Management's Statement on the Annual Report

The Executive and Supervisory Boards have today considered and adopted the Annual Report of Makeen Power A/S for the financial year 1 January – 31 December 2021.

The Annual Report is prepared in accordance with the Danish Financial Statements Act.

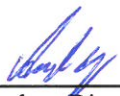

In our opinion, the Financial Statements give a true and fair view of the financial position at 31 December 2021 of the Company and of the results of the Company operations for 2021.

In our opinion, Management's Review includes a true and fair account of the matters addressed in the Review.

We recommend that the Annual Report be adopted at the Annual General Meeting.

Independent Auditors' report

To the Shareholders of Makeen Power A/S

Opinion

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company on 31 December 2021 and of the results of the Company operations for the financial year 1 January - 31 December 2021 in accordance with the Danish Financial Statements Act.

We have audited the Financial Statements of Makeen Power A/S for the financial year 1 January - 31 December 2021, which comprise income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies ("the Financial Statements").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's responsibilities for the audit of the Financial Statements section of our Report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter

We draw attention to note 2 in the Financial Statements, which describes the significant uncertainty associated with measurement of the recognised development project and contract work in progress. Our conclusion is not modified regarding this matter.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the Financial Statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Independent Auditors' report

Management's responsibilities for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the Financial Statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, where such disclosures are not adequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Independent Auditors' report

- Evaluate the overall presentation, structure and contents of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

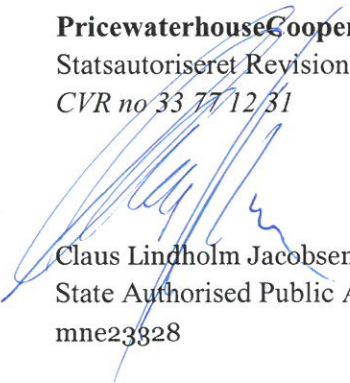

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Managements Review

Main activities

Makeen Power A/S is a turnkey power contractor to supply 360 degree solutions when it comes to establishing green, sustainable and flexible power plants tailored to customers' needs.

Development during the Year

The result before tax for the year is a loss of DKK 87.4 million. The result is lower than expected at the beginning of the year and negatively affected by DKK 84.0 million related to higher cost for designing and construction of the first plast to oil conversion system.

The plast to oil conversion systems is requiring a lot of resources and higher investments than originally planned. The future expectations for this new technology are very high and the market interest shown so far is very positive. The first system is under construction and will be in operation by the end of 2022.

Capital Resources

The Company has per 31 December 2021 lost more than half of the share capital. The Company is subject to the rules of loss of capital of the Danish Company Act. With reference to note 1 the Company expects to reestablish the share capital through future profit, alternatively through capital increase or conversion of debt.

Expectations for the Year Ahead

Russia's invasion of Ukraine is not expected to impact turnover nor operating profit for the financial year 2022, where the Company expects an operating profit closer to zero. From 2023 the Company is expected to be profitable.

Ownership

The Company's share capital of DKK 500k by 31 December 2021 is wholly owned by Makeen Energy A/S, Alsvej 21, DK-8940 Randers SV, Denmark.

Accounting Policies

Basis of Preparation

The Annual Report of Makeen Power A/S for 2021 has been prepared in accordance with the provisions of the Danish Financial Statements Act applying to small enterprises of reporting class B with addition of a few optional items from class C.

In order to follow Group policies, the presentation of the income statement has in 2021 been changed from the nature of expense method to the function of expense method. Comparative figures have been aligned.

The other accounting policies are unchanged compared to previous years.

The financial statement is presented in DKK.

Recognition and measurement

The financial statements have been prepared under the historical cost method.

Revenues are recognised in the income statement as earned. Furthermore, value adjustments of financial assets and liabilities measured at fair value or amortised costs are recognised. Moreover, all expenses incurred to achieve the earnings for the year are recognised in the income statement, including depreciation, amortisation, impairment losses and provisions as well as reversals due to changed accounting estimates of amounts that have previously been recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future economic benefits attributable to the asset will flow to the Company, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow out of the Company, and the value of the liability can be measured reliably.

