DKTH group in brief

About DKTH

DKT Holdings ApS (DKTH) was established 22 December 2017 with the purpose of running an investing business through its 100% owned subsidiaries, DKT Finance ApS (DKTF) and DK Telekommunikation ApS (DKT). DKTH is owned by a consortium comprising:

- DKTUK Limited (50%), managed by Macquarie Infrastructure and Real Assets Europe Limited
- Arbejdsmarkedets Tillægspension (ATP) (16.7%)
- PFA Ophelia InvestCo I 2018 K/S (16.7%), managed by PFA Asset Management A/S
- PKA Ophelia Holding K/S (16.7%), managed by AIP Management P/S.

The business

All core activities relate to TDC. TDC is the incumbent operator and a provider of integrated communications and entertainment solutions in Denmark with a leading market position across broadband, pay-TV, mobile and landline voice services based on end-user subscriptions to consumer, business and wholesale customers and the multi-play segment with a focus on premium digital services. TDC also offers integrated solutions to business customers.

For further information, please see the Annual Report for TDC for 2021.

Financial review

This financial report includes the consolidated financial statements for DKTH. The operating activities of the DKTH Group relate to activities in TDC Group.

The acquisition of TDC has resulted in a number of accounting adjustments to DKTH's financial statements, including purchase price allocation adjustments which have increased consolidated non-cash expenses and contributed to the consolidated net loss.

DKTH group's EBITDA

DKTH group revenue, cost of sales, external expenses, personnel expenses and other income, i.e. EBITDA (Operating profit before depreciation, amortisation and special items), largely corresponds to TDC Group's similar items. EBITDA for DKTH group amounted to DKK 6,412m. Hereof DKK 6,420m stems from TDC. The remaining negative EBITDA of DKK 8m is primarily related to consultant fees.

TDC Group's financial performance 2020 vs. 2019

Revenue

In 2020, TDC Group's revenue decreased by 5.6% or DKK 955m to DKK 16,089m, compared with 2019. The decline was driven mainly by TV, the drag from legacy technologies in internet & network and landline voice.

Gross profit

TDC Group's gross profit decreased by 5.3% or DKK 636m to DKK 11,463m in 2020. The decline was driven primarily by TV, the drag from legacy technologies in internet & network and the continued decline in landline voice.

Operating expenses¹

In 2020, operating expenses decreased by 9.5% or DKK 532m to DKK 5,043m. The improved operating expenses were fuelled by cost savings across TDC Group.

EBITDA

In 2020, EBITDA decreased by 1.6% or DKK 104m to DKK 6,420m. The development was triggered by declines in TV, internet & network and landline voice that were somewhat offset by improved cost savings.

¹ Including other income.

Key figures (DKKm)

		2020	2019	2018 ²
Income statements				
	DKKm			
Revenue		16,089	17,044	11,581
Gross profit		11,463	12,099	8,266
EBITDA		6,412	6,512	4,342
Net financial expenses		(3,208)	(3,041)	(3,350)
Profit/(loss) for the year from continuing operations excluding special items		(2,885)	(3,088)	(2,934)
Profit/(loss) for the year		(3,028)	(3,244)	(2,951)
Capital expenditure		(5,547)	(4,801)	(2,443)
Mobile licences		0	(1,349)	0
Total assets		67,889	70,319	65,872
Total equity		(4,141)	(1,753)	893

Total cash flow from continuing operations		(1,146)	(703)	(15,167)
Total cash flow from discontinued operations		0	(3)	17,581
Total cash flow		(1,146)	(706)	2,414
Key financial ratios				
Gross margin	%	71.2	71.0	71.4
EBITDA margin	%	39.9	38.2	37.5
Net interest-bearing debt excl. shareholder loans and impact from IFRS 16	DKKm	(32,957)	(32,803)	(30,449)
Net interest-bearing debt (NIBD)	DKKm	(56,347)	(55,579)	(46,902)
NIBD/EBITDA ¹	x	5.8	5.8	4.6
NIBD/EBITDA excl. impact from IFRS 16 ¹	x	5.5	5.4	4.6
NIBD/EBITDA excl. impact from IFRS 16 and spectrum licence liabilities ¹	x	5.3	5.1	4.5

¹ Calculated excluding shareholder loans. The 2018 figure is based on TDC's EBITDA of DKK 6,691m.

² As TDC was acquired by DKT as of 4 May 2018, the figures for the DKTH Group for 2018 do not include the operations of TDC for the full year.

Depreciation, amortisation and impairment losses

Depreciation, amortisation and impairment losses are all related to the TDC Group and amounted to DKK 6,232m. Hereof DKK 1,296m was depreciation and amortisation of assets recognised in connection with the purchase price allocation performed in connection with the acquisition of TDC. This included primarily amortisation of customer relationships, brands and software, recognised as separate assets as part of the purchase price allocation performed in connection with the acquisition of TDC.

The customer relationships are amortised over the estimated useful lives of such relationships. Brands with finite useful lives are amortised over the useful lives of such brands. The useful life of the TDC brand is deemed indefinite and consequently, DKTH does not amortise the value of this brand.

The decrease in amortisation from 2019 to 2020 was due primarily to reduced amortisation of customer relationships as a result of the diminishing-balance method partly offset by higher amortisation of software due to an increased amortisation base.

The decrease in depreciation from 2019 to 2020 was due primarily to the increased useful lives of various network equipment and a decreased depreciation base resulting from various fully depreciated assets. The decrease was also impacted by

the 2019 reduction of useful lives of existing mobile equipment as a result of the replacement with Ericsson equipment.

Special items

The total special items, representing a net expense of DKK 180m before tax, comprised primarily expenses related to redundancies and other restructuring costs in the TDC Group.

Financial income and expenses

Financial income and expenses represented a net expense of DKK 3,208m. Hereof DKK 2,383m related to DKT, DKTF and DKTH. These financial expenses related primarily to interest expenses on senior notes and shareholder loans. All other financial income and expenses related to the TDC Group.

The net expense increased by DKK 167m compared with 2019. The increase was due primarily to increased interest expenses on shareholder loans due to a higher level of shareholder loans in 2020.

Income taxes

DKTH Group income taxes relate primarily to the profit before income taxes in TDC as well as the impact from purchase price allocation adjustments. The taxes are also affected by the Danish rules on limitation on the tax deductibility of interest expenses. DKTH Group's net financial expenses are effectively not tax deductible due to the limitations and furthermore, DKTF and DKTH are impacted by the rules regarding thin capitalisation applicable for the joint taxation.

Loss for the year

The loss for the year of DKK 3,028m comprised a loss for TDC of DKK 617m and a combined loss in DKT, DKTF and DKTH of DKK 2,411m related primarily to the net financial expenses.

Net interest-bearing debt

In 2020, net interest-bearing debt excluding the impact from IFRS 16 increased by DKK 1,696m. The increase was due primarily to interest accrued on shareholder loans (DKK 1,566m) and the negative net cash flows from operating and investing activities (DKK 141m).

Guidance 2020 follow-up

2020 guidance assumed a flat to slightly declined EBITDA development, strategic capex investments of DKK ~2.6bn in 5G and fibre, total capex spending of DKK 5.5- 5.9bn and net debt-to-EBITDA EoY of ~5.9x excluding IFRS 16.

DKTH Group delivered on all guided parameters. The 2020 EBITDA result was within guidance of flat to a slight decline in EBITDA for the full-year (-1.5% YoY).

The 2020 capital expenditure and strategic capital expenditure investments in 5G and fibre were within the guided amounts of 5.5-5.9bn (5.5bn) and ~2.6bn (2.5bn), respectively. The 2020 EoY net debt-to-EBITDA was below the guided amount of ~5.9x excluding IFRS 16 (5.5x).

Guidance 2021

2021 guidance assumes slightly lower to flat EBITDA.

ESG framework at DKTH Group

TDC has been connecting Denmark with the world since 1882 and clearly, our infrastructure and services have supported the growth and development of Denmark into a digital society. As the country's foremost connectivity and digital services provider, it is important that we fulfil our obligation to be good corporate citizens and operate in a responsible manner, growing our business in line with our sustainability ambitions and ethical values. This translates into decision-making in our business that reinforces sustainable and responsible development.

Our sustainability strategy

Our sustainability strategy, which is based on our material issues, guides our environmental, social and governance activities.

Despite the broad range of issues covered; we have defined a three-pillared strategy that balances stakeholder concerns, ESG risks, core competencies, public commitments and business ambitions. It is also aligned to the UN Sustainable Development Goals, and underpinned by our Sustainability Policy, which we publish on our website.

To ensure that we deliver on our ambitions, our strategy is tied to various KPIs that monitor and measure our performance and are used for internal reporting to Management and the Board of Directors.

Our strategy is now well into the rollout and execution phase, and some of our targets published in 2019 have already been raised to match our

increased appetite for taking responsibility for ESG issues, especially regarding climate action.

This demonstrates our ambition to make a positive impact and actively operate and develop TDC in a way that promotes sustainability and contributes to society's green transition.

