STATEMENT BY MANAGEMENT ON THE ANNUAL REPORT

The board of directors and the Executive Board have today considered and approved the annual report of New Nutrition Holding ApS for the financial year 1 January – 31 December 2020.

The annual report is presented in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statement Act.

In our opinion, the consolidated financial statements and the Parent financial statements give a true and fair view of the Group's and the Parent's financial position at 31 December 2020 and of the results of their operations and cash flows for the financial year 1 January – 31 December 2020.

In our opinion, the management review contains a fair review of the development of the Group's and the Parent's business and financial matters, the results for the year and of the Parent's financial position and the financial position as a whole of the entities included in the consolidated financial statements, together with a description of the principal risks and uncertainties that the Group and the Parent face.

We recommend the annual report for adoption at the annual General meeting.

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF NEW NUTRITION HOLDING APS

OPINION

We have audited the consolidated financial statements and the parent financial statements of New Nutrition Holding ApS for the financial year 01.01.2020 - 31.12.2020, which comprise the income statement, statement of comprehensive income, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies, for the Group as well as for the Parent, and the consolidated cash flow statement. The consolidated financial statements and the parent financial statements are prepared in accordance with the International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent financial statements give a true and fair view of the Group's and the Parent's financial position at 31.12.2020, and of the results of their operations and the consolidated cash flows for the financial year 01.01.2020 - 31.12.2020 in accordance with the International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's responsibilities for the audit of the consolidated financial statements and the parent financial statements section of this auditor's report. We are independent of the Group in accordance with the International Ethics Standards Board of Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

MANAGEMENT'S RESPONSIBILITES FOR THE CONSOLIDATED FINANCIAL STATEMENTS AND THE PARENT FINANCIAL STATEMENTS

Management is responsible for the preparation of consolidated financial statements and parent financial statements that give a true and fair view in accordance with the International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of consolidated financial statements and parent financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements and the parent financial statements, Management is responsible for assessing the Group's and the Parent's ability to continue as a going concern, for disclosing, as applicable, matters related to going concern, and for using the going concern basis of accounting in preparing the consolidated financial statements and the parent financial statements unless Management either intends to liquidate the Group or the Entity or to cease operations, or has no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS AND THE PARENT FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements and the parent financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and these parent financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements and the parent financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the consolidated financial statements and the parent financial statements, and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements and the parent financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Entity to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements and the parent financial statements, including the disclosures in the notes, and whether the consolidated financial statements and the parent financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

STATEMENT ON THE MANAGEMENT COMMENTARY

Management is responsible for the management commentary.

Our opinion on the consolidated financial statements and the parent financial statements does not cover the management commentary, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements and the parent financial statements, our responsibility is to read the management commentary and, in doing so, consider whether the management commentary is materially inconsistent with the consolidated financial statements and the parent financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the management commentary provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the management commentary is in accordance with the consolidated financial statements and the parent financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the management.

$$\text{Equity ratio} = \frac{\text{Equity end of year} \times 100}{\text{Total assets}}$$

$$\text{Return on equity} = \frac{\text{Net profit for the year} \times 100}{\text{Average equity}}$$

HAMLET

DEVELOPMENT IN ACTIVITIES AND FINANCES

OPERATING REVIEW

HAMLET PROTEIN GROUP

The objective of the parent company New Nutrition Holding ApS is to own shares and other financial instruments. In 2015, the parent company acquired all shares in the HAMLET PROTEIN A/S Group via the fully owned subsidiary New Nutrition ApS.

HAMLET PROTEIN A/S' business strategy is to develop, produce and sell vegetable specialty protein solutions used in high value-add animal feed for young animals. The company services more than 50 countries from its two production facilities in Horsens, Denmark and Findlay, Ohio, USA.

The subsidiary, New Nutrition ApS is located in Denmark, and handles selected group functions

The subsidiary, HAMLET PROTEIN Inc., is located in Ohio, USA, and handles the production, sales, and distribution of products, primarily to North America and Asia. The subsidiary, Hamlet (Qingdao) Trading Co., Ltd. is located in Shandong, China, and handles import, sales and distribution to customers in China. The subsidiary, HAMLET PROTEIN GmbH with no operating activities is under liquidation.

FINANCIAL REVIEW

As the demand for safe and affordable meat products continues to grow in most regions of the world, so does the demand for high quality specialty feed protein. Our growth is supported by long-term structural mega trends such as population growth, transition from backyard farming towards more industrialized farming practices as well as greater focus on antibiotic free feed practices and feed safety. Especially the North American and Chinese markets have contributed with considerable growth in recent years, driven by the need for continued improvement of farm efficiency, while at the same time reducing or eliminating antibiotics in animal feed. Finally, demand is driven by an increased focus on feed security by reducing the use of animal-based protein in favor of secure, highly efficient products such as HAMLET PROTEIN's soy-based specialty products.

At HAMLET PROTEIN we draw on our knowledge of bioavailability, biotechnology,bioconversion and the practical application of our specialty feed ingredients to meet all these demands. Every year, we run a large number of tests in our pilot production plant to verify efficacy and customer value. Many of our innovation projects are run in partnership with customers and external research institutes. Together, we aim to lead the way to bigger and better achievements within specialty proteins for young animals. As an integral part of HAMLET PROTEIN's DNA, we continuously document the value-adding performance of HAMLET PROTEIN products in numerous international trials at farms and universities.

In late 2019 a new strategic plan for the HAMLET PROTEIN group was formulated which focused on three main areas: branding & positioning, commercial acceleration, and entrepreneurial culture. Implementation of the plan was started late 2019, and implementation has been executed successfully in 2020:

- Sales in metric ton grew by 18% compared to 2019
- Number of FTEs has been reduced from 144 at peak in 2019 to 119 by end of 2020
- EBITDA has improved from 24 mDKK in 2019 to 79 mDKK in 2020

Further, a refinancing of HAMLET PROTEIN's senior debt facilities was completed in March 2020 to reduce HAMLET PROTEIN's interest expenses and provide the company with added operational liquidity to pursue further growth.

Throughout most of 2020 the global economy has been impacted by the Covid-19 virus pandemic. Even though the feed industry proved to be quite resilient during the pandemic, some notable effects occurred. On a global level that lead to increased freight costs as the availability of containers was reduced.

In the USA Covid-19 forced the closure and/or reduced capacity at livestock/meat processing plants, resulting in a build-up of pig inventories, which led to a significant price drop of pork meat. When farmgate prices are under pressure this leads to a reduced inclusion of HP portfolio products in the diets. In Europe the closure of food services (restaurants) led to a reduced demand for veal meat, putting pressure on this market segment.

HAMLET PROTEIN experienced strong sales growth in China, where Hamlet Protein continued to invest in positioning its' product portfolio. The high pork prices, and relatively high fish meal pricing, provided positive market conditions to increase our market penetration.

Another important driver for our markets is African Swine Fever (ASF). Whereas China showed a swine herd recovery in 2020 after significant reductions in previous years, the Philippines was affected negatively by the virus. Reduced pig numbers lead to reduced market potential for Hamlet Protein. ASF was detected in wild boars in Germany in 2020, which led to an export ban for Germany pork meat to China in late 2020. As the German producers sold their export capacity into Europe, this led to decreased pig meat prices in Europe.

We have maintained or increased our market share in most main markets through competitive positioning and expanded deployment of our own sales teams, mainly within piglets. Our position in veal followed market developments and in poultry we focused predominantly on the US, where we aim to launch a cost-effective poultry product in H2-2021.

We are specialized in young animals and our strong market position is maintained and expanded via a deep and specific knowledge of the individual species, combined with solid documentation from feeding trials continuously ongoing across the world.

In 2020 we have invested resources in brand building – both for products and the company – and will continue to do so in 2021. Due to Covid-19 our interaction with customers is predominantly virtual, as travel is restricted and tradeshows cancelled. We expect that trend to continue at least for H1-2021.

