Statement by Management on the Annual Report

Today, the Board of Directors and the Executive Board have discussed and approved the Annual Report of AX V Nissens Aps for the financial year 2020/2021 covering the period 1 May 2020 to 30 April 2021.

The Annual Report has been prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements in the Danish Financial Statements Act.

It is our opinion that the consolidated financial statements and the parent company financial statements give a true and fair view of the Group's and the Parent Company's financial position on 30 April 2021 and of the results of the Group's and the Parent Company's operations and cash flows for the financial year 1 May 2020 – 30 April 2021

In our opinion, the Management's review includes a fair review of the development in the Group's and the Parent Company's operations and financial conditions, the results for the year, cash flow and financial position as well as a description of the significant risks and uncertainty factors that the Parent Company and the Group face.

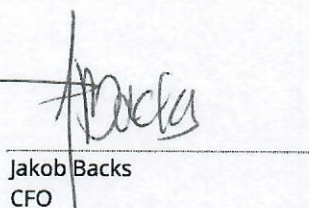

We recommend that the annual report be approved at the Annual General Meeting.

Independent auditor's report

To the shareholders of AX V Nissens ApS

Opinion

We have audited the consolidated financial statements and the parent company financial statements of AX V Nissens ApS for the financial year 1 May 2020 – 30 April 2021, which comprise income statement, statement of comprehensive income, balance sheet, statement of changes in equity, cash flow statement and notes, including accounting policies, for the Group and the Parent Company. The consolidated financial statements and the parent company financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the Parent Company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 30 April 2021 and of the results of the Group's and the Parent Company's operations and cash flows for the financial year 1 May 2020 – 30 April 2021 in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

Our opinion is consistent with our long-form audit report to the Board of Directors.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements and the parent company financial statements" (hereinafter collectively referred to as "the financial statements") section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements.

To the best of our knowledge, we have not provided any prohibited non-audit services as described in article 5(1) of Regulation (EU) no. 537/2014.

Appointment of auditor

Subsequent to AX V Nissens ApS having listed its bond on OMX Nasdaq Copenhagen, we were initially appointed as auditors of AX V Nissens ApS on 6 July 2018. We have been re-appointed annually by resolution of the general meeting for a total consecutive period of two years up to and including the financial year 2020/2021.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements for the financial year 2020/2021. These matters were addressed during our audit of the financial statements as a whole and in forming our opinion thereon. We do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled our responsibilities described in the "Auditor's responsibilities for the audit of the financial statements" section, including in relation to the key audit matters below. Accordingly, our audit included the design and performance of procedures to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including

Independent auditor's report

the procedures performed to address the matters below, provide the basis for our audit opinion on the financial statements.

Measurement of intangible assets

The Group has recognised intangible assets totalling DKK 1,518,308 thousand in the balance sheet at 30 April 2021. The useful life of goodwill is indefinite, and according to International Financial Reporting Standards as adopted by the EU (IAS 36), goodwill must be tested for impairment at least annually. Management performed the impairment test in accordance with the discounted cash flow model, and the expected net cash flows are based on expectations for the years 2021/2022 to 2025/26 and a terminal value. Brand, know-how and customer relations are amortised over 10-15 years. No impairment of intangible assets was identified during the financial year other than the decrease in value reflected by ordinary amortisation of brand, know-how and customer relations. The annual impairment test is key to our audit, as it includes Management's assumptions and estimates relating to, for instance, future earnings.

We assessed whether the calculation model is relevant and recalculated the impairment model. We compared expected revenue, operating profit and cash flows to the Group's strategic efforts in the individual areas and assessed the key assumptions made by Management by comparing, among others, the discount factor and growth rate levels with available market data and growth rates in previous years. Further, we discussed with Management the potential impact from Covid-19 on future earnings. Additionally, we examined whether the information on goodwill disclosed in Note 13 is adequate relative to applicable accounting standards.

Measurement of inventories

At 30 April 2021, the Group recognised inventories totalling DKK 660,927 thousand. Inventories are measured at the lower of cost and net realisable value. The valuation of inventory is therefore subject to significant judgement by Management to assess the appropriate level of the provision for slow-moving and/or obsolete inventory. As a result, we consider the provision for slow-moving and obsolete inventories to be a key audit matter.

We considered the model for inventory write-down where cost exceeds net realisable value. During our audit, we obtained and tested the Group's analyses of age distribution and write-down for obsolescence on inventories and tested the completeness of the basis for the calculation and the mathematical accuracy of the calculation. We also assessed the reasonableness of the estimates applied by Management in the model by comparing the estimates with previous estimates and actual results. Moreover, we examined whether the information on inventories is adequate relative to applicable accounting standards.

Measurement of investments in subsidiaries

The Parent Company has recognised investments in subsidiaries totalling DKK 2,193,335 thousand in the balance sheet at 30 April 2021. Investments in subsidiaries are measured at the lower of cost and recoverable amount. Investments in subsidiaries are tested for impairment in case of impairment indicators. No impairment indicators for investments in subsidiaries were identified during the financial year. The assessment of impairment indicators, including a potential effect of Covid-19, and, if relevant, the impairment test, is key to our audit, as it includes Management's assumptions and estimates relating to, for instance, future earnings.

In connection with our audit, we examined Management's assessment of impairment indicators and assessed whether the assumptions made by Management could be substantiated. We examined procedures for the assessment and compared expectations with the Group's strategic efforts in the individual areas.

Independent auditor's report

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the Management's review.

Management's responsibilities for the financial statements

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

Independent auditor's report

- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- ▶ Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements and the parent company financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Management's review

Business review

The Nissens Group develops, manufactures and markets cooling systems and engine efficiency products for the international automotive aftermarket and customized cooling systems for the renewable energy and special vehicles segments. The Nissens Group is considered a market-leading brand in the automotive aftermarket for thermal and engine efficiency solutions. In addition, the Nissens Group is a leading global company in cooling systems for on- and offshore wind turbines and a leading manufacturer of cooling solutions for special vehicles and industrial applications. The Nissens Group is known for a strong brand, a wide product range, consistently high service levels, good product quality, strong engineering capabilities as well as high-quality customization and innovation.

The Nissens Group consists of two business units: The Nissens Automotive division, selling to wholesalers and distributors in the automotive aftermarket, and the Nissens Cooling Solutions division, covering development and sales to two sub-segments; the wind energy industry and the industrial sub-segment, targeting respectively global wind turbine OEMs and global heavy-duty equipment OEMs.

The Nissens Group is headquartered in Horsens, Denmark, with most of the production being undertaken at two production facilities in Slovakia, three production facilities in Denmark, two production facilities in China and a production facility in the Czech Republic. The Nissens Group consists of 33 subsidiaries across three continents with activities within sales, production and distribution. As of 30 April 2021, the Nissens Group employs 1,554 FTEs, of which 794 are located in Slovakia and the Czech Republic, 414 are located in Denmark, 189 are located in China and 168 are employed in other countries.

History and recent developments

The Nissens Group is celebrating its 100 years anniversary in 2021. The remarkable event is celebrated across Nissens' companies and subsidiaries worldwide with various activities, including the publication of an anniversary book with highlights from Nissens' amazing journey from 1921 to 2021.

Nissens was established in 1921 by Mr. Julius Nissen and opened its first international offices in Finland and Sweden in 1977. In 2005, the Nissens Group established its first international factory in Slovakia, and another factory was established in 2010 in Tianjin, China. Since 2013, the Nissens Group has gradually expanded its manufacturing facilities across Slovakia, China, USA and the Czech Republic.

In June 2017, AX V Nissens Aps acquired the entire share capital of K. Nissen International A/S from Advanced Cooling A/S.

Automotive Business Unit

The Automotive business unit is specialized in the production and supply of products within engine cooling, climate solutions and engine efficiency. As an automotive aftermarket leading company of most essential thermal system components, the Automotive business unit has a broad product portfolio coverage covering above 95% of the European car park including, *inter alia*, radiators, condensers, compressors and intercoolers, turbos and EGR valves. The product range covers products from the common to the more special parts of the European, Asian and American vehicle aftermarkets.

In December 2020 and February 2021, the division holding company NA International A/S acquired four European companies of the AVA group from Enterex to further strengthen the market presence of the Automotive business unit.