Governance

Our sustainability strategy is embedded in our business strategy and is approved by our Board of Directors. On an operational level, our Executive Management team is responsible for ensuring our targets are met, and the strategy and activities have been cascaded down throughout the entire organisation.

To manage our climate commitments, we have established a CO2 Forum, led by a member of the Executive Management Team of TDC Group, in which key management-level personnel from both TDC NET and Nuuday participate. The CO2 Forum is responsible for the roadmap to CO2 neutrality¹ that they have developed with input from suppliers and employees, taking direction from our sustainability team and project management offices. The Director of Sustainability is responsible for implementing the sustainability strategy in operations and achieving our KPIs. In this task, she is assisted by the Sustainability Team and a large network of employee

'Sustainability Ambassadors' who are located in teams and brands across TDC Group, TDC NET and Nuuday.

In addition, our governance is supplemented by project- or topic-specific checks and balances, which are externally audited. For example, our environmental activities are tied to our ISO 14001 certified environmental management system, and our Occupational Health and Safety (OH&S) approach is tied to our ISO 45001 certified OH&S system. We also have an extensive range of issue-specific policies covering critical ESG risk areas such as: data protection, privacy and data

¹ Our definition of CO2 neutrality refers to achieving net zero greenhouse gas emissions for our Scope 1 and 2 emissions by reducing to zero those generated through energy used in our operations or from the generation of electricity and heat that we purchase. We will achieve this by sourcing zero emission fuels and offsetting. Measured in tons of CO2e, our 2023 target to achieve a 50% reduction in CO2e emissions has a 2020 baseline.

 <p>Digital Denmark</p> <p>We support digital citizenship, develop digital solutions and ensure digital connections for all of Denmark</p>	 <p>Environmental Impact</p> <p>We will be 100% CO2 neutral in 2028</p> <p>We minimise our environmental impact</p>	 <p>How we do business</p> <p>We take responsibility for our employees, our customers, and our value chain</p>
--	---	--

ethics, anti-corruption, IT security, and our Code of Conduct. These have established lines of responsibility, culminating with the Board of Directors or the Audit Committee of the Board of Directors, that support strong governance within ESG areas at TDC. Finally, our ESG reporting is prepared in accordance with GRI Reporting Standards: Core Option and the TDC Group, TDC NET and Nuuday Annual Reports are assured by an external third-party assessor.

A materiality-led approach to sustainability

At TDC, we define and understand our material issues according to best practice sustainability reporting standards (GRI). The integration of stakeholder insights and feedback is a central tenet of our approach.

Our most recent materiality assessment, conducted in 2019, followed a 5-step approach. First, we identified and engaged with all our stakeholders and key internal experts, before performing a desk study of issues and trends that allowed us to assess and prioritise the challenges and opportunities both for and from our business. Quantitative and qualitative engagement with stakeholders included surveys and interviews, and finally this input was integrated to create a hierarchy of impacts on and from our operations and products.

Stakeholders' voices included in this exercise were: our Management and Board of Directors, our customers, employees, owners and investors, the authorities and regulatory bodies, media, suppliers, business partners, NGO partners, and interest groups.

Our materiality matrix was the outcome of this assessment, and the material issues identified by this assessment informed our strategy development and are all captured in our three strategic pillars. By developing our strategy in this way, we aim to build resilience and future-proof our business by bringing all concerns and voices into the conversation.

As a result, we aim for our ESG activities and targets to be inclusive, proactive, and materiality led. By uncovering our potentially most challenging areas and addressing them in a systematic and considered manner, we can focus our attention and resources on what is most important to our stakeholders. And focus our efforts where we are certain we can make the greatest impact, while maintaining strategic relevance for the business.

By conducting this in-depth exercise every 2-3 years and maintaining close contact with key stakeholders on an ongoing basis, we can remain aware of our ESG-related risks and opportunities, while being better prepared to respond to, address or capitalise on unexpected events.

Our materiality matrix

Our materiality matrix (right) visualises our top material issues and, in turn, our ESG reporting boundaries.

UN Sustainable Development Goals

The 17 goals of the UN sustainable development agenda for 2030 seek to ensure “universally beneficial outcomes” for all, including future generations. It is a plan of action to achieve a peaceful, equitable and sustainable life for all people on a healthy planet.

We support this agenda, and our approaches and targets are aligned with the UN SDGs to ensure that our efforts support the global effort for sustainable development. We do this because we believe we can use the 2030 goals as a blueprint to increase the positive impact of our business.

By bringing the 2030 sustainable development agenda into the heart of our business, we have identified three SDGs that, we believe, enable us to contribute to in a meaningful way.

In 2020, TDC worked actively to advance progress in these three areas: Quality Education (SDG #4), Industry, Innovation and Skills (SDG #9) and Climate Action (SDG #13).

SDG actions taken by our business in 2020

 <p>4 QUALITY EDUCATION</p>	<p>Target</p> <ul style="list-style-type: none"> • 25% of Danish schoolchildren to benefit from TDC digital citizenship materials by 2025 <p>2020 Actions</p> <ul style="list-style-type: none"> • By the end of 2020, 99,205 Danish school children had been reached with digital citizenship materials; 52% of the way towards achieving our 2025 target • Digital citizenship materials launched in Greenland
 <p>9 INDUSTRY, INNOVATION AND INFRASTRUCTURE</p>	<p>Target</p> <ul style="list-style-type: none"> • One million homes to be passed by fibre; nationwide 5G coverage <p>2020 Actions</p> <ul style="list-style-type: none"> • In 2020, TDC NET passed 123,000 homes in Denmark with fibre broadband; meaning we are 25% of the way to achieving our goal • National 5G coverage was achieved by December 2020
 <p>13 CLIMATE ACTION</p>	<p>Target</p> <ul style="list-style-type: none"> • 100% CO₂e neutral¹ by 2028 (Scopes 1 and 2 emissions)²; set Science-Based Targets (SBTi)³ <p>2020 Actions</p> <ul style="list-style-type: none"> • Agreed roadmap to CO₂e neutrality (zero emissions from operations) • Target deadlines brought forward 2 years; 50% reduction in CO₂e emissions by 2023 vs. a 2020 baseline, 100% reduction by 2028 • Completed our first Scope 3 emissions inventory; a critical step towards setting our SBTi target

¹ Our definition of CO₂ neutrality refers to achieving net zero carbon dioxide emissions for our Scope 1 and 2 emissions by reducing to zero the CO₂e emissions generated through our use of energy in our operations or from the generation of electricity that we purchase. We will achieve this through sourcing zero emission fuels or offsetting. Our 2023 target to achieve a 50% reduction in our CO₂e emissions has a 2020 baseline.

² We report our emissions in line with the World Business Council for Sustainable Development GHG Protocol methodology, which classes emissions in three groups: Scopes 1, 2 and 3. Our Scope 1 emissions consist of the fuel in our vehicles, the oil in our backup generators and other energy sources we use in our operations. Scope 2 emissions are those from purchased electricity. Scope 3 comprises value chain emissions.

³ Science-Based Targets are clearly defined greenhouse gas emission reduction targets in line with the latest climate science aimed at meeting the goals of the Paris Climate Agreement and limiting global warming to 1.5°C. For more information, read [here](#).

Engaging with our stakeholders

Memberships

As a part of engaging with ESG topics, TDC is a proud member of specially selected international and national organisations and commitments that promote sustainable development.

We collaborate with the Telecoms Industry Association (TI), the Danish Chamber of Commerce (Dansk Erhverv), DA (Dansk Arbejdsgiverforening), the Danish IT Industry Association (ITB), Danske Mediedistributører (FDIH), and the UN Gender Diversity Roundtable.

In Europe, we collaborate with the European Telecommunications Network Operators' Association (ETNO), and GIGA Europe.

At international level, we are board members of the Global e-Sustainability Initiative (GeSI) and we also participate in the association of mobile network operators worldwide GSMA, as well as the Joint Audit Committee (JAC), an association of telecom operators working to further ESG implementation in the global ICT supply chain.

TDC has been a signatory of the UN Global Compact since 2009; providing annual Communications on Progress towards the 10 principles of the compact. In 2019, we also signed the UN Business Ambition for 1.5°C Pledge and are working towards fulfilling our commitments under this pledge.

Certifications and external recognition

We publish information related to our ESG activities in order to increase transparency and facilitate benchmarking by our owners, investors, suppliers and other interested parties.

We strive to align our operations with international standards when applicable. Currently, we have three ISO certifications across our business, covering environmental management, occupational health and safety, and IT security.

- In 2020, we were pleased to retain our ISO 14001 certification in Environmental Management. This ISO standard is an internationally recognised framework that helps organisations to improve their environmental performance through more efficient use of natural resources. The certification encompasses all TDC brands and is amongst the largest in Denmark, covering all our employees and locations.
- In spring 2020, we upgraded our OHSAS 18001 certification to meet the ISO 45001 standard. This certification covers TDC's largest locations where employees are permanently located.
- Our business-to-business brand NetDesign has been ISO 27001 certified in terms its IT security for several years.

Our activities and performance are rated by both GRESB and EcoVadis, and we seek to demonstrate year-on-year improvement.

