Statement by the Board of Directors and the Executive Management on the annual report

The board of directors and the executive management have today considered and approved the annual report of Scalepoint Technologies Holding A/S for the financial year 1 January 2017 - 31 December 2017.

The consolidated financial statements and the parent financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the EU and further requirements in the Danish Financial Statements Act.

In our opinion, the accounting policies applied are appropriate, thus ensuring that the consolidated financial statements and the financial statements provide a fair presentation of the group's and the parent company's assets, liabilities and financial position as at 31 December 2017 and of the results of the group's and the parent company's operations and the consolidated cash flows for the financial year 1 January 2017 - 31 December 2017.

We believe that the management's review contains a true and fair review of the development and performance of the group's and the parent company's business activities and financial position, the earnings for the year and the financial position of the parent company and the financial position as a whole of the entities comprised by the consolidated financial statements, together with a description of the principal risks and uncertainties that the group and the parent company faces.

The annual report is submitted for adoption by the general meeting.

Principal activities of the Group

The principal activity of the Group and the parent company is the provision of innovative digital software and services to the insurance industry.

Development in activities and financial matters

The Group's net profit for the year 2017 amounted to DKK 13,2 million which is above projections. The Directors subsequently approved an annual dividend payment of DKK 10,1 million.

Expectations for the coming year

In 2018, the Group will continue to help its customers (insurance carriers) help their claimants (policy holders). Main effort will be in the Nordic and in selected European markets. The Group is determined to be the best at digitalizing and automating claims processes and services, always with the highest possible claimant and customer-centric approach.

The Group's strategy for 2018 includes accelerated investments into further development of modules constituting its EasyClaims digital claims solution. Substantial investments will also be made into continued development of innovative technologies and value-adding services to end-users.

Overall, the outlook for 2018 remains positive. Management will be closely monitoring and tracking ongoing value creation of the group including key KPIs: solution performance, customer satisfaction, talent recruiting and retention, new contract wins, gross revenues and profits, EBITDA, ROIC, accelerated innovation and operational excellence.

Know-how resources

Know-how is a key resource for the Group and essential for achieving innovative and operational excellence. It is decisive that the Group recruit and retain highly educated and knowledgeable employees. The Group will therefore continue to make substantial investments in recruitment with the aim of adding knowledge and capabilities from new as well as with existing employees.

Development activities

During 2017, the Group continued its revenue growth driven by larger volumes of claims processed and an increased activity within the Group's online replacement services. Gross revenues of 2017 grew 6,9% from DKK 523 million to DKK 559 million. Above projections, gross profits grew 3,1% from DKK 112,5 million to DKK 116 million.

The main drivers for the larger volumes of processed claims relate to continuously improved functionality and features leading to higher solution and service usage. In addition, the full year effect of new contracts e.g. with Zurich Insurance Group Ltd. in Switzerland and Storebrand in Norway led to a higher volume of claims.

The Group's cost base (including other operating expenses, employee remuneration, etc.) increased 3,4% from DKK 71,4 million to DKK 73,8 million, which is below projections.

As of 1 January 2017, the Group finalized all planned business restructurings. A new parent and holding company in Denmark was established under the name Scalepoint Technologies Holding A/S. Furthermore, an operational company Scalepoint Technologies Denmark A/S was established to take on the activities previously performed by Scalepoint Technologies Ltd.

Business risks

Management, in consultation with the Board of Directors, manage the Group's financial risks. Monitoring and managing of the Group's risks are elements included in management's day-to-day tasks. The Group does not actively engage in the trading of financial assets and financial derivatives other than utilizing short term USD hedging contracts. The most apparent financial risks of the Group are described below.

Foreign currency risk

The Group is subject to currency risks on payables and receivables in foreign currency, and purchases of services in foreign currency. The Group's most material currency risk relates to purchase of foreign developer hours in USD for development of new software application system. The currency risk is hedged by USD forward contracts which are purchased on a quarterly basis. Hereafter the management considers the current currency risks limited.