Net loss for the year was -35 mDKK, which is 35 mDKK better than last year mainly due to the positive impact from higher sales and the savings from the restructuring.

2020 investments include a further expansion of production capacity at our plant in Ohio, USA. In addition, we have invested in strengthening our long-term growth platform through R&D activities with the aim to further broaden the knowledge of our products in future growth markets.

NON FINANCIAL MATTERS

Quality

Both our plants in Denmark and USA meet the criteria of the feed safety standard GMP+ and the food safety management standard ISO 22000. Further, our strict Feed Safety Policy ensures full traceability of both GMO and non-GMO products, allowing any batch of product to be easily traced if need be. Every week, our laboratory team analyses 200 protein samples, taken round-the-clock from our production lines. These analyses are an important part of our customer service and a guarantee of high product quality.

Shareholders
The Company is owned by New Nutrition Holding S.àr.l., Luxembourg, which ultimately is owned by Goldman Sachs Group Inc. ("GS Group") and Altor Fund IV Holding AB.

The Company's share capital is not divided into share classes, and the Company's articles of association do not stipulate any limits for ownership or voting right.

The Board of Directors regularly assesses whether the Company's capital structure is sound. The overall objective is to ensure that the Company's capital structure supports its growth strategy

The Board of Directors' duties
The Board of Directors of the Company ensures that the Executive Board complies with the decisions, strategies and business procedures adopted by the Board of Directors. The Board of Directors in New Nutrition Holding ApS meets according to a fixed schedule. In 2020, the Board of Directors held six meetings. In 2021 the meeting frequency will be reduced to four.

The Board of Directors does not rely on any subcommittees due to the limited size and complexity of the Group. Accordingly, the entire Board of Directors has focused on significant accounting policies and significant accounting estimates, and transactions with related parties, if any, as well as uncertainties and risks in its financial reporting process. Together with the auditors, the quality of the Company's internal control systems is assessed on a regular basis, just as the auditors' independence is verified. Areas identified as particularly critical, such as foreign currency policy, procurement policy and insurance matters, are regularly discussed within the Board of Directors.

Outlook
For 2021 we expect that the global trend of increasing demand for high-quality, vegetable-based specialty protein will continue. We expect that the Asian and North American markets will be the main drivers of our 2020 growth. The ambition is to grow sales volumes by 5-10% compared to 2020.

In 2021 HAMLET PROTEIN will continue to invest in new products and future growth. In addition, further investments in process optimization and information technology will pave the way for a further shift of resources towards growth-driving commercial areas. Through the combination of sales growth and improved utilization of our production facilities, we expect a 10-20% improvement in EBITDA in 2021 compared to 2020.

Particular risks
The pricing of HAMLET PROTEIN's raw materials and finished goods is influenced by the price development on international commodity exchanges, which, together with the price development on substitute goods, will influence the Company's and customers' competitive situation, resulting in uncertainty about forecasted results.

A substantial part of the Company's products is sold to the agricultural sector. The market conditions for these customers are subject to high volatility, meaning that the market situation may change rapidly and be difficult to predict. HAMLET PROTEIN strives to mitigate such conditions by setting up its production, sales and distribution channels as flexibly as possible.

It is company policy to hedge risks on transactions denominated in selected foreign currencies as well as purchases of raw materials. The Company's exposure to changes in the interest rate of loans is regularly assessed, and interest hedging is made at group level. Currency risks on the investment in the US subsidiary are partly hedged by loans denominated in USD.

Research and development activities
In 2020, HAMLET PROTEIN incurred research and development costs for products for both new and existing customers. All external development cost is capitalized in the balance sheet.

GROUP RELATIONS

Recommendations for active ownership and corporate governance for private equity funds
Being owned by private equity funds, New Nutrition Holding ApS is subject to the guidelines for active ownership and corporate governance for private equity funds and their controlled enterprises as issued by the Danish Venture Capital and Private Equity Association ("DVCA"). In general, New Nutrition Holding ApS complies with these recommendations apart from the incidents where the Company's Management assesses that the disclosure of specific information will be detrimental to the Group's and the Company's competitive situation.

Statutory report on corporate social responsibility
HAMLET PROTEIN's business model is to develop, produce and sell vegetable protein solutions used in high value add animal feed for young animals mainly in Europe, North America and Asia. We strive to define our corporate social responsibility within the areas of energy and environment, responsible sourcing, human resource issues and compliance with ethical business standards.

ENVIRONMENTAL PERFORMANCE

Energy and impact on the external environment
Our production process requires energy and we acknowledge that energy production involves an environmental impact related to carbon dioxide emissions. Ever since we designed our production process in the early 1990s, we have focused on optimizing our use of energy and water and on reducing waste. This means that the plant in Denmark is certified according to the ISO 50001:2011 energy management system standard. The plant in US is built on the same level of technology. Apart from steam consisting of water and carbon dioxide, our emission is close to zero hence, the risk of directly polluting the external environment is negligible.

In both factories, we have already made considerable investments in thermal incineration plants reducing energy consumption per produced ton of finished goods by more than 10%.

In Denmark, we have worked intensively to further reduce energy consumption via condensation and recycling of excess heat. As a direct result of these efforts, HAMLET PROTEIN has entered into a partnership agreement with Horsens' district heating (Fjernvarme Horsens) to convert waste energy into heating.

Since its inauguration in 2020, the plant is providing heating to approximately 3,300 households in the Horsens area, and reduces energy waste at HAMLET PROTEIN to the lowest degree possible. We believe that our efforts have contributed to minimizing our environmental impact in 2020.

In 2021 we will continue to focus on reducing our energy waste.

Responsible sourcing
We believe that human rights should be observed and respected in all aspects. Our predominant raw material is soy, which we acquire partly from producers in South America, and we are aware that there is a potential risk of lacking compliance with human rights in the production chain. The risk, however, is mitigated by means of our policy for responsible sourcing of raw materials.

Our objective is to be leading within product quality and product integrity, and we constantly strive to strengthen our supply chain towards sustainability but at the same time balancing the need for an effective and reliable flow of raw materials to our production units.

It is our policy only to buy from soy producers that demonstrate social and environmental responsibility. We buy our raw materials from the world's leading soy producers in North and South America and have since day one paid a surcharge to reach our goal proven by certifications since 2005. HAMLET PROTEIN solely buys soy from suppliers who are approved according to our quality management system before goods are delivered.

In the US, we buy soy from internationally recognized suppliers; either members of NOPA (National Oilseed processors Association) or related members.

In South America, we require the following from our suppliers:

- The supplier is not involved in or supports the use of child labor, forced labor, discrimination or harassment
- The supplier supports voluntary unionism of employees and the right to negotiate collective agreements for all employees
- The supplier does not buy soy from land in the Amazon Biome cleared after 24 July 2006.
- The supplier does not buy soy grown from land where natives' residences have been removed after May 2009, except if in accordance with national legislation
- The supplier supports the use of pesticides in accordance with local legislation, the Stockholm Convention and the Rotterdam Convention.

Alternatively, we require that our soy suppliers are certified according to the ProTerra Standard or committed to the Soy Moratorium or in any other way are able to document that they live up to the Basel Criteria (4th edition 16.02.2005). Our goal is that minimum 90% of our soy supplies should comply with these conditions. In recent years, the company has met and exceeded this minimum threshold, a trend that continued into 2021. As new and improved soy certification programs become available, we will consider implementing these programs in our standard basis for sourcing. Finally, in 2021 we will continue to focus our human rights efforts.

Compliance
Our long-term success is built on doing business in a fair and ethical way. The risk of failing to do so is unrelated to HAMLET PROTEIN's specific business model but merely a general risk of doing business is all parts of the world. Specific risk areas for HAMLET PROTEIN includes bribery in connection with government approvals and licenses for manufacturing and cross border trade, selling to unethical individuals or dealing with companies or individuals subject to international sanctions.