Management's review

Business review (continued)

Cooling Solutions Business Unit

The Cooling Solutions business unit is specialized in the development and production of customized cooling solutions for a number of application areas. The Cooling Solutions business unit fully manufactures products for its own end customers in two sub-segments; Wind and Industrial applications.

The wind business delivers cooling systems and modules to the wind industry, whereas the industry business is focused on cooling solutions for special vehicles and industrial applications such as construction equipment, mining machinery, agricultural machines and special equipment.

Products

The Nissens Group offers a wide range of products within its two business units. Within the Automotive business unit, the Group offers products within three existing categories: climate cooling, engine cooling and efficiency & emissions. Condensers, compressors, blowers, receivers, dryers, evaporators, heaters and fans are products offered within the climate category; radiators, oil coolers and fan clutches are products offered within the engine cooling product category. The efficiency & emissions category covers products such as turbos, EGR valves and intercoolers.

The main product categories offered within the Cooling Solutions business unit are for wind turbine applications, including mechanical and electrical drive train cooling, converter & inverter cooling, transformer cooling and climate control as well as system and module assembly for the wind turbine industry for easy integration and final assembly by the wind turbine manufacturers. Furthermore, engine cooling, oil cooling and charge air cooling are solutions supplied to industrial manufacturers.

Research & development

Research & Development (R&D) is essential in order to ensure future development and growth, and therefore the Nissens Group continues to spend considerable resources in R&D activities. The R&D activities and the test facilities drive a range of product applications for future launches and will support the ongoing product development activities.

Knowledge resources

The Nissens Group wishes for all employees to be able to live up to the constantly changing demands relating to the working processes. Therefore, Nissens Group attaches great importance to the training and education of the employees in order for each of them to be able to deliver high performance as well as flawless products and services. The training takes place as both internal and external courses, and with this approach, a profound know-how of the processes related to the processing of aluminium and the development of applications for thermal solutions is gained.

Account of the gender composition of Management

Nissens Group has a policy for diversity and equality. The Supervisory Board is thus monitoring the gender and cultural mix across management levels.

It is Nissens Group's policy that regardless of gender, race, and religion, all employees must be treated equally in order to ensure that everyone has equal opportunities for employment.

The Board of Directors currently consists of six members, of which six are male, and zero are female. It is the target that at least one woman is represented in the Board of Directors by 2024. In 2020/2021,

Management's review

Business review (continued)

the Board has been reduced by one member due to resignation and no new candidates were elected for the Board. Hence, the target for 2020/2021 has not been achieved.

The Nissens Group wants to increase the representation of women in the group management team supporting the CEO and therefore strives to have at least one of each gender among the final candidates in search processes. The share of women in the group management team supporting the CEO is 17%.

Financial review

AX V Nissens ApS

The Parent Company was established on 17 May 2017 with the purpose of acquiring the shares in K. Nissen International A/S. This transaction was conducted on 30 June 2017 from which date K. Nissen International A/S became a 100% owned subsidiary of the company.

The Automotive division holding company NA International A/S has acquired 100% of the shares in four companies in the AVA Group. The AVA companies' business activities involve sales and distribution of automotive cooling and climate products and will further strengthen the market position of the Automotive division. The AVA brand has a strong acknowledgement in the European market and together the combined companies will benefit from synergies in supply chain and other back-office functions.

The purchase price reflects that the acquired companies have not been profitable in their previous structure and ownership. To obtain the synergies from the business combination there will be substantial transformation costs in both FY 2020/2021 and FY 2021/2022, which are reflected as negative goodwill on the acquisition. The negative goodwill has been recognized as special items, cf. note 8.

The consolidated financial statements for the company for the financial year 1 May 2020 – 30 April 2021 show EBITDA before special items of 310.2 MDKK (2019/2020: 199.1 MDKK), operating profit after special items of 190.9 MDKK (2019/2020: 74.1 MDKK) and net profit before tax of 121.9 MDKK (2019/2020: 6.3 MDKK).

The consolidated balance sheet for the company includes intangible assets of 1,518 MDKK (2019/2020: 1,554 MDKK) of which 1,463, MDKK (2019/2020: 1,530 MDKK) relates to intangible assets from the acquisition of K. Nissen International A/S. Amortisation of intangible assets related to the acquisition of K. Nissen International has had a negative impact on the income statement of 67 MDKK (2019/2020: 67 MDKK). Goodwill of 937 MDKK has been allocated with 61% to the Automotive business unit and 39% to the Cooling Solutions business unit. Both divisions of the company have been impairment tested. Cf. note 13 the impairment test did not identify any need for impairment write-down.

With an equity of 1,291 MDKK (2019/2020: 1,209 MDKK), the Group has an equity ratio of 37.4% (2019/2020: 38.3%). The cash flow statement shows a negative cash flow of 34 MDKK (2019/2020: 16 MDKK) for the year. The cash flow is impacted by the acquisition of companies in the AVA Group and the completion of the major part of an extensive investment program carried out in 2019/2020 and 2020/2021. Changes in working capital mainly relate to the execution of a large order book for the wind turbine industry and financing activities.

Cash flow from operations amounts to 177 MDKK (2019/2020: 153 MDKK) as a result of an increase in result before financial items offset by an increase in working capital.

The cash balance at the end of the year is 161 MDKK (2019/2020 195 MDKK) and with an unused credit facility of 125 MDKK, the company has until now not considered it a requirement to establish further available liquidity.

Management's review

Financial review (continued)

The development in the result over the last year is explained by growth in both Nissens Automotive and Nissens Cooling Solutions. In the Automotive division, the growth is partly generated through the acquisition of the AVA companies and partly derived from organic growth. In the Cooling Solutions division, market growth and the execution of a large order pipeline for the wind turbine industry in the last six months of the fiscal year are the main contributors to the result.

Furthermore, continued execution of a significant and ongoing transformation project in Cooling Solutions as well as reductions in the overhead cost base in both the Cooling Solutions and Automotive divisions positively influence the development in the results.

Management considers the results of both divisions as satisfactory.

Nissens Automotive

In the beginning of the financial year 2020/2021, the Automotive division was negatively impacted by Covid-19. Despite this, the Automotive division closed the year with continued long-term sales growth delivering an all-time high revenue. The drivers behind this are the acquisition of the AVA Group and a strong financial year end based on order build-up by customers preparing for the summer season as well as a mitigation of the negative impacts from Covid-19. Furthermore, last year was negatively impacted in the fourth quarter by Covid-19.

Product costs are impacted by current inbound freight increases due to the global freight market development as well as increased raw material prices.

To mitigate this, market price level adjustments have been announced and partially implemented. The need for further adjustments will be evaluated continuously.

Nissens Cooling Solutions

The growth in the result over the last year is explained by growth in the wind division, where the execution of a large order book for the wind turbine industry in the past six months of the year has been a growth driver. Furthermore, the continued execution of a significant and ongoing transformation project as well as reductions in the overhead cost base explain the development in the result over the last year.

Market conditions are characterized by several new product platform introductions from the global wind turbine manufacturers and a continued pressure on prices and cost levels within the wind energy industry. The industrial business segments have been impacted by a general macro-economic slowdown of activity starting with the outbreak of Covid-19.

One-time events in the financial year are global supply chain disturbances mainly relating to Covid-19 impacts.

Cost-out projects on product platforms have been a key initiative in the financial year and will continue to play a leading role in securing the competitiveness of the Cooling Solutions business as well as the wind energy segment in the coming years.

Material costs have seen significant fluctuations in the last quarter of the year, and the future impact and duration are at the current stage not fully clear. To the extent possible, increases in material prices will be reflected in future commercial agreements.

Management's review

Outlook

In FY2021/2022, the Group expects a revenue between 2,450 MDKK and 2,550 MDKK driven by continued growth in the Automotive division, partly by the integration of the AVA group companies, while the Cooling Solutions division expects revenue to decrease due to a decline in market demand in FY2021/2022 compared to FY2020/2021.

EBITDA before special items is expected to end between 270 MDKK and 300 MDKK, mainly driven by sales growth in the Automotive division and offset by lower sales in the Cooling Solutions division, material and freight increases as well as planned overhead investments in both divisions.

K. Nissen International A/S

K. Nissen International A/S, the acquired company, prepares its financial statements according to Danish GAAP. The financial statements for 2020/2021 show a consolidated group revenue of 2,439 MDKK (1,943 MDKK in 2019/2020), EBITDA of 314 MDKK (182 MDKK in 2019/2020), profit before tax of 264 MDKK (143 MDKK in 2019/2020) and a profit for the year of 207 MDKK (109 MDKK in 2019/2020). Cash flow from operating activities amounts to 110 MDKK (126 MDKK).