Credit risk

Due to the nature of the business, credit risk is deemed minimal. The maximum credit risk relating to receivables corresponds to the carrying amount.

Liquidity risk

The Group liquidity risks covers the risk that the Group is not able to meet its liabilities as they fall due. The Group is not subject to material liquidity risks.

Interest rate risk

The Group is only exposed to interest rate risks in relation to managing surplus liquidity, as the Group does not have any financial loans.

Technology risk

The Group is through the nature of the business exposed to technology risk such as cyber-attacks, system disruptions and system failure. To minimize and moderate those risks the Group have implemented the recommendations from the international standard "Information technology - Security techniques - Code of practice for information security controls" - ISO 27002, and is documented in our annual ISAE-3402 and ISAE-3000 audit reports. Furthermore, a cyber risk insurance has been signed. The technology risk is thus deemed limited.

Environmental impact

The Group has taken several initiatives to reduce possible harmful environmental impacts. The Group are actively taking measures to dispose of waste with a minimum of environmental impact. For an example, Daka ReFood collects all the company's food-waste later used for fertilizing and the creation of biological gas. Furthermore, micro plastics are avoided when buying dish cloths. And among other initiatives, light sensors have been installed throughout all office toilets to minimize the use of electricity.

Events subsequent to the financial year

No events subsequent to the financial year which require disclose in these financial statements have occurred.

To the shareholders of Scalepoint Technologies Holding A/S

Our opinion

In our opinion, the Consolidated financial statements give a true and fair view of the Group's financial position at 31 December 2017 and of the results of the Group's operations and cash flows for the financial year 1 January to 31 December 2017 in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act.

Moreover, in our opinion, the parent company's financial statements give a true and fair view of the parent company's financial position at 31 December 2017 and of the results of the parent company's operations and cash flows for the financial year 1 January to 31 December 2017 in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group and the parent company in accordance with International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the ethical requirements that are relevant to our audit of the financial statements in Denmark. We have also fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Statement on Management's Review

Management is responsible for the Management's Review. Our opinion on the financial statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. Moreover, we considered whether Management's Review includes the disclosures required by the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Consolidated financial statements and the Parent Company Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in the Management's Review.

Responsibilities for the financial statements and the audit

Management is responsible for the preparation of Consolidated financial statements and parent company financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going-concern basis of accounting unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgment and maintain professional scepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group or the Parent Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

General information and statement of compliance with IFRS

Scalepoint Technologies Holding A/S, the Group's parent company, is a limited company incorporated and domiciled in Denmark.

The consolidated financial statements of the Group and of the parent company have been prepared in accordance with International Financial Reporting Standards (IFRS) as approved by the EU and additional Danish disclosure requirements.

The financial statements have been prepared on the going concern basis and have been prepared under the historical cost convention as modified by the revaluation of financial assets and liabilities including derivative financial instruments. The principal accounting policies set out below have been consistently applied to all periods presented.

Basis of consolidation

The Group financial statements consolidate the parent company and all of its subsidiaries as of 31 December 2017. Subsidiaries are all entities over which the Group has the power to control the financial and operating policies. The Group obtains and exercises control through more than half of the voting rights. All subsidiaries have a reporting date of 31 December.

All transactions and balances between Group companies are eliminated on consolidation, including unrealised gains and losses on transactions between Group companies. Where unrealised losses on intra-group asset sales are reversed on consolidation, the underlying asset is also tested for impairment from a Group perspective. Amounts reported in the financial statements of subsidiaries have been adjusted where necessary to ensure consistency with the accounting policies adopted by the Group.

Profit or loss and other comprehensive income of subsidiaries acquired or disposed of during the year are recognised from the effective date of acquisition, or up to the effective date of disposal, as applicable.

Business combinations

The Group applies the acquisition method in accounting for business combinations. The consideration transferred by the Group to obtain control of a subsidiary is calculated as the sum of the acquisition date fair values of assets transferred, liabilities incurred and the equity interests issued by the Group, which includes the fair value of any asset or liability arising from a contingent consideration arrangement.

Acquisition costs are expensed as incurred.