HAMLET PROTEIN has revised its compliance policies to reflect best practices in regards to Anti-Bribery and Corruption, Economic Sanctions and Anti-Money Laundering compliance, and we are committed to ensuring we conduct our business ethically and in line with these principles. The Anti-Corruption and Economic Sanctions Compliance Policy sets forth the policy of the Group to ensure compliance with all potentially applicable laws and conventions. The Policy applies to everyone working for the Company and any other member of the Group worldwide regardless of location, role or level of seniority. Third parties acting on behalf of the Group, such as agents, consultants, partners, or distributors must also comply with the spirit of this Policy and all applicable laws.

In addition, HAMLET PROTEIN provides a whistleblowing opportunity for all employees to report suspicions of misconduct. We encourage employees to raise their concern if they suspect a serious misconduct that should be prevented or corrected. If they feel they cannot be open with their information, they can raise their concern anonymously, by using a communication channel managed by a third-party. HAMLET PROTEIN has not received any external reports or complaints, nor any (anonymous) complaints from employees about incidents of unethical behavior in 2020.

Organization and employees

One of HAMLET PROTEIN's strategic drivers is to attract and retain qualified and motivated employees. The Company provides its employees with a safe and healthy workplace and follows procedures intended to safeguard all employees, avoid workplace accidents and maintain compliance. However, as for any other company, working at HAMLET PROTEIN involves a minimal level of risks such as work accidents in operations and stress.

To maintain and improve our safety standards, we focus on avoiding occupational accidents - security in our facilities is our top priority. We have established Safety Committees that are committed to work-place safety, and who regularly follow up and document workplace accidents. Industrial accidents are measured on "the number of hours absent due to industrial accidents per million working hours".

To ensure and improve the general working environment, HAMLET PROTEIN follows up on staff turnover, capability development and absence due to sickness. We continuously work with a number of activities to help promote the attractive and motivating working environment that the Company wishes to offer to all its employees.

We work diligently and are dedicated to the recruitment and integration of new employees, just as we focus on maintaining and developing our employees' personal and professional skills. The annual performance reviews is an important part of these efforts.

In Hamlet Protein A/S we measure short term and long-term absence due to sickness. For 2020, long-term absence in Hamlet Protein A/S was 1.84% (last year 0.9%) and short-term absence due to sickness was 1.69% (last year 1.0%), which is well below our objective of 2.5%. Absence due to sickness totaled 0.89% (last year 1.1%) in the US subsidiary.

At year-end, the Group had 113 employees (last year 133) and 6 independent consultants (last year 5). 25 new employees were hired in and 50 employees left during 2020. Staff turnover represented 44% (last year 23%). The high turnover is mainly the consequence of the restructuring plan started in Q4 2019 and completed in 2020, reducing back office staff, while strengthening the commercial organization. We expect to have a turnover of approx. 15% in 2021.

In 2020, 48% (last year 67%) of the planned performance reviews were performed in Hamlet Protein A/S. In the US subsidiary, high employee turnover caused by the restructuring efforts resulted in very few of performance reviews being carried out. This is a decrease from 2019 driven by changes in management positions and the adjustment in the organization as part of the restructuring plan.

Statutory report on the underrepresented gender
New Nutrition Holding ApS' supreme governing body, the Board of Directors, consists at year-end of one female and three male members. 50% of the external Board members are female. The unchanged goal is to have at least one female board member. We see this goal as ambitious in an industry in which the recruitment base primarily consists of men.

It is our policy and goal to represent a minimum of 40% of each gender in other management levels within our enterprise. This goal is not fulfilled for 2020 as the gender composition was 76% male and 24% female by year-end. Our corporate values aim at attracting both female and male applicants equally, and we have strong focus on strengthening our resources in communication to and recruitment of the under-represented gender.

We are an equal opportunity employer and aim at maintaining and reaching the gender ratio objective for each management group, but we will always employ the person who is best qualified for the job. We strive to, whenever possible, to have at least one candidate from the underrepresented gender represented among 3 final candidates for a management position; we have assessed barriers and challenges in relation to the underrepresented gender in other management levels, e.g. how we form job ads, how we recruit, how we train and develop our employees and how we communicate in relation to opportunities internally. Both male and female employees are encouraged to apply for internally advertised positions and to develop their skills and careers.

Events after the balance sheet date
After the closing of the financial year 2020, the global economy is still impacted by Covid-19 virus pandemic. Many industries are directly or indirectly affected, but so far, the animal feed sector has proven to be rather resilient.

The food service industry continues to be affected from Covid-19 restrictions, and demand for meat types predominantly served in restaurants has dropped. Demand for meat types predominantly consumed at home have increased.

Increased raw material costs impact the inclusion of specialty ingredients, like the Hamlet Protein portfolio, as the main cost driver for animal protein producers is feed.

Potential supply chain interruptions could create a risk, but so far, no major disruptions have occurred. International freight rates have increased, and availability of containers is limited at times, but the additional cost is normally passed on to our customers.

No other significant events have occurred subsequent to the financial year-end.

1. BUSINESS AND BACKGROUND

The consolidated financial statements of New Nutrition Holding ApS (the "Company") for the year ended 31 December 2020 and its subsidiaries (collectively, the Group) were discussed and approved by the management on 21 May 2021.

New Nutrition Holding ApS (the Company or the parent company) is a limited liability company incorporated and domiciled in Denmark. The registered office is located in Horsens.

The Group is principally engaged in the development, production and sale of vegetable protein solutions used in high value-add animal feed for young animals. Information on the Group's structure and on other related party relationships of the Group is provided in Note 26.

2. ADOPTION OF NEW AND REVISED STANDARDS

NEW AND AMMENDED IFRS STANDARDS THAT ARE EFFECTIVE FOR THE CURRENT YEAR

2.1. The effect of new accounting standards

All new and revised standards, which entered into force with effect from fiscal periods beginning at 1 January 2020, and interpretations that are relevant to the Hamlet Group are used in preparing the financial statements. The Hamlet Group has assessed that the new or amended standards and interpretation have not had any material impact on the Hamlet Groups Annual report 2020.

New standards effective from 2020

IASB has not issued or amended standards and interpretations which have effect on the consolidated financial statements for 2020 or onwards.

3. CHANGE IN ACCOUNTING POLICIES

The accounting policies have been applied consistently in respect of the financial year and comparative figures.

4. SIGNIFICANT ACCOUNTING POLICIES

4.1. BASIS OF PREPARATION

The consolidated financial statements of the Group are prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and additional Danish disclosure requirements according to the Danish Financial Statements Act.

The consolidated financial statements are prepared based on the standards and interpretations that are effective as of 31 December 2020.

The consolidated financial statements have been prepared on a historical cost basis, except for derivative financial instruments, that have been measured at fair value.

The consolidated financial statements are presented in DKK, which is the parent company's functional currency and the presentation currency of the Group.

4.2. BASIS OF CONSOLIDATION

The consolidated financial statements comprise the financial statements of the Group and its subsidiaries at 31 December 2020. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control over the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control and until the date the Group ceases to control the subsidiary.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

4.3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BUSINESS COMBINATIONS AND GOODWILL

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. Acquisition costs incurred are expensed and included in the separate statement of profit or loss caption "Special items".

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions at the acquisition date.

4. SIGNIFICANT ACCOUNTING POLICIES *(CONTINUED)*

BUSINESS COMBINATIONS AND GOODWILL

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IFRS 9 Financial Instruments: Recognition and Measurement, is measured at fair value with the changes in fair value recognised in the statement of profit or loss.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for the non-controlling interest over the net identifiable assets acquired and liabilities assumed.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

FOREIGN CURRENCY TRANSLATIONS

For each of the reporting entities in the Group, a functional currency is determined. The functional currency is the primary currency used for the reporting entity's operations. Transactions denominated in currencies other than the functional currency are considered transactions denominated in foreign currencies.

