Management's Statement

Today, Management has considered and adopted the Annual Report of Hiveonline ApS for the financial year 1 January 2022 - 31 December 2022.

The Annual Report is presented in accordance with the Danish Financial Statements Act.

In our opinion, the Financial Statements give a true and fair view of the assets, liabilities and financial position of the Company at 31 December 2022 and of the results of the Company's operations for the financial year 1 January 2022 - 31 December 2022.

In our opinion, the Management's Review includes a true and fair account of the matters addressed in the review.

We recommend that the Annual Report be adopted at the Annual General Meeting.

Chairman

Independent Auditors' Report

To the shareholders of Hiveonline ApS

Opinion

We have audited the financial statements of Hiveonline ApS for the financial year 1 January 2022 - 31 December 2022, which comprise an income statement, balance sheet, statement of changes in equity and notes. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the Company's financial position at 31 December 2022 and of the results of its operations for the financial year 1 January 2022 - 31 December 2022 in accordance with the Danish Financial Statements Act.

Basis of opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibility under those standards and requirements are further described in the "Auditors' responsibility for the Audit of the Financial Statements" section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statement in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's responsibility for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management considers necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern; disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting in preparing the financial statements unless Management either intends to either liquidate the Company or suspend operations, or has no realistic alternative but to do so.

The auditor's responsibility for the audit of the financial statements

Our responsibility is to obtain reasonable assurance as to whether the financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is no guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect material misstatements. Misstatements can arise from fraud or error and can be considered material if it would be reasonable to expect that these - either individually or collectively - could influence the economic decisions taken by the users of financial statements on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain an attitude of professional skepticism throughout the audit. We also:

- * Identify and assess the risk of material misstatements in the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for a material misstatement resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or override of internal control.
- * Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the

Independent Auditors' Report

Company's internal control.

- * Evaluate whether the accounting policies used are appropriate and whether the accounting estimates and the related disclosures made by Management are reasonable.
- * Conclude on whether Management's use of the going concern basis of accounting in preparing the financial statements is appropriate and, based on the audit evidence obtained, conclude on whether a material uncertainty exists relating to events or conditions, which could cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may imply that the Company can no longer remain a going concern.
- * Evaluate the overall presentation, structure and contents of the financial statements, including note disclosures, and whether the financial statements reflect the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control which we identify during our audit.

Statement on Management's Review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of opinion providing assurance regarding the Management's review.

Our responsibility in connection with our audit of the financial statements is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or with the knowledge we have gained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review meets the disclosure requirements in the Danish Financial Statements Act.

Based on our procedures, we are of the opinion that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements in the Danish Financial Statements Act. In our opinion, the Management's review is not materially misstated.

Management's Review

The Company's principal activities

The Company's principal activities consist in development and marketing of online products related to financial administration.

Development in activities and the financial situation

The Company's Income Statement of the financial year 1 January 2022 - 31 December 2022 shows a result of 922.022 DKK and the Balance Sheet at 31 December 2022 a total of 15.293.420 DKK and an equity of 6.897.052 DKK.

The financial year has been characterized by continous scaling of the Company and the development of the hiveonline platform and app for small businesses.

In order to finance the approved budget and plans for 2023, the Company is depending on a capital injection. The Company has initiated negotiations with new investors and expects the negotiation to turn out in favor of the Company.

The shareholders have declared that adequate liquidity will be injected in the Company to finance the present budget and plans as a minimum for 12 months from the balance sheet date or at least until an agreement on new equity financing with new investors have been finalized. Based on this declaration the financial statements for 2022 have been prepared under the assumption of going concern.

Post financial year events

After the end of the financial year, no events have occurred which may change the financial position of the entity substantially.

Research and development activities

hiveonline is a suite of applications, integrations and dashboard that provides a financial and commercial ecosystem for communities without access to traditional financial services or markets. It is based on low-energy blockchain technology and machine learning, to provide financial infrastructure where none exists. The design and community based structure enables customers without access to a phone to have an ID, a wallet and a digital credit history, and to make buyers aware of their crops. Financial institutions, buyers, NGOs and governments can get data analytics and integrations to link their services to the communities. The platform is currently undergoing extended trials sponsored by NGO projects that are hiveonline's primary source of revenue, taking steps towards implementing features that will result in recurring revenue.

hiveonline's suite of applications gives unbanked community groups, primarily in sub-Saharan Africa, access to financial services and markets to build better economies. It will provide the bridge between communities such as savings groups, farmers' associations and cooperatives, and the formal financial system and buyers. It is delivered as an app for savings groups, another for agricultural cooperatives and a third for merchants, providing identity, credit scoring, lending management, group management, accounting and crop forecasting and quality management, together with dashboards and integrations for partner and customer organisations.