- In 2020, we received a GRESB Infrastructure rating of 65, up 4 points from 2019.
- Our EcoVadis rating for the 2020 assessment was 65, up 3 points from 2019, which put us in the top 10% of respondents.

- Our ESG reporting is prepared in accordance with GRI Reporting Standards: Core Option and is the TDC Group, TDC NET and Nuuday Annual Reports are assured by an external third-party assessor.

Environment and climate

Our approach

The ICT industry is a key enabler of sustainable economic growth. By connecting individuals and communities across the globe, we facilitate the flows of knowledge and commerce that underpin our economies and livelihoods. The adoption of 5G, where lightning-fast and stable mobile internet connections will allow for the remote operation of all kinds of machines and processes in real time, will reveal even more potential. Connectivity and digital technology promise to facilitate the delivery of sustainable development for all according to the Digital with Purpose report from the ICT industry body GeSI. This report found that digital technologies can potentially deliver carbon emissions reductions equivalent of seven times the growth in the entire ICT sector's emissions footprint over the period to 2030.

However, this connectivity is not without an environmental cost. Telecom networks require electricity to operate, our equipment requires large-scale manufacturing and rare earth minerals, and our employees must transport themselves around Denmark to service customers. This impact is our responsibility and consequently, we actively engage with this agenda.

We take an inward-out approach to managing our impacts. First, we look at our operations and how we can reduce impacts across all environmental KPIs, including initiatives on energy consumption and intensity, carbon emissions, resource use, waste, and electronic waste (WEEE). Next, we consider how to reduce the impact of our products and

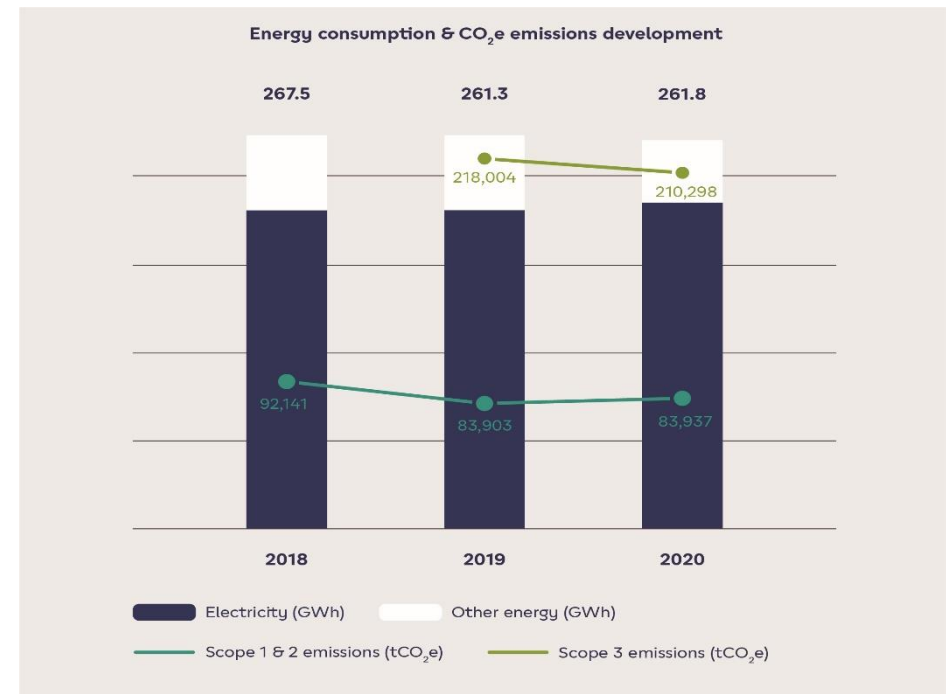

services and our employee activities on behalf of TDC, e.g. through remote collaboration. Finally, we seek to increase the knowledge of sustainable behaviours and research through involvement with international organisations and advocacy at national, regional and international fora.

We maintain a systematic framework of impact assessment, gap analyses, initiative planning, and active management, all guided by our materiality matrix and based on the ISO 14001 Environmental Management System framework. Our entire operation, spanning over 10,000 network sites and almost 7,500 employees, has been ISO 14001 certified since 2019.

We believe that taking this approach helps us to build a resilient, lean business that can create value for the environment, value for society, and value for our owners simultaneously.

Climate ambitions

Due to our position as one of the largest private companies in Denmark, with 100% of our operations in our domestic market and a significant consumption of electricity, we have a unique opportunity to play a role in supporting Denmark in achieving its national climate targets. To do this, we have set an ambitious climate target: to be 100% CO₂ neutral by 2028 for our direct emissions (scopes 1 & 2)¹ and to reduce our CO₂ emissions by 50% by 2023, measured against a 2020 baseline. These commitments drive all our activities to reduce our climate footprint.

We have also committed to set a Science-Based Target² in line with the protocols of the Science-Based Targets Initiative (SBTi) for our emissions, including Scope 3³, by September 2021. That will address reducing emissions in our operations and across our whole value chain.

¹ We report our emissions in line with the World Business Council for Sustainable Development GHG Protocol methodology, which classes emissions in three groups: Scopes 1, 2 and 3. Our Scope 1 emissions consist of the fuel in our vehicles, the oil in our backup generators and other energy sources we use in our operations. Our Scope 2 emissions refer to the emissions from the electricity we purchase to power our operations and the heat from district heating. We measure our emissions in tons of CO₂e.

² Science-Based Targets are greenhouse gas emission reduction targets that are clearly defined and in line with the latest climate science in order to meet the goals of the Paris Climate Agreement and its aim to limit global warming to 1.5°C. For more information, read here.

³ Our Scope 3 emissions refer to the emissions generated in our upstream and downstream value chain that result from our operations.

Environmental activities: 2020 and beyond

During 2020, three major programmes were put in place to achieve our climate ambitions.

1. Governance and activities

Firstly, we established the internal governance structures needed to drive success regarding our Scope 1, 2 and 3 emissions. Our CO2 Forum has developed a roadmap of initiatives that will deliver on our targets, using input from employees gathered through workshops and working groups, and with direction from our Sustainability Team. One of their first actions was to bring forward our scope 1 & 2 targets by 2 years.

The other key initiatives in 2020 included opening a tender for a renewable energy PPA (power purchase agreement) for our electricity consumption. This agreement will cover almost 100% of our Scope 2 emissions once implemented. We expect the agreement to be finalised in 2021 in time for execution in 2022.

We have chosen to pursue this strategy instead of buying certificates from existing renewable energy capacity, as we wish to take co-responsibility for supporting the green transition in Danish society. Our actions will fuel the development of new renewable energy resources to cover our electricity consumption without compromising other's access through competition for existing resources.

Four additional CAPEX investments were secured for rollout in 2021. Together, they are expected to reduce CO2e emissions from the network by 191 tons in 2021. The projects cover upgrades to our cooling and power systems at various important technical sites.

In 2020, we have continued several projects from previous years that have helped to reduce our energy consumption; including legacy decommissioning. One example is the shutdown of an older version of our XDD broadband platform, which will result in a 1.5 GWh annual energy saving in the network. Although rolling out 5G and fibre across Denmark counteracted this saving, these new networks raised our energy consumption, as expected. As a result, energy consumption remained flat in 2020 compared with 2019.

2. Scope 3 inventory

In 2020, we completed our first-ever complete inventory of our Scope 3 emissions. This work uncovered in detail our indirect upstream and downstream emissions and demonstrated the true climate impact of our operations. We can clearly see that the scale of our Scope 3 emissions are two and a half times greater than our direct operations. The biggest emitters are purchased goods and services, capital goods, and use of goods sold.

This inventory provides us with the critical baseline for setting our SBTi Scope 3 target and highlights the levers available to influence them. It will also inform our supplier engagement programme, which we will ramp up in 2021, supported by an increased organisational focus and resourcing. We have identified suppliers with the largest emissions and estimated the emissions of suppliers who are not fully transparent. We will therefore work within a supplier relationship management framework to identify the potential for reducing emissions, while also conveying the importance of emission data quality and disclosure to suppliers.

An example of how this insight can help us reduce our climate impact is employee commuting. We now have a baseline that can be used to see how different internal policy options can affect our total carbon footprint. For example, in June, we launched "Pioneering Digital Collaboration", an initiative that gives employees more freedom to work anywhere, anytime. We anticipate that employees will work more from home, even after the COVID-19 lockdowns are lifted. According to our modelling, that could a decrease of over 1,400 tons of CO2e.

3. Resource management & circularity

2020 was another very successful, if atypical, year, as we reduced the total waste volume produced from our operations by 13% compared with 2019. This sizable drop can be attributed to most employees working remotely for long periods of time. Nonetheless, we managed to maintain a high recycling rate of 61%.

From a network perspective, our 5G rollout has required upgrading 3,800 existing radio sites. Consequently, around 700 tons of existing installation material has been used for spare parts, recycled, or scrapped (e.g. approx. 40 tons of iron, 200 tons of batteries, and 400 tons of cables) this year. We have also identified approximately 85,000 devices that are now available to be sold for reuse by operators in other countries, harvested for spare parts, or recycled.