On initial recognition, transactions denominated in foreign currencies are translated to the functional currency at the exchange rates at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and at the date of payment are recognised in profit or loss as financial income or financial expenses.

Receivables, payables and other monetary items denominated in foreign currencies are translated at the exchange rates at the end of the reporting period. The difference between the exchange rates at the end of the reporting period and at the date at which the receivable or payable arose or the exchange rate in the latest consolidated financial statements is recognised in profit or loss as financial income or financial expenses.

On recognition in the consolidated financial statements of entities with a functional currency other than the presentation currency of New Nutrition Holding ApS (DKK), the statement of profit or loss is translated at the exchange rates at the transaction date, and the statement of financial position items are translated at the exchange rates at the end of the reporting period. An average exchange rate for the month is used as the exchange rate at the transaction date to the extent that this does not significantly deviate from the exchange rate at the transaction date. Foreign exchange differences arising on translation of the opening balance of equity of foreign entities at the exchange rates at the end of the reporting period and on translation of the statement of profit or loss from the exchange rates at the transaction date to the exchange rates at the end of the reporting period are recognised in other comprehensive income (OCI) and attributed to a separate translation reserve in equity.

4. SIGNIFICANT ACCOUNTING POLICIES *(CONTINUED)*

FOREIGN CURRENCY TRANSLATIONS

Foreign exchange adjustments of balances with foreign entities which are considered part of the investment in the entity are recognised in the consolidated financial statements in other comprehensive income if the balance is denominated in the functional currency of the parent or the foreign entity.

REVENUE RECOGNITION

The Group recognises revenue from sale of protein and fiber products.

Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognises revenue when the performance obligation is satisfied, i.e. when control of the goods is transfered to the customer. Control of the goods is transferred at a point in time, typically on delivery.

OTHER OPERATING INCOME

Other operating income comprise items of a secondary nature relative to the Group's core activities, including gains on the sale of certain non-current assets.

RAW MATERIALS AND CONSUMABLES USED

Raw materials and consumables include expenses relating to raw materials and consumables used in generating the year's revenue.

OTHER EXTERNAL EXPENSES

Other external expenses include the year's expenses relating to the Group's core activities, including expenses relating to distribution, sale advertising, administration, premises, bad debts, etc.

EMPLOYEE BENEFIT EXPENSES

Employee benefit expenses comprise wages and salaries, pensions, social security costs and other related staff costs.

FINANCIAL INCOME AND EXPENSES

Finance income and costs comprise interest income and expense, gains and losses on receivables, payables and transactions denominated in foreign currencies, amortisation of financial assets and liabilities as well as surcharges and refunds under the on-account tax scheme, etc.

TAX ON PROFIT/LOSS FOR THE YEAR

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted, at the reporting date in the countries where the Group operates and generates taxable income.

4.3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

TAX ON PROFIT/LOSS FOR THE YEAR

New Nutrition Holding ApS (Parent company) is jointly taxed with all of its Danish group enterprises. The current Danish income tax is allocated among the jointly taxed entities proportionally to their taxable income.

Current income tax relating to items recognised directly in OCI or equity is recognised in OCI or equity. Management periodically evaluates positions taken in the tax returns with respect to situations, in which applicable tax regulations are subject to interpretation, and establishes provisions where appropriate.

Deferred tax is provided using the ability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

- in respect or taxable temporary differences associated with investments in subsidiaries when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry-forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are valued at cost less accumulated depreciation and accumulated impairment losses, if any.

Cost comprises the purchase price and costs directly attributable to the acquisition until the date when the asset is ready for use. The net present value of estimated liabilities related to dismantling and removing the asset and restoring the site on which the asset is located is added to the cost.

4.3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

PROPERTY, PLANT AND EQUIPMENT

Subsequent costs, e.g. for replacing part of an item, are recognised in the cost of the asset if it is probable that the future economic benefits embodied by the item will flow to the Group. The carrying amount of the item is derecognised when replaced and transferred to the income statement. All other costs for common repairs and maintenance are recognised in the income statement when incurred.

Depreciation is based on the cost of an asset less its residual value. When parts of an item of property, plant and equipment have different useful lives, they are accounted for separately. The estimated useful life and residual value are determined at the acquisition date. If the residual value exceeds the carrying amount depreciation is discontinued.

Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted prospectively, if appropriate.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets. The estimated useful lives for current and comparative years are as follows:

	Estimated useful life
Buildings	25 - 40 years
Plant and machinery	10 - 30 years
Equipment	3 - 10 years

Land is not depreciated

Gains and losses arising on the disposal or retirement of property, plant and equipment are measured as the difference between the selling price less direct sales costs and the carrying amount, and are recognised in Other operating expenses in the year of sale, except gains and losses arising on disposal of property, which are recognised in Other income and expenses, net.

RIGHT-OF-USE ASSETS

The group leases various offices, warehouses and vehicles. Rental contracts are typically made for fixed periods of 6 months to 8 years, but may have extension options.

Contracts may contain both lease and non-lease components. The group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices.

From 1 January 2019, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the group.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

4. SIGNIFICANT ACCOUNTING POLICIES *(CONTINUED)*

4.3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
RIGHT-OF-USE ASSETS

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date
- amounts expected to be payable by the group under residual value guarantees
- the exercise price of a purchase option if the group is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the group, the incremental borrowing rate is used, being the rate that the Group would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

The Group is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

Extension and termination options are included in a number of property leases across the Group. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations.

4. SIGNIFICANT ACCOUNTING POLICIES *(CONTINUED)*

4.3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

INTANGIBLE ASSETS

Goodwill is initially recognised at cost and subsequently at cost less accumulated impairment losses. Goodwill is not amortised. Goodwill is attributable mainly to technical expertise and technological knowhow.

Acquisition-related **brands** are recognised at fair value at the acquisition date. Subsequently, acquired brands with indefinite useful lives are measured at cost less accumulated impairment losses. Brands with finite useful lives are measured at cost less accumulated amortisation and impairment losses. Amortisation is calculated on a straight-line basis over the estimated useful life, which is usually 12 years.

Acquisition-related **customer relationships** are recognised at fair value at the acquisition date and subsequently at cost less accumulated amortisation and impairment losses. Amortisation is calculated on a straight-line basis over the estimated useful life of the acquired portfolio, which is usually 12 years.

Development projects and technology are recognised at fair value at the acquisition date. Subsequently, technology is measured at cost less accumulated amortisation and impairment losses. The cost of development projects includes external costs to consultants and software as well as internal direct costs related to the development. Other development costs for which it cannot be rendered probable that future economic benefits will flow to the Group are recognised in the income statement as and when incurred. Amortisation is calculated on a straight-line basis over the estimated useful life, which is usually in the range of 3 to 10 years.

Amortisation methods and useful lives are reassessed at each reporting date and adjusted prospectively, if appropriate.

Intangible assets with an indefinite useful life, i.e. goodwill and brand, are subject to impairment testing at least annually or when circumstances indicate that the carrying amount may be impaired. The carrying amount of other non-current assets is tested annually for indications of impairment.

If an indication of impairment exists, the recoverable amount of the asset is determined. The recoverable amount is the higher of the fair value of the asset less anticipated costs of disposal and its value-in-use. The value-in-use is calculated as the present value of expected future cash flows from the asset or the CGU to which the asset belongs.

The carrying amount of goodwill is tested for impairment together with the other non-current assets in the cash generating unit (CGU) to which goodwill is allocated. Management believes that the value of the brand supports the Group in its entirety rather than any individual CGU. Accordingly, the brand is tested for impairment at Group level. The impairment test is based on group-wide cash flows adjusted for the Group's total goodwill and other non-current assets.

An impairment loss is recognised in the income statement in a separate line if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount.

4. SIGNIFICANT ACCOUNTING POLICIES *(CONTINUED)*

4.3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

INTANGIBLE ASSETS

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses are only reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortisation, if no impairment loss had been recognised.

