2017 are expected to increase in line with the general economic growth in Denmark and nearby markets, while the outlook for export sales are slightly better mainly driven by continued market growth in USA, improved positioning in France and continued sales to new markets in South America.

Earnings in 2017 are however expected to be moderately lower than in 2016 given an increase in the low energy prices experienced in 2016. In line with the long term strategy, focus will remain on customer satisfaction and increasing competitiveness.

Financial review

As the results in 2015 for Aalborg Portland A/S only comprise the period from 27 June to 31 December, the 2015 numbers are not directly comparable regarding Profit and loss and account and Cash flows.

Profit and loss account

Revenue in 2016 amounted to EUR 232.4m (2015: EUR 108.1m).

Sales in Denmark and the neighbouring export markets were above expectations.

Operating profit before depreciation (EBITDA ratio) reached 34.7% (2015: 38.9%). This satisfactory level was mainly due to high sales, low fuel costs and also the focus on Operational Excellence and cost optimisation programmes.

Earnings before interest and tax (EBIT) amounted to EUR 67.9m (2015: EUR 33.1m).

Tax on profit for the year amounted to EUR 14.6m (2015: EUR 7.7m), net profit for the year being EUR 53.3m (2015: EUR 25.3m).

Cash flows

Cash flow from operating activities (CFFO) was EUR 89.6m for 2016 (2015: EUR 51.3m).

Cash flow from investment activities (CFFI) amounted to EUR 23.3m (2015: EUR 2.6m).

The year's investments (CFFI) were funded by cash flow from operations (CFFO). The remainder of the free cash flow (FCF) of EUR 66.3m was primarily used to improve the net financial position.

Debt and financial resources

Aalborg Portland is part of the cash pool held by the parent company, Aalborg Portland Holding A/S. Aalborg Portland has access to funding through the parent company financing facility, and added to this a long-term mortgage loans of EUR 117m with an average life of 11.5 years.

Balance sheet

Non-current assets amounted to EUR 145.7m at 31 December 2017, whereof EUR 132.6m is related to property, plant and equipment.

Current assets amounted to EUR 208.9m, whereof EUR 203.0m is related to inventories and receivables.

Shareholders' equity

Shareholders' equity amounted to EUR 127.4m at the end of 2016 against EUR 73.8m the year before. The increase in shareholders' equity is due to the profit for the year.

Equity ratio was 36% at the end of 2016 (26% in 2015).

Working capital

Working capital, i.e. the capital tied up in debtors and inventories less creditors, was at a low level through focused control and reporting in relation to agreed goals. Keeping down working capital saves on interest expenses and frees up resources for investment etc. Furthermore, as stated, low working capital contributes to an improved return on capital employed (ROCE).

Working capital at end-2016 amounted to EUR -18.1m (EUR 4.5m in 2015).

Risk management

Like any other company, Aalborg Portland A/S (the Company) is affected by risks and uncertainties relating to its business activities and works continuously on strengthening risk management. Aalborg Portland is part of the Aalborg Portland Holding Group (the Group). The Group employs a holistic risk management process in which the most critical risks are:

- Market conditions
- Framework conditions
- Environmental impacts
- Organisation
- Financial risks

The Group continuously monitors and addresses both risks and opportunities in its market areas with a view to achieving its strategic objectives.

Monitoring and control

The Group's risk management is based on a standardised risk process. The assessment of the individual risk factors is based on the likelihood of the risks occurring and their potential impact on earnings, operations and reputation in this event.

The risk management process is embedded in the management of the business units. The business units together with the corporate and service functions are responsible for identifying, analysing and managing risks and for reporting on progress and initiating control measures. Risk owners are appointed specifically for the most significant risks. The individual unit managements are responsible for integration of risk assessments in all major decisions.

The individual risk reports received from the business units are consolidated at Group level. The combined risk report is included in Group management's monitoring and risk management processes. Group management is responsible for ensuring that the overall risk for the Group as a whole is of an acceptable level and that risk management procedures are implemented.

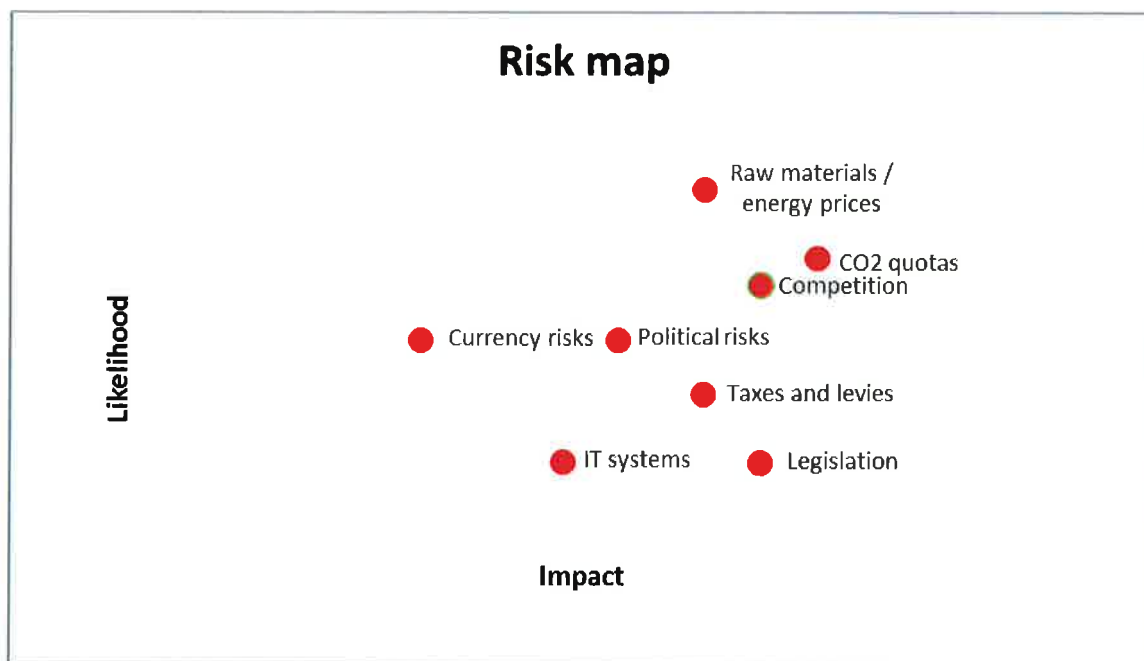

Group management reports periodically or as needed to the Board of Directors, which determines the overall policies and framework for the day-to-day management.