From a customer equipment perspective, we continued to work on reducing the lifecycle impact of our Customer Premise Equipment (CPE) by promoting circular processes through refurbishment and reuse. Between them, TDC Erhverv and

YouSee refurbished almost 157,000 units, up 51% compared with 2019. By doing so, they avoided 77 tons of e-waste. This work not only reduces our environmental impact by shortening supply chains and avoiding transport emissions, it also reduces the need to mine for and manufacture new devices.

Moving forward

The journey towards a 50% reduction of our Scope 1 and 2 CO2e emissions by 2023¹ is well underway. We are paying specific attention to the increased energy consumption that will result from the 5G and fibre rollouts, and mitigation efforts are included in our planning.

For 2021, and as a part of our commitment to the UN Business Ambition for 1.5°C pledge, we will set our Scope 3 emission reduction target and submit our targets for scopes 1, 2 & 3 to the SBTi for approval. We will also work to detail our Scope 3 lever catalogue and utilise supplier engagement to further this process.

Of the direct actions to reduce energy consumption in 2021, some were already approved for implementation in 2020. This includes entering a PPA for all our Scope 2 electricity consumption, the four capital investments at our technical sites detailed above, and employee engagement with a focus on commuting and waste. Rolling these out will be key operational activities in 2021.

In order to increase transparency and continue to improve our reporting, we will report to CDP and in line with TCFD reporting requirements. We will also have our energy and emissions data assured by an external third party for the first time.

¹ Compared with a 2020 baseline.

Digital Denmark

As the leading telecommunications provider in Denmark, we are committed to realising 'Digital Denmark' through countrywide connectivity and by promoting digital citizenship for all.

Our approach

We work as one company and in partnership with dedicated and knowledgeable representatives of civil society to promote digital citizenship and ensure that everyone can benefit from the new, rapidly evolving opportunities digitalisation brings. TDC has always played a special role in facilitating communication and ensuring connections between people.

TDC wants to enable Denmark to move forward as a digital nation while taking co-responsibility for the society that fostered us by ensuring and protecting equal digital opportunities even though the technological landscape is rapidly changing.

Our investments in 5G, fibre, and our network are investments in the digital future of Denmark. In 2020, our investments amounted to DKK 5,547m.

Digital citizenship and skills

As the country's leading supplier of digital connections, we take co-responsibility for ensuring that individuals and members of society have the skills required for a digital age. This relates to technical, creative and social skills that are crucial for developing as individuals and treating others with respect in a digital universe.

We insist that digitalisation is for everyone and we recognise that some need a little more help to discover the benefits of digital solutions.

TDC is also a founding member of the "Digital Dogme" initiative for upgrading employees' digital skills and sharing knowledge among companies across industries and sectors. In 2020, TDC led a Digital Dogme working group that discusses different knowledge levels within cyber security and works to increase the focus on this topic.

Supporting 'Parents in a Digital World'

Faster than ever, technological devices, digital games and social media are creating new opportunities and disrupting the way we live our lives and interact with each other. And even though we have been engaging with social digital tools for several decades, we still have much to learn about how to handle all the new opportunities offered by digitalisation.

Particularly, when it comes to our children. Many parents find themselves on uncertain ground when setting guidelines for their children's use of digital and social media. With our partner for more than 30 years, Børns Vilkår, we have run several campaigns, including the most recent campaign on so-called 'Sharenting', when parents share images of their children on social media without consent. We did this to start a debate and raise awareness. The campaign exceeded our expectations by reaching more than 200,000 people.

Preserving history

'ENIGMA', the national Post, Tele and Communication Museum, is an important source of knowledge on the communications technologies that have shaped our society in the past. In many ways, the story of TDC echoes the story of Denmark's digital development. Consequently, since 1996, we have supported the daily operations of the museum.

In 2020, we announced that, TDC Group will play an important part in the planned historic re-opening of the museum, which features exhibits related to digitalisation.

How we do business

Our approach

As one of the largest employers in Denmark, owning and operating critical national infrastructure, we are aware of our duty to Danish society to operate in a conscientious and transparent manner. It is critical that our partners, employees and customers trust us and feel secure when using our products and services.

We are committed to taking a proactive approach. We comply with the relevant laws and regulations; however, we aspire to higher standards and seek to continuously improve our policies and practices through external benchmarking assessments, certifications, and other external validation sources. For example, in 2020 we adopted a wide-ranging Data Ethics Policy, which is available on our website. This policy goes beyond the legal requirements, and through its eight points, seeks to set a standard for data handling that customers can rely on.

In addition, and to demonstrate our commitment to transparency, we have also published our Tax Principles on our website. As a leader in our industry, we are proud to contribute to the Danish economy, both directly and indirectly.

To ensure that we address stakeholder concerns, we also actively engage with all our stakeholders to identify material issues and strategic priorities, and we are committed to the highest standards of ethical behaviour.

UN Global Compact

TDC Group has been a signatory to the UN Global Compact since 2009. Ever since, the ten principles of the Global Compact have underpinned our commitment to human rights, labour conditions, respect for the environment, health and safety, data protection and security, and ethical business practices. We publish an annual progress report.

Supporting the principles of the Global Compact, we have devised a suite of policies and procedures that our employees are required to either be aware of or attend training in. These are all available on our website in both Danish and English and include our Whistleblower Policy, our Anti-corruption and Gift Policy and our Data Privacy Policy. Our Partner Code of Conduct is also displayed on our website and addresses the compact principles specifically from the perspective of suppliers and business partners, our Sustainability Policy, and ESG accounting principles.

Sustainable procurement

TDC's business activities affect many stakeholders, including employees, customers, suppliers, subcontractors, partners, and owners and investors. All our stakeholders should be confident that the ways we do business comply not only with legal requirements, but also with the highest professional and ethical standards.

The main risks we focus on in our supply chain are the environmental impact of the products we buy, human and labour rights, particularly in our

network rollout activities, and health and safety along the whole value chain.

Our first tool for mitigating these risks is our membership of the UN Global Compact, which we have been a signatory since 2009. We take our commitment to the ten principles seriously and through our Partner Code of Conduct, we translate these principles and their underlying conventions into policies for our employees, partners, and suppliers.

In 2020, several activities brought our Partner Code of Conduct into clearer focus, as we worked to reduce risks in our operations and value chain. Firstly, to mirror the increased activity in our network rollout, we systematically addressed the safety performance of our key civil works suppliers by establishing safety reporting systems. From an organisational point of view, we also upgraded our OH&S certification from OHSAS 18001 to ISO 45001 one year ahead of schedule.

In terms of environmental impact, a number of activities started, or existing activities continued in 2020. One major advance this year was the establishment of our scope 3 inventory, which puts us on track to set a Science-Based Target for these emissions in 2021. This work is laying the foundation for uncovering our most impactful scope 3 categories and the levers available to influence them. It will also inform our supplier engagement programme, which we will roll out in 2021.

Work on reducing the lifecycle impact of our Customer Premise Equipment (CPE) continues by promoting circular processes through refurbishment and reuse. The process is initiated when a customer returns a TV box or modem, which is then redeployed or refurbishing for reuse by other customers. In 2020, TDC Erhverv and YouSee refurbished almost 157,000 units, thereby avoiding 77 tons of e-waste. By shortening supply chains and removing the need to manufacture new devices, reuse reduces the environmental impact of our products.

TDC is proud to share that in 2020, we were awarded silver-level recognition by EcoVadis, which ranked our ESG performance among the top 10% of evaluated suppliers. Our performance improved by 3 points compared with 2019.

In 2021, we will increase our focus in this area by implementing a sustainable procurement programme based on a strategic approach to addressing our material risk issues in a systematic and holistic manner. This will replace our Vendor Sustainability Forum. We expect to achieve this in partnership with our telecommunications peers, industry initiatives and through the use of EcoVadis as a screening and engagement tool for our suppliers. We also intend to build on all the work completed in 2020 with the scope 3 inventory, as the various initiatives are already in place, by setting KPIs and targets as well as establishing internal sustainable procurement reporting.

Health and safety

Our approach

Ensuring good labour practices that promote wellbeing and physical safety has high priority and is key to securing that all TDC employees can fulfil their potential regardless of their fields of expertise.

Structure and governance

The Health & Safety organisation is structured in line with the Danish Working Environment Act and TDC is H&S certified (ISO 45001) based on an H&S management system that defines strategy, risks and procedures.

Our health and safety collaboration is handled by the Joint Health and Safety Committee. This Committee consists of four employee representatives from the Health & Safety organisation and three representatives from the trade unions in addition to a representative from TDC Group management and the Head of Health & Safety.

Furthermore, across all brands and companies under TDC Group, health and safety is anchored in 93 Health & Safety groups. Specifically, for TDC Group there are seven health and safety groups.

Health & Safety risks

In line with the overall risks reported via the enterprise risk management board, the main health & safety risk in 2020 for employees across TDC Group, Nuuday and TDC NET was COVID-19. Specifically, for technicians in TDC NET work in relation to the fibre rollout, other projects, and maintenance tasks (tripping/falling, traffic).