The Group recognises identifiable assets acquired and liabilities assumed in a business combination regardless of whether they have been previously recognised in the acquirer's financial statements prior to the acquisition. Assets acquired and liabilities assumed are generally measured at their acquisition date fair values.

Goodwill is stated after separate recognition of identifiable intangible assets. It is calculated as the excess of the sum of a) fair value of consideration transferred, b) the recognised amount of any non-controlling interest in the acquiree and c) acquisition date fair value of any existing equity interest in the acquiree, over the acquisition date fair values of identifiable net assets. If the fair values of identifiable net assets exceed the sum calculated above, the excess amount (i.e. gain on a bargain purchase) is recognised in profit or loss immediately.

1. Accounting policies - continued**Foreign currency translation***Functional and presentation currency*

The consolidated financial statements are presented in currency DKK, which is also the functional currency of the parent company.

Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency of the respective Group entity, using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-measurement of monetary items denominated in foreign currency at year-end exchange rates are recognised in profit or loss.

Non-monetary items are not retranslated at year-end and are measured at historical cost (translated using the exchange rates at the transaction date), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

Foreign operations

In the Group's financial statements, all assets, liabilities and transactions of Group entities with a functional currency other than the DKK are translated into DKK upon consolidation. The functional currency of the entities in the Group has remained unchanged during the reporting period.

On consolidation, assets and liabilities have been translated into DKK at the closing rate at the reporting date. Goodwill and fair value adjustments arising on the acquisition of a foreign entity have been treated as assets and liabilities of the foreign entity and translated into DKK at the closing rate. Income and expenses have been translated into DKK at the average rate over the reporting period. Exchange differences are charged/credited to other comprehensive income and recognised in the currency translation reserve in equity. On disposal of a foreign operation, the related cumulative translation differences recognised in equity are reclassified to profit or loss and are recognised as part of the gain or loss on disposal.

PROFIT AND LOSS**Revenue**

Revenue is measured at the fair value of consideration received or receivable, excluding sales taxes, rebates, and trade discounts. Revenue arises from rendering of services which comprises insurance claim handling on behalf of insurance companies. The claim handling is operated through the Group's own developed software application systems.

The revenue is based on fees from subscription agreements with insurance companies and services relating to replacement of goods. Revenue consists of fixed and variable fees based on the number of claims handled in the year. The revenue is recognised when delivery of the service have been provided.

As a part of the claim handling service to the insurance companies, the Group also provide service solutions for the insurance policyholder, i.e. by providing replacement goods or gift vouchers through a webshop. The replacement goods are delivered via an extensive network of suppliers, which the Group has built. The revenue from replacement goods and gift vouchers are recognised once delivery has taken place.

Costs of sales

Cost of sales are recognised in profit and loss upon delivery of the goods sold.

1. Accounting policies - continued

Operating expenses

Operating expenses are recognised in profit and loss upon utilisation of the service or as incurred.

Interest and dividends

Interest income and expenses are reported on an accrual basis using the effective interest method. Dividends, other than those from investments in associates, are recognised at the time the right to receive payment is established.

BALANCE SHEET

Other intangible assets

Recognition of software

Software is capitalised on the basis of the costs incurred to acquire and prepare the specific software for usage.

Subsequent measurement

Software is accounted for using the cost model whereby capitalised costs are amortised on a straight-line basis over their estimated useful lives, as these assets are considered finite. Residual values and useful lives are reviewed at each reporting date. In addition, they are subject to impairment testing as described. The following useful lives are applied:

- Software application systems: 2-5 years

Amortisation has been included within depreciation, amortisation and impairment of non-financial assets.

Property, Plant and Equipment

IT equipment and other equipment

IT equipment and other equipment (comprising fittings and furniture) are initially recognised at acquisition cost, including any costs directly attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the Group's management. IT equipment and other equipment are subsequently measured using the cost model, cost less accumulated depreciation and impairment losses.

Depreciation is recognised on a straight-line basis to write down the cost less estimated residual value of IT equipment and other equipment. The following useful lives are applied:

- IT equipment: 2-5 years
- Other equipment: 3-10 years.