Assets and liabilities are initially measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

Certain financial assets and liabilities are measured at amortised cost, which involves the recognition of a constant effective interest rate over the maturity period. Amortised cost is calculated as original cost less any repayments and with addition/deduction of the cumulative amortisation of any difference between cost and the nominal amount. In this way, capital losses and gains are allocated over the maturity period.

Recognition and measurement take into account predictable losses and risks occurring before the presentation of the Annual Report which confirm or invalidate affairs and conditions existing at the balance sheet date.

Danish kroner is used as the measurement currency. All other currencies are regarded as foreign currencies.

Accounting Policies

Translation policies

Transactions in foreign currencies are translated at the exchange rates at the dates of transaction. Gains and losses arising due to differences between the transaction date rates and the rates at the dates of payment are recognised in financial income and expenses in the income statement.

Receivables, payables and other monetary items in foreign currencies that have not been settled at the balance sheet date are translated at the exchange rates at the balance sheet date. Any differences between the exchange rates at the balance sheet date and the transaction date rates are recognised in financial income and expenses in the income statement; however, see the section on hedge accounting.

Income statements of foreign subsidiaries are translated at transaction date rates or approximated average exchange rates. Balance sheet items are translated at the exchange rates at the balance sheet date. Exchange adjustments arising on the translation of the opening equity and exchange adjustments arising from the translation of the income statements at the exchange rates at the balance sheet date are recognised directly in equity.

Income Statement

Gross profit

Gross profit consists of revenue, other revenues and costs and cost of goods sold. With reference to Danish Financial Statements Act § 32, revenue is not shown in the financial statement.

Revenue

Revenue from the sale of goods for resale and finished goods is recognised in the income statement when the sale is considered effected based on the following criteria:

- delivery has been made before year end;
- a binding sales agreement has been made;
- the sales price has been determined; and payment has been received or may with reasonable certainty be expected to be received.

Cost of sales

Cost of sales comprises costs incurred to achieve revenue for the year. Cost comprises purchases for projects, raw materials, consumables, direct labour costs and indirect production costs such as maintenance and depreciation, etc, as well as operation, administration and management of factories.

Cost of sales also includes development costs that do not qualify for capitalisation.

Distribution expenses

Distribution expenses comprise costs in the form of salaries to sales and distribution staff, advertising, marketing and exhibition expenses as well as operation of motor vehicles, depreciation, etc.

Accounting Policies

Administrative expenses

Administrative expenses comprise expenses for Management, administrative staff, office expenses, depreciation, etc.

Income from investments in subsidiaries

The item "Income from investments in subsidiaries" in the income statement includes the proportionate share of the profit for the year after tax.

Financial income and expenses

Financial income and expenses comprise interest, realised and unrealised exchange adjustments, price adjustment of securities as well as extra payments and repayment under the on-account taxation scheme.

Tax on profit/loss for the year

Tax for the year consists of current tax for the year and deferred tax for the year. The tax attributable to the profit for the year is recognised in the income statement, whereas the tax attributable to equity transactions is recognised directly in equity.

The Company assesses for Danish tax purposes jointly with the Danish consolidated company. Foreign subsidiaries are not part of the joint taxation.

The effect of the joint taxation is divided among the involved companies according to the taxable profit or loss of each company. The companies that are part of the joint taxation are entered into the tax prepayment scheme.

Accounting Policies

Balance Sheet

Intangible assets

Development projects and licences

Costs of development projects comprise salaries, amortisation and other expenses directly or indirectly attributable to the Company's development activities.

Development projects that are clearly defined and identifiable and in respect of which technical feasibility, sufficient resources and a potential future market or development opportunity in the enterprise can be demonstrated, and where it is the intention to manufacture, market or use the project, are recognised as intangible assets. This applies if sufficient certainty exists that the value in use of future earnings can cover cost of sales, distribution and administrative expenses involved as well as the development costs.