Bond

AX V Nissens ApS EUR 130,000,000 Senior Secured Floating Rate Bonds due 29 June 2022 are listed on Nasdaq Copenhagen (Nissens, ISIN DK0030400890).

Events after the reporting period

After the balance sheet date, no events have occurred that may have significant influence on the assessment of the financial statements for the year 1 May 2020 – 30 April 2021.

Corporate Social Responsibility

Corporate Social Responsibility Report

Nissens Corporate Social Responsibility Report can be found on the company's website: <https://nissens.com/Admin/Public/DWSDownload.aspx?File=%2fFiles%2fFiles%2fCSR%2f2020-21+Annual+Report+CSR+section+AX+V.pdf>

Business model & Nissens' approach to sustainability

Being a global production company, the Nissens Group believes that it is responsible for contributing to limiting the Group's environmental and climate footprint, just as it is the Group's obligation to secure good conditions for the health and safety of its employees.

In 2018/2019, Nissens has enhanced its commitment to corporate social responsibility and sustainability by joining the UN Global Compact as a member. The COP Report from Nissens can be found on the company's website.

Special risks

Market risks

Customer and market-related risks are assessed as limited, considering the large spread of both customers and markets.

Covid-19 is still considered a potential market risk for sales activities and supply chain disturbances.

The Group is reliant on effective international trade relations between nations.

Currency risks

The majority of the Group's activities implies currency risks in connection with the purchase and sale of goods and services in foreign currencies. These currency risks are monitored and covered within the limitations of the financial policy approved by the Board of Directors.

Credit risks

Nissens' activities imply a credit risk in connection with sales to customers in a number of countries throughout the world. We take measures to cover these outstanding debts in the best possible way, for instance by taking out credit insurances.

Material prices and freight-related risks

Both material prices and freight rates from Asia to Europe have been subject to steep price increases over the last six months, as the global economy starts to recover from the Covid-19 pandemic.

Material prices increase, freight costs and other cost elements may impact margins on the short to medium term until the effects can be mitigated.

Covid-19 risks

In the Automotive division the impact of Covid-19 was mainly seen during the first quarter of 2020/2021 due to a reduction in driven mileage in the key markets and thereby a reduction in the need for spare parts. Along with the gradual opening of markets, a corresponding increase in the need for spare parts has emerged again. If the Covid-19 impact re-escalates and driven mileage declines, these issues might re-emerge.

In the Cooling Solutions division, a number of supply chain-related disturbances relating to Covid-19 has materialized and the ongoing transformation program has been delayed due to Covid-19.

These risk elements may arise again if Covid-19 re-escalates.

Main Elements of the Group's Internal Control and Risk Management Systems in Connection with Financial Reporting

Financial Reporting Process

The Board of Directors and the Executive Board have the overall responsibility for the Group's control and risk management, including financial reporting and compliance with relevant legislation and regulations.

Control Environment

The Board of Directors and the Executive Board determine and approve the overall policies, procedures and controls in key areas of the accounting process, including business procedures and internal controls.

The Board of Directors and the Executive Board receive monthly reports with detailed financial follow-up.

The Board meets at least five times annually.

Audit Committee

The Audit Committee function is carried out by the entire Board of Directors.

Audit

A state-authorized audit company is selected to carry out the audit at the discretion of the Board of Directors. The auditor shall submit a long-form audit to the entire Board of Directors, and in addition, immediately after the finding of any fact that the Board should relate to. The Board of Directors and the Executive Management will assess the auditor's independence, competencies, etc.

Code of Corporate Governance

The DVCA guidelines for Corporate Governance were implemented in the financial year 2018/19. Please see the company's website for further information.

DVCA's guidelines are available at www.dvca.dk.

Board of Directors

Niels Jacobsen

Consolidated financial statements

Notes

1 Accounting policies

AX V Nissens ApS is a private limited company registered in Denmark. The company holds a bond listed on Nasdaq OMX Copenhagen. The financial statements section of the Annual Report for the year 1 May 2020 - 30 April 2021 comprises both the consolidated financial statements of AX V Nissens ApS and its subsidiaries (the Group) and the separate parent company financial statements.

The consolidated financial statements of AX V Nissens ApS for the year 1 May 2020 - 30 April 2021 have been prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements in the Danish Financial Statement Act applying to reporting class D entities.

On 25 June 2021, the Board of Directors and the Executive Board discussed and approved the Annual Report of AX V Nissens ApS for the year 1 May 2020 - 30 April 2021.

Basis of preparation

The consolidated financial statements and the separate financial statements have been presented in Danish kroner, rounded to the nearest DKK thousand.

The accounting policies have been applied consistently in the financial year and for the comparative figures.

Impact of new accounting standards

With effect from 1 May 2020, the Group has implemented the following new or amended standards and interpretations:

- Amendment to IFRS 16 Leases Covid-19 Related Rent Concessions
- Amendments to IFRS 3 - Business Combinations
- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 Interest Rate Benchmark Reform – Phase 2

None of the new standards have had a significant effect on recognition and measurement in the Annual Report.

Consolidated financial statements

The consolidated financial statements comprise of AX V Nissens ApS (the parent) and the subsidiaries controlled by the parent. The Group controls an entity if the Group directly or indirectly owns more than 50% of the voting rights, or when the Group in one way or another has the ability to have a controlling influence. Companies wherein the Group directly or indirectly holds between 20% and 50% of the voting rights and has significant but not controlling influence are treated as associates. Please refer to the overview of the Nissens Group in Notes 16 and 17.

On consolidation, intra-group income and expenses, shareholdings, intra-group balances and dividends, and realized and unrealized gains on intra-group transactions are eliminated. Unrealized gains on transactions with associates are eliminated in proportion to the Group's interest in the entity.

Consolidated financial statements

Notes

1 Accounting policies (continued)

Business combinations and goodwill

Enterprises acquired or formed during the year are recognised in the consolidated financial statements from the date of acquisition or formation. Enterprises disposed of are recognised in the consolidated profit or loss until the date of disposal and settlement date.

Gains or losses on disposal of subsidiaries and associates are stated as the difference between the sales amount and the carrying amount of net assets, including goodwill at the date of disposal and costs of disposal.

The purchase method is applied to acquisitions of new businesses over which AXV Nissens ApS obtains control. The acquired businesses' identifiable assets and liabilities are measured at fair value at the acquisition date. In connection with the acquisition, provision is made for the costs associated with the decided and published restructurings in the acquired business. Deferred tax related to the fair value adjustments that have been identified are recognised.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred (a bargain purchase), then the gain is recognised in profit or loss. After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Negative goodwill is recognised in the profit or loss on the day of acquisition.

Gains and losses at disposal of subsidiaries

Gains and losses at disposal or settlement of a subsidiary are calculated as the difference between the selling price or the disposal value and the carrying amount of the net assets, respectively, at the disposal or settlement date, including goodwill and the expected costs of sale or disposal.

Foreign currency translation

On initial recognition, foreign currency transactions are translated at the exchange rates at the transaction date. Foreign exchange differences arising between the rate at the transaction date and the rate at the date of payment are recognised in profit or loss as financial income or financial expenses.

Receivables and payables and other monetary items denominated in foreign currencies are translated at the exchange rates at the date of the statement of financial position. The difference between the exchange rates at the end of the year and at the date at which the receivable or payable arose or was recognised in the latest annual report is recognised in profit or loss as financial income or financial expenses.

Foreign subsidiaries are seen as independent units. The profit or loss is translated at an average exchange rate for the month, and the statement of financial position are translated at closing rates. Foreign exchange differences arising on translation of the opening equity of such entities at closing rates and on translation of profit or loss at average exchange rates to the closing rates are recognised in other comprehensive income.

Foreign exchange adjustments of balances with the independent foreign subsidiaries considered a part of the total net investment in foreign operations are recognised under a separate translation reserve in equity.

Consolidated financial statements

Notes

1 Accounting policies (continued)

Revenue

Revenue is measured at fair value of the agreed consideration excl. VAT and taxes charged on behalf of third parties. All discounts granted are recognised in revenue.

The fair value corresponds to the agreed price discounted at present value where payment terms exceed 12 months.

The variable part of the total consideration is not recognised in revenue until it is highly probable that it will not be reversed in subsequent periods.