Risk management

Critical risks

Risks of particular significance to the Company's activities are illustrated below based on the likelihood of their occurring and their potential impact in that event.

Market conditions

Competition

Loss of major customers and projects may pose a significant risk in relation to the achievement of the Company's objectives. The Group continuously monitors its markets and takes ongoing actions to adapt to and meet the competitive environment and market changes.

Raw materials and energy prices

The Company uses large quantities of energy in cement manufacture and is therefore sensitive to long-lasting price changes. In order to mitigate this risk the purchase of energy is partly hedged by establishing contracts for terms up to 24 months.

Access to essential raw materials is ensured through ownership of deposits, extraction licences, long-term contracts and diversity in terms of suppliers. Furthermore, the market for the raw materials which are considered production-critical is carefully monitored. A small number of raw materials are subject to particular uncertainty as regards long-term security of supply, and the Company is working proactively to find appropriate solutions to this issue.

Framework conditions

Legislation and other regulations

The Company is subject to regulatory changes by the authorities and organisations in a variety of areas. Non-compliance with recommendations and regulations is often subject to substantial fines and constitutes a

Risk management

potential risk to overall earnings. The Company is committed to conforming with all aspects of competitive legislation, environmental legislation and internal rules regarding fraud. The Group trains relevant personnel in compliance with current requirements on an ongoing basis.

Political risks

The Group operates globally, including in emerging and growth markets with special political risks. This can have material consequences both for production conditions and sales. The Group pursues active dialogue at all levels with politicians, authorities and interest groups to create a good basis for continued operation and to enable the Group's operations to be adjusted when appropriate.

Taxes and levies

The Company's production is subject to substantial taxation, particularly in Denmark. Tax represents a material area of risk for the Company as it impacts directly on competitiveness and sales potential. It is particularly difficult to compete on price with cement producers from neighbouring countries that do not have high tax levels like Denmark.

CO₂ quotas

The future granting of CO₂ quotas to the Group's production units may have substantial financial impact. Ongoing focus is therefore placed by the Group on complying with all requirements relating to the granting of such quotas. The Group also closely monitors EU and national political issues concerning CO₂ quotas in relation to the Group's expected development in the EU area.

Environmental impacts

The Group's business units and management are very conscious of their environmental role and strive to recognise, manage and counteract relevant risks in this regard. The manufacture of the Group's products consumes raw materials and energy, but the environmental and climate characteristics of these products are very favourable. It is the stated policy of the Group to contribute constructively and significantly to achieving society's climate goals, and through the development of its products and production the Group therefore constantly strives to ensure a more environment-friendly and sustainable cement manufacture.

Organisation

Employees and management

The Company's continued success is dependent on the retention of experienced employees and managers and on the recruitment of new skilled employees and managers to the Group's business units and support functions. Accordingly, the Group attaches importance to providing attractive jobs with good development opportunities for employees and managers.

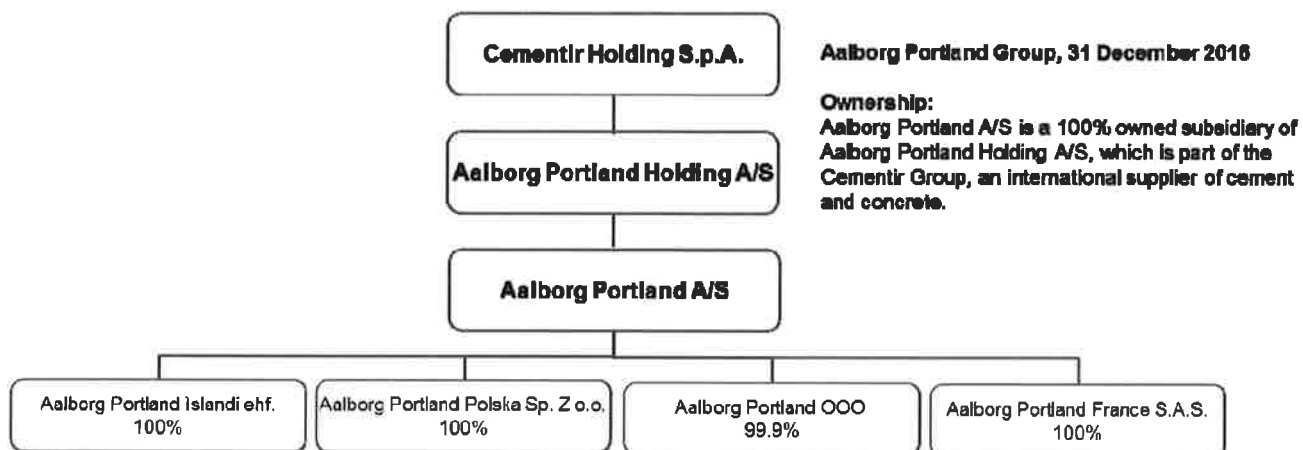

IT systems

IT systems are used in all parts of the Company's activities, including production, sales and finance. Operational disruption and loss of data and communications would impact the Group negatively. Consequently, IT security and business continuity are accorded high priority, especially in connection with implementation of new systems.

Financial risks

Financial risks, including currency risks, which are of material significance for the Company are described in the notes to the financial statements.