Development projects that do not meet the criteria for recognition in the balance sheet are recognised as expenses in the income statement as incurred.

Capitalised development costs are measured at cost less accumulated amortisation and impairment losses or at a lower recoverable amount.

As of the date of completion, capitalised development costs are amortised on a straight-line basis over the period of the expected economic benefit from the development work, but not exceeding 5 years.

Investments in subsidiaries

Investments in subsidiaries are recognised and measured under the equity method.

The items "Investments in subsidiaries" in the balance sheet include the proportionate ownership share of the net asset value of the enterprises calculated on the basis of the fair values of identifiable net assets at the time of acquisition with deduction or addition of unrealised intercompany profits or losses and with addition of any remaining value of positive differences (goodwill).

The total net revaluation of investments in subsidiaries is transferred upon distribution of profit to "Reserve for net revaluation under the equity method" under equity. The reserve is reduced by dividend distributed to the Parent Company and adjusted for other equity movements in subsidiaries.

Accounting Policies

Inventories

Inventories are measured at the lower of cost under the weighted average method and net realisable value. The net realisable value of inventories is calculated at the amount expected to be generated by sale in the process of normal operations with deduction of selling expenses and costs of completion. The net realisable value is determined allowing for marketability, obsolescence and development in expected sales sum.

The cost of goods for resale, raw materials and consumables equals landed cost.

The cost of finished goods, semi-finished goods and work in progress comprises the cost of raw materials, consumables and direct labour with addition of indirect production costs. Indirect production costs comprise the cost of indirect materials and labour as well as maintenance and depreciation of the machinery, factory buildings and equipment used in the manufacturing process as well as costs of factory administration and management.

Receivables

Receivables are measured in the balance sheet at the lower of amortised cost and net realisable value, which corresponds to nominal value less provisions for bad debts. Provisions for bad debts are determined on the basis of an individual assessment of each receivable, and in respect of trade receivables, a general provision is also made based on the Company's experience from previous years.

Contract work in progress

Contract work in progress is measured at the value of the work performed calculated on the basis of the stage of completion. The stage of completion is measured by the proportion that the contract expenses incurred to date bear to the estimated total contract expenses. Contract work in progress includes agreements of delivery of projects with a high level of individual customization. Where it is probable that total contract expenses will exceed total revenues from a contract, the expected loss is recognised as an expense in the income statement.

Where the value cannot be measured reliably, the selling price is measured at the lower of expenses incurred and net realisable value.

Prepayments and payments received on account are set off against the selling price. The individual contracts are classified as receivables when the net value is positive and as liabilities when the net value is negative.

Expenses relating to sales work and the winning of contracts are recognised in the income statement as incurred.

Prepayments

Prepayments comprise prepaid expenses concerning rent, insurance premiums, subscriptions and interest.

Accounting Policies

Provisions

Provisions are recognised when - in consequence of an event occurred before or on the balance sheet date - the Company has a legal or constructive obligation and it is probable that economic benefits must be given up to settle the obligation.

Provisions are made for warranty obligations in respect of repair work within the warranty period of 1 year. Provisions are measured and recognised based on experience with guarantee work.

Deferred tax assets and liabilities

Deferred tax is recognised in respect of all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised in respect of temporary differences concerning goodwill not deductible for tax purposes and other items - apart from business acquisitions - where temporary differences have arisen at the time of acquisition without affecting the profit for the year or the taxable income.

Deferred tax is measured on the basis of the tax rules and tax rates that will be effective under the legislation at the balance sheet date when the deferred tax is expected to crystallise as current tax. In cases where the computation of the tax base may be made according to alternative tax rules, deferred tax is measured on the basis of the intended use of the asset and settlement of the liability, respectively.

Deferred tax assets, including the tax base of tax loss carry-forwards, are measured at the value at which the asset is expected to be realised, either by elimination in tax on future earnings or by set-off against deferred tax liabilities.