In line with the Danish Government, TDC has designed a risk level model to guide mitigation actions. The highest risk level pertains to the widespread infection rate in society, and when recommended, TDC sends staff home to work, closes canteens and organises all meetings online. For technicians, the model also regulates how close staff come to clients, e.g. when we're at risk level 5, no employee is to enter a client's home. The risk of working in the Fiber Factory project is mitigated by both an active Health & Safety organisation in TDC NET Onsite and a Health & Safety Concept in the Fiber Factory itself.

2020 Performance

The Health & Safety strategy was approved by TDC's Board of Directors in 2020. With a focus on developing a preventive H&S culture, it is designed to mitigate and reduce the negative effects of the physical and psychological work environment.

We have converted our OHSAS 18001 certification into ISO 45001 certification – the world's international standard for occupational health and safety designed to protect employees from work-related accidents and diseases.

We have also implemented a health & safety data collection with our top 30 subcontractors with a specific focus on fibre rollout and 5G.

Furthermore, we have conducted basic health and safety training for all staff as well as e-learning. This gives employees insight into safe labour

practices and provides the health and safety team with insights into and knowledge of employees' awareness levels.

Finally, we have developed a TDC Bradley model to conduct a baseline Bradley survey to measure the maturity of our health and safety culture. We can then learn from the results and launch new relevant initiatives and activities based on the findings.

The Bradley score for TDC Group is 76/100.

The score reflects that the Health & Safety culture is mature and based on a high level of awareness and personal responsibility among the employees and managers. To further strengthen the Health & Safety culture, managers and teams develop and implement individual action plans throughout the organization.

2020 data

Fatalities	0
With lost time	45
Without lost time	65
Total	110
Days of absence	467
Injury incidence (lost time injuries per 10,000 employees)	60
Rate of fatalities (per 1,000,000 hours)	0
Rate of high consequence work related injuries (per 1,000,000 hours)	3.7
Rate of work-related injuries (per 1,000,000 hours)	8.9
Rate of near-miss accidents (per 1,000,000 hours)	7.8

Targets

The 2020–2025 Health & Safety strategy, which covers TDC Group, TDC NET and Nuuday, has as an overall target to reduce the negative health and safety consequences by 50% in 2025 regarding injuries, wellbeing and attrition.

2021 outlook

The major project activities will focus on:

- Continuing to develop our culture
- Continuing dialogue with subcontractors, including collecting health and safety data from a revised list of our top 30 subcontractors, and TDC Management site visits
- Improving overall employee wellbeing
- Continuing focus on the COVID-19 situation
- Reporting and reducing near-miss accidents

Digital trust: GDPR and data ethics

GDPR: We keep your data close at heart

We take responsibility for protecting customers' and employees' personal data very seriously.

We aim to meet all GDPR requirements and provisions. Through both organisational and technical measures, we ensure that we process personal data safely, securely, and in compliance with all relevant legislation.

While the responsibility to achieve and maintain GDPR compliance stretches across the entirety of TDC, an appointed Group Data Protection Officer (DPO) drives this specific agenda from a central point of view, supported by the DPO Office. Data Privacy Managers (DPMs) in each business line are responsible for day-to-day processes and GDPR compliance.

The DPO liaises with the supervisory authorities and reports both to the Board of Directors via the Audit Committee, and to the Executive Management Team.

All employees must complete e-learning training in GDPR and personal data compliance and pass a test every 18 months; this is also a mandatory component of the onboarding process for all new employees.

For employees who handle personal data every day, supplementary educational and awareness initiatives are implemented.

2020 GDPR performance

Within the last year, 95% of all employees across TDC Group, Nuuday and TDC NET have completed our comprehensive GDPR e-learning course.

In addition, the DPO Office has conducted awareness campaigns focusing on how to work safely from home and on rules of conduct when processing personal data.

We continue to assess processes to maintain our focus on decreasing the number of personal data breaches. Despite our focused efforts and high level of awareness, however, we do unfortunately experience data breaches.

This can happen due to cyber-criminal attacks or errors. However, we continuously strengthen our systems and processes, and prioritise focusing clearly on GDPR.

Our approach to data ethics

In 2019, TDC's first-ever Data Ethics Policy outlining our data ethics principles was approved by our Board of Directors. The policy is available on our website.

In 2020, we conducted a series of interviews with managers and employees in parts of the organisation that work specifically with this field and handle personal data and tasks involving aspects of data ethics.

It is our assessment that, across the organisation, personal data is handled responsibly and in accordance with our Data Ethics Policy.

Similarly, the series of internal interviews have led us to conclude that a high degree of awareness of GDPR compliance is also conducive to maintaining a good data ethics culture in the organisation.

Even though the use of artificial intelligence (AI) is regulated by GDPR. AI is also an area where we must pay attention to data ethics, due to the pace of technological development and the large volumes of data that we hold as a company. Our conclusion is that awareness of ethical data-related behaviour is strong among management and employees in the departments working with AI to ensure that AI improves services for our customers, as stated in our policy.

2021 data ethics outlook

We will set up initiatives to raise awareness of data ethics, especially for employees working extensively with data, to ensure compliance with our principles and to support our data-ethical culture.

We will also focus on designing processes and structures that ensure our Data Ethics Policy is firmly anchored. Particularly when it comes to ensuring that all new business initiatives with significant implications for privacy and handling of personal data must be approved by the corporate management team but also processes that support a positive error culture, where openness about errors and problems leads to improvement.

Security

Our approach

Security remains a top priority, and we base our work on four principles:

1. Protect our company
2. Protect our customers
3. Protect our employees
4. Protect citizens.

We take overall responsibility for IT security, information security and physical security by applying a wide-ranging Group Security Policy based on best practices and compliance with the ISO27001 standard for handling IT security.

2020 performance

At TDC Group, we are continuously conducting awareness activities to raise the level of knowledge concerning the present threat landscape and educate employees and customers on how to react to cybercrime attacks.

We want security to be part of our employees' everyday mindset. In 2020, we launched a new security awareness campaign and mindset for security training.

Instead of annual online security training for all employees, we implemented a new online training platform where employees receive an invitation to a short training/awareness session every second to third week featuring different security themes and surveys.

Each activity has a maximum duration of 2 minutes to minimise the impact on the employees' normal work.

We now have a good overview of the employees' knowledge and engagement and will continue to make more targeted activities for special groups of the organisation.

The list of topics focuses on the theme "social engineering", and the security mindset we want our employees to adopt is known as STAR behaviour:

- **S**top
- **T**hink
- **A**sk
- **R**eport

Parallel with the online training, we are present on all the internal platforms, explaining security measures taken and guiding employees to secure behaviour with tips and tricks. Again, in the strong belief that security awareness should be part of all employees' everyday work.

Furthermore, during the COVID-19 situation, working securely from home it has been an ongoing task to ensure that all employees have the right tools and mindset to continue business as usual in a secure way.

Similarly, Group Security ensures that transforming TDC and building TDC NET and Nuuday continue without compromising security.

2021 outlook

In 2021, we will continue to raise security awareness and begin transforming online activities to on-premises activities to become a closer aspect of employees' everyday work.

Finally, we will strengthen our security competencies in TDC NET and Nuuday to secure the transformation as we continue our journey towards becoming best in class.

Diversity and inclusion

Our approach

At TDC Group, we serve all areas of Danish society across age, gender, ethnic background, religion, ability, and sexual orientation. We want our employees to reflect the society in which we operate. We believe diversity will support us in creating a better working environment and better results.

We are proud that among our 7,484 employees we have 48 different nationalities, a wide age profile from 16 to 76 years of age, and numerous different backgrounds.

Nonetheless, despite having worked with diversity and inclusion (D&I) for many years, we are taking further steps to stimulate D&I, because we know that a diverse and inclusive culture fosters a more creative and innovative work environment.

Today, 28% of all employees at TDC are women, while 20% of all managers are women, so we understand that we have an important journey ahead. That has prompted us to set an ambitious goal to achieve 50/50 gender balance in management. With this ambition, we want to strengthen our business and send the message both internally and externally that TDC is a workplace with equal opportunities for anyone with the right skills and mindset to become a leader.

DKTH has set a target to have one representative of the underrepresented gender on the Board of Directors by 2023. Currently, status is that all 6 members of the Board of Directors are men.

2020 performance

We have taken new steps to pursue our ambition for gender balance in leadership. By using data insights more extensively, we have been able to identify areas with the biggest potential for improvement. One area is our ability to attract more diverse talent, and we have therefore implemented the AI-based software tool Develop Diverse, which helps us create inclusive and gender-neutral job ads to attract a wider and more diverse pool of candidates for vacant positions.

In 2020, we introduced a new D&I programme for the entire top leadership team. Through the programme, top leaders are trained in unconscious biases and inclusive leadership to enable them to take ownership of D&I initiatives in their own branches of the business. Our leaders should embody our values of inclusion as good role models for the organisation.