Carrying amount at 31 December 2015	2,329	5,256	456	8,041

Other intangible assets include software licenses (SAP R/3), quarry rights, CO₂ quotas and development projects.

Except goodwill, all intangible assets have definite useful lives. The management has not identified factors indicating a need for carrying through impairment test of other intangible assets.

The carrying amount of development projects is EUR 0.0m (2015: EUR 0.0m).

Internally generated intangible assets, mainly regarding SAP implementation, amount to EUR 1.5m (2015: EUR 1.7m).

Goodwill is related to cement activity. Due to strong cash flow there is no indication on impairment.

15 Trade receivables, other receivables and prepayments

	2016	2015
Development in impairment losses on trade receivables:		
Impairment losses at 1 January	3	0
Transferred activity from Group company	0	12
Reversed	0	-9
Impairment losses at 31 December	3	3

All receivables are due within one year.
 The carrying amount essentially corresponds to fair value.
 No collateral has been received regarding trade receivables.
 Other receivables include i.a. energy taxes.
 Prepayments comprise prepaid rent and insurance etc.

16 Provisions

	2016	2015
Provisions at 1 January	3,590	0
Transferred activity from Group company	0	3,523
Exchange rate adjustment	14	0
Additions during the year	107	67
Disposals/application in the year	-74	0
Provisions at 31 December	3,637	3,590
Recognised in the balance sheet as follows:		
Stated as non-current liabilities	3,571	3,491
Stated as current liabilities	66	99
	3,637	3,590
Maturities for provisions are expected to be:		
Falling due within one year	66	99
Falling due between one and five years	1,110	603
Falling due after more than five years	2,461	2,888
	3,637	3,590

Provisions including demolition liabilities for buildings and terminal on rented land amount to EUR 2.2m (2015: EUR 2.2m), re-establishment of chalk and clay pits amounts to EUR 1.4m (2015: EUR 1.3m) and other provisions amount to EUR 0.1m (2015: EUR 0.1m).

Movements in the year include adjustment of liabilities regarding re-establishment of chalk and clay pits, and other provisions.

Provisions for liabilities due after more than five years include liabilities regarding re-establishment of chalk and clay pits and demolition liabilities for buildings and terminals with no decision made regarding closure.

Costs for re-establishment of chalk and clay pits are mainly paid when finishing an excavation or when moving out from a lease. No considerable costs are expected in 2017.

Notes

17 Credit institutions and other borrowings

Bank borrowings and credits at 31 December:

	Year of maturity	Fixed/ variable	Carrying amount 2016	Carrying amount 2015
Mortgage loan	2028	Variabel	115,569	124,639
			<u>115,569</u>	<u>124,639</u>

Fair value of mortgage loan amounts to EUR 117.6m (2015: EUR 126.0m). Other fair values do not significantly deviate from the carrying amount.

The fair value corresponds to the nominal outstanding debt.

The Company's debt to credit institutions have been recognised and fall due as follows:

	Non-current borrowings (> 1 year)	Current borrowings (0-1 year)	Total	Maturity > 5 years
31 December 2016:				
Mortgage loan	106,062	9,507	115,569	71,137
	<u>106,062</u>	<u>9,507</u>	<u>115,569</u>	<u>71,137</u>
Specification of contractual cash flows incl. interest:				
Mortgage loan	117,987	11,599	129,586	70,912
	<u>117,987</u>	<u>11,599</u>	<u>129,586</u>	<u>70,912</u>
31 December 2015:				
Mortgage loan	115,227	9,412	124,639	76,974
	<u>115,227</u>	<u>9,412</u>	<u>124,639</u>	<u>76,974</u>
Specification of contractual cash flows incl. interest:				
Mortgage loan	126,403	11,351	137,754	81,920
	<u>126,403</u>	<u>11,351</u>	<u>137,754</u>	<u>81,920</u>

The maturity analysis is based on all undiscounted cash flows including estimated payment of interest.

Payment of interest is estimated and based on the present market conditions.

Maturity of derivatives is disclosed in note 26.

Other financial liabilities are due within 1 year.

18 Other payables

Other current payables include holiday pay liabilities, taxes and public indirect taxes, interest payable and dividends payable to non-controlling interests.

Notes

19 Charges and securities

	2016		2015	
	Carrying amount of mortgaged assets	Debt regarding mortgaged assets	Carrying amount of mortgaged assets	Debt regarding mortgaged assets
Property, plant and machinery	108,487	115,569	112,308	124,639

20 Contingent liabilities, contractual obligations and contingent assets

Contingent liabilities

The Company is involved in a few disputes, lawsuits, etc. of various scopes, including a few tax disputes in some countries. No significant liabilities are considered to be incumbent on the Company in that respect, and the outcome of the disputes is not expected to have significant impact on the Company's financial position beyond what has been recognised in the balance sheet.

In 2016, contractual liabilities, including acquisition of raw materials etc., are EUR 30.9m (2015: EUR 24.4m).

The Company is taxed jointly with other Danish companies in the Aalborg Portland Holding Group. As an administrative company, the Company is jointly and unlimited liable with the other companies in the joint taxation of Danish taxes at source and income taxes within the joint taxation group. Payable income taxes in the joint taxation group amounted to EUR 2.8m at 31 December 2016. Any subsequent corrections of the taxable income subject to joint taxation could cause a higher liability of the Company.

	2016	2015
Guarantees		
Other guarantees, etc.	649	593
	649	593
Operating leases		
Aggregate future lease payments under non-cancellable operating leases:		
Falling due within one year	9,060	5,932
Falling due between one and five years	15,180	6,544
Falling due after more than five years	6,626	1,170
	30,866	13,646
Operating lease expenses recognised in the income statement	7,956	4,210

Operating leases are primarily related to ships, silos/terminals and operating equipment. These leases contain no special purchase rights, etc.

The Company has no financial leasing liabilities.