Sale of finished goods is recognised when control over the individual identifiable performance obligation in the sales agreement is transferred to the customer. In general, this is considered to occur at the time of physical delivery. The only exception to this is bill and hold arrangements, cf. below.

The buyer has, in some cases, a right to return. The Group recognises revenue for this at the time of the physical delivery to the buyer to the extent that it can be reliably measured how much of the delivery, after the balance sheet date, cannot be returned.

Payment terms in the Group's sales agreements

The payment terms in the Group's sales agreements with customers are dependent partly on the underlying customer relationship and partly on the segment.

The Group's terms of payments are between 30-120 days.

The Group receives prepayments for some sales agreements. The prepayments do not necessarily reflect the work performed and do not affect the time of the recognition of revenue.

The Group's revenue comprises sale of standard and customised cooling systems.

The Group's sales agreements are divided into individually identifiable performance obligations, which are recognised and measured separately at fair value. If a sales agreement comprises several performance obligations, the total selling price of the sales agreement is allocated proportionately to the individual performance obligations of the agreement.

Revenue is recognised when control over the individual identifiable performance obligation is transferred to the customer.

Bill and hold arrangements

In some cases, the customers request that the delivery is postponed. In addition to the usual recognition criteria, all of the following criteria are required to be met for the Group to recognise revenue upon the time of planned delivery:

- a) The reason for the bill and hold arrangement must be substantive (for example, the arrangement might be requested by the customer because of a lack of physical space to store the goods);
- b) The product must be identified separately as belonging to the customer (that is, it cannot be used by the Group to satisfy other orders);
- c) The product must currently be ready for physical transfer to the customer; and
- d) The Group cannot have the ability to use the product or to direct it to another customer.

Consolidated financial statements

Notes

1 Accounting policies (continued)

Other operating income

Other operating income comprises income that is not product-related. This includes income from sales of raw materials and consumables, government grants, sale of assets and other income of a secondary nature in relation to the main activities of the Group.

Government grant

Government grant income is recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. The grant will be recognised in profit and loss under other operating income or special items, as the eligible costs are incurred.

Other external expenses

Other external expenses include expenses in regards to the Company's principal activities arising during the year. This includes expenses for sales, advertisement, administration, office buildings, debit losses, etc.

Staff costs

Staff costs include wages and salaries, including holiday pay and pensions, as well as other expenses for social security, etc. for the Group's employees. In the staff costs, compensation received from public authorities has been subtracted.

Share-based payments

Employees (including senior executives) of the Group receive remuneration in the form of share-based payments.

Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model.

The cost is recognised in employee benefits expense together with a corresponding increase in equity (other capital reserves) over the year in which the service, and, where applicable, the performance conditions, are fulfilled (the vesting period). The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The expense or credit in the statement of profit or loss for a year represents the movement in cumulative expense recognised at the beginning and end of that year.

Special items

Special items include significant income and expenses of a special nature in terms of the Group's revenue-generating operating activities that cannot be attributed directly to the Group's ordinary operating activities. Such income and expenses include negative goodwill, transaction costs and transformation cost in a business combination.

Finance income and expenses

Finance income and expenses are recognised in the income statement for the amounts that correspond to the transactions of the current financial year. Finance income and expenses comprise interest income and expenses, exchange gains and losses on transactions denominated in foreign currencies etc., as well as surcharges, gain/loss on foreign exchange instruments and allowances under the on-account tax scheme, etc.

Consolidated financial statements

Notes

1 Accounting policies (continued)

Income tax

Current income tax

AX V Nissens ApS is jointly taxed with all its Danish parent companies and subsidiaries. The subsidiaries are included in the joint taxation from the date which they are included in the consolidation and until the date which they are excluded from the consolidation.

The Company's ultimate Parent Company, AX V Nissens III ApS, is the administrative company for the joint taxation and settles the payments of the joint taxation with the taxation authorities.

The actual corporation tax is distributed by settling joint taxation contributions between the jointly taxed companies relatively to their income. The companies with a tax deficit receive a joint tax contribution from the companies which have been able to apply the deficit for reducing their own taxable surplus.

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Tax for the year, which comprises the year's current tax charge, the year's joint taxation contribution and deferred tax adjustments – including the adjustment of the tax rate – is recognised in the income statement for the share which is attributable to the profit for the year, and in other comprehensive income, with the share attributable to entries recognised in other comprehensive income.

Income tax and deferred tax

Current tax payables and receivables are recognised in the balance sheet as tax computed on the taxable income for the year, adjusted for tax on prior-year taxable income and tax paid on account.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to assets and liabilities without affecting either the profit or loss for the year or the taxable income.

Adjustments are made to deferred tax resulting from elimination of unrealized intra-group profits and losses.

Deferred tax is measured according to the tax rules and at the tax rates applicable in the respective countries at the balance sheet date when the deferred tax is expected to crystallise as current tax. Deferred tax assets are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity and jurisdiction.

Joint taxation contribution payable and receivable is recognised in the balance sheet as "Income tax receivable" or "Income tax payable".

Balance sheet

Goodwill

Goodwill is measured in the balance sheet at cost in connection with initial recognition. Subsequently, goodwill is measured at cost less accumulated impairment losses. Goodwill is allocated to the cash flow generating units as defined by Management. The determination of cash generating units complies with the managerial structure and the internal control and reporting in the Group.

Consolidated financial statements

Notes

1 Accounting policies (continued)

Other intangible assets

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation year and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit or loss in the expense category that is consistent with the function of the intangible assets.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Rights and development projects

Development projects that are clearly defined and identifiable, where the technical feasibility, sufficient resources and a potential future market or development opportunities are demonstrated, and where the Group intends to complete and use the individual project, are recognised as intangible assets provided that the cost can be measured reliably and that there is sufficient assurance that future earnings or the net selling price can cover production costs, selling and administrative expenses and development costs. Other development costs are recognised under research and development costs in the income statement as incurred. Rights and development projects are measured at cost less accumulated amortisation and impairment.

Cost comprises external expenses as well as internal directly related wages and salaries attributable to the development project. Other development costs are recognised in the income statement as they arise.

Rights and development expenses, which are recognised in the balance sheet, are initially measured at cost and subsequently at cost less accumulated amortisation and impairment losses.

Following the completion of development work, development costs are amortized on a straight-line basis over the estimated useful life from the date when the asset is available for use. The amortisation period is:

Development projects	3-5 years
Brand	15 years
Acquired intangible assets	10 years

Gains and losses from sale of rights and development projects are calculated as the difference between the sales prices less sales expenses and the carrying amount at the date of sale. Gains and losses are recognised in the income statement as other operating income or other operating expenses, respectively.

Consolidated financial statements

Notes

1 Accounting policies (continued)

Property, plant and equipment

Leasehold improvements and other fixtures and fittings are measured at cost less accumulated depreciation and impairment losses. Cost comprises the purchase price and any costs directly attributable to the acquisition until the date when the asset is available for use.

The cost for a total asset is split in separate components, which are depreciated separately, if the useful life of each of the components differ.

Depreciation is provided on a straight-line basis over the expected useful lives of the assets/components. The expected useful lives are as follows:

Buildings	20-25 years
Plant and machinery	5-10 years
Other fixtures and fittings, tools and equipment	2-7 years
Right-of-use assets	Over the term of the lease contract

Depreciation is calculated on the basis of the residual value and impairment losses, if any. The depreciation period and the residual value are determined at the acquisition date and are reassessed annually. If the residual value exceeds the carrying amount, depreciation is discontinued.

When the depreciation period or the residual value is changed, the effect on depreciation is recognised prospectively as a change in accounting estimates.

Gains and losses at sale of property, plant and equipment is calculated as the difference between the sales price less the sales expenses and the carrying amount at the date of sale. Gains or losses are recognised in the income statement as the item other operating income and other operating expenses, respectively.

Land is not depreciated.

Leases

The right-of-use asset and corresponding lease liability will be recognised at the commencement date, i.e. the date the underlying asset is ready for use and when the Group obtains the right to obtain the economic benefits from the use of it. Right-of-use assets are measured at cost corresponding to the lease liability recognised.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liabilities adjusted for any lease payments made at or before the commencement date, plus any initial costs incurred.

The lease liabilities are initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, an incremental borrowing rate.