The platform provides remote access to group data, which can be used for remote credit assessment and KYC for lenders, remote input management for buyers and a reduction in friction for the agricultural commercial ecosystems, giving the groups, their suppliers and buyers the ability to generate profits and grow higher yielding crops. In 2021 hiveonline added vouchers for distribution of agricultural inputs to the platform, which have been tested in a pilot in 2022.

Management's Review

hiveonline's platform is live in Mozambique, Zambia, Kenya and Lebanon. There are live users (non-paying) on both the vsla.online and myCoop.online apps. hiveonline continues to develop additional features, service enhancements and user driven changes on both the myCoop.online and vsla.online platforms. This is both driven by hiveonline's technology roadmap, and by the needs of users, agricultural ecosystem players and NGO partners. hiveonline has segmented project activity into build projects and "pure rollout projects" managed by their project team, which will form a small but important revenue stream, although in 2022 most project activity was build activity...

In 2022 hiveonline both enhanced back end scalability with further enhancements to data architecture and platform containerisation, and released a range of new features and existing feature enhancements to improve customer experience. Hiveonline integrated core banking service Mifos and developed lending services for both apps, including the ability to configure and manage group lending portfolios, and a bank portfolio management interface for financial institutions. They ran an assessment of the viability of migration to Hedera Hashgraph, a more scalable chain, alongside evaluations of other potential chains, and plan to migrate in 2023. Work progressed on transaction and routing services in preparation for mobile money integration, remote lending and remote payments, which will drive recurring revenue.

Significant usability changes were implemented based on customer feedback and further containerized platform components. The savings group app was translated into Arabic including reconfiguring screens for right to left legibility and both apps were translated into Swahili. Additional customer dashboards and views were developed. Offline functionality was enhanced to include asynchronous blockchain transactions and membership management, moving further towards full offline functionality for communities lacking connectivity. Following a pilot of blockchain based vouchers, changes were implemented based on learnings from the pilot. Quality measures were enhanced and a large range of new crop types and small animals were introduced. Message broadcast capabilities were released to improve user experience.

Towards the end of 2022, hiveonline was successful in an application to join the 4th cohort of the Mozambique Central Bank's regulatory sandbox, thanks to the enhancements to the platform. This will entail further development work and cement hiveonline as a key financial inclusion player in the Mozambique financial landscape.

Management assesses that the market for the hiveonline platform is still in the scale-up phase of its lifecycle and will be expanding significantly in the coming years. Management assesses that the large resource investment in the development of the platform to support this market will be able to provide the Company a significant competitive advantage in the coming years.

Accounting Policies

Reporting Class

The annual report of Hiveonline ApS for 2022 has been presented in accordance with the provisions of the Danish Financial Statements Act governing reporting class B enterprises with additional choice of a few rules from class C enterprises.

The Company has also decided not to include an cash flow statement due to Danish Financial Statements Act §86, 4.

The accounting policies applied remain unchanged from last year.

Consolidated Financial Statements

With reference to § 110 of the Danish Financial Statements Act, no Consolidated Financial Statement have been prepared because the Group enterprises do not exceed the amount limits.

Reporting currency

The annual report is presented in Danish kroner.

Translation policies

Transactions in foreign currencies are translated into DKK at the exchange rate prevailing at the date of transaction. Monetary assets and liabilities in foreign currencies are translated into DKK based on the exchange rates prevailing at the balance sheet day. Realised and unrealised foreign exchange gains and losses are included in the income statement under financial income and expenses.

Government grants and other grants

Government grants and other grants provided to cover costs are recognised in the income statement when it is probable that all the conditions and/or milestones for the grant have been fulfilled. Grants to be repaid under certain circumstances are recognised only so far as they are not expected to be repaid. Grants provided for purchasing assets are set off in the cost of the asset.

Other unconditional grants from non-related parties, which have been granted without any requirement for a compensation, are recognised in the income statement when received.

General information

Basis of recognition and measurement

The financial statement have been prepared under the historical cost principle.

Income is recognised in the income statement as it is earned, including value adjustments of financial assets and liabilities that are measured at fair value or amortized cost. Moreover, all expenses incurred to achieve the earnings for the year are recognised in the income statement, including depreciation, amortization, impairment losses and provisions as well as reversals due to changed accounting estimates of amounts that have previously been recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future economic benefits attributable to the asset will accrue to the Company, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits attributable to the asset will flow out of the Company, and the value of the liability can be measured reliably.

At initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

Certain financial assets and liabilities are measured at amortised cost, which involves the recognition of a constant effective interest rate over the term. Amortised cost is calculated as original cost less repayments and with the

Accounting Policies

addition/deduction of the accumulated amortisation of the difference between the cost and the nominal amount. This way, exchange losses and gains are allocated over the term.

In connection with recognition and measurement, consideration is given to predictable losses and risks occurring prior to the presentation of the financial statement, i.e. losses and risks which prove or disprove matters which exist at the balance sheet date.