Material residual value estimates and estimates of useful life are updated as required, but at least annually.

Gains or losses arising on the disposal of equipment are determined as the difference between the disposal proceeds and the carrying amount of the assets and are recognised in profit or loss within other income or other expenses.

Leased assets

Operating leases

Where the Group is a lessee, payments on operating lease agreements are recognised as an expense on a straight-line basis over the lease term. Associated costs, such as maintenance and insurance, are expensed as incurred.

1. Accounting policies - continued

Impairment testing of intangible assets and equipment

For the impairment assessment, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level.

All individual assets or cash-generating units are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's or cash-generating unit's carrying amount exceeds its recoverable amount, which is the higher of fair value less costs to sell and value-in-use. To determine the value-in-use, management estimates expected future cash flows from each cash-generating unit and determines a suitable interest rate in order to calculate the present value of those cash flows. The data used for impairment testing procedures are directly linked to the Group's latest approved budget, adjusted as necessary to exclude the effects of future reorganisations and asset enhancements. Discount factors are determined individually for each cash-generating unit and reflect management's assessment of respective risk profiles, such as market and asset-specific risks factors.

Impairment losses for cash-generating units reduce first the carrying amount of any goodwill allocated to that cash-generating unit. Any remaining impairment loss is charged pro rata to the other assets in the cash-generating unit. All assets are subsequently reassessed for indications that an impairment loss previously recognised may no longer exist. An impairment charge is reversed if the cash-generating unit's recoverable amount exceeds its carrying amount.

Financial instruments

Recognition, initial measurement and de-recognition

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted by transaction costs, except for those carried at fair value through profit or loss which are measured initially at fair value. Subsequent measurement of financial assets and financial liabilities are described below.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expires, or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Classification and subsequent measurement of financial assets

For the purpose of subsequent measurement, financial assets other than those designated and effective as hedging instruments are classified into the following categories upon initial recognition:

- Loans and receivables
- Financial assets at fair value through profit or loss (FVTPL)
- Held-to-maturity (HTM) investments
- Available-for-sale (AFS) financial assets

All financial assets except for those at FVTPL are subject to review for impairment at least at each reporting date to identify whether there is any objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described below.

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables which is presented within other expenses.

1. Accounting policies - continued**Financial instruments - continued***Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial recognition, these are measured at amortised cost using the effective interest method, less provision for impairment. Discounting is omitted where the effect of discounting is immaterial. The Group's cash and cash equivalents, trade and most other receivables fall into this category of financial instruments.

Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default. Receivables that are not considered to be individually impaired are reviewed for impairment in groups, which are determined by reference to the industry and region of a counterparty and other shared credit risk characteristics. The impairment loss estimate is then based on recent historical counterparty default rates for each identified group.

Financial assets at FVTPL

A financial asset is classified at fair value through profit or loss if it is classified as held for trading or is designated as such upon initial recognition. The Group currently holds listed bonds designated to this category. Financial assets are designated at fair value through profit or loss if the Group manages such investments and makes purchase and sale decisions based on their fair value in accordance with the Group's documented risk management or investment strategy. Upon initial recognition attributable transaction costs are recognised in profit or loss as incurred. Financial assets at fair value through profit or loss are measured at fair value, and changes therein are recognised in profit or loss.

Classification and subsequent measurement of financial liabilities.

The Group's financial liabilities include trade payables and other payables. Financial liabilities are measured subsequently at amortised cost using the effective interest method.

Derivative financial instruments and hedge accounting

Derivative financial instruments are accounted for at FVTPL except for derivatives designated as hedging instruments in cash flow hedge relationships, which require a specific accounting treatment. To qualify for hedge accounting, the hedging relationship must meet several strict conditions with respect to documentation, probability of occurrence of the hedged transaction and hedge effectiveness.

For the reporting period under review, the Group has designated certain forward currency contracts as hedging instruments in cash flow hedge relationships. These arrangements have been entered into to minimize currency exchange risk arising from certain legally binding purchase orders in respect of software in foreign currency.