- Financial items, net	12	-57
- Trade and financial receivable	10,913	6,250
- Trade and financial payables	294	46

Remunerations to the Board of Directors and the Management are presented in note 2.

No losses on loans to or receivables from related parties were recognised, nor provisions made for such in 2016 or 2015.

All transactions were made on terms equivalent to arm's length principles.

Notes

22 Financial risks and financial instruments

Risk management policy

As a result of its international operations, investments and financing, the Company is exposed to a number of financial risks, including market risks, liquidity and credit risks.

Market risks	Liquidity risks	Credit risks
Risks that the fair value of or future cash flows from a financial instrument will fluctuate due to changes in market prices.	Risks that the Company will encounter difficulties in meeting obligations associated with financial liabilities.	Risks that a counterparty of a financial instrument is unable to fulfil its obligations and thereby inflict a loss to the Company.

The Group's Finance & Treasury is in charge of the overall risk management in accordance with the principles adopted by the Board of Directors and the Company follows the Group policy. The policy is not to engage in any active speculation in financial risks. The Group's financial management is thereby solely directed towards the management and reduction of financial risks arising directly from the commercial operations, investments and financing.

The Company does not hedge the currency risk between EUR/DKK due to the Danish fixed-exchange-rate policy aimed at the EUR.

Neither in 2016 nor in 2015 the Company has defaulted or breached any loan agreements (covenants).

Market risks

Currency risks	Interest rate risks	Raw material price risks
Arise due to purchase and sale transactions as well as financial assets and liabilities in currencies other than the functional currency of the individual Company business.	Refer to the influence of changes in market interest rates on future cash flow relating to the Company's interest-bearing assets and liabilities and the fair value of these.	Refer to the influence of changes in raw material prices, which are not related to currency risks or interest rate risks.

Currency risks

Hedging is assessed and taken out in close co-operation with the Italian parent company. For the hedging of currency risks, the Company analyses realised and expected cash flows broken down by currencies.

Risks relating to purchases and sales

Revenue from the Company's activities and the purchases by this segment are denominated in several currencies. Accordingly, these activities are also exposed to changes in exchange rates.

The Company's currency risks are primarily hedged by the settlement of income and costs in the same currency and by use of derivative financial instruments. Investments in Group enterprises are not hedged.

The Company's most predominant currency exposure regarding the operating results arises from sales and purchases in EUR, USD, GBP, NOK, SEK and PLN. A 10% drop in these currencies (apart from EUR) would, viewed separately, increase EBITDA by EUR 2.6m (NOK amounts to EUR 0.1m, GBP amounts to EUR 1.0m, PLN amounts to EUR 1.3m, USD amounts to EUR 0.1m and SEK amounts to 0.1m), (2015: NOK amounted to EUR 0.3m, GBP amounted to EUR 1.1m, PLN amounted to EUR 1.3m and USD amounted to EUR 0.5m).

Risks relating to net financing

The Company's most important net positions at 31 December 2016 relate to a deposit in PLN and receivable in GBP. If the PLN and GBP had been 10% down at 31 December 2016, the Company's equity would have been affected negatively by an exchange rate adjustment of EUR 0.8m (2015: EUR 1.2m). Rising exchange rates would have had a similar positive impact on equity.

Notes

Translation risks relating to net investments in subsidiaries

Hedging of currency risk is not performed for net assets (equity) in foreign subsidiaries. Gains and losses relating to net assets in foreign subsidiaries are accounted directly in equity.

With regard to investments in foreign enterprises, equity at 31 December 2016 would have been reduced by EUR 1.0m (2015: EUR 0.7m), if the PLN, ISK, EUR and RUB exchange rates had been 10% down on the actual exchange rates.

Assumptions of sensitivity analysis

The sensitivities are stated on the assumption of unchanged sales and price levels and interest levels, and on the assumption of recognised assets and liabilities at 31 December 2016.

Forward contracts regarding future transactions

The Company does not comply with the conditions for taking out hedge accounting of future cash flows from the sale of goods. In terms of the hedging of future investments, the Company assesses in each case whether these comply with the conditions for hedge accounting.

Open forward contracts at 31 December are specified as follows:

2016

<i>EURm</i>	GBP	Total
Market value - forward contracts	-0.1	-0.1
Notional principal amount - forward contracts *)	-11.2	-11.2

The forward contracts fall due in January 2016.

2015

<i>EURm</i>	NOK	USD	Total
Market value - forward contracts	0.3	0.4	0.7
Notional principal amount - forward contracts *)	-4.6	1.4	-3.2

*) For forward exchange contracts, positive notional values are purchases of the relevant currency, negative notional values are sales.

Interest rate risk

The Company has exposure to interest rate changes in Denmark. The primary interest-rate exposure is related to fluctuations in CIBOR.

The Company's preferred financing is floating rate loans. The Company's net interest-bearing debt (NIBD) at 31 December 2016 came in at EUR -39.1m, 100% thereof financed by floating rate loans. NIBD at 31 December 2015 represented EUR -30.3m.

With regard to the Company's floating rate loans and cash equivalents, an annual 1% increase in the interest level in proportion to the actual interest rates would, other things being equal, have had an adverse hypothetical impact on the profit before tax of EUR 1.2m (2015: EUR 0.2m) and on equity of EUR 0.9m (2015: EUR 0.1m). A declining interest level would have had a corresponding positive impact on result and equity.

Raw material price risks

The Company uses a number of raw materials in the manufacture of products, which expose the Company to a price risk, i.a. especially different fuels and electricity. The Company enters into annual fixed price contracts for some raw materials. A material part of the price risk on the Company's fuel oil is hedged through swap agreements.

Notes

Open swap contracts at 31 December, net:

2016

<i>EURm</i>	Total
Market value - swap contracts	0.0

2015

<i>EURm</i>	Total
Market value - swap contracts	-0.4

Liquidity risks

Aalborg Portland A/S is included in the Cementir Group's overall management of financial risks.