Income statement

Revenue

Revenue is recognised in the income statement if the goods have been delivered and the risk has passed to the buyer before year-end and if the revenue can be reliably calculated and expected to be received. Revenue is recognised excluding VAT and all discounts granted are recognised in revenue.

Other external expenses

Other external expenses include expenses for distribution, sales, advertising, administration, premises, bad debts, operating leasing expenses etc.

Staff costs

Staff costs include wages and salaries including compensated absence and pension to the Companies employees, as well as other social security contributions etc. The item is deducted from refunds from public authorities.

Other staff expenses are recognised in other external expenses.

Amortisation and impairment of tangible and intangible assets

Amortization and impairment of intangible assets, property, plant and equipment has been performed based on a continuing assessment of the useful life of the assets in the Company. Non-current assets are amortized on a straight line basis, based on cost, on the basis of the following assessment of useful life and residual values:

Financial income and expenses

Financial income and expenses are recognised in the income statement based at the amounts that concern the financial year. Financial income and expenses include interest revenue and expenses, realised and unrealised capital gains and losses regarding trade receivables and accounts payable and transactions in foreign currencies, surcharges and allowances under the advance-payment of tax scheme.

Tax on net profit for the year

Tax on net profit/loss for the year comprises current tax on expected taxable income of the year and the year's adjustment of deferred tax less the part of the tax of the year that relates to changes in equity. Current and deferred tax regarding changes in equity is recognised directly in equity.

Balance sheet

Intangible assets

Development projects that are clearly defined and identifiable, and where the degree of technical utilization, sufficient resources and a potential future market or development potential in the Company are provable and where the intention is to manufacture, market or use the product or process are recognised as intangible assets if the value in use can be determined reliably and it is sufficiently certain that future earnings can cover production, sales and administration costs as well as total development costs.

Other development costs are recognised as costs in the income statement as they incur.

Development costs comprise costs, including wages, salaries and amortization, that are directly or indirectly attributable to the development activities of the enterprise and meet the recognition criteria.

Capitalized development costs are measured at cost on initial recognition and subsequently at the lower of cost less accumulated amortization and the recoverable amount.

Accounting Policies

Property, plant and equipment

Property, plant and equipment are measured at cost on initial recognition and subsequently at cost less accumulated depreciation and impairment losses.

The depreciable amount is calculated taking into consideration the residual value of the asset at the end of its useful life, reduced by impairment losses, if any. The depreciation period and the residual value are determined at the data of acquisition. If the residual value exceeds the carrying amount of the asset, depreciation is discontinued.

In case of changes in depreciation period or residual value, the effect of a change in depreciation period is recognised prospectively in accounting estimates.

Cost includes the purchase price and expenses directly related to the acquisition until the time when the asset is ready for use. The cost of self-constructed assets includes costs for materials, components, subcontractors, direct payroll costs and indirect production costs.

The cost of composite asset is disaggregated into components, which are separately depreciated if the useful lives of the individual component differ.

	Expected useful life	Residual value
Other fixtures and fittings, tools and equipment	3-5 years	0

The carrying amounts of property plant and equipment are tested annually to determine whether there is any indication of impairment other than what is expressed by amortization and depreciation. If so, the assets are tested for impairment to determine whether the recoverable amounts are lower than the carrying amounts and the relevant assets are written down to such lower recoverable amounts. An impairment test is carried out annually of ongoing development projects, whether or not there is any indication of impairment.

The recoverable amount of an asset is determined as the higher of the net sales price and the value in use. Where the recoverable amount of the individual assets cannot be determined, the assets are grouped together into the smallest group of assets that can be estimated to determine an aggregate reliable recoverable amount for those units.

Equity investments in group enterprises and associates

Equity investments in group enterprises and associates are measured at cost. Dividends that exceed accumulated earnings of the group enterprise or the associate during the ownership period are treated as a reduction of the cost. If cost exceeds the net realizable value, a write-down to this lower value will be performed.

Deposits

Deposits are measured at cost.

Receivables

Receivables are measured at amortized cost which usually corresponds to the nominal value. The value is reduced by write-downs for expected bad debts.

Impairment of accounts receivables past due is established on individual assessment of receivables.

Accrued income, assets

Accrued income recognised in assets comprises prepaid costs regarding subsequent financial years.

Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand as well as short-term securities with a term of less than three months which can be converted directly into cash at bank and in hand and involve only an insignificant

Accounting Policies

risk of value changes.

Equity

Equity comprises the working capital and a number of equity items that may be statutory or stipulated in the articles of association.

Development cost reserve

Development cost reserve includes recognised development costs. The reserve is not available for the payment of dividend or losses. The reserve is deducted or dissolved by depreciation of the recognized costs or abandonment of the activity. Such reduction or dissolution is made by means of a transfer to distributable reserves.