All derivative financial instruments used for hedge accounting are recognised initially at fair value and reported subsequently at fair value in the statement of financial position.

To the extent that the hedge is effective, changes in the fair value of derivatives designated as hedging instruments in cash flow hedges are recognised in other comprehensive income and included within the cash flow hedge reserve in equity. Any ineffectiveness in the hedge relationship is recognised immediately in profit or loss.

1. Accounting policies - continued**Financial instruments - continued**

At the time the hedged item affects profit or loss, any gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss and presented as a reclassification adjustment within other comprehensive income. However, if a non-financial asset or liability is recognised as a result of the hedged transaction, the gains and losses previously recognised in other comprehensive income are included in the initial measurement of the hedged item.

If a forecast transaction is no longer expected to occur, any related gain or loss recognised in other comprehensive income is transferred immediately to profit or loss. If the hedging relationship ceases to meet the effectiveness conditions, hedge accounting is discontinued and the related gain or loss is held in the equity reserve until the forecast transaction occurs.

Income taxes

Tax expense recognised in profit or loss comprises the sum of current tax and deferred tax not recognised in other comprehensive income or directly in equity.

Current income tax assets and/or liabilities comprise those obligations to, or claims from, fiscal authorities relating to the current or prior reporting periods, that are unpaid at the reporting date. Current tax is payable on taxable profit, which differs from profit or loss in the financial statements. Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases. However, deferred tax is not provided on the initial recognition of goodwill, or on the initial recognition of an asset or liability unless the related transaction is a business combination or affects tax or accounting profit. Deferred tax on temporary differences associated with investments in subsidiaries and joint ventures is not provided if reversal of these temporary differences can be controlled by the Group and it is probable that reversal will not occur in the foreseeable future.

Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period of realisation, provided they are enacted or substantively enacted by the end of the reporting period.

Deferred tax assets are recognised to the extent that it is probable that they will be able to be utilised against future taxable income, based on the Group's forecast of future operating results which is adjusted for significant non-taxable income and expenses and specific limits to the use of any unused tax loss or credit. Deferred tax liabilities are always provided for in full.

Deferred tax assets and liabilities are offset only when the Group has a right and intention to set off current tax assets and liabilities from the same taxation authority.

Changes in deferred tax assets or liabilities are recognised as a component of tax income or expense in profit or loss, except where they relate to items that are recognised in other comprehensive income, or directly in equity, in which case the related deferred tax is also recognised in other comprehensive income or equity, respectively.

Cash

Cash comprise cash on hand and demand deposits.

1. Accounting policies - continued

Equity, reserves and dividend payments

Share capital represents the nominal value of shares that have been issued.

Share premium includes any premiums received on issue of share capital. Any transaction costs associated with the issuing of shares are deducted from share premium, net of any related income tax benefits.

Other components of equity include the following:

- Translation reserve – comprises foreign currency translation differences arising from the translation of financial statements of the Group's foreign entities into DKK
- Other reserve - comprises gains and losses relating to cash flow hedges

Retained earnings includes all current and prior period retained profits and share-based employee remuneration.

All transactions with owners of the parent are recorded separately within equity.

Dividend distributions payable to equity shareholders are included in other liabilities when the dividends have been approved in a general meeting prior to the reporting date.

Short-term employee benefits

Short-term employee benefits

Short-term employee benefits, including holiday entitlement, are current liabilities measured at the undiscounted amount that the Group expects to pay as a result of the unused entitlement.

Share-based employee remuneration

The Group operates equity-settled share-based remuneration plans for its employees. None of the Group's plans feature any options for cash settlement.

The fair values of employees' services rewarded under these plans are determined indirectly by reference to the fair value of the equity instruments granted. The fair value is measured at grant date and excludes the impact of non-market vesting conditions (for example, profitability and sales growth targets and performance conditions).

All share-based remuneration is recognised as an expense in profit or loss in the period that the service is rendered, with a corresponding credit to 'retained earnings'.