Lease payments included in the measurement of the lease liabilities comprise the following:

- Fixed payments from commencement date
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date
- The exercise price of a purchase option if it is reasonably certain to exercise the options
- Amount expected to be payable under residual value guarantees

Consolidated financial statements

Notes

1 Accounting policies (continued)

The lease liabilities are subsequently measured at amortised cost using the effective interest method. The lease liabilities are adjusted when there is a change in future lease payments, typically due to a change in index or rate on property leases, or if there is a reassessment of whether an extension or termination option will be exercised.

When the lease liabilities are adjusted in this way, a corresponding adjustment is made to the carrying amount of the right-of-use assets, or is recorded in profit or loss if the carrying amount of the right-of-use assets has been reduced to zero.

Subsequently, the asset is measured at cost less accumulated depreciation and impairment losses. The right-of-use assets are from the commencement date depreciated over the shorter period of the lease term and useful life of the underlying asset. When it is reasonably certain that the Group will obtain ownership of the leased asset after the lease period, the asset is depreciated over the useful life.

Depreciation is provided on a straight-line basis over the expected lease period.

The Group has chosen not to recognize low value lease assets and short-term leasing contracts in the balance sheet. Lease payments on short-term leases and low-value assets are recognised as expenses on a straight-line basis according to the lease contract.

The right-of-use assets are presented in property, plant and equipment and the lease liabilities in borrowings.

Investments in associates

The Group's investments in associates are accounted for using the equity method.

Under the equity method, the investment in the associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment separately.

The statement of profit or loss reflects the Group's share of the results from operations of the associate. Any change in OCI of those investees is presented as part of the OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognizes its share of any changes, when applicable, in the statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

Impairment of non-current assets

If there is an indication of impairment, the carrying amount of intangible assets and property, plant and equipment as well as investments in associates is tested for evidence of impairment.

When there is evidence that assets may be impaired, an impairment test is performed for each of the assets/group of assets. An impairment is recognised at the recoverable amount, if this is lower than the carrying amount.

The recoverable amount is the higher of the value in use or fair value less costs of disposal.

During the period of development, development costs are tested annually for impairment.

Consolidated financial statements

Notes

1 Accounting policies (continued)

Inventory

Inventory is measured at cost according to the FIFO method. If the net realisable value is lower than the cost, then they are impaired to the lower value.

Cost of goods for resale as well as raw materials and consumables include the purchase price plus the delivery cost, as well as indirect production expenses in terms of leaflets, packaging for goods for resale. Expenses in terms of external storage fees are added as well.

The net realisable value of inventories is determined as the selling price less costs of completion and costs incurred to effectuate the sale, and taking into account marketability, obsolescence and developments in the expected selling price.

Trade receivables

Receivables

Receivables are measured at amortised cost. Write-down for bad and doubtful debts is made in accordance with the simplified expected credit loss model according to which the total loss is recognised immediately in the income statement at the same time as the receivable is recognised in the balance sheet based on the expected loss in the useful life of the receivable.

Trade receivables are monitored continuously according to the Group's risk management until realisation. Write-downs are calculated based on the expected loss ratio, which is estimated based on historical data adjusted for estimates over the effect of expected changes in relevant parameters such as financial development, political risks, etc., in the relevant market.

Prepayments, assets

Prepayments recognised under "Current assets" comprise expenses incurred concerning subsequent financial periods.

Other provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Warranty provisions

Provisions for warranty-related costs are recognised when the product is sold or a service is provided to the customer. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

In Automotive, the standard term is a 12-month warranty period. In Cooling Solutions, warranty conditions are in general negotiated on a customer level.

Consolidated financial statements

Notes

1 Accounting policies (continued)

Trade and other payables

The Group's financial liabilities include trade and other payables. Trade payables are non-interest bearing and are settled on normal market terms. Other payables are non-interest bearing.

Contractual liabilities

Contractual liabilities include prepayments from customers and other liabilities where the Group has a future commitment to deliver goods or service items. Contractual liabilities are reduced when the related goods or service items are invoiced, either fully or partially.

Liabilities

Financial liabilities are recognised at the date of borrowing at fair value less directly attributable transaction costs paid. On subsequent recognition, financial liabilities are measured at amortized cost, corresponding to the capitalized value using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan. Non-financial liabilities are measured at net realisable value.

Derivatives

The Group uses derivative financial instruments such as forward currency contracts and interest rate swaps to hedge its foreign currency risks and interest rate risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of forward currency contracts are taken directly to profit or loss (finance income and expenses) as hedge accounting has not been applied for the period. Any gains or losses arising from changes in the fair value of interest rate swaps are recognised directly in other comprehensive income as hedge accounting has been applied.

Fair value

Fair value measurements are based on the principal market. If no principal market exists, the measurement is based on the most advantageous market, i.e. the market that maximises the price of the asset or liability less transaction and/or transport costs.

All assets and liabilities which are measured at fair value, or whose fair value is disclosed, are classified based on the fair value hierarchy, see below:

Level 1 Value in an active market for similar assets/liabilities

Level 2: Value based on recognised valuation methods on the basis of observable market information

Level 3: Value based on recognised valuation methods and reasonable estimates (non-observable market information)

Consolidated financial statements

Notes

1 Accounting policies (continued)

Alternative performance measures

The Group presents the measure of EBITDA before special items in the income statement which has not been defined in IFRS. The Group assesses that the measure gives valuable insight for investors and management of the Group to evaluate the result. As other companies may not calculate EBITDA before special items, it may not be comparable to other companies.

Cash flow statement

The cash flow statement shows the Group's cash flows from operating, investing and financing activities for the year, the year's changes in cash and cash equivalents as well as the Group's cash and cash equivalents at the beginning and end of the year.

The cash flow effect of acquisitions and disposals of entities is shown separately in cash flows from investing activities. Cash flows from corporate acquisitions are recognised in the cash flow statement from the date of acquisition. Cash flows from disposals of entities are recognised up until the date of disposal.

Cash flows from operating activities

Cash flows from operating activities are calculated as the Group's share of the profit/loss adjusted for non-cash operating items, interest received, changes in working capital and income taxes paid.

Cash flows from investing activities

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of entities, activities and intangible assets, property, plant and equipment and financial assets.

Cash flows from financing activities

Cash flows from financing activities comprise changes in the size or composition of the Group's share capital and related costs as well as the raising of loans, repayment of interest-bearing debt, paid interest on interest-bearing debts, and payment of dividend to shareholders.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances.

Notes

2 Significant accounting judgements, estimates and assumptions

Purchase price allocation

As of December 1st, 2020 the Automotive division company NA International A/S acquired 100% of the outstanding shares in AVA CEE S.P. z o.o., AVA Benelux B.V. and AVA Cooling UK Ltd. In addition, NA International A/S acquired 100 % of the outstanding shares in AVA Cooling France as of 23 February 2021.

AVA CEE S.P. z o.o., AVA Benelux B.V., AVA Cooling UK Ltd. and AVA Cooling France's assets, liabilities and contingent liabilities have been recognised under the purchase method in the consolidated financial statements of AX V Nissens ApS. The key assets of the companies are property, plant and equipment, inventories, trade receivables and the value of the brand. Especially with regard to the brand, there are no efficient markets based on which fair value can be determined. Management has therefore made an estimate in connection with the calculation of the fair value of the acquired assets and liabilities at the date of acquisition and has allocated the purchase price on that basis, see note 27. The fair value calculation is subject to uncertainty. The unallocated part of the purchase price has been recognised as negative goodwill and has been recognised in the income statement as a special item cf. note 8.

Impairment tests for goodwill

Goodwill is tested for impairment annually and whenever events or changes in circumstances indicate that the carrying amount of goodwill has been impaired, for example due to a changed business climate. In order to determine if the value of goodwill has been impaired, the cash-generating unit to which goodwill has been allocated must be valued using present value techniques. When applying this valuation technique, the Company relies on a number of factors, including historical results, business plans, forecasts and market data.

Especially the impairment test of the Nissens Cooling Solutions divisions depends on the success of the current development projects with the global wind turbine OEM's and from a macro perspective that the current global outlook on installations rates is obtained..

This is further described in note 13. As can be deduced from this description, changes in the conditions for these judgments and estimates can significantly affect the assessed value of goodwill.

Receivables

Estimates are used in determining the level of receivables that cannot be collected according to Management. When evaluating the adequacy of the allowance for doubtful receivables, Management analyses trade receivables and examines changes in customer creditworthiness, reports from credit insurance companies, customer payment patterns and current economic trends.