Aalborg Portland A/S has access to funding through the Cementir Holding facility and also through Aalborg Portland Holding's uncommitted facility in Danske Bank.

The Company is part of the Group's cash pool scheme. The purpose of the cash pool scheme is to optimise cash management and the use of liquidity in the participating companies.

Regarding maturities of the Company's debt, reference is made to note 17.

Based on the expectations for the future operation and the present cash funds, no other significant liquidity risks have been identified.

Credit risks

The credit risks arise primarily from receivables related to customers, other receivables and cash.

As a consequence of the credit risk policy, credit rating of all major customers and other trading partners is performed before contract formation and hereafter continuously. An efficient credit control is important in the present market. Management of the credit risk is based on internal credit limits, which are based on the customer's and the counterparties' creditworthiness, based on both internal and external credit ratings as well as the experience with the counterparty. If no satisfactory guarantee is obtained when credit rating the customer/counterparty, payment in advance or separate guarantee for the sale, e.g. a bank guarantee, will be required.

The Company takes out credit insurances on a large part of export customers.

Due to the market situation, the Company has in recent years increased the resources used on follow-up on customers, which contributes to early warnings of possible risks. As part of the overall risk management, the credit exposure of customers and counterparties is monitored daily, weekly or monthly based on individual assessments. Historically the Company has had relatively small losses due to customers' or counterparties' inability to pay.

The credit risk limit of financial assets corresponds to the values recognised on the balance sheet.

No individual customer or co-operator poses any material risk to the Company.

Receivables from the Company's activities are attributable to Danish customers and export customers characterised as medium-sized and major customers. The Company is familiar with the Danish customers, who have not been granted long credit lines. Experience shows that export customers pose a low credit risk.

Receivables overdue at 31 December are specified as follows:

EURm

	2016	2015
Payment:		
Up to 30 days	0.5	0.7
Between 30 and 90 days	0.0	0.5
More than 90 days	0.0	0.0
	0.5	1.2

The Company's trade receivables at 31 December 2016 and 31 December 2015 include no write-downs.

Notes

Management of capital structure

Capital management is assessed and adjusted in close co-operation with the Italian parent company. Aalborg Portland A/S is included in the Cementir Group's overall capital management.

It is the Group's policy that the capital structure and financial gearing shall at all times reflect the Group's activities and risk profile, afford sufficient financial latitude to ensure the Group's creditworthiness, and provide flexibility and room for investments or acquisitions based on the Group strategy.

The distribution of dividends takes place considering the appropriate level of equity and sufficient availability of loan capital to facilitate the Group's ongoing expansion.

The financial gearing between net interest-bearing debt and EBITDA is -0.5 at 31 December 2016.

Specification of financial assets and obligations

<i>EUR '000</i>	Carrying value 2016	Fair value 2016	Carrying value 2015	Fair value 2015
Financial assets measured at fair value in the income statement	0	0	0	0
Financial assets used as hedging instruments, level 2	0	0	667	667
Loans and receivables	183,723	183,723	123,927	123,927
Financial assets available for sale	0	0	0	0
Financial obligations measured at fair value in the income statement	0	0	0	0
Financial obligations used as hedging instruments, level 2	126	126	413	413
Financial obligations measured at amortised cost	194,126	195,070	185,240	185,366

Methods and assumptions on determination of fair values

In general, fair value corresponds to the carrying value, except for mortgage loans.

Financial instruments related to sale and procurement of goods etc. with a short credit period are measured at fair value corresponding to the carrying value.

Derivative financial instruments are computed on generally accepted valuation methods based on relevant exchange rates.

23 Post-balance sheet events

There have been no post-balance sheet events material to this Annual Report which have not been recognised or mentioned.

Notes

24 Critical accounting policies as well as accounting estimates and judgements

The accounting policies require that when calculating the carrying value of certain assets and liabilities estimates are made of how future events influence the value of recognised assets and liabilities at the balance sheet date. Estimates that have a material influence on the amounts recognised in the annual report.

The estimates applied are based on assumptions deemed reasonable by the Management, but, given the nature of things, are uncertain. Thus, the Company is exposed to risks and uncertainties that may result in variances between actual and estimated results.

The development in the world economy and in the financial markets in the last three years has resulted in considerable changes compared to previous years in respect of some uncertainty in a number of key assumptions within i.a. credit risk, interest level, sales volumes, volatility, etc.

The Management deems that the accounting policies do not include critical aspects.

The following items are subject to major accounting estimates and judgements:

Non-current assets

Non-current assets are measured at cost less accumulated depreciation and impairment. Depreciation is provided on a straight-line basis over the expected useful lives of the assets considering the residual value of the assets. The anticipated useful life and residual value are determined on the basis of past experience and the anticipated future use of the asset in question. The anticipated future use and scrap values may prove impossible to realise, prompting a need for write-down or a loss on the disposal of the assets. The depreciation periods are stated in the section "Accounting policies" in note 25, and non-current assets are stated in notes 10 and 11.

Provisions and contingent liabilities

Assessment of provisions and contingent liabilities are largely based on estimates and judgements. Description of provisions and contingent assets and contingent liabilities is given in note 16 and 20.

Notes

25 Accounting policies

The Annual Report 2016 of Aalborg Portland A/S is prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional Danish disclosure requirements.

Aalborg Portland A/S official statutory annual report is presented in EUR.

The accounting policies set out below have been used consistently in respect of the financial year. For standards implemented prospectively, comparative information is not restated.

On 2 March 2017, the Board of Directors and the Management approved the annual report for 2016 for the Aalborg Portland Group. The annual report is submitted to the shareholders of Aalborg Portland A/S for approval at the Annual General Meeting on 18 April 2017.

Changes in accounting policies

The Company has implemented the financial reporting standards and IFRICs which came into force for the 2016 financial year. The new standards and IFRICs did not affect recognition and measurement of assets and liabilities in the 2016 financial year.