Provisions, contingent assets and contingent liabilities

Provisions for legal disputes, onerous contracts or other claims are recognised when the Group has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic resources will be required from the Group and amounts can be estimated reliably. Timing or amount of the outflow may still be uncertain.

Restructuring provisions are recognised only if a detailed formal plan for the restructuring has been developed and implemented, or management has at least announced the plan's main features to those affected by it. Provisions are not recognised for future operating losses.

1. Accounting policies - continued

Provisions, contingent assets and contingent liabilities - continued

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Provisions are discounted to their present values, where the time value of money is material.

Any reimbursement that the Group can be virtually certain to collect from a third party with respect to the obligation is recognised as a separate asset. However, this asset may not exceed the amount of the related provision.

In those cases where the possible outflow of economic resources as a result of present obligations is considered improbable or remote, no liability is recognised.

Significant management judgement in applying accounting policies and estimation uncertainty

When preparing the financial statements, management undertakes a number of judgements, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses. These are described below.

Significant management judgement

The following are significant management judgements in applying the accounting policies of the Group that have the most significant effect on the financial statements:

Impairment of software application systems

Assessing whether there are indications of impairment on capitalised software requires judgement. The management monitors whether there are indicators that the capitalised software may be impaired on an ongoing basis. If there are indications of impairments, an impairment test on the specific software is prepared.

Cash

The Group's cash consist of Scalepoint's own cash and indemnification accounts to cover granted claims to policy holders. Scalepoint have the full rights without any restrictions to dispose of cash on all bank accounts and thus in management's judgement all bank accounts are recognised as cash in the annual statements.

Recognition of deferred tax assets

The extent to which deferred tax assets can be recognised is based on an assessment of the probability that future taxable income will be available against which the deductible temporary differences and tax loss carry-forwards can be utilised. In addition, significant judgement is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions.

Estimation uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be substantially different.

Impairment

In assessing impairment, management estimates the recoverable amount of each asset or cash-generating units based on expected future cash flows and uses an interest rate to discount them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate.

1. Accounting policies - continued

Estimation uncertainty - continued

Useful lives of depreciable assets

Management reviews its estimate of the useful lives of depreciable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical obsolescence that may change the utility of certain software application systems.

Fair value of derivative forward contracts

The Group's management base their estimation of fair value of derivative forward contracts on the basis of the reported fair value by the issuing bank on a marked to market basis.

2. Nature of operations

The principal activity of the Group and the parent company is the provision of Information Technology services to the insurance industry.

10. Financial assets and liabilities

Note 1 provides a description of each category of financial assets and financial liabilities and the related accounting policies. The carrying amounts of financial assets and financial liabilities in each category are as follows:

31 December 2017

Amounts in DKK '000	Derivatives measured at fair value (carried at fair value)	Loans and other receivables (carried at amortised cost)	Total
Financial assets			
Other long-term receivables	0	810	810
Other long term financial assets	0	810	810
Trade and other receivables	0	84.370	84.370
Cash and cash equivalents	0	354.910	354.910
Other short term financial assets	0	439.280	439.280
Total financial assets	0	440.090	440.090

Amounts in DKK '000	Derivatives measured at fair value (carried at fair value)	Other liabilities (carried at amortised cost)	Total
Financial liabilities			
Current debt to credit institutions	0	263	263
Trade and other payables	0	461.154	461.154
Derivative financial instruments - cashflow hedge	370	0	370
Financial liabilities	370	461.417	461.787

All of the above listed financial assets and liabilities' carrying values are approximate to their fair values due to their short term nature as at 31 December 2017 with exception of derivative financial instruments which are carried at their fair values.

10. Financial assets and liabilities - continued**Derivative financial instruments**

The Group's derivative financial instruments are measured at fair value and are summarised below:

	31-12-2017 DKK '000
USD forward contracts - cash flow hedge	-370
Derivative financial assets / (liabilities)	-370

The Group uses forward foreign exchange contracts to mitigate exchange rate exposure arising from purchases of application system software in US dollars.

All US dollar forward exchange contracts have been designated as hedging instruments in cashflow hedges in accordance with IAS 39.