Inventory

Inventories are measured at the lower of cost and net realisable value. Uncertainty estimates for the inventory relate to write-down to net realisable value.

The valuation of inventory is according to the Group principal including assessment of provision for slow moving and/or obsolete inventory.

For a specification of inventory, see note 18.

Consolidated financial statements

Notes

2 Significant accounting judgements, estimates and assumptions (continued)

Estimating the incremental borrowing rate of leases

The Group cannot readily determine the interest rate implicit in the leases, therefore, the Group uses its incremental borrowing rate to measure lease liabilities. The incremental borrowing rate is the rate of interest which the Group would have to pay to borrow over a similar term and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The incremental borrowing rate therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Group estimates the incremental borrowing rate using observable inputs when available and is required to make certain entity-specific estimates.

Determining the lease term of contracts with renewal and termination options

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

The Group included the renewal period for buildings as part of the lease term for leases of right-of-use assets with shorter non-cancellable period unless there are specific plans to terminate the lease. The renewal periods for leases of right-of-use assets with longer non-cancellable periods are not included as part of the lease term as these are not assessed as reasonably certain to be exercised. Furthermore, the periods covered by termination options are included as part of the lease term only when they are reasonably certain not to be exercised. Refer to note 15 for information on potential future rental payments relating to periods following the exercise date of extension and termination options that are not included in the lease term.

Consolidated financial statements

Notes

3 Segment information

For management purposes, the Group is organised into business units based on its products and services and has two reportable segments which are as follows:

- ▶ Nissens Automotive
- ▶ Nissens Cooling Solutions

No operating segments have been aggregated to form the above reportable operating segments.

The Management of AX V Nissens ApS monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the consolidated financial statements.

Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties.

Financial year ended 30 April 2021	Automotive	Cooling Solutions	Total segments	Unallocated	Consoli- dated
	MDKK	MDKK	MDKK	MDKK	MDKK
Revenue					
External customers	1,133.8	1,304.8	2,438.6	0.0	2,438.6

Denmark	262,209	197,049
Germany	355,493	400,315
China	434,277	155,438
Other	1,386,667	1,190,774
Total	2,438,646	1,943,576

The revenue information above is based on the location of the customers. Denmark, Germany and China are the only countries whose sale represents more than 10% of total revenue.

Two customers have sales representing more than 10% of the total revenue. Revenue from these customers is in the range 10%-20% of the total revenue.

DKK'000	30 April 2021	30 April 2020
Non-current operating assets		
Denmark	1,742,447	1,792,057
Slovakia	152,631	149,360
China	26,649	20,831
Other	50,712	19,595
Total	1,972,438	1,981,843

Non-current assets for this purpose consist of property, plant and equipment and intangible assets.

4 Other operating income

DKK'000	1 May 2020 – 30 April 2021	1 May 2019 – 30 April 2020
Government grants	1,637	2,218
Net gain on disposals of property, plant and equipment	439	229
Other operating income	8,849	8,211
Total	10,925	10,658

Government grants have been received as Covid-19 compensation. There are no unfulfilled conditions or contingencies attached to these grants.

Other operating income includes sales of raw materials.

Share-based payments	365	382	747
	1,765	7,830	9,595

No warrant agreements have been granted to the key personnel during the financial year.

6 Share-based payments

In the financial year 2020/2021, no warrants have been granted.

In the financial year 2019/2020 no warrants have been granted.

The Board of Directors and other executive employees were granted warrants to purchase shares in AX V Nissens II ApS at a given exercise price. The warrants will vest on 30 June 2022 or at an earlier date if the activities of the Group are disposed of in an exit situation. The warrant programs are contingent on continued employment in the Group.

The fair value of the granted warrants is estimated using the Black-Scholes Model. The value is calculated applying the following assumptions:

Estimated volatility (based on a selected peer-group)	30%
Risk free interest rate	-0.43%
Market value per share	DKK 10

Consolidated financial statements

Notes

6 Share-based payments (continued)

Every warrant grants the right to buy one share in AX V Nissens II ApS at a nominal value of DKK 0.01 at a price of DKK 10 + 8% p.a.

The fair value per warrant at grant dates was estimated to be DKK 1.10 – 1.19.

Estimating fair value for share-based payment transactions requires a determination of the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires a determination of the most appropriate inputs to the valuation model, including the expected life of the share option or appreciation right, volatility and dividend yield and making assumptions about them.

The fair values of awards granted were determined using the Black-Scholes Model that takes into account factors specific to the share incentive plans, such as the vesting period.

The inputs used for the valuation model include, among others, the exercise price of the award, the expected life of the option, the expected volatility, the expected dividend yield and the risk-free interest rate.

11 Income tax (continued)

In addition to the tax loss recognised in the balance sheet, the Group has total unrecognised tax losses of 9,760 DKK'000 which, due to the uncertainty of the future utilization, has not been recognised in the balance sheet. The tax losses can be carried forward as follow:

DKK'000	30 April 2021	30 April 2020
Financial year 2021/2022	0	0
Unlimited	9,760	537
Unrecognised tax loss to be carried forward 30 April	9,760	537

The Group has two subsidiaries in China for which future dividend payments will be subject to withholding tax in the range of 5 – 10%. The potential withholding tax amounts to 5,567 – 11,135 DKK'000.

The withholding tax has not been recognised in the balance sheet as there are no current plans for dividend payments from the subsidiaries in China.

Notes

13 Impairment test

For impairment assessment purposes, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level. Goodwill from the acquisition of K. Nissen International A/S is monitored by Management at segment level and therefore allocated to the two segments - Automotive and Cooling Solutions.

All individual assets or cash-generating units are tested for impairment in circumstances in which indicators of impairment are identified and therefore, the carrying amount may not be recoverable.

The carrying amount of goodwill relates to the two segments as follows:

DKK'000	2020/2021	2019/2020
Automotive	572,309	572,309
Cooling Solutions	364,192	364,192
Total	936,501	936,501

Goodwill is tested for impairment once a year and in the case of impairment indicators. Impairment test in 2020/2021 is made as of 31 March 2021.

The recoverable amount is based on the value in use, which is calculated by means of expected net cash-flows on the basis of forecasts for 2021/2022 – 2025/2026 agreed by the Executive Board.

The forecasts are based on the expected market developments, including growth in market and expected price levels. The revenue forecasts for both divisions are adjusted for the expected short-term Covid-19 impact and a reduced long-term outlook has been incalculated. The duration and depth of Covid-19 may impact the revenue and earnings outlook further.

No impairment has been recognised as the impairment test indicates a headroom in the range of +653 MDKK for Automotive and +129 MDKK for Cooling Solutions between calculated value used and the carrying amount of net assets in the Cooling Solutions segment.

Amongst other things, the Automotive sales volume is driven by development in the car park in markets where Nissens is present. Cooling Solutions sales volume is driven by factors such as the performance of the global wind industry and the general macro-economic trends.

The key assumptions underlying the calculation of recoverable amounts and the tolerable sensitivities hereon are:

	Automotive		Cooling Solutions	
	Used	Sensitivity	Used	Sensitivity
<u>2020/2021</u>				
Growth rates	6.5%	10.4%	4.7%	2.6%
Growth rate in terminal period	2.0%	7.0%	2.0%	1.4%
Discount rate (WACC)	8.9%	3.6%	10.0%	0.8%
<u>2019/2020</u>				
Growth rates	5.8%	10.3%	10.1%	1.3%
Growth rate in terminal period	2.0%	3.7%	2.0%	0.6%
Discount rate (WACC)	8.9%	2.2%	10.0%	0.3%

Going forward, the discount rates applied are expected to be in the range of 8% - 10%.

15 Leases

Amounts recognised in the balance sheet

The balance sheet shows the following amounts relating to leases:

Right-of-use assets

DKK'000	30 April 2021	30 April 2020
Buildings	74,359	58,746
Plant and machinery	11,223	11,369
Other fixtures and fittings	6,927	6,059
	92,509	76,174

Further specification of right-of-use assets is disclosed in note 14.

Lease liabilities

DKK'000	30 April 2021	30 April 2020
Current	35,136	20,707
Non-current	60,408	55,885
	95,544	76,592

Further information about maturity is disclosed in note 29.

