ANVENDT REGNSKABSPRAKSIS
*ACCOUNTING POLICIES***BALANCEN****Tilgodehavender**

Tilgodehavender måles til amortiseret kostpris, hvilket sædvanligvis svarer til nominel værdi. Værdien reduceres med nedskrivning til imødegåelse af forventede tab.

Skyldig skat og udskudt skat

Aktuelle skatteforpligtelser og tilgodehavende aktuel skat indregnes i balancen som beregnet skat af årets skattepligtige indkomst reguleret for skat af tidligere års skattepligtige indkomster samt for betalte acontoskatter.

Selskabet er sambeskattet med koncernforbundne danske selskaber. Den aktuelle selskabsskat fordeles mellem de sambeskattede selskaber i forhold til disses skattepligtige indkomster og med fuld fordeling med refusion vedrørende skattemæssige underskud. De sambeskattede selskaber indgår i acontoskatteordningen. Skyldig og tilgodehavende sambeskatningsbidrag indregnes i balancen under henholdsvis omsætningsaktiver og gæld.

Udskudt skat måles af midlertidige forskelle mellem regnskabsmæssig og skattemæssig værdi af aktiver og forpligtelser.

Udskudte skatteaktiver, herunder skatteværdien af fremførselsberettiget skattemæssigt underskud, måles til den værdi, hvortil aktivet forventes at kunne realiseres, enten ved udligning i skat af fremtidig indtjening, eller ved modregning i udskudte skatteforpligtelser inden for samme juridiske skatteenhed.

Udskudt skat måles på grundlag af de skatteregler og skattesatser, der med balancedagens lovgivning vil være gældende, når den udskudte skat forventes udløst som aktuel skat. Ændring i udskudt skat som følge af ændringer i skattesatser indregnes i resultatopgørelsen bortset fra poster, der føres direkte på egenkapitalen.

BALANCE SHEET**Receivables**

Receivables are measured at amortised cost which usually corresponds to nominal value. The value is reduced by write-down to meet expected losses.

Tax payable and deferred tax

Current tax liabilities and receivable current tax are recognised in the balance sheet as the calculated tax on the taxable income for the year, adjusted for tax on the taxable income for previous years and taxes paid on account.

The Company is subject to joint taxation with Danish group companies. The current corporation tax is distributed among the joint taxable companies in proportion to their taxable income and with full allocation and refund related to tax losses. The joint taxable companies are included in the on account tax scheme. Joint taxation contributions receivable and payable are recognised in the Balance Sheet under current assets and liabilities, respectively.

Deferred tax is measured on the temporary differences between the carrying amount and the tax value of assets and liabilities.

Deferred tax assets, including the tax value of tax loss carry-forwards, are measured at the expected realisable value of the asset, either by set-off against tax on future earnings or by set-off against deferred tax liabilities within the same legal tax entity.

Deferred tax is measured on the basis of the tax rules and tax rates that under the legislation in force on the balance sheet date would be applicable when the deferred tax is expected to crystallise as current tax. Any changes in the deferred tax resulting from changes in tax rates, are recognised in the income statement, except from items recognised directly in equity.

ANVENDT REGNSKABSPRAKSIS
ACCOUNTING POLICIES

Gældsforpligtelser

Finansielle forpligtelser indregnes ved låneoptagelse til det modtagne provenu med fradrag af afholdte låneomkostninger. I efterfølgende perioder måles de finansielle forpligtelser til amortiseret kostpris svarende til den kapitaliserede værdi ved anvendelse af den effektive rente, således at forskellen mellem provenuet og den nominelle værdi indregnes i resultatopgørelsen over låneperioden.

Gæld i øvrigt er målt til amortiseret kostpris svarende til nominal værdi.

I finansielle forpligtelser indregnes tillige den kapitaliserede restleasingforpligtelse på finansielle leasingkontrakter.

Liabilities

Financial liabilities are recognised at the time of borrowing by the amount of proceeds received less borrowing costs. In subsequent periods, the financial liabilities are measured at amortised cost equal to the capitalised value when using the effective interest, the difference between the proceeds and the nominal value being recognised in the income statement over the term of loan.

Other liabilities are measured at amortised cost equal to nominal value.

The capitalised residual lease liability on finance lease contracts is also recognised as financial liabilities.