Non-controlling interests

On initial recognition, non-controlling interests are measured at fair value or at the proportionate share of the fair value of the acquired business's identifiable assets, liabilities and contingent liabilities. In the first scenario, goodwill in relation to the non-controlling interests' ownership share in the acquired enterprise is thus recognised, while, in the latter scenario, goodwill in relation to non-controlling interests is not recognised. Measurement of non-controlling interests is chosen transaction by transaction and stated in the notes in connection with the description of acquired enterprises.

The effect of transactions with non-controlling interests is taken directly to shareholders' equity. Therefore, no gains or losses are stated in the income statement, and there is no change of the carrying amount of net assets (including goodwill).

Foreign currency translation

For each of the reporting enterprises in the Group, a functional currency is determined. Transactions denominated in other currencies than the functional currency are considered transactions denominated in foreign currencies.

Transactions in foreign currencies are on initial recognition translated at the functional currency at the exchange rate of the date of transaction.

Financial assets and liabilities in foreign currencies are translated at the exchange rates at the balance sheet date. Any foreign exchange variances between the rates at the transaction date and the payment date or the balance sheet date, respectively, are stated in the income statement as financial items.

Non-financial assets and liabilities in foreign currencies are stated at the rate of exchange at the date of transaction.

On recognition in the consolidated financial statements of foreign enterprises and associates as well as foreign joint ventures with a functional currency different from the Group's presentation currency, the income statements are translated at the average exchange rates and the balance sheet items are translated at the exchange rates at the balance sheet date. The calculation differences arising from the translation of the income statements of companies abroad at average exchange rates and of their balance sheet items at the rate of exchange on the balance sheet date are taken directly to other comprehensive income.

On full or partial disposal of wholly-owned foreign operations resulting in a loss of control or on repayment of balances which constitute part of the net investment in the foreign operation, the share of the cumulative amount of the exchange differences that is recognised in other comprehensive income relating hereto is reclassified from other comprehensive income to profit for the year together with gain or loss on disposal.

On the disposal of partially owned foreign subsidiaries resulting in a loss of control, the share of the translation reserve in other comprehensive income attributable to non-controlling interests is not transferred to profit or loss.

An average exchange rate is used if it does not significantly deviate from the exchange rate ruling at the transaction date.

The assets and liabilities of a foreign company acquired are translated at the exchange rate at the date of transaction (acquisition date).

Notes

Derivative financial instruments

Derivative financial instruments are recognised at the date a derivative contract is entered into and measured in the statement of financial position at fair value. Positive and negative fair values of derivative financial instruments are included as separate line items in the statement of financial position, and set-off of positive and negative values is only made when the Company has the right and the intention to settle several financial instruments net.

The rules for hedge accounting are not applied, and value adjustments of derivative financial instruments are therefore recognised as finance income and finance costs.

Income statement

Revenue

Revenue is recognised in the income statement on delivery and passing of the risk to the buyer and when the income can be measured reliably and is expected to be received.

Revenue is measured at fair value of the consideration agreed excl. VAT charged on account of third party. All kinds of discounts are recognised in Revenue.

Cost of sales

Cost of sales comprises costs incurred to generate revenue for the year and development costs which do not meet the criteria for capitalisation. This includes raw materials, consumables, CO₂ quotas, direct labour costs and indirect production costs such as maintenance and operation of production plant as well as production plant depreciation, administration and plant management.

Sales and distribution costs

Sales and distribution costs comprise direct distribution and marketing costs, salaries for the sales and marketing functions as well as other indirect costs, including depreciation and amortisation.

Administrative expenses

Administrative expenses comprise the costs of administrative staff and management and other indirect expenses, as well as depreciation and amortisation.

Other operating income and costs

Other operating income and costs comprise items of a secondary nature in relation to the activities of the Group, including certain grants, rentals, fees, etc.

Gains and losses from the disposal of property, plant and equipment which cannot be considered part of the disposal of a complete activity are included in other operating income and costs.

Financial items

Interest income and expenses comprise interest, exchange rate gains and losses regarding transactions denominated in foreign currencies and write-down on securities, amortisation of financial assets and liabilities as well as surcharges and refunds under the on-account tax scheme, etc. Realised and unrealised gains and losses on derivative financial instruments that are not qualified as hedge accounting are also included.

Tax

Tax for the year comprises current tax and changes in deferred tax.

Current tax comprises tax payable calculated on the basis of the expected taxable income for the year, using the applicable tax rates for the financial year and any adjustment of tax for previous years.

Tax related to other comprehensive income is recognised in other comprehensive income.

Deferred tax is recognised and measured according to the balance sheet liability method on all temporary differences between the carrying amounts for financial reporting purposes and the amounts used for taxation purposes, except differences relating to goodwill not deductible for tax purposes.

Measurement of deferred tax is based on the tax rules and tax rates applicable in the respective countries at the balance sheet date, which is expected to be valid, when the deferred tax will be reversed as current tax. The effect of changes in the tax rates is stated in the income statement unless it relates to items previously entered directly in Shareholders' equity.

Notes

Deferred tax assets, including the value of tax loss carry-forwards, are recognised under Financial assets at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity and jurisdiction.

Aalborg Portland A/S is covered by the Danish rules on compulsory joint taxation of the Group's Danish companies. Enterprises are included in the joint taxation from the date of consolidation into the consolidated financial statements and up to the date when they exit the consolidation.

Aalborg Portland A/S is jointly taxed with the parent company, Aalborg Portland Holding A/S, and all Danish enterprises. The current Danish income tax is allocated by payment of joint taxation contributions between the jointly taxed companies in proportion to their taxable income. Companies with tax losses receive joint tax contributions from companies who have used this loss to reduce their own taxable income.

Balance sheet

Intangible assets

Goodwill

On initial recognition, goodwill is recognised in the balance sheet at cost as described under "Business combinations". Subsequently goodwill is measured at cost less accumulated impairment. Goodwill is not amortised.