In performing the impairment test management assesses whether the CGU to which the intangibles relate will be able to generate positive net cash flows sufficient to support the value of intangibles and other net assets of the entity.

This assessment is based on estimates of expected future cash flows (value-in-use) made on the basis of financial budgets for the following financial year and estimated discount rates, growth and margin development. In recent years, volatility in risk free interest rates has increased, which generally has increased the estimation uncertainty.

FINANCIAL INSTRUMENTS

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

FINANCIAL ASSETS

Financial assets are measured initially at fair value plus, in the case of a financial asset not at fair value through profit of loss, transaction costs that are directly attributable to the acquisition of the financial asset.

For purposes of subsequent measurements, financial assets are classified as financial assets at fair value through profit or loss or financial assets at amortised cost.

Financial assets at fair value through profit or loss are measured at fair value and at end of each reporting period, with any fair value gains or losses recognised in the profit or loss to the extent they are not part of a designated hedging relationship (please see hedge accounting policy).

Financial assets at amortised costs are the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss amount. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

IMPAIRMENT OF FINANCIAL ASSETS

The group recognises a loss allowance for expected credit losses (ECL) on investment in debt instruments that are measured at amortised cost or trade receivables and contract assets. The amount of the expected credit loss is updated at each reporting date to reflect changes in credit risk since initial recognision of the respective financial instrument.

4. SIGNIFICANT ACCOUNTING POLICIES *(CONTINUED)*

4.3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
FINANCIAL INSTRUMENTS

IMPAIRMENT OF FINANCIAL ASSETS

The group always recognises lifetime ECL for trade receivables and contract assets. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit losses experience, adjusted for factors that are specific to the debtor, general economic conditions and an assessment of both the current as well as the forecast directions of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instruments has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.

Lifetime ECL represents the expected credit losses that will result from all positive default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of the lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

FINANCIAL LIABILITIES

All financial liabilities except derivatives are recognised initially at fair value less transaction costs.

After initial recognition, financial liabilities at amortised cost are subsequently measured at amortised cost using the effective interest method (EIR). Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are en integral part of EIR. The EIR amortisation is included as finance cost in the statement of profit and loss.

This category generally applies to interest-bearing loans and borrowings. For more information refer to Note 20.

DERIVATIVES AND HEDGING ACTIVITIES

The Group recognises derivatives at fair value on the date a derivative contract is entered into. Derivative financial instruments are measured at fair value at initial recognition and at each reporting period.

The Group uses derivative financial instruments such as forward currency contracts and interest rate swaps to hedge its foreign currency risk and interest rate risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in other comprehensive income, and subsequently reclassified to profit or loss when the hedge item affect profit or loss.

4. SIGNIFICANT ACCOUNTING POLICIES *(CONTINUED)*

4.3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

FINANCIAL INSTRUMENTS

For the purpose of hedge accounting, hedges are classified as cash flow hedges. Cash flow hedges hedge a particular risk associated with the cash flows of recognised assets and liabilities and highly probable forecast transactions.

The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months; it is classified as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

The effective portion of the gains or losses on the hedging instrument are accounted for as follow:

- The effective portion of the gains or losses on the hedging instrument is recognised on Other Comprehensive Income (OCI) in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the profit or loss as finance costs. The group uses foreign exchange contracts as hedges of its exposure to foreign currency risk in forecast transactions. The ineffective portion relating to foreign currency contracts is recognised as finance cost in profit or loss.

- Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged finance income or finance cost is recognised or when a forecast sale occurs. Amounts previously recognised in OCI are transferred to the same item as as the hedged item when the hedged item impacts profit or loss.

INVENTORIES

Inventories are measured at cost in accordance with the first-in/first-out method. Where the net realisable value is lower than cost, inventories are written down to this lower value.

Raw materials and finished goods are stated at the lower of cost and net realisable value. Cost comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Cost includes the reclassification from equity of any gains or losses on qualifying cash flow hedges relating to purchases of raw material but excludes borrowing costs. Costs are assigned to individual items of inventory on the basis of weighted average costs. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

PREPAYMENTS

Prepayments comprise expenses incurred concerning subsequent financial years.

CASH AND CASH EQUIVALENTS

Cash is cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

4. SIGNIFICANT ACCOUNTING POLICIES *(CONTINUED)*

EQUITY

Retained earnings is the Group's free reserves, which includes share premium. Share premium comprises amounts above the nominal share capital paid by shareholders of New Nutrition Holding ApS. Share premium includes also cash received from employees from sale of warrants. The share premium reserve is available for distribution.

Translation reserve comprises all foreign exchange differences arising from the translation of financial statements of foreign entities with a functional currency other than DKK as well as from the translation of non-current balances which are considered part of the investment in foreign entities.

The reserve for hedges includes the accumulated net change in the fair value of hedging transactions qualifying for cash flow hedge accounting.

On full or partial realisation of a foreign entity where control is lost the foreign exchange adjustments are transferred to the income statement in the same line item as the gain or loss.

Common stock warrants: Equity-settled share options are measured at fair value minus consideration received at grant date, and recognized in the income statement under share-based payment over the period in which the final right of the share options vest. The balancing item is recognized directly in equity.

The fair value of the share options granted is estimated by using a pricing model, taking into account the fair market value of the shares in New Nutrition Holding ApS.

STATEMENT OF CASH FLOWS

The statement of cash flows shows the cash flows from operating, investing and financing activities for the year, the year's changes in cash and cash equivalents as well as cash and cash equivalents at the beginning and end of the year.

Cash flows from operating activities are presented using the indirect method as the profit before tax adjusted for non-cash operating items, changes in working capital, restructuring costs paid, interest received and paid, and income tax paid.

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of entities and activities, and of intangible assets, property, plant and equipment and other non-current assets. The cash flow effect of acquisitions and disposals of entities is shown separately in cash flows from investing activities. Cash flows from acquisitions of entities are recognised in the statement of cash flows from the acquisition date. Cash flows from disposals of entities are recognised up until the date of disposal.

Cash flows from financing activities comprise changes in the size or composition of the share capital and related costs as well as the acquisition and disposal of non-controlling interests, raising of loans, repayment of interest-bearing debt and payment of dividends to shareholders.

5. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGEMENTS

In preparing these consolidated financial statements, management made various judgements, estimates and assumptions concerning future events that affected the application of the Group's accounting policies and the reported amounts of assets, liabilities, income and expenses, the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities in future periods.

Estimates and assumptions are reviewed on an ongoing basis and have been prepared taking macroeconomic developments into consideration, but still ensuring that one-off effects which are not expected to exist in the long term do not affect estimation and determination of these key factors, including discount rates and expectations for the future.

The following items involve significant accounting estimates and judgements:

Item	Estimates	Judgements	Note
Deferred tax assets	x		12
Intangible assets		x	13
Impairment tests	x		13

Except for goodwill, all other intangible assets have finite useful lives and are amortised according to the Group's accounting policies. Goodwill is tested for impairment annually.

[1] New legislation is underway in many countries regulating the use of antibiotics and zinc in animal feed. Development projects completed in 2020 mainly relate to new or improved products aimed at piglet and poultry production with antibiotic- and zinc free feed. The capitalized cost relate mainly to external analysis and tests.

The new legislation is expected to generate significant demand for such products, and impairment tests of the book value based on expected cash flows generated from anticipated sales in the years 2021, 2022 and 2023 (approved by management) has concluded that the expected future benefits from these projects exceed the book value.

13. INTANGIBLE ASSETS *(CONTINUED)*

[2] The above-mentioned new legislation also generates new documentation requirements of Hamlet Protein's existing and new products relative to this particular legislation. Part of the ongoing development projects relate to the creation of such documentation in various countries.

Estimated cost to complete of these projects is approximately DKK 2-4 mio. and completion is anticipated during 2021. Being a prerequisite for the continued sales on these markets it has been concluded that the expected future benefits from these projects exceeds the book value.