A digital Denmark built by all, for all

Great potential exists in engaging more girls and women in shaping the digital Denmark of tomorrow. We therefore remain committed to supporting and encouraging young girls and women to pursue IT career paths.

Therefore, we collaborate with a wide range of educational institutions to inspire more girls and women to become interested in the career opportunities presented by IT and future technologies. We host Girls' Day in Science in collaboration with Naturvidenskabernes Hus and hold Tech Career

Days in collaboration with the IT University of Copenhagen. In 2020, we extended our partnership with Women in Tech Denmark to include an internal network across TDC Group, Nuuday and TDC NET for women working in IT. We also collaborate with ReDI School, which is a non-profit tech school offering IT courses to women with migrant and refugee backgrounds.

A culture of inclusion and equality

We believe differences enhance teamwork. That is why we promote a diverse workplace where we feel we can contribute and be our true selves.

In 2020, we continued our work to include and strengthen wellbeing for minority groups, including people with mental or physical disabilities, refugees, and people identifying as LGBT+. TDC was once again a main sponsor for Copenhagen Pride and during Pride Week, also hosted educational talks for all employees on LGBT+ inclusion and wellbeing at work. We remain a partner in the Ministry of Equality's industry focus group, which aims to create broad industry collaborations to support the inclusion and wellbeing of members of the LGBT+ community.

TDC Group has always offered its employees the opportunity to organise their work life to suit individual needs, reduced work capacity, busy family lives etc. and will continue to do so. In accordance with this cornerstone aim, TDC hopes to encourage new fathers and non-birth mothers to take up to 14 weeks of paid partner leave. Our culture today is highly supportive of partner leave, and we

are proud that more than 81% of fathers and non-birth mothers at TDC Group took leave in 2020.

2021 outlook

In 2021, we aim to integrate a new D&I governance model to ensure that our goal for achieving gender balance in leadership is driven and monitored just as rigorously as any other strategic or financial target. Each business leader will be provided with ambitious yet realistic annual gender balance targets.

Besides a new governance structure, another focus in 2021 will be to foster a culture of inclusion and respect. Therefore, we will analyse our current culture as well as our focus on leader training in inclusive leadership and bias awareness – from our Board of Directors to our team leaders. Bias-mitigating talent acquisition processes and talent management practices will also be a key focus in 2021 to drive continuous improvements in talent diversity at all levels.

Risk management

Risk management

DKTH Group faces both internal and external risks on which we focus in the short, medium and long term, as described in the following pages. These are accompanied by risks TDC Group has identified that could influence long-term growth if TDC Group were to become a low-margin service provider and potentially lost its corporate footprint and network utilisation. However, TDC Group implements strategic initiatives to mitigate these risks.

Risk management is an integrated, structured, and dynamic aspect of TDC Group's business operations and planning and is based on a hybrid of internationally recognised standards such as ISO, COSO, and NIST.

Risk assessments are conducted monthly with business lines and corporate functions identifying and updating all significant risks within the TDC Group risk universe. Risks are then consolidated and assessed based on their type, potential impact and probability, and the conclusions are then reported to the Risk Committee monthly, to the Corporate Management Team quarterly, the Audit Committee biannually, and the Board of Directors on an annual basis. Responsibilities are assigned for significant risks, which are monitored and evaluated monthly and compared with defined risk appetite levels. Mitigating initiatives are also established, tracked, and evaluated.

By their very nature, forward-looking statements involve certain risks and uncertainties. Risks not currently known to TDC Group, or emerging risks that TDC Group currently deems to be immaterial, may also adversely affect TDC Group's business, financial condition, and results of operations. The most essential risks and uncertainties that could be impacted by TDC Group's operations are stated but might not be limited to those listed below.

TDC Group's Risk Management Process Cycle

Commercial factors

Description

As the telecommunications industry is still undergoing a huge transformation, the risk landscape remains subject to fierce competition from market developments and price pressure, with digitisation, changes in customer behaviour, and new technologies among the major drivers prompting a transition to new business models and structural changes.

Given TDC's leading market position, we continuously observe events or circumstances that could result in a loss of customers, declining customer experiences and loyalty, loss of competitiveness and/or competitive leadership in the markets where we operate, as well as events or circumstances that could potentially improve or compromise TDC's commercial developments, changes to service offerings, product portfolios, and market performances in general.

The TV market is changing rapidly towards both more flexible viewing solutions and strong new players with larger market shares accelerating the trend of customers moving from traditional flow TV to other solutions. Meanwhile, content owners are changing their business models, selling directly to end customers and increasingly taking over the role of aggregating content. This leads to increased pressure on premium content rights that could potentially raise prices to levels that cannot be passed to consumers and/or lead to loss of content rights.

In the mobile market, the competitive landscape is accelerating with renewed intense price competition and new entrants. In landline broadband, the market development for both retail and wholesale customers is trending towards migration to faster networks.

Furthermore, competition is increasing in the B2B market and new entrants with convergent products may increase competition and challenge our ability to remain attractive and competitive. Technology developments could also increase churn if swift adaptation to new technologies is not ensured.

Potential impact

Intensified competition and net loss of customers could lead to reduced ARPU¹ and pressure on margins and profits.

On TV, RGU² net losses could be experienced due to the discontinuation of the Discovery contract, however financial performance exceeded the expectations due to higher ARPU. In addition, accelerating pressure from OTT suppliers, content owners, content prices, and customers terminating TV subscriptions could exert pressure on ARPU levels and net adds.

Increased competition with continued price pressure, including new competitors, could result in failure to execute sustainable pricing in the B2C and B2B mobile markets.

Finally, inability to remain on par with technology developments and service offerings could lead to higher churn.

Mitigation initiatives

- Monitoring commercial developments, market and customer behaviour, changing service offerings, product portfolios, and market performances in general
- Focusing on market positioning and ensuring the best mobile network in Denmark to retain and attract customers
- Securing the appropriate positioning towards device manufacturers and other operators
- Differentiating on the B2B market
- Launching new business initiatives to regain and strengthen TDC's market position as the leading provider of digital solutions and entertainment

¹ **ARPU** refers to Average Revenue Per User and is calculated per month. TDC Group calculates ARPU for a given product group as its total revenue divided by the average RGUs in the period. ARPU includes gross traffic revenue unless otherwise stated

² **RGU or Revenue Generating Unit** refers to the total number of customer relationships generating revenue for TDC Group. TDC Group's RGU statement includes the number of main products sold by TDC Group's residential, business and wholesale segments. Customer relationships are synonymous with RGUs.

Network quality and security factors

Description

High-quality and secure services and networks are fundamental to TDC and our product portfolios, and crucial to our customers and the Danish society. They are therefore pivotal for our continued commercial success.

At global level, various threats and events potentially undermining the effectiveness of operations or development of IT and/or technology, as well as threats and events that could potentially compromise the processing, confidentiality, integrity, availability, stability, capacity, performance, continuity or resilience of information technology are becoming more frequent and sophisticated.

Multiple threats could potentially trigger the materialisation of operational, IT, and cyber risks, typically stemming from human errors (e.g. information leakages), malicious activity (e.g. malware), natural phenomena (e.g. floods), or system failures (e.g. hardware failures).

However, other parameters such as complex IT landscape and legacy technology being unable to match the speed and functionality of newer IT software and hardware held by competitors also affect our business.

As such, many factors can influence the outcome of our ambitious strategies, including the rollout of fibre and 5G technology. Uncertainty regarding the speed at which other competitors are rolling out fibre and 5G, uncertainty regarding the future level of unit costs associated with fibre rollout,

and uncertainty regarding publicity if vendors fail to meet re-establishing requirements are just a few of these factors. In addition, uncertainties regarding new technology, legacy technology and technology debt, security by design and by default, as well as the robustness of vendors, outsourcing and vendor setup, scalability, suite vs. breed, inadequate design, or process and service life-cycle management may all impact network quality, security, and operations, or hamper innovation and development.

Potential impact

Any loss of confidentiality, integrity, or availability of information, data, technology assets or damage to our infrastructure or services could impact our operations, customers, society, and/or reputation. More specifically, cyberattacks could potentially expose critical data and affect business operations and activities impacting customer experience, perceived quality, and brand reputation, which could increase customer churn and overall profitability.

As such, any event resulting in TDC being unable to meet its customers' quality and security requirements or expectations could potentially impact customer retention or otherwise affect our opportunities to ensure growth and remain ahead of our competitors. Therefore, if security and contingency measures fail to prevent or overcome a major incident, TDC might incur e.g. regulatory sanctions, contract penalties, significant financial losses, damage to its reputation and loss of

customers, general attraction value, and market share.

Resistance towards 5G could potentially result in vandalism, destroyed or damaged equipment or even threats towards employees, which could lead to financial losses, increased costs, downtime or even employee disengagement or staff injuries.

However, initiatives and strategic programmes on e.g. technology debt and infrastructure rollout proceeded according to expectations and plan, maintaining overall network quality and determining our leading competitive position. Some, like the 5G rollout, were even achieved successfully ahead of schedule, leading to TDC being the first telecom provider in Scandinavia to offer 5G and cover 90% of the population of Denmark within one year. Such initiatives are certainly providing our customers and Danish society with new opportunities and strengthening the capacity of our award-winning network on the brink of a new digitalisation age.