The carrying amount of goodwill is allocated to the Group's cash-generating units at the acquisition date. Determination of cash-generating units follows the management structure and internal financial control.

Development projects

Development projects that are clearly defined and identifiable, where the technical feasibility, sufficient resources and a potential future market or development opportunities in the Company is demonstrated, and where the Company intends to complete, market or use the individual project, are recognised as intangible assets provided that the cost can be measured reliably and that there is sufficient assurance that future earnings or the net selling price can cover production costs, selling and administrative expenses and development costs. Other development costs are recognised in the income statement as incurred.

Development projects are measured at cost less accumulated amortisation and impairment. Cost comprises wages and salaries, amortisation and other costs attributable to the Group's development activities.

Following the completion of the development work, development costs are amortised on a straight-line basis over the estimated useful life from the date when the asset is available for use. The amortisation period is up to 5 years.

Other intangible assets

Other intangible assets, including intangible assets acquired in business combinations, are measured at cost less accumulated amortisation and impairment losses.

Amortisation is made on a straight-line basis over the lower of the useful life and the contract period.

The expected useful lives are:

- Software applications, up to 10 years.
- Customer contract 25 years.
- Patents, licences and other intangible assets, up to 20 years.
- Leasehold improvements, up to 5 years.

CO₂ quotas

On initial recognition, granted and acquired CO₂ quotas are measured at cost.

The basis for amortisation of CO₂ quotas is stated as cost less scrap value. The scrap value depends on whether the company expects to utilise the quotas or sell them. Amortisation is based on a portfolio view on a straight-line basis.

If the actual emission exceeds the granted and acquired CO₂ quotas, a liability corresponding to the fair value of the CO₂ quotas, which the company has to settle, is recognised.

On disposal of CO₂ quotas the difference between carrying amount and the selling price of excess CO₂ quotas is recognised in the income statement at the date of disposal.

Notes

Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and impairment.

The cost of self-constructed assets comprises direct and indirect costs of materials, components, sub-suppliers, and wages and salaries as well as borrowing costs from specific or general lending directly relating to the construction of the individual asset.

Deemed costs for dismantling and disposal of the asset and re-establishment are added to cost if the deemed costs are recognised as a provision. The cost of total assets is split into separate components, which are depreciated separately if the useful lives of the individual components differ.

The cost of finance leases are measured at the lower value of the asset's fair value or at the present value of the future minimum lease payment. When calculating the present value, the internal interest rate of the lease or the Group's alternative borrowing rate is used as discount rate.

Subsequent costs, e.g. in connection with replacement of components of property, plant and equipment, are recognised in the carrying amount of the asset if it is probable that the costs will result in future economic benefits for the Group. The carrying amount of the replaced components are derecognised in the balance sheet and recognised as an expense in the income statement. All costs incurred for ordinary repairs and maintenance are recognised in the income statement as incurred.

Depreciation is charged on a straight-line basis during the estimated useful life of the asset concerned until it reaches the estimated scrap value.

Estimated useful lives are as follows:

- Buildings and improvements of land, 5-50 years
- Main machinery, 25 years
- Other plant and machinery, 3-20 years

Newly acquired assets and assets of own construction are depreciated from the time they come into use. Land is not depreciated, unless it is used for raw material extraction after individual assessment.

The basis of depreciation is calculated on the basis of the scrap value less impairment losses. The scrap value is determined at the acquisition date and reassessed annually. If the scrap value exceeds the carrying amount, depreciation is discontinued.

When changing the depreciation period or the scrap value, the effect on the depreciation is recognised prospectively as a change in accounting estimates.

Depreciation is recognised in the income statement as production costs, sales and distribution costs and administrative expenses to the extent that depreciation is not included in the cost of self-constructed assets.

Other non-current assets

Other non-current assets mainly relate to deposits and loans which are measured at amortised cost. Amortisation for the year is stated in the income statement.

Impairment of non-current assets

Goodwill is subject to annual impairment tests, initially before the end of the acquisition year.

The carrying amount of goodwill is tested together with the other non-current assets of the cash-generating unit or group of cash-generating units to which goodwill is allocated. The assets of the cash-generating units are written down to the recoverable amount in profit or loss if the carrying amount is higher. The recoverable amount of a CGU is generally determined as the present value of the expected future net cash flows from the entity or activity (cash-generating unit) to which goodwill is allocated. However, impairment losses on goodwill are recognised as other operating costs in the income statement.

The carrying amount of other non-current assets, except for goodwill, investment properties and financial assets measured at fair value, is tested annually for indications of impairment. When there is an indication that assets may be impaired, the recoverable amount of the asset is determined. The recoverable amount is the higher of an asset's fair value less expected costs to sell and its value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or the cash-generating unit to which the asset belongs.

An impairment loss is recognised if the carrying amount of an asset or a cash-generating unit, respectively, exceeds the recoverable amount of the asset or the cash-generating unit.

Notes

Amortisation and depreciation of intangible assets and property, plant and equipment are recognised in the same item as the related amortisation and depreciation. However, impairment losses on goodwill are recognised in a separate line item in the income statement.

Inventories

Raw materials and consumables are measured at cost. Cost is computed according to the weighted average cost method.

The cost of goods for resale and raw materials and consumables comprises purchase price plus delivery costs.

The cost of work in progress and finished goods comprise direct production costs with addition of indirect production costs. Indirect production costs include operating costs, maintenance and depreciation of production plant and plant management.

If the net realisable value is lower than cost, write-down is made to this lower value.

Receivables

Receivables are measured at amortised cost.

Write-down is made for bad debt losses when there is an objective indication of an impairment loss. In such cases, write-down is made individually for each specific receivable.

Write-down is stated as the difference between the carrying amount and the present value of the expected cash flow, including the net realisable value of any received collaterals. The effective interest rate used at the time of initial recognition is used as the discount rate for the individual receivable or portfolio.