The Group's US dollar forward contracts relates to a 12 months forecasted cash flow. The transactions for which hedge accounting has been used are expected to occur.

Borrowings

Borrowings include the following financial liabilities:

	31-12-2017 DKK '000
Current debt to credit institutions	263
Total carrying amounts	263

	Fair value
Current debt to credit institutions	263
Total borrowings at fair value	263

	Carrying amount
Current debt to credit institutions	263
Total borrowings at carrying amounts	263

Borrowings consists of credit card debt that are repaid on a monthly basis. No interests incur if paid within terms. There are no pledged securities.

10. Financial assets and liabilities - continued**Financial instruments measured at fair value**

Financial assets and financial liabilities measured at fair value in the statement of financial position are grouped into three levels of fair value hierarchy. This grouping is determined based on the lowest level of significant inputs used in fair value measurement, as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (ie as prices) or indirectly (ie derived from prices)
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There have been no transfers between Levels 1 and 2 in the reporting period.

The hierarchy of the fair value measurement of the Group's financial assets and financial liabilities are as follows:

Amounts in DKK '000	Note	Level 1	Level 2	Level 3	Total
31 December 2017					
Liabilities					
USD forward contracts - cash flow	A	0	-370	0	-370
Net fair value		0	-370	0	-370

Measurement at fair value

Fair values have been determined by reference to their quoted bid prices at the reporting date.

A) Foreign currency forward contracts

The Group's foreign currency forward contracts are not traded in active markets. The fair values of these contracts are estimated using a valuation technique that maximises the use of observable market inputs, eg market exchange and interest rates (i.e. on a marked to market basis) and are included in Level 2 of the fair value hierarchy.

Other financial instruments

The carrying amount of the following financial assets and liabilities is considered a reasonable approximation of fair value:

- Trade and other receivables
- Cash and cash equivalents

Notes to the consolidated financial statements

31-12-2017

DKK '000

11. Trade and other receivables

Trade receivables, gross	77.831
Provision for losses	-98
Financial assets	77.733
Prepayments	392
Other receivables	6.245
Non-financial assets	6.637

All amounts are short term. The net carrying value of trade receivables is considered a reasonable approximation of fair value.

5,1 million DKK of the total other receivables of 6,2 million DKK relates to amounts due from management relating to loans provided to purchase of shares in Scalepoint Technologies Holding A/S. The loans have an interest rate of 5 % and must be repaid in full no later than the 31 December 2026 or at the time of the borrower's resignation as an employee in Scalepoint Technologies Denmark A/S.

All of the Group's trade and other receivables have been reviewed for indications of impairment. No such indications was identified.

Due receivables not written down:

Overdue, less than 30 days	999
Overdue, more than 30 days	0
Total	999

12. Cash and cash equivalent

Cash	354.910
Total	354.910

13. Equity*Share capital*

The company's share capital consists of 426.993 ordinary shares of 1 DKK and 74.928 B shares of 1 DKK. The shares are fully paid in. All shares are equally eligible to receive dividends and the repayment of capital and all ordinary shares represent on vote at the shareholders' meeting.

Share premium

Proceeds received in addition to the nominal value of the shares issued during the year have been included in share premium.

Translation reserve

Translation reserve represents the exchange differences from the translation of the financial statements of foreign operations into the Group's presentational currency.

Retained earnings

Retained earnings represent retained profits.

Capital management policies and procedures

The Group's capital management objectives are to ensure its ability to continue as a going concern and to provide an adequate return to shareholders.

The Group monitors capital on the basis of the carrying amount of equity plus borrowings, less cash and cash equivalents as presented on the consolidated statement of financial position.

The Group manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Dividend

Interim dividend of DKK 10.053.000 was paid in 2017.

31-12-2017
DKK '000

14. Trade payables

Trade payables	33.514
Short term debt to credit institutions	263
Trade and other payables - current	33.777

Notes to the consolidated financial statements

31-12-2017
DKK '000

15. Other liabilities

Payables to policy holders	414.109
Holiday allowances	5.027
US dollar forward contracts - cashflow hedge	370
Other payables	7.540
Other current liabilities	427.046

Payables to policy holders comprises undisposed claim compensations to insurance policy holders.