Mitigation initiatives

- Continuous investment in network infrastructure, security, and optimisation of processes and structures
- Group-wide crisis management organisation
- Successful rollout of tech and infrastructure programmes, including fibre and 5G
- Monitoring customer satisfaction and expectation fulfilment
- Close dialogue with Danish Authorities and our customers
- Vendor quality control
- Focusing on network resilience through risk management and incident management

Political, legal and financial factors

Description

TDC's business may be impacted by several political, economic or legal/regulatory factors. For example, our business may be impacted to some extent by market regulation requiring TDC to provide certain services on regulated terms and at regulated prices. In addition, TDC may be impacted by regulatory changes or new regulation or legislation that, in turn, may lead to e.g. increased compliance requirements or reduced sector profit, reducing the incentive to invest. Other factors related to network integrity, data security, and customer privacy are also to be considered highly relevant in this context, as TDC has a responsibility to protect data from misuse, loss, unauthorised disclosure and damage. However, the digitisation age is leading to new and faster ways of working and connecting, which are resulting in more complex and data-driven business models continuously challenging the ability to retain control over how data is collected and used.

Other macro factors could relate to financial risks such as higher interest levels leading to higher financing costs when refinancing, or fraudulent events leading to financial loss. Macro factors could also be related to public sentiment regarding TDC or our suppliers potentially weakening our ability to engage with political and regulatory stakeholders. Finally, additional macro factors could also relate to external events or circumstances that could compromise or improve TDC's standing or credibility, potentially impacting consumers and/or revenue streams.

Potential impact

Changes in regulation or government policies could affect our business activities, as could decisions by regulatory authorities or courts, including granting, amending or revoking telecom licences and spectrum permits, which could ultimately affect TDC's possibility of carrying out its business and/or operations. Review of market regulations, e.g. on broadband markets, and revising the LRAIC¹ model to set new pricing parameters from 2021, may impact future revenue generation.

Furthermore, a new law on supplier security in critical telecommunications infrastructure might lead to replacing/swapping network equipment earlier than planned, leading to increased short-term cost levels and increased planning complexity. Individual cases of operational and external issues could also constitute short-term detractions from TDC's public image by affecting its overall reputation and brand image. For instance, negative publicity due to the TV market situation resulted in medium-term detractions resulting in lost customers and other direct business impacts.

Finally, risks related to network integrity, data security, and customer privacy could also lead to unfavourable perceptions of TDC's ability to handle these matters, which could impact our business. Non-compliance with national and EU legislation could result in significant financial penalties.

Mitigation initiatives

- Monitoring political and legal developments in the markets where TDC operates
- Proactive and continuous close dialogue with politicians, regulatory and market stakeholders, such as the Danish Business Authority
- Storytelling and clear communication about TDC's strategy and initiatives through campaigns, marketing, and social media focusing on our contributions to Danish society
- Implementing the EU General Data Protection Regulation (GDPR) and training all TDC employees in security and privacy awareness

¹ **LRAIC (Long Run Average Incremental Cost)** refers to the most applied pricing regulation methods used to set interconnection prices for operators with Significant Market Power (SMP). LRAIC uses an average of the costs of services. The interconnection prices are set equal to the costs associated with producing the regulated services in a modern and fully effective telecommunications network of the same size as the SMP operator's network.

Transition and transformation factors

Description

The ongoing transition of TDC Group into two stand-alone companies, namely Nuuday and TDC NET, could turn out to be more wide-ranging than expected when separating IT systems and establishing new processes, and may also demand more resources and investments than previously anticipated.

Furthermore, failure to execute an optimised separation due to difficulties in attracting, engaging, and retaining qualified employees, especially IT specialists, cannot be ruled out.

Taking part in the digital transformation is essential to engage customers, increase productivity, and ensure high-quality products in the future landscape. Therefore, events or circumstances that could potentially improve, compromise or undermine the effectiveness of TDC's execution of transformation, including objectives, initiatives, processes, capacity, capabilities, and deliverables, are being monitored closely.

Potential impact

Investment envelope issues, concerning the potential lack of the required investments to deliver initiatives, as well as top-line impact, i.e. negative impact on revenue from key cost initiatives, and challenges regarding building capabilities and ensuring synergies to avoid missing capabilities after the separation, could also have a major impact on TDC's ability to execute on transition and transformation initiatives.

The fact that many employees are being allocated to execute the transition could also move our focus away from optimising the core business, leading to a lower degree of efficiency. This calls for initiatives being taken to avoid the risk of voluntary churn of key personnel, which in turn could impact capacity, quality, and/or time constraints, ultimately leading to the lack of execution power to deliver on strategic initiatives. In 2020, our focus on attracting and developing digital talent was therefore maintained, and Group IT remains dedicated to handling the IT-related processes in TDC's separation phases.

Finally, failure to achieve the digital transformation could also lead to lower productivity and efficiency compared with competitors and OTT¹ products.

Mitigation initiatives

- Clear focus and engagement from top management and an IT foundation that enables the IT of the future
- Focusing on ensuring the appropriate and efficient investment levels within guided bounds
- Focusing on investing in and attracting the right talents for the digital transformation
- Initiatives to strengthen cooperation and collaboration with educational institutions

¹ **OTT or Over The Top** refers to online delivery of video and audio without the internet service provider being involved in the control or distribution of the content itself.

ESG risks

Risk

Management Approach

Governance

Human Rights

TDC Group's risks relating to human rights concern our employees, our customers, and the employees of partners and companies in our supply chain.

These include the risk of forced labour, discrimination or harassment and the misuse or loss of personal data through human error, data breaches, or other nefarious means.

As a signatory to the UN Global Compact since 2009, we take our commitment to acting responsibly, in line with the principles, very seriously. The inalienable right of all people to live free of discrimination and degrading treatment, and to have the right to freedom of association, collective bargaining and (data) privacy, is strongly supported at TDC. We do not tolerate the use of forced or child labour, discrimination, abuse, or harassment. We have in place an array of policies and procedures that support our efforts in this area. These are underpinned by activities including training, awareness raising, auditing, reporting and external certification, and include our:

- Partner Code of Conduct, covering respect for human rights. For more information, read the section 'Sustainable procurement'
- Vendor management audits and monitoring of strategic suppliers. Despite COVID-19, in 2020, six subcontractors of one closely monitored strategic partner underwent external third-party audits
- Group Personnel Policy. In 2020, the percentage of our employees covered by collective bargaining agreements increased to 88% from 84%. More information on our activities regarding employee wellbeing, health and safety and HR is provided in the sections 'Occupational Health & Safety' and 'Diversity & Inclusion'
- Occupational Health and Safety Policy and certification to ISO 45001 standard. In 2020, we upgraded our OHSAS 18001 Occupational Health & Safety certification to the ISO 45001 certificate one year ahead of schedule. For more information read the section 'Occupational Health & Safety'
- Data Ethics Policy. For more information, read the section 'Digital trust: GDPR and data ethics'
- Group Security Policies aligned with the ISO 27001 standard for data handling and IT security. Our B2B brand NetDesign is certified according to the standard. In 2020, 68% of our employees completed security training and 97% completed an e-learning course on GDPR and data privacy

As a result of the encompassing nature and utmost importance of respecting human rights and all that is entailed, the following three governance structures are maintained by TDC: the OH&S Committee of the Board of Directors, the Audit Committee of the Board of Directors, and the Executive Management.

Each of these committees has a system for monitoring and reporting on performance management and risk mitigation.

Anti-corruption and bribery

TDC Group is one of the largest private employers in Denmark with suppliers from around the globe.

The risk is always present that bribery or corrupt practices could influence business decisions.

Although as a country, Denmark is characterised by low levels of corruption, we continue to be vigilant regarding this agenda. We strongly support free and fair competition on open and transparent terms and do not accept business deals being entered into on a dubious or illegal basis, not when supplying goods or services to others, nor when goods or services are supplied to us. We have a zero-tolerance approach to corruption in any form, and do not accept that we as a company nor our employees offer or accept any kind of bribery. Our activities revolve around policy development, awareness raising and putting in place resources and employee training and include our:

- Whistleblower Policy, which allows for the anonymous reporting of suspected wrongdoings at the company directly to the Audit Committee of the Board of Directors. The policy is reviewed and updated on an annual basis. This process is accompanied by a cross-company communications drive to raise awareness. Over the past 12 months, building incident reporting has been in focus. One report was submitted to the whistleblower system in 2020
- Gifts and Anti-Corruption Policy, through which TDC commits to comply with the United Nations Convention against Corruption, adopted in Merida. The policy is reviewed and revised on an annual basis
- Partner Code of Conduct for suppliers, partner organisations and employees
- Sustainability Policy

Governance for anti-corruption and bribery is the responsibility of the Audit Committee of the Board of Directors and the Executive Management.

ESG risks

Risk

Environment and climate

As the owner of critical digital infrastructure in Denmark, we make huge investments in our network to maintain our network service and to roll out new technologies every year. We are currently in the midst of a massive deployment of fibre and 5G.