Finally, ongoing projects relate to the implementation of a production management system. The capitalized cost of this project mainly consists of external consulting costs and internal hours captured through own time recording system.

[3]The recoverable amount is determined on the basis of value-in-use. The value-in-use is established using certain key assumptions as decribed below. The key assumptions are revenue growth, operating profit before depreciation, amortisation and special items (EBITDA) and discount rates. The management considers the Group as one CGU.

Value-in-use cash flow projections are based on financial budgets approved by management covering the following financial year. Revenue growth and operating margin assumptions applied in the short to medium term (forecasting period of five years) are based on management's expectations regarding the growth and operational development considering all relevant factors including past experience and external sources of information where possible and relevant.

Terminal growth rates do not exceed the expected long-term average growth rate including inflation for the countries in which the Group operates.

The **discount rates**, which are calculated net of tax, are generally based on 10-year government bonds. An interest premium is added to adjust for the inconsistency of applying government bonds with a short-term maturity when discounting the estimated future cash flows with infinite maturity.

A **target ratio** of 30/70 (2019: 18/82) between the market value of debt and equity value has been applied in the calculation. As a company based in Europe, the Group assumes the long-term market equity risk premium to be 6.3% (2019: 6.0%).

Uncertainties reflecting past performance and possible variations in the amount or timing of the projected cash flows are generally reflected in the discount rates. Consequently, a country specific risk premium is added to the discount rates to reflect the specific risk associated with CGU.

13. INTANGIBLE ASSETS *(CONTINUED)*

CARRYING AMOUNTS AND KEY ASSUMPTIONS

The carrying amount of goodwill and the key assumptions used in the impairment testing as per 31 December are presented below.

DKK million	2020	2019
Carrying amount	155	155
Long-term growth in revenue	1,5%	2,0%
Applied discount rate, net of tax	8,0%	8,3%
Applied discount rate, pre-tax	8,1%	8,4%

CARRYING AMOUNTS AND KEY ASSUMPTIONS

Further, the impairment test is based on the assumption that resent years' sales growth in North America will accelerate in the coming 2-4 years and hereafter approaching the long-term growth assumption. The expected sales growth in North America is driven by the general shift away from animal based proteins towards vegetable based antibiotic free animal feed. In Asia sales is expected to continue the strong growth however dependent on the spread of African Swine Fever. The accelerated sales growth in Asia is especially driven by China where resent years' transformation of the pig farming industry from backyards to large industrial units is expected to be accelerated for environmental and disease control reasons (African Swine Fever). In addition China is moving towards antibiotic free animal diets, which will increase demand for quality vegetable based protein like Hamlet Protein. Along with increased capacity utilisation, our net earnings are expected to increase at a higher rate than sales over the same period.

EXPOSURE TO CREDIT RISK

We assess the Group's exposure to credit risk as low. The Group's customer portfolio is diversified in terms of geography and customer size. The Group is not exposed to credit risk related to significant individual customers.

Exposure to credit risk on trade receivables is managed locally in the operating entities and credit limits are set as deemed appropriate taking into account the customer's financial position and the current market conditions.

Outstanding customer receivables are followed up upon a regular basis and provisions are made for bad debt on a monthly basis. The calculation is based on actual historical data. The maximum exposure to credit risk at the reporting data is the carrying amount of each class of financial assets.

The Group considers the concentration of risk with respect to trade receivables low, as its customers are located in several jurisdictions and operate in largely independent markets.

Trade receivables are non-interest bearing and fall generally due on 30-45 days term.

17. TRADE RECEIVABLES AND CREDIT RISK (CONTINUED)

EXPOSURE TO CREDIT RISK

At 31 December, the aging analysis of trade receivables is as follows:

DKK thousands	Gross	Loss allowance	Carrying amount
2020			
Not past due	58.739	-	58.739
Past due 1 to 30 days	15.869	-	15.869
Past due 31 to 60 days	2.210	-	2.210
More than 60 days	1.382	(603)	779
Total	**78.200**	**(603)**	**77.597**
2019			
Not past due	52.540	-	52.540
Past due 1 to 30 days	8.761	-	8.761
Past due 31 to 60 days	475	-	475
More than 60 days	1.632	-	1.632
Total	**63.408**	-	**63.408**

18. TRADE PAYABLES AND OTHER PAYABLES

DKK thousands	2020	2019
Trade payables	63.148	55.901
Other payables	36.286	29.700
Total	**99.434**	**85.601**

Trade payables are non-interest bearing and are normally settled on 8 to 30 day term.

19. LEASE LIABILITY, RIGHT-OF-USE ASSETS

Undiscounted lease payments are listed below.

DKK thousands	Less than 1 year	Between 1 - 5 years	More than 5 years	Total
2020				
Cars	723	292	-	1.015

Mortgage debt A	865	0	-	865
Mortgage debt B	1.008	4.064	2.462	7.534
Total	**91.702**	**499.163**	**2.462**	**593.327**

Interest rates are assumed as average of the interest span for each loan.

20. INTEREST BEARING LOANS AND BORROWINGS (continued)

At 31 December 2020, capitalised borrowing costs amount to DKK 7.424 thousand (2019: DKK 6.291 thousand) and are amortised until the expiry date of the loans. Amortisation in 2020 amounts to DKK 7.844 (2019: DKK 2.894 thouand).

Negative value of interest swap included in loans and borrowings as per 31 December 2020 amount to DKK 1.918 thousand.

The debt facilities A and B as well as the revolving credit facility are subject to usual covenants, which include leverage, interest coverage ratios and investment amounts. All such covenants were in compliance during the year ending at 31 December 2020.

21. FINANCIAL ASSETS AND LIABILITIES

FINANCIAL ASSETS AT AMORTISED COST

DKK thousands	2020	2019
Trade and other receivables	93.375	85.601

FINANCIAL LIABILITIES AT FAIR VALUE

DKK thousands	2020	2019
Derivative financial instruments	(4.306)	(3.571)
Total	**(4.306)**	**(3.571)**

FAIR VALUES

Financial instruments measured at fair value are limited to derivative instruments. As described below, the fair value of derivatives is based on marked data and valuation techniques (Level 2). The financial instruments are measured at fair value on recurring basis.

AMORTISED COSTS

The carrying amount of the Group's financial instruments, measured at cost, are reasonable approximations of fair value, except for interest-bearing loans and borrowings.

DKK thousands	2020	2019
Loans and borrowings	535.539	476.400

VALUATION TECHNIQUES

Management has assessed that cash, trade receivables, trade payables, bank overdraft and other current liabilities approximate their carrying amount largely due to the short-term maturities of these instruments.

The following methods and assumptions were used to estimate the fair value of other financial instruments:

21. FINANCIAL ASSETS AND LIABILITIES (CONTINUED)

VALUATION TECHNIQUES

Derivative financial instruments with various counterparties are principally financial institutions with investment grade credit ratings. The applied valuation techniques are discounted cash flows models, which incorporated various inputs, including the credit quality of counterparties, foreign exchange spot and forward rates and interest rate curves. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships and other financial instruments recognised at fair value.

Fair values of the Group's interest-bearing borrowing and loans are determined by using the discounted cash flow (DCF) method using a discount rate that reflects the issuer's borrowing rate at the end of the reporting period (level 2). The own non-performance risk at 31 December 2020 was assessed to be insignificant.

22. NOTE TO THE CASH FLOW STATEMENT

CASH AND SHORT TERM DEPOSITS

For the purpose of the statement of cash flows, cash and cash equivalents comprise the following at 31 December:

DKK thousands	2020	2019
Cash and cash deposits	**89.044**	**27.574**

Cash at bank earns interest at floating rates based on daily bank deposit rates.

At 31 December 2020, the Group's undrawn committed borrowing facilities totalled DKK 44.464 thousand (2019: DKK 32,549 thousand)

CHANGES IN LIABILITIES ARISING FROM FINANCING ACTIVITIES

The table below details changes in the Group's liabilities arising from financing activities, including both cash and non-cash changes. Liabilities arising from financing activities are those for which cash flows were, or future cash flows will be, classified in the Group's consolidated cash flow statement as cash flows from financing activities.

