### **Basis of recognition and measurement**

Income is recognised in the income statement as earned, including value adjustments of financial assets and liabilities. All expenses, including amortisation, depreciation and impairment losses, are also recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the company and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow from the company and the value of the liability can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. On subsequent recognition, assets and liabilities are measured as described below for each individual accounting item.

Certain financial assets and liabilities are measured at amortised cost using the effective interest method. Amortised cost is calculated as the historic cost less any installments and plus/less the accumulated amortisation of the difference between the cost and the nominal amount.

On recognition and measurement, allowance is made for predictable losses and risks which occur before the annual report is presented and which confirm or invalidate matters existing at the balance sheet date.

Jointly taxed companies entitled to a tax refund are, as a minimum, reimbursed by the management company according to the current rates applicable to interest allowances, and jointly taxed companies having paid too little tax pay as a maximum, a surcharge according to the current rates applicable to interest surcharges to the management company.

Deferred tax is measured according to the liability method in respect of temporary differences between the carrying amount of assets and liabilities and their tax base, calculated on the basis of the planned use of the asset and settlement of the liability, respectively. Deferred tax is measured at net realisable value.

Deferred tax is measured according to the tax rules and at the tax rates applicable in the respective countries at the balance sheet date when the deferred tax is expected to crystallise as current tax. ## NOTES

### 1 UNCERTAINTY ABOUT THE CONTINUED OPERATION (GOING CONCERN)

The company has incurred a net loss of 242 TDKK during the year ended December 31, 2023 and, as of that date, the Company's current liabilities exceeded its current assets by 4,796 TDKK.

The company is dependent on that the IWG Group regularly provides the necessary liquidity to ensure that the company is able to meet its liabilities as they fall due until the annual general meeting where the annual report of 2024 is approved.

No commitments on financial support has been given from the owners, which indicates that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern.

Management however expects that the owners have the ability to pay, for which reason the financial statements for the year ended 31 December 2023 have been prepared on a going concern basis.