Deferred tax assets and liabilities are offset within the same legal tax jurisdiction.

Current tax receivables and liabilities

Current tax receivables and liabilities are recognised in the balance sheet at the amount calculated on the basis of the expected taxable income for the year adjusted for tax on taxable incomes for prior years. Tax receivables and liabilities are offset if there is a legally enforceable right of set-off and an intention to settle on a net basis or simultaneously.

Financial debts

Fixed-interest loans, such as loans from credit institutions, are recognised initially at the proceeds received net of transaction expenses incurred. Subsequently, the loans are measured at amortised cost; the difference between the proceeds and the nominal value is recognised as an interest expense in the income statement over the loan period.

Other debts are measured at amortised cost, substantially corresponding to nominal value.

Equity at 31 December 2021	500.000	16.367.817	-87.185.388	-70.317.571

Notes to the Annual Report

1 Going concern

The Annual report is prepared under the condition of going concern. The Company has per 31 December 2021 lost more than half of the share capital. The Company expects to reestablish the share capital through future profit, alternatively through capital increase or conversion of debt.

Makeen Energy A/S who owns 100 % of the share capital has issued a parent guarantee which expire at the next annual general meeting. The guarantee secures the needed cash flow to ensure going concern of the Company.

2 Uncertainty regarding recognition and measurement

As of 31 December 2021, Makeen Power A/S has recognised an intangible asset of DKK 21 million in the balance sheet regarding the development of an industrial plant that converts recycled plastic into oil. The first plant has been sold and is currently under construction. The expected loss on the construction contract has been expensed and the remaining loss of DKK 66 million has been recognised as Other provisions in the annual report. The market has reacted very positively and there are high expectations for the sale of the developed plant. As mentioned, this is a newly developed industrial plant, and a natural uncertainty is associated with the market potential and the cost of constructing the first plant. However, no losses are expected beyond what is recognised in the annual report. Please also refer to note 7 and 8.

Amortisation at 31 December 2021	1.965.870	0
Carrying amount at 31 December 2021	2.752.233	18.232.148

Development projects

Completed development projects comprise development and testing of components and systems within the area of recycling. Completed development projects are amortized over 3-5 years.

The management has not identified any indication of impairment in relation to the carrying amount.

Development project in progress

Development projects consists of development of a new product within the area of recycling. The costs consists of external costs and internal hours.

The new product leads to competitive advantage and thus directly influence the future financial performance of the company.

Notes to the Annual Report

	2021	2020
	DKK	DKK
8 Contract work in progress

	DKK	DKK	DKK	DKK	DKK
Share capital	500.000	500.000	500.000	500.000	500.000

Notes to the Annual Report

11 Contingent assets, liabilities and other financial obligations

The Company's banks have at 31 December 2021 issued bank guarantees totalling DKK 3,412k and EUR 1,526k towards the Group's customers and banks.

The Danish companies in the Group are subject to mandatory Danish national joint taxation. The jointly taxed companies share the liability for the Danish income tax etc.

The Company has issued a surety guarantee for Makeen Energy A/S, Kosan Crisplant A/S, House of Makeen Energy A/S and Makeen Prosupply ApS' engagement with banks for a total of DKK 453,373k.

The parent company has issued a parent guarantee to Makeen Power A/S which expire at the next annual general meeting.

12 Related parties and Group Annual Report

Transactions

The Company has chosen only to disclose transactions which have not been made on arm's length basis in accordance with section 98(c)(7) of the Danish Financial Statements Act.

In 2021 the Company had no transactions with related parties, which are not on arm's length basis.

Group Annual Report

The Company is included in the Group Annual Report for the parent company Makeen Energy A/S, Alsvej 21, 8940 Randers SV, Denmark.

13 Subsequent events

No events materially affecting the assessment of the financial position of the Company at 31 December 2021 have occurred after the balance sheet date.