DKK thousands	2020	2019
Bank loans 1 January	470.109	426.603
Proceeds from borrowings	51.259	44.197
Value adjustment of interest swap	(1.131)	-
Amortization of borrowing costs	7.263	-
Other adjustments	2.533	-
Lease liabilities, right-of-use assets	6.573	8.854
Total liabilities from financing activities 31 December	**536.606**	**479.654**

23. FINANCIAL RISK MANAGEMENT OBJECTIVE AND POLICIES

The Group's risk management policy has been established by the Board of Directors and includes guidelines and rules related to identification and measurement of risks, mandates, limits and hedging activities. The Group is primarily exposed to risks related to commodity prices, foreign currencies, interest rates credit, financing and liquidity.

The purpose of the risk management policies are to manage and reduce risks as a consequence of the Group's operations, investments and financing related to its ordinary activities. Hence, it is the Group's policy not to speculate in financial instruments.

The CFO is responsible for meeting the requirements and reports regularly – or if any breaches have been identified - to the Board. The Board updates and approves the policy once a year, or more often if circumstances require. The management of financial risks is centralised to group finance.

Below, each material risk is described in terms of risk type, risk management policies and activities and the impact on the financial statements.

COMMODITY PRICE RISK

Due to its ordinary activities the Group is exposed to price changes in Soy. When entering into a sales contract an offsetting purchase contract for soy is concluded in order to obtain a stable margin except for sales to markets with long delivery time where soy is purchased based on a sales forecast. If an open net position is identified the Group enters into forward contracts with physical delivery - hence, volumes and timing of delivery is matched on a one to one basis at the time of entering into the sales contract but not subsequently.

The group is also exposed to price changes in gas and electricity. It is the groups policy not to have a structured hedging done for the purchase of energy due to which gas and electricity can be purchased at spot price and/or fixed prices.

FOREIGN CURRENCY RISK

Foreign currency risk arises when transactions or financing is obtained in a currency other than the functional currency of a group entity. The Group is predominantly exposed to foreign currency risks in USD from sales, purchases and financing activities, and CNY from sales activities. Since the EUR and DKK currencies are pegged, the Group hedges into EUR and not DKK.

Currency hedging is done mainly on the purchase of soy in USD and is done when new purchase contracts are concluded for soy. Hedgining is done by use of forward contracts (buy USD / sell EUR) if the exposure exceeds allowed thresholds of USD 2,000 thousand for long positions and DKK 2,000 thousand for short positions. At 31 December 2020 and 2019, the group entered into forward contracts. No hedging of CNY has been done in 2020.

Sensitivity analysis

The Group is sensitive to changes in the USD and CNY exchange rate. A reasonably possible change in the USD or CNY exchange rate of 100 basis points with all other variables held constant, could have a material impact on the profit before tax and the pre-tax equity. The Group's exposure to foreign currency changes for all other currencies is not considered material.

23. FINANCIAL RISK MANAGEMENT OBJECTIVE AND POLICIES (CONTINUED)

Sensitivity analysis

The impact on the Group's profit before tax is due to changes in the fair value of monetary assets and liabilities. The impact on the Group's pre-tax equity is also due to changes in the fair value of forward exchange contracts designated as cash flow hedges.

Hedge accounting

For hedge accounting relationships related to currency risk, the hedged item relates to purchases of soy in USD. The hedging ratio is one-to-one and is established by matching the notional of the derivatives against the principal of the hedged item.

At 31 December 2020, the Group had entered into FX forward contracts with a notional of DKK 59.546 thousand (2019: DKK 65,000 thousand). The hedges in 2020 have not been considered effective. Due to changes in the timing on actual delivery of soy compared to what was expected. Due to this when the hedge contract was conducted, the fair value adjustment of the hedge contracts are no longer included in 'other comprehensive income' in 2020.

INTEREST RATE RISK

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's long-term debt obligations with floating interest rates. The Group evaluates the net exposure on a frequent basis and when conducting finance activities. According to the limits set by the board, two thirds of the floating rate exposure should be hedged and up to three years using interest rate swaps (pay fixed / receive floating). At 31 December 2020 and 2019, the Group's exposure exceeded the risk limits why the group entered into interest rate swaps.

Sensitivity analysis

The Group is sensitive to changes in the interest rates. A reasonably possible change in the interest rate of 100 basis points, with all other variables held constant, could have a material impact on profit before tax and equity.

The impact on the Group's profit before tax is due to changes in floating rate assets and liabilities including received interest from derivatives recognised 31 December. The impact on the Group's pre-tax equity is due to changes in the fair value of interest rate derivatives designated as cash flow hedges.

Hedge accounting

The Group enters into pay fixed / receive floating interest rate swaps in order to reduce the variability in future interest payments. There is an economic relationship between the hedged item and hedging instruments since terms of the interest rate swap match the terms of the floating rate loan (i.e. notional amount, maturity, payment dates, reset dates etc.).

23. FINANCIAL RISK MANAGEMENT OBJECTIVE AND POLICIES (CONTINUED)

At 31 December 2020, the Group had entered into interest rate swaps with a notional of DKK 176.040 thousand (2019: DKK 244,000 thousand). The interest rate swaps mature by the end of 2021.

The hedges in 2020 have not been considered effective due to which the fair value adjustment of the hedge contracts are no longer included in 'other comprehensive income' in 2020.

24. CAPITAL MANAGEMENT

The primary objective of the Group's capital management is to maximise shareholder value.

In order to achieve this overall objective, the Group's capital management aims, e.g. at ensuring that it meets financial covenants related to the interest-bearing loans and borrowings that define capital structure requirements. Failure to meet the financial covenants would permit the bank to call loans and borrowings.

The Group manages its capital structure and makes adjustments in the light of change in economic conditions and the requirements of the financial covenants.

25. CONTINGENT LIABILITIES AND OTHER FINANCIAL OBLIGATIONS

CONTINGENCIES

The parent is jointly taxed with its Danish subsidiaries. The entities included in the joint taxation arrangement have joint and several unlimited liability for Danish corporate income taxes, etc. The Group as a whole is not liable to other parties.

PLEDGES AND COLLATERAL

Surityship (indemnity) toward the bank amounted at DKK 440 million at year end 2020.

A mortgage of USD 2,000 thousand secured upon the Group's properties was initially provided as collateral for borrowings with Ohio Department of Development. The remaining outstanding borrowings as of December 31, 2020 amounted to USD 1.101 thousand and the carrying amount of mortgaged properties amounted to USD 3.942 thousand.

A collateral for commitments with banks, the following have been deposited:

- Owner's mortgage of DKK 20,000 thousand and letter of indemnity of DKK 18,000 thousand secured on the Group's property Saturnvej 51, Horsens, Denmark
- Movable property owner's mortgage of DKK 22,000 thousand secured by letter of indemnity on the Group's machinery.

The carrying amount of mortgaged properties amounted to DKK 32.984 thousand in 2020 (31,500 DKK thousand in 2019).

As collateral for commitments with banks, the following has been deposited:

- Letter of indemnity on movables of DKK 12,000 thousand and chattel mortgage registered to the owner of DKK 22,000 thousand secured upon machinery and fixtures and fittings, etc.

The carrying amount of assets provided as collateral amounted to DKK 39,765 thousand (2019: DKK 32,549 thousands)

26. RELATED PARTY DISCLOSURES

The consolidated financial statements include the financial statements of the Company and the subsidiaries listed below:

Company name	Principal activities	Place of incorporation	Equity interest
New Nutrition ApS	Subholding and selected group activities	Horsens, Denmark	100%
HAMLET PROTEIN A/S	Production, distribution and selected group activities	Horsens, Denmark	100%
HAMLET PROTEIN Inc.	Production and distribution	Ohio, USA	100%
Hamlet Trading Co. Ltd.	Sales and distribution	Qindao, China	100%
Hamlet Protein GmbH	Sales and distribution	Barmsted, Germany	100%

26. RELATED PARTY DISCLOSURES (CONTINUED)

The direct parent company and ultimate ownership of New Nutrition Holding ApS is New Nutrition Holding S.a.r.l.

