**ACCOUNTING POLICIES**

The Annual Report of DK Resi Propco Godthåbsvej 62 ApS for 2018 has been presented in accordance with the provisions of the Danish Financial Statements Act for enterprises in reporting class Band certain provisions applying to reporting class C.

The Annual Report is prepared consistently with the accounting principles applied last year.

**Comparative figures**

The comparative figures in the income statement are not comparable with the current year because last year was a transition period of 6 months, whereas the current year covers 12 months.

**INCOME STATEMENT**

**Gross profit or loss**

Gross profit or loss comprises revenue and external expenses.

**Net revenue**

Rental income and expenses have been accrued to cover the period up to the end of the financial year. Payments charged to cover heating are not included in rental income.

**Other external expenses**

Other external expenses include administration, buildings, bad debts, etc.

**Financial income and expenses**

Financial income and expenses include interest income and expenses, debt and transactions in foreign currencies, amortisation of financial assets and liabilities as well as charges and allowances under the tax-on-account scheme etc. Financial income and expenses are recognised in the income statement by the amounts that relate to the financial year.

**Tax**

The tax for the year, which consists of the current tax for the year and changes in deferred tax, is recognised in the income statement by the portion that may be attributed to the profit for the year, and is recognised directly in the equity by the portion that may be attributed to entries directly to the equity.

**BALANCE SHEET**

**Tangible fixed assets**

Land and buildings are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated.

The depreciation base is cost less estimated residual value after end of useful life.

The cost includes the acquisition price and costs incurred directly in connection with the acquisition until the time when the asset is ready to be used.

Straight-line depreciation is provided on the basis of an assessment of the expected useful lives of the assets and their residual value:

	Useful life	Residual value
Buildings.....	50 years	25 %

Estimated useful lives and residual values are reassessed annually.

Profit or loss on disposal of tangible fixed assets is stated as the difference between the sales price less selling costs and the carrying amount at the time of sale. Profit or loss is recognised in the income statement as other operating income or other operating expenses.

## ACCOUNTING POLICIES

### Impairment of fixed assets

The carrying amount of tangible assets are valued on an annual basis for indications of impairment other than that reflected by amortisation and depreciation.

In the event of impairment indications, an impairment test is made for each asset or group of assets, respectively. If the net realisable value is lower than the carrying amount, the assets are written down to the lower value.

The recoverable amount is calculated at the higher of net selling price and capital value. The capital value is determined as the fair value of the expected net cash flows from the use of the asset or group of assets and the expected net cash flows from sale of the asset or group of assets after the end of its useful life.

### Receivables

Receivables are measured at amortised cost which usually corresponds to nominal value. The value is reduced by impairment losses to meet expected losses.

### Cash and cash equivalents

Cash comprises bank deposits.

### Tax payable and deferred tax

Current tax liabilities and receivable current tax are recognised in the balance sheet as the calculated tax on the taxable income for the year, adjusted for tax on the taxable income for previous years and taxes paid on account.

The company is subject to joint taxation with Danish group companies. The current corporation tax is distributed among the joint taxable companies in proportion to their taxable income and with full allocation and refund related to tax losses. The joint taxable companies are included in tax-on-account scheme. Joint taxation contributions receivable and payable are recognised in the balance sheet under current assets and liabilities, respectively.

Deferred tax is measured on the temporary differences between the carrying amount and the tax value of assets and liabilities.

Deferred tax assets, including the tax value of tax loss carry-forwards, are measured at the expected realisable value of the asset, either by set-off against tax on future earnings or by set-off against deferred tax liabilities within the same legal tax entity.

Deferred tax is measured on the basis of the tax rules and tax rates that under the legislation in force on the balance sheet date will be applicable when the deferred tax is expected to crystallise as current tax. Any changes in the deferred tax resulting from changes in tax rates, are recognised in the income statement, except from items recognised directly in equity.

### Liabilities

Amortised cost of current liabilities usually corresponds to nominal value.

### Accruals, liabilities

Accruals recognised as liabilities include payments received regarding income in subsequent years.
