<b>Joint liabilities</b>			

The company is jointly and severally liable together with the parent company and the other group companies in the jointly taxed group for tax on the group's jointly taxed income and for certain possible withholding taxes such as dividend tax and royalty tax.

Tax payable of the group's jointly taxed income is stated in the annual report of DK Resi Holdco I ApS, which serves as management company for the joint taxation.

**NOTES****Note****Consolidated financial statements****7**

The company is included in the consolidated financial statements of DK Resi Holdco I ApS, c/o 360 North Property Management ApS, Göteborg Plads 1, 9., 2150 Nordhavn.

## ACCOUNTING POLICIES

The Annual Report of DK Resi Nørrebrogade 34 Holding ApS for 2018 has been presented in accordance with the provisions of the Danish Financial Statements Act for enterprises in reporting class B and certain provisions applying to reporting class C.

The format of the income statement has been adjusted to the company's activities as a holding company.

The Annual Report is prepared consistently with the accounting principles applied last year.

### Comparative figures

The comparative figures of the income statement are not comparable with the current financial year because last year covered the period from 30 August 2016 to 31 December 2017 (16 months) whereas the current year covers 12 months.

## INCOME STATEMENT

### Gross profit or loss

Gross profit or loss comprises external expenses.

### Other external expenses

Other external expenses include cost of sales, advertising, administration, buildings, bad debts, operating lease expenses, etc.

### Financial income and expenses

Financial income and expenses include interest income and expenses, debt and transactions in foreign currencies, amortisation of financial assets and liabilities as well as charges and allowances under the tax-on-account scheme etc. Financial income and expenses are recognised in the income statement by the amounts that relate to the financial year.

### Tax

The tax for the year, which consists of the current tax for the year and changes in deferred tax, is recognised in the income statement by the portion that may be attributed to the profit for the year, and is recognised directly in the equity by the portion that may be attributed to entries directly to the equity.

## BALANCE SHEET

### Fixed asset investments

Equity investments in subsidiaries are measured at cost. If the cost exceeds the net realisable value, this is written down to the lower value.

### Impairment of fixed assets

The carrying amount of fixed assets, which are not measured at fair value, are valued on an annual basis for indications of impairment other than that reflected by amortisation and depreciation.

In the event of impairment indications, an impairment test is made for each asset or group of assets, respectively. If the net realisable value is lower than the carrying amount, the assets are written down to the lower value.

The recoverable amount is calculated at the higher of net selling price and capital value. The capital value is determined as the fair value of the expected net cash flows from the use of the asset or group of assets and the expected net cash flows from sale of the asset or group of assets after the end of its useful life.

## ACCOUNTING POLICIES

### Receivables

Receivables are measured at amortised cost which usually corresponds to nominal value. The value is reduced by impairment losses to meet expected losses.

### Cash and cash equivalents

Cash comprises bank deposits.

### Tax payable and deferred tax

Current tax liabilities and receivable current tax are recognised in the balance sheet as the calculated tax on the taxable income for the year, adjusted for tax on the taxable income for previous years and taxes paid on account.

The company is subject to joint taxation with Danish group companies. The current corporation tax is distributed among the joint taxable companies in proportion to their taxable income and with full allocation and refund related to tax losses. The joint taxable companies are included in tax-on-account scheme. Joint taxation contributions receivable and payable are recognised in the balance sheet under current assets and liabilities, respectively.

Deferred tax is measured on the temporary differences between the carrying amount and the tax value of assets and liabilities.

Deferred tax assets, including the tax value of tax loss carry-forwards, are measured at the expected realisable value of the asset, either by set-off against tax on future earnings or by set-off against deferred tax liabilities within the same legal tax entity.

Deferred tax is measured on the basis of the tax rules and tax rates that under the legislation in force on the balance sheet date will be applicable when the deferred tax is expected to crystallise as current tax. Any changes in the deferred tax resulting from changes in tax rates, are recognised in the income statement, except from items recognised directly in equity.

### Liabilities

Amortised cost of current liabilities usually corresponds to nominal value.