Goldman Sachs Group Inc. ("GS Group") and Altor Fund IV Holding AB have a 50/50 controlling interest.

REMUNERATION TO THE BOARD OF DIRECTORS AND EXECUTIVE BOARD MANAGEMENT

	2020		2019	
DKK thousands	Board of directors	Executive board	Board of directors	Executive board
Wages and salaries including pensions	1.042	5.807	1.971	11.587
Total remuneration	**1.042**	**5.807**	**1.971**	**11.587**

COMMON STOCK WARRANTS

The Company has issued 785,876 common stock warrants to management and directors of the Group of which 112,260 were issued during 2020 (302,368 issued in 2019). 120,016 common stock warrants were repurchased during 2020, and as at 31 December 2020 616,008 common stock warrants were outstanding. None of the common stock warrants are exercisable at this date. The warrants were issued at fair market value and therefore no compensation expense is recognised. The warrants give the holders the right (without pre-emption right for the Company's existing shareholders) to subscribe for up to 785,876 shares in the Company with a par value of one Danish Krone.

The common stock warrants can be exercised either (i) at a change of control of the Group or an IPO or (ii) in the period from 30 August 2025 to 30 September 2025 if a change of control of the Group or an IPO has not occurred before then. The Company's share capital may be increased in order to make it possible for the holders of the warrants to exercise the warrants.

TRANSACTIONS WITH RELATED PARTIES

No transactions have been entered into during the year.

At 31 December 2020, there is a receivable of DKK 5,178 thousand from New Nutrition Holding S.a.r.l. The loan carries an interest of 7.2% p.a.

At 31 December 2020, there is a payable of DKK 152,533 thousand to New Nutrition Holding S.a.r.l. The loan carries an interest of Cibor + 2% p.a.

27. ISSUED CAPITAL AND RESERVES

The share capital consist of 6,638,065 shares of DKK 1.00 each. Each share carries 1 vote. The shares are fully paid in. Premium paid-in over nominal share capital is recorded into the share premium reserve, but available for distribution under Danish law.

	2020	2019	2018
Nominal shares begining of year	6.610	6.534	6.534
Additions	28	76	-
Nominal shares end of year	**6.638**	**6.610**	**6.534**

28. SUBSEQUENT EVENTS

After the closing of the financial year 2020, the global economy is still impacted by Covid-19 virus pandemic.Many industries are directly or indirectly affected, but so far the animal feed sector continues and has proven to be very resilient.

The food service industry continues to be affected from Covid-19 restrictions, and demand for meat types predominantly served in restaurants has dropped. Demand for meat types predominantly consumed at home have increased.

Increased raw material costs impact the inclusion of specialty ingredients, like the Hamlet Protein portfolio, as the main cost driver for animal protein producers is feed.
Potential supply chain interruptions could create a risk, but so far no mayor disruptions have occurred.
International freight rates have increased, and availability of containers is limited at times, but the additional cost is normally passed on to our customers.

No other significant events have occurred subsequent to the financial year-end.

29. NEW STANDARDS AND INTERPRETATIONS NOT YET IMPLEMENTED

IASB has published certain new standards, amendments to existing standards and interpretations that are not yet mandatory for the preparation of the consolidated financial statements of the Group at 31 December 2020. In addition, IASB has published certain new standards, amendments to existing standards and interpretations, which are not yet adopted by the EU at 31 December 2020.

The Group expects to adopt the new standards and interpretations when they become mandatory. The standards and interpretations that are approved with different effective dates in the EU than the corresponding effective dates under IASB will be early adopted so that the implementation follows the effective dates under IASB.

Based on the current business setup and level of activities, none of these standards and interpretations are expected to have a material impact on the recognition and measurement in the consolidated financial statements.

1. CORPORATE INFORMATION

The parent company is incorporated and domiciled in Denmark. The registered office is located in Horsens.

2. ACCOUNTING POLICIES

The parent company financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and additional Danish disclosures requirements according to Danish Financial Statement Act.

The Company was established on 26 May 2015 and acquired all shares in Hamlet Protein A/S and its subsidiaries on 18 September 2015.

The financial statements are prepared based on the standards and implementations that are effective as of 31 December 2020.

The parent company financial statements are presented in DKK, which is the parent company's functional currency, and all values are rounded to the nearest thousand (DKK '000) except when otherwise stated.

The accounting policies of New Nutrition Holding ApS are the same as for the consolidated financial statements with the additions included in note 3 below. For a description of the accounting policies of the consolidated financial statements, please refer to notes 1 - 5.

3. SUPPLEMENATARY ACCOUNTING POLICIES FOR THE PARENT COMPANY

INVESTMENT IN SUBSIDIARIES

The company's investments in its subsidiaries are accounted for using the equity method.

Under the equity method, investment in subsidiaries are initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Company's share of net assets of the subsidiary since the acquisition date. Goodwill relating to the subsidiary is included in the carrying amount of the investment and is not tested for impairment individually.

The statement of profit or loss reflects the Company's share of the results of operations of the subsidiary net of tax. Any items recognised in other comprehensive income of those investees are presented as part of the Company's other comprehensive income. In addition, when an item has been recognised directly in the subsidiary's equity, the Company recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Company and its subsidiaries are eliminated to the extent of the interest in the subsidiary.

The aggregate of the Company's share of profit or loss of a subsidiary is shown on the face of the statement of profit or loss outside operating profit and represents profit or loss net of tax and non-controlling interest of the subsidiary.

The financial statements of the subsidiaries are prepared for the same reporting period as the Compnay. When necessary, adjustements are made to bring the accounting policies in line with those of the Company.

3. SUPPLEMENTARY ACCOUNTING POLICIES FOR THE PARENT COMPANY (CONTINUED)

INVESTMENT IN SUBSIDIARIES

After application of the equity method, the Company determines whether it is necessary to recognise an impairment loss on its investment in its subsidiaries. At each reporting date, the Company determines whether there is objective evidence that the investments in the subsidiaries are impaired. if there is such evidence, the Company calculates the amount of impairment loss as the difference between the recoverable amount of the subsidiary and its carrying value, and then recognises such impairment loss as "Share of profit or loss in subsidiaries net of tax using the equity method" in the statement of profit or loss.

Remuneration of the Executive Board and the Board of Directors are disclosed in Note 7 of the conolidated financial statement.

At 31 December 2020, there is a receivable of DKK 152,533 thousand from New Nutrition ApS. The loan carries an interest of 2.0% p.a. (compared to DKK 4.200 thousand at 3.5% p.a. in 2019)
At 31 December 2020, there is a loan of DKK 152,533 thousand from New Nutrition S.a.r.l. The loan carries an interest of CIBOR + 2.0% p.a.

Other than above stated, the company does not have any related party transactions.

15. SUBSEQUENT EVENTS

After the closing of the financial year 2020, the global economy is still impacted by Covid-19 virus pandemic.Many industries are directly or indirectly affected, but so far the animal feed sector continues and has proven to be very resilient.

The food service industry continues to be affected from Covid-19 restrictions, and demand for meat types predominantly served in restaurants has dropped. Demand for meat types predominantly consumed at home have increased.

Increased raw material costs impact the inclusion of specialty ingredients, like the Hamlet Protein portfolio, as the main cost driver for animal protein producers is feed.
Potential supply chain interruptions could create a risk, but so far no mayor disruptions have occurred.
International freight rates have increased, and availability of containers is limited at times, but the additional cost is normally passed on to our customers.

No other significant events have occurred subsequent to the financial year-end.