Amounts recognised in the statement of profit or loss

The statement of profit or loss shows the following amounts relating to leases:

Depreciation charge of right-of-use assets

DKK'000	30 April 2021	30 April 2020
Buildings	22,197	12,292
Plant and machinery	3,674	2,488
Other fixtures and fittings	4,656	4,037
Total depreciation charge of right-of-use assets	30,527	18,817
Interest expense (included in finance expenses)	2,231	1,232
Expense related to short-term leases (included in external expense)	1,184	1,061
Expense related to low-value leases (included in external expense)	250	192
The total cash outflow for leases in the year	29,020	19,415

Estimates and assumptions related to leases are described in note 2.

Consolidated financial statements

15 Leases (continued)

The Group's leasing activities

The Group leases various offices, warehouses, equipment and vehicles. Rental contracts are typically made for fixed periods of 12 months to 6 years, but may have extension options as described below.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group, the lease's incremental borrowing rate is used. The incremental borrowing rates used are 2% for buildings and 3.5% for plant and machinery other fixtures and fittings.

A not insignificant proportion of the Company's building leases contains options to extend the lease period between 1-3 years. To the extent Management found it reasonably certain that these leases will be exercised, the period of the option is recognised as part of the lease. Extension options are recognised based on a specific contract-to-contract assessment. As of 30 April 2021, extension options are recognised with a value of 16.8 MDKK (2019/2020: 16.4 MDKK) as they are exercised with reasonable certainty. No extension options extended exceed 5 years. As of 30 April 2021, extension options that with reasonable certainty are not exercised amount to 20.9 MDKK (2019/2020: 22.9 MDKK). Management exercises significant judgement in determining whether these extension and termination options are reasonably certain to be exercised, see note 2.

18 Inventory

DKK'000	30 April 2021	30 April 2020
Raw materials and consumables	143,360	102,393
Work in progress	143,840	137,185
Finished goods	373,727	321,943
	660,927	561,521

Inventory is reported net of allowances for obsolescence, analyses of which is as follows:

DKK'000	30 April 2021	30 April 2020
1 May	17,083	7,364
Addition in year	11,307	9,719
Utilised	-8,249	0
30 April	20,141	17,083

The net realisable value of inventories is calculated as selling price less costs of completion and costs necessary to make the sale. The Group and Management have a strong focus on inventory turnover and are continuously working with procedures to reduce risk of obsolescence. The Group has implemented fixed procedures to calculate obsolescence on stock.

19 Trade and other receivables

DKK'000	30 April 2021	30 April 2020

21 Equity

Capital management

On a regular basis, the Executive Board assesses whether the Group has an adequate capital structure, just as the Board of Directors regularly evaluates whether the Group's capital structure is in line with the best interests of the Group and its stakeholders.

The current capital structure was implemented to support the acquisition of K. Nissen International A/S in June 2017, and Management assesses that the current capital structure is sufficient to support the Group's strategy plans. According to the current policy, the Group does not distribute dividend.

Financial year 2020/2021

Acquisition of the AVA Group

As of 1 December, 2020, the Automotive division company NA International A/S acquired 100% of the share capital in the following 3 companies AVA CEE S.P. z o.o., AVA Benelux B.V. and AVA Cooling UK Ltd. In addition, NA International A/S acquired 100% of the share capital in the company AVA Cooling France as of 23 February 2021.

The AVA companies' business activities are within sales and distribution of automotive cooling and climate products and will further strengthen the market position of the Automotive division. The AVA brand has a strong acknowledgement in the European market, and together, the combined companies will benefit from synergies in supply chain and other back-office functions.

The total acquisition price is agreed to 34.1 mDKK of which 26.7 mDKK has been paid in cash in December 2020 and 7.4 mDKK in February 2021. The total acquisition price was adjusted with 3.5 mDKK in May 2021.

The Group has incurred transaction costs of approximately 4.2 mDKK in connection with the acquisition for legal, financial and commercial advisors. The costs have been recognized as special items, cf. note 8.

AVA CEE S.P. z o.o., AVA Benelux B.V. and AVA Cooling UK Ltd have been included in the consolidated financial statements from the date of acquisition, 1 December, 2020 and AVA Cooling France has been included in the consolidated financial statements from the date of acquisition, 23 February 2021.

Assets acquired and liabilities assumed

The fair values of the identifiable assets and liabilities as of the acquisition date have been presented jointly for the four companies as valuation of the AVA companies has been made at group level and not at the single legal unit as the Group is one cash generating unit.

Consolidated financial statements

Notes

27 Business combinations (continued)

The fair values of the identifiable assets and liabilities as at the date of acquisition were:

DKK'000	Fair value recognised on acquisition
Assets	
Intangible assets	14,930
Property, plant and equipment	38,233
Deferred tax assets	3,303
Deposits	2,054
Inventory	48,650
Trade and other receivables	49,261
Cash and cash equivalents	9,044
	<hr/>
	165,475
Liabilities	
Borrowings	-9,686
Provisions	-609
Trade and other payables	-57,575
Contract liability	-326
Lease liability	-30,132
Income tax payable	-45
	<hr/>
	-98,373
	<hr/>
Total identifiable net assets at fair value	67,102
Negative goodwill	-36,487
	<hr/>
Purchase consideration	30,615

The purchase price reflects that the acquired companies have not been profitable in their previous structure and ownership. To obtain the synergies from the business combination there will be substantial transformation costs in both FY 2020/2021 and FY 2021/22, which are reflected as a negative goodwill on the acquisition. The negative goodwill has been recognized as special items, cf. note 8.

Acquired receivables include trade receivables of a fair value of 39.2 mDKK. The contractually receivable gross amount is 42,7 mDKK and hence 3.5 mDKK has been assessed as irrecoverable at the date of acquisition.

From the date of acquisition, AVA entities contributed 100.4 mDKK to revenue and -5.1 mDKK to profit before tax from continuing operations of the Group. If the combination had taken place at the beginning of the year, revenue from continuing operations would have been 267.1 mDKK and profit before tax from continuing operations for the Group would have been -21.3 mDKK.

The Group measured the acquired lease liabilities using the present value of the remaining lease payments at the date of acquisition. The right-of-use assets were measured at an amount equal to the lease liabilities and adjusted to reflect the favourable terms of the lease relative to market terms.

The total cost price has been settled in cash.

Financial year 2019/2020

Nissens Group has not acquired any subsidiaries or activities during 2019/20.

Consolidated financial statements

Notes

28 Pledges, collateral, contingencies and commitments

Danish Group entities are jointly taxed with AX V III Nissens ApS, which acts as a management company, and are jointly and severally liable with several other jointly taxed group entities for the payment of income taxes as well as withholding taxes on interest, royalties and dividends. The liabilities have been estimated at 18.7 MDKK at 30 April 2021 (30 April 2020: 5.5 MDKK).

The Group is party to a minor number of pending disputes. The outcome of these cases is not expected to have any material impact on the financial position of the Group, neither individually nor in the aggregate.

Commitments

The Group has entered into lease agreements related to cars, plant and computers, with lease terms between 0 and 6 years. Detailed information related to other contractual commitments in note 30 and leases in note 15.

Collateral

Land and buildings with a carrying amount of 165.0 MDKK have been pledged as security for mortgage debt of 164.7 MDKK.

Shares in K. Nissen International A/S, carrying amount 806 MDKK and shares in the following subsidiaries of K. Nissen International A/S, Nissens Cooling Solutions SK S.r.o, carrying amount 134 MDKK, Nissens Cooling Solutions North SK S.r.o, carrying amount 2 MDKK, Nissens North America Inc. carrying amount 23 MDKK Nissens Cooling Solutions A/S, carrying amount 204 MDKK, Nissens Automotive A/S, carrying amount 273 MDKK, Nissens Deutschland GmbH, carrying amount 7 MDKK and the subsidiary of Nissens A/S, Nissens UK Ltd, carrying amount 5 MDKK have been pledged as security for bond debts of 130 MEUR.

Goodwill and other purchase price allocations have not been allocated to legal unit. Therefore, the listed carrying amounts for the shares pledged are based on the booked equity and do not include allocation of goodwill etc., if any.

29 Financial risk and financial instruments

Risk management policy

The Group's principal financial liabilities, other than trade payables, are mortgage and bond loans. The main purpose of these financial liabilities is to finance the Group's operations and acquisitions of assets. The Group's principal financial assets include accounts receivable. The Group also enters into derivative transactions. Financial instruments applied by the Group include forward contracts on exchange rate exposures and interest hedging.