16. Contingent liabilities

The Danish companies are taking part in a joint taxation with the majority shareholder HST Holding A/S and the ultimate majority shareholder CREP ApS, which are both Danish limited companies. The Danish companies have joint and unlimited liability for the total income tax and any obligations related to withholding taxes regarding interest, royalties and dividends for these jointly taxed Danish entities. The liability also includes any subsequent corrections to the calculated tax liability as a consequence of changes made to the jointly taxable income.

The liability at 31 December 2017 amounts to DKK 803.000.

17. Capital commitments

At 31 December 2017, the Group had no capital commitments in place.

18. Operating lease commitments

The Group has operating leases in respect of office premises and cars. The leases are based on fixed lease payments, which are index-adjusted once every year.

31-12-2017
DKK '000

The total, future minimum lease payments are distributed as follows:

Within 1 year	1.200
1-5 year(s)	45
After 5 years	0
Total	1.245
Operating lease payment recognised in the income statement amounts to	1.454

19. Financial risks and financial instruments*Risk management policy*

Management, in consultation with the board of directors, manages the Group's financial risks. The management of the Group's risks is included in management's day-to-day monitoring of the Group. The Group is exposed to a variety of financial risks, which result from its operating and investing activities. The Group does not actively engage in the trading of financial assets and financial derivatives other than the use of short term forward contracts which is used to hedge purchase of software in USD. The most significant financial risks to which the Group is exposed to are described below.

Credit risk

Due to the nature of the business and customers, credit risk is deemed minimal. The maximum credit risk relating to receivables corresponds to the carrying amount.

Interest rate risks

The Group is only exposed to interest rate risks in connection with surplus liquidity, as the Group does not have any financial loans.

Foreign currency risk

The Group is subject to currency risks on payables and receivables in foreign currency, and purchases of services in foreign currency. The Group's most material currency risk relates to purchase of software in USD for application system software. The currency risk is hedged by USD forward contracts which are purchased on a quarterly basis. Hereafter the management considers the current currency risks limited.

Liquidity risk

The Group liquidity risks covers the risk that the Group is not able to meet its liabilities as they fall due. The Group is not subject to material liquidity risks.

The maturities of financial liabilities appear from the tables below. All amounts are contractual cash flows, i.e. inclusive of interest.

Amounts in DKK '000	Within 1 year	1-2 year(s)	2-5 years	Over 5 years	Total
As at 31 December 2017					
Payables to credit institutions	263	0	0	0	263
Trade payables	33.514	0	0	0	33.514
Tax liabilities	594	0	0	0	594
Other payables	427.046	0	0	0	427.046
Total	461.417	0	0	0	461.417

All financial liabilities as at 31 December 2017 are measured at amortised cost.

20. Related parties*Ownership*

HST Holding ApS, Aldersrogade 8, 2100 Copenhagen, Denmark, has control of Scalepoint Technologies Holding A/S, as the company holds the majority of the voting rights.

The ultimate controlling party is CREP ApS, Aldersrogade 8, 2100 Copenhagen, Denmark, which holds the majority of the votes in HST Holding ApS.

The following shareholders holds more than 5 % of the share capital or the voting rights:

- HST Holding ApS, Denmark, 62,8 %
- VC1943 ApS, Denmark, 10,3 %

Transactions with other related parties

There were no transactions with other related parties.

21. Events occurring after the balance sheet date

There are no post balance date events that requires adjustments to the financial statements.

22. New accounting standards

IASB has published a number of new and revised accounting standards and interpretations, which are not mandatory for the preparation of the consolidated financial statements for 2017. Management has begun to assess the impact of IFRS 9 on financial instruments (effective date 1 January 2018), IFRS 15 on revenue recognition (effective date 1 January 2018) and IFRS 16 on leases (effective date 1 January 2019, not yet adopted by the EU) on the future financial reporting. The other standards are not expected to have any substantial impact on the group.