Equity

Dividends are recognised as debt at the time of approval at the annual general meeting (time of declaration). Dividends which are proposed for distribution are therefore stated separately in the shareholders' equity.

Reserves relating to foreign exchange adjustments in the consolidated financial statements comprise currency translation differences arising from the translation of the financial statements of foreign entities from their functional currencies to the presentation currency of the Company (EUR) and foreign exchange adjustments of assets and liabilities considered to be part of the Group's net investment in foreign operations.

On full or partial realisation of net investments, exchange differences are recognised in the income statement.

Provisions

Provisions are recognised when, as a result of past events, the Group has a legal or a constructive obligation and it is probable that there may be an outflow of resources embodying economic benefits to settle the obligation.

When the Group has a legal obligation to dismantle or remove an asset or restore the site on which the asset is located, a provision is recognised corresponding to the present value of expected future costs. The present value of costs is recognised in the income statement for the tangible assets concerned and is amortised together with these assets over the useful lives or according to the production method.

Provisions are measured as the best estimate of the expenses required to settle the obligation at the balance sheet date.

Financial liabilities

Amounts owed to credit institutions are recognised when raising the loan at fair value less transaction costs. Subsequent measurement is made at amortised cost so that the difference between the proceeds and the nominal value is recognised in the income statement during the term of the loan.

The capitalised remaining lease liability of finance leases is also recognised in financial liabilities, measured at amortised cost.

Other financial liabilities are measured at amortised cost.

Leases

Lease commitments are classified as finance or operating leases.

A lease is classified as a finance lease if it transfers substantially all risks and rewards incident to ownership. All other leases are classified as operating leases.

The accounting for finance leases and the related liabilities are described in the paragraphs concerning tangible assets and financial liabilities, respectively.

Lease payments regarding operating leasing are expensed on a straight-line basis over the lease term.

Notes

Cash flow statement

The cash flow statement is presented according to the indirect method and shows the composition of the cash flow divided into operating, investing and financing activities, respectively, and the cash funds at the beginning and end of the year.

In the statement of working capital/loans a distinction is made between interest-bearing and non-interest-bearing items plus cash funds.

Cash funds consist of cash in hand and bank deposits.

Loans represent total interest-bearing debt items less interest-bearing receivables. Formation of finance leases are considered as non-cash transactions

All other non-interest-bearing receivables and debt items are regarded as working capital.

Cash flows from operating activities are stated as Profit for the year (EAT) adjusted for non-cash operating items, changes in working capital, financial items and paid tax.

Cash flows from investing activities comprise payments made in connection with the acquisition and disposal of enterprises and activities and the acquisition and disposal of non-current assets.

Cash flows from financing activities comprise payments to and contributions from owners as well as the raising and repayment of loans.

Omission of consolidated financial statements

Pursuant to section 112(1) of the Danish Financial Statements Act, no consolidated financial statements have been prepared. The financial statements of Aalborg Portland A/S and group entities are included in the consolidated financial statements of Aalborg Portland Holding A/S, Rørdalsvej 44, 9220 Aalborg Øst, Denmark, CVR no. 14 24 44 41.

Segment reporting

Aalborg Portland A/S is not a listed company and therefore no segment reporting is made according to IFRS 8.

New and changed standards

A number of new financial reporting standards, which are not compulsory for the Company in 2016, have been released. The adopted, non-effective standards and interpretations are implemented as they become mandatory for the Group. None of the new standards or interpretations is expected to have any significant impact on the financial reporting for the Group.

Notes

Financial ratios

EBITDA ratio	$\frac{\text{Earnings before depreciation/amortisation, impairment losses, provisions, interest and tax (EBITDA)}}{\text{Revenue}}$
EBIT ratio	$\frac{\text{Earnings before interest and tax (EBIT)}}{\text{Revenue}}$
NOPAT	Net Operating Profit After Tax $\text{Earnings before interest and tax (EBIT)} \times (1 - \text{effective tax rate})$
Capital employed	Intangible assets + tangible assets + working capital
Equity ratio	$\frac{\text{Shareholders' equity}}{\text{Total assets}}$
Return on equity	$\frac{\text{Profit}}{\text{Average shareholders' equity}}$
Net interest-bearing debt (NIBD)	Interest-bearing liabilities less interest-bearing assets
Working capital	Inventories, receivables and trade payables.

Signatures

Statement by the Board of Directors and the Executive Board

The Board of Directors and the Executive Board have today discussed and approved the annual report of Aalborg Portland A/S for the financial year 1 January – 31 December 2016.

The annual report has been prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional Danish disclosure requirements.

In our opinion, the financial statements give a true and fair view of the Company's as-sets, liabilities and financial position at 31 December 2016 and of the results of the Company's operations and cash flows for the financial year 1 January – 31 December 2016.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's activities and financial matters, of the results for the year and of the Company's financial position.

We recommend that the annual report be approved at the annual general meeting.

Independent auditors' report

To the shareholders of Aalborg Portland A/S

Opinion

We have audited the financial statements of Aalborg Portland A/S for the financial year 1 January – 31 December 2016 comprising income statement, balance sheet, statement of changes in equity, cash flow statement and notes, including accounting policies. The financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional Danish disclosure requirements.

In our opinion, the financial statements give a true and fair view of the Company's assets, liabilities and financial position at 31 December 2016 and of the results of the Company's operations and cash flows for the financial year 1 January – 31 December 2016 in accordance with International Financial Reporting Standards as adopted by the EU and additional Danish disclosure requirements.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's responsibility for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU and additional Danish disclosure requirements and for such internal control that Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements in Denmark will always detect a material misstatement when it exists. Misstatements may arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of financial statement users made on the basis of these financial statements.

Signatures

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also

- identify and assess the risks of material misstatement of the company financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.