The Group is exposed to market risk, credit risk and liquidity risk. The Group's senior management oversees the management of these risks. The Board of Directors reviews and agrees on policies for managing each of these risks, which are described below.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: interest rate risk, currency risk and other price risks such as equity price risk and commodity price risk. The Group applies the following derivative financial instruments to mitigate market risks, interest rate swaps and forward contracts.

Consolidated financial statements

Notes

29 Financial risk and financial instruments (continued)

Currency risk

The majority of Nissens' activities implies currency risks in connection with the purchase and sale of goods and services in foreign currencies. The largest exposure for purchases relates to CNY, EUR and USD whereas largest invoicing currencies are EUR, PLN, USD and GBP. Currency risks are handled within the limitations of the policy approved by the Board of Directors. The policy recommends the use of layered hedging, but it does not set a minimum share of the expected future cash-flow which should be secured by financial instruments.

All changes in financial instruments related to foreign currency risk are recognised as financial income or financial expenses in the income statement.

At the balance sheet date, the Group has the following exposures towards net-monetary positions on current receivables and total liabilities.

	Change in rate	2020/2021 P/L effect (MDKK)	2019/2020 P/L effect (MDKK)
EUR - bond loan	+0.1%	-1.0	-1.0
EUR – current receivables and current liabilities	+0.1%	0.3	0.2
PLN	+5.00%	4.8	1.2
GBP	+5.00%	0.9	0.3
USD	+5.00%	2.9	1.5
CNY	+5.00%	6.1	-1.6
CZK	+5.00%	1.8	-

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in the market interest rates relates primarily to the Group's mortgage and bond loan. The interest applied to the loans is variable on 3-months terms.

An increase in the interest rate by 1 percentage in comparison to the interest rate at the balance sheet date would, all other things being equal, affect the Group's profit or loss by -1.9 MDKK (2019/20: -1.9 MDKK) and equity after tax by DKK -1.4 MDKK (2019/2020: -1.4 MDKK).

Financial instruments

To minimize the interest exposure on the bond loan, the Group has entered into a cap on the interest rate on the bond loan. The interest cap of 5.0% is a 4-year agreement with maturity date 29 September 2021 and covers the full interest position on the 130 MEUR bond loan.

The fair value adjustment has been recognised in "other comprehensive income".

Pricing risk

The Group is affected by the volatility of primarily aluminium prices. The outlook for aluminium prices is continuously monitored and decisions on securing expected consumption are made in accordance with policies hereon. The annual direct consumption of aluminium is approx. 6,000 ton. A change in the LME reference price of 1% will affect the Group's profit or loss by 0.7 MDKK (2019/2020: 0.5 MDKK).

The Group is also affected by the volatility of other raw material prices directly and indirectly.

Consolidated financial statements

Notes

29 Financial risk and financial instruments (continued)

The Group is also exposed to the development in the global freight rates. Short to medium term the development in material prices and freight rates may impact earnings until mitigations can be implemented.

Liquidity risk

The purpose of the Group's cash management procedures is to ensure that the Group at all times has sufficient and flexible financial resources at its disposal and is able to honour its obligations when due. The Group's liquidity reserves consist of credit balances and fixed overdraft facilities.

Loan facilities

Besides net cash of DKK 160 MDKK (2019/2020: 195 MDKK), the Group had undrawn credit facilities of 125 MDKK (2019/2020: 125 MDKK) at 30 April 2021.

In addition to the credit facilities, the Group has the following loans:

Maturity analysis

DKK'000	Contractual cash flow	< 1 year	1 - 3 years	3 to 5 years	>5 years
Bond loan (130 MEUR)	1,029,059	48,426	980,633	0	0

30 April 2020	1,687,011	398,790	1,089,546	61,592	137,084

The corporate bond loan will mature in June 2022.

The contractual cash flows are based on the non-discounted cash flows, including down-payments and calculated interests based on current interest rates.

Consolidated financial statements

Notes

29 Financial risk and financial instruments (continued)

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or a customer contract, leading to a financial loss. The Group is exposed to credit risk from its trade receivables and from its financing activities, including deposits with banks and financial institutions (to the extent the balance is in surplus of the Group), foreign exchange transactions and other financial instruments. The credit risk incurred from trade receivables is generally managed by continuous credit evaluation of the customers and trading partners. In addition, credit risks on counterparties other than banks are minimized through the use of prepayments and credit insurance. From a historical perspective, losses on receivables are at a low level.

The maximum credit risk related to trade receivables equals the carrying amount of the trade receivables.

The allowance for expected credit losses for trade receivables is calculated at individual level when there is an indication of impairment. For receivables with no indication of impairment, the expected credit losses are based on the historical credit loss. The expected loss includes the effect of Covid-19. In 2020/2021, credit losses recognised in the income statement are less than 0.1% of total revenue, corresponding to historic level. In 2019/2020, credit losses recognised in the income statement accounted for less than 0.1% of total revenue.

Selected customers offers supply chain financing programs, which the Group utilized to sell certain receivables. The Groups involvement in receivables sold under these programs is limited to administration and financial costs related to delayed payments. Thus, the Group only carries an immaterial risk on these receivables. The profit and loss impact from these programs is limited to an interest payment on the payments. The balance sheet does not include any receivables or payables related to receivables sold under these programs. At the balance sheet date, the nominal value of receivables sold amounts to 136.7 MDKK (2019/2020: 75.6 MDKK). Receivables sold are due within 4 months.

AX V Nissens ApS is included in the consolidated financial statements of AX V Nissens III ApS, CVR.no. 38 64 73 50. The consolidated financial statements of AX V Nissens III ApS can be obtained by contacting the company.

33 Events after the reporting period

After the balance sheet date, no events have occurred that may have influence the assessment of the financial statements for the year 1 May 2020 – 30 April 2021.

Consolidated financial statements

Notes

34 Standards issued but not yet effective

The IASB has issued a number of new standards and amendments not yet in effect or endorsed by the EU and therefore not relevant for the preparation of the 2020/2021 consolidated financial statements.

- IAS 1 Presentation of Financial Statements — Amendments to IAS 1: Classification of Liabilities as Current or Non-current
- IAS 16 Property, Plant and Equipment – Amendments to IAS 16: Proceeds before Intended Use
- IAS 37 Provisions, Contingent Liabilities and Contingent Assets – Amendments to IAS 37: Onerous Contracts – Cost of Fulfilling a Contract
- IFRS 3 Business Combinations – Amendments to IFRS 3: Reference to the Conceptual Framework
- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 Interest Rate Benchmark Reform – Phase 2
- Annual Improvements to IFRSs 2018-2020.

None of the new standards are endorsed by EU.

The endorsed adopted, not yet effective standards and interpretations will be implemented as they become mandatory for AX V Nissens ApS.

None of the new standards and interpretations are expected to have a significant impact on recognition and measurements in AX V Nissens ApS.

Parent company financial statements

Notes

1 Accounting policies

For the accounting policies, please refer to the consolidated financial statements' accounting policies on page 25.

Investments in subsidiaries

Dividends on investments in subsidiaries are recognised in the income statement of the Parent Company in the financial year in which the dividend is declared.

Investments in subsidiaries are measured at cost, including transaction costs.

If there is an indication of impairment, the carrying amount of investments in subsidiaries is tested for evidence of impairment.

When there is evidence that investments may be impaired, an impairment test is performed. Impairment is recognised at the recoverable amount, if this is lower than the carrying amount. The recoverable amount is the higher of the value in use or fair value less costs of disposal.

Receivables

For receivables from group entities, the expected credit loss-model (ECLs) is used.

For the credit loss-model is an expectation-based model, where the expected lifetime of an asset is less than 12 months, expected losses are measured at its expected lifetime (stage 1).

If a significant increase in the credit risk has occurred compared to original expectations, expected loss related to the assets is presumed, lifetime expected losses (stage 2).

The assets are written off, when there is no reasonable expectation to recover outstanding amounts based on the expected loss of the assets, lifetime expected losses (stage 3). Interest income is recognised in the income statement based on effective interest method according to the remaining asset.

Expected loss is estimated based on considered PD (probability of default), EAD (exposure at default) and LGD (losses by default), incorporated in Management's expectation for the future development and information available.

2 Significant accounting judgements, estimates and assumptions

For the significant accounting judgements, estimates and assumptions, please refer to note 2 to the consolidated financial statements on accounting policies.

3 Staff costs