Current tax liabilities

Current tax liabilities and current tax receivables are recognised in the balance sheet as estimated income tax charge for the year, adjusted for prior-year taxes and tax paid on account.

Liabilities

Financial liabilities are recognised initially at the proceeds received net of transaction expenses incurred. In subsequent periods, financial liabilities are measured at amortized cost, corresponding to the capitalized value using the effective interest method, so that the difference between the proceeds and the nominal value is recognised in the income statement over the life of the financial instrument.

Mortgage debt is accordingly measured at amortized cost, corresponding to the outstanding balance in case of cash loans. In case of bond loans, amortized cost corresponds to the outstanding balance determined as the underlying cash value of the loans at the time of borrowing adjusted for amortisation of capital losses on the loans over the repayment period.

Other liabilities are measured at net realisable value.

Other payables

Other payables are measured at amortized cost, which usually corresponds to the nominal value.

Accruals and deferred income entered as liabilities

Accruals and deferred income entered as liabilities consist of payments received regarding income in the subsequent financial years.

Contingent assets and liabilities

Contingent assets and liabilities are not recognised in the Balance Sheet but appear only in the notes.

hiveonline is a suite of applications, integrations and dashboard that provides a financial and commercial ecosystem for communities without access to traditional financial services or markets. It is based on low-energy blockchain technology and machine learning, to provide financial infrastructure where none exists. The design and community based structure enables customers without access to a phone to have an ID, a wallet and a digital credit history, and to make buyers aware of their crops. Financial institutions, buyers, NGOs and governments can get data analytics and integrations to link their services to the communities. The platform is currently undergoing extended trials sponsored by NGO projects that are hiveonline's primary source of revenue, taking steps towards implementing features that will result in recurring revenue.

hiveonline's suite of applications gives unbanked community groups, primarily in sub-Saharan Africa, access to financial services and markets to build better economies. It will provide the bridge between communities such as savings groups, farmers' associations and cooperatives, and the formal financial system and buyers. It is delivered as an app for savings groups, another for agricultural cooperatives and a third for merchants, providing identity, credit scoring, lending management, group management, accounting and crop forecasting and quality management, together with dashboards and integrations for partner and customer organisations.

The platform provides remote access to group data, which can be used for remote credit assessment and KYC for lenders, remote input management for buyers and a reduction in friction for the agricultural commercial ecosystems, giving the groups, their suppliers and buyers the ability to generate profits and grow higher yielding crops. In 2021 hiveonline added vouchers for distribution of agricultural inputs to the platform, which have been tested in a pilot in 2022.

Notes

hiveonline's platform is live in Mozambique, Zambia, Kenya and Lebanon. There are live users (non-paying) on both the vsla.online and myCoop.online apps. hiveonline continues to develop additional features, service enhancements and user driven changes on both the myCoop.online and vsla.online platforms. This is both driven by hiveonline's technology roadmap, and by the needs of users, agricultural ecosystem players and NGO partners. hiveonline has segmented project activity into build projects and "pure rollout projects" managed by their project team, which will form a small but important revenue stream, although in 2022 most project activity was build activity...

In 2022 hiveonline both enhanced back end scalability with further enhancements to data architecture and platform containerisation, and released a range of new features and existing feature enhancements to improve customer experience. Hiveonline integrated core banking service Mifos and developed lending services for both apps, including the ability to configure and manage group lending portfolios, and a bank portfolio management interface for financial institutions. They ran an assessment of the viability of migration to Hedera Hashgraph, a more scalable chain, alongside evaluations of other potential chains, and plan to migrate in 2023. Work progressed on transaction and routing services in preparation for mobile money integration, remote lending and remote payments, which will drive recurring revenue.

Significant usability changes were implemented based on customer feedback and further containerized platform components. The savings group app was translated into Arabic including reconfiguring screens for right to left legibility and both apps were translated into Swahili. Additional customer dashboards and views were developed. Offline functionality was enhanced to include asynchronous blockchain transactions and membership management, moving further towards full offline functionality for communities lacking connectivity. Following a pilot of blockchain based vouchers, changes were implemented based on learnings from the pilot. Quality measures were enhanced and a large range of new crop types and small animals were introduced. Message broadcast capabilities were released to improve user experience.

Towards the end of 2022, hiveonline was successful in an application to join the 4th cohort of the Mozambique Central Bank's regulatory sandbox, thanks to the enhancements to the platform. This will entail further development work and cement hiveonline as a key financial inclusion player in the Mozambique financial landscape. Management assesses that the market for the hiveonline platform is still in the scale-up phase of its lifecycle and will be expanding significantly in the coming years. Management assesses that the large resource investment in the development of the platform to support this market will be able to provide the Company a significant competitive advantage in the coming years.