This activity, our operations and our supply chain are related to several potential environment and climate risks. These include issues linked to the physical impacts of climate change. For example, changes to average seasonal temperatures and extremes may reduce our ability to rely on free air cooling at larger technical sites.

Management Approach

As a signatory to the UN Business Ambition for 1.5°C Pledge, we are committed to averting catastrophic climate change. Our commitment to the UN Global Compact principles also anchors our work on environmental issues, highlighting a precautionary approach as we undertake initiatives to promote environmental responsibility and encourage the development and rollout of environmentally friendly technologies. These commitments and activities are captured in a number of policies and certifications, including our:

- Sustainability Policy
- ISO 14001 certification, which covers all 10,000 of our addresses and 7,484 employees
- CO2 Forum governance body and working group's efforts to deliver our CO2 neutral target
- Detailed emissions reporting: In 2020, we undertook a complete Scope 3 inventory for the first time
- Scope 1, 2, and 3 targets, which will be submitted to the SBTi initiative in 2021
- Circular economy activities in operations
- Climate-related assessments and mitigation activities within our network and facilities
- Energy-efficiency initiatives and investments
- Supplier engagement
- Sustainability by Design in our Products: Focused on energy consumption and efficiency, single-use plastics, lightweight materials, and use of recycled materials

Governance

Governance for TDC's climate and environment activities is the responsibility of the CO₂ Forum and the Executive Management.

Section 1

Basis of preparation

This section sets out the basis of preparation, which relates to the financial statements as a whole. Where an accounting policy is specific to one note, the policy is described in the note to which it relates. Similarly, critical sources of estimation uncertainty are described in the notes to which they relate.

In this section

1.1. Accounting policies	35
1.2. Critical accounting estimates and judgements	35

1.1 | Accounting policies

DKTH Group's consolidated financial statements for 2020 have been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union (EU) and further disclosure requirements in the Danish Financial Statements Act.

The consolidated financial statements are based on the historical cost convention, except that the following assets and liabilities are measured at fair value: derivatives, financial instruments held for sale, and financial instruments held to collect and sell.

When preparing the consolidated financial statements, Management makes assumptions that affect the reported amount of assets and liabilities at the balance sheet date, and the reported income and expenses for the accounting period. The accounting estimates and judgements considered critical to the preparation of the consolidated financial statements are shown in note 1.2 below.

The accounting policies are unchanged compared with the policies applied in the Annual Report 2019.

Consolidation policies

The consolidated financial statements include the financial statements of the Parent Company and subsidiaries in which DKT Holdings ApS has direct or indirect control. Joint ventures in which the Group has joint control and associates in which the Group has significant influence are recognised using the equity method.

The consolidated financial statements have been prepared on the basis of the financial statements of DKT Holdings ApS and its consolidated enterprises, which have been restated to Group accounting policies, combining items of a uniform nature.

On consolidation, intra-group income and expenses; shareholdings, dividends, internal balances; and realised and unrealised profits and losses on transactions between the consolidated enterprises have been eliminated.

1.2 | Critical accounting estimates and judgements

The preparation of DKTH Group's Annual Report requires Management to exercise judgement in applying the Group's accounting policies. It also requires the use of estimates and assumptions that affect the reported amount of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions are recognised during the period in which the estimates are revised and during any future periods affected.

The following areas involve a higher degree of estimates or complexity and are outlined in more detail in the related notes on:

Notes	Critical accounting estimates and judgements	Estimates /judgements
2.2	Revenue	Assessment of principal or agent Assessment of contracts involving complex sale of goods and services
2.7	Special items	Assessment of special events or transactions
3.1	Intangible assets	Assumptions for useful lives Assumptions used for Impairment testing
3.3	Lease assets	Assumptions related to write-down of lease assets re. vacant tenancies Assumptions related to extension options
3.7	Defined benefit plans	Assumptions for discount rates, wage inflation and mortality

1.3 | New accounting standards

DKTH Group has adopted the new standards, amendments to standards and interpretations that are effective for the financial year 2020. None of the changes have affected recognition or measurement in the financial statements nor are they expected to have any future impact.

At 29 April 2021, IASB had approved a number of new accounting standards and changes to standards. DKTH has evaluated the standards and none of them are expected to be relevant to the Group and are therefore not expected to have an impact on the financial statements.

Section 2

Profit/(loss) for the year

This section focuses on disclosures of details of the DKTH Group's results for the year including segment reporting, special items and taxation. A detailed review of revenue, EBITDA and profit for the year is provided in the section 'Financial review' in the Management's review.

In this section

2.1. Segment reporting	38
2.2. Revenue	40
2.3. Cost of sales	43
2.4. External expenses.....	43
2.5. Personnel expenses	44
2.6. Depreciation, amortisation and impairment losses	45
2.7. Special items.....	46
2.8. Income taxes.....	47

2.1 | Segment reporting

Worth noting

DKTH Group consists of the three operating segments Nuuday, TDC NET and Group Functions.

Nuuday develops and markets the best communications and entertainment services, including the development of new innovative products and digital solutions.

TDC NET designs, builds, and runs Denmark's best broadband and mobile networks and delivers highly qualified technical support to customers and the networks.

Group Functions governs, advises and delivers shared services to the business units including management and property services.

Accounting policies

Operating segments are reported in a manner consistent with the internal management and reporting structure.

Profit before depreciation, amortisation and special items (EBITDA) represents the profit earned by each segment. The operating segments are managed primarily on the basis of EBITDA.

Segment results are accounted for in the same way as in the consolidated financial statements.

Segment income and segment expenses are those items that, in our internal management reporting, are directly attributable to individual segments. Intersegment transactions are conducted on market terms.

In 2020, the treatment of leases relating to properties and cars in the segment reporting for Nuuday and TDC NET was changed. These leases are now recognised as depreciation and interest expenses in accordance with IFRS 16. Previously, these leases were recognised as operating expenses.

The allocation between external revenue and revenue across segments regarding mobile interconnect revenue has been changed.

Comparative figures have been restated accordingly.

2.1 | Segment reporting (continued)

Activities (DKKm)	Nuuday		TDC NET		Group Functions	
	2020	2019	2020	2019	2020	2019

Sales of services recognised over time	14,713	15,721
Total	16,089	17,044

Critical accounting judgements

Revenue recognition for a telecom operator is a complex area of accounting that requires management estimates and judgements.

Recognition of revenue depends on whether the Group acts as a principal in a transaction or an agent representing another company. Whether the Group is considered to be the principal or agent in a transaction depends on an analysis of both the form and substance of the customer agreement. When the Group acts as the principal, revenue is recognised at the agreed value, whereas when the Group acts as an agent, revenue is recognised as the commission the Group receives for arranging the agreement.

Judgements of whether the Group acts as a principal or as an agent impact on the amounts of recognised revenue and operating expenses, but do not impact on net profit for the year or cash flows. Judgements of whether the Group acts as a principal are used primarily in transactions covering content.

When the Group concludes contracts involving complex sale of goods and services, management estimates are required to determine whether goods and services shall be recognised together or as separate goods and services.

Management estimates are also used for allocating the transaction price to the individual elements based on their respective fair values, if judged to be recognised separately. For example, business customer contracts can comprise several elements related to mobile phones, subscriptions, leases, etc.

2.2 | Revenue (continued)

§ Accounting policies

Revenue is measured at the fair value of the consideration receivable, exclusive of sales tax and discounts relating directly to sales. Revenue comprises goods and services provided during the year. Goods and services may be sold separately or in bundled packages. Services include traffic and subscription fees, interconnection and roaming fees, fees for leased lines, network services, TV distribution as well as connection and installation fees. Goods include customer premises equipment, telephony handsets, PCs, set-top boxes, etc.

The Group derives revenue from the transfer of goods and services to customers in the main segments as shown in the table above.

Consumer sells to households and the contracts are primarily perpetual, with the same service provided until the customer terminates the contract. Some of the contracts include a non-cancellation period of 6 months. Consumer also has contracts with antenna associations for longer periods.

Business sells digital solutions to enterprises and public segments. Business offers modular solutions for small and medium-sized enterprises, as well as customised solutions for public and large enterprises. Modular self-service contracts are perpetual and contracts with customised solutions are for longer periods, i.e. 3-5 years.

Wholesale delivers services from plain access to full service packages to service providers. Wholesale revenue is partly regulated.

The significant sources of revenue are recognised in the income statements as follows:

- revenues from subscription fees and flat-rate services are recognised over the subscription period
- revenues from telephony are recognised at the time the calls are made
- sales related to prepaid services are deferred, and revenues are recognised at the time of use
- revenues from leased lines are recognised over the rental period
- revenues from the sale of equipment are recognised on delivery. Revenues from the equipment maintenance are recognised over the contract period

Revenue arrangements with multiple deliverables are recognised as separate units of accounting, independent of any contingent element related to the delivery of additional items or other performance conditions. Such revenues include the sale of equipment located at customer premises, e.g. switchboards and handsets.

The transaction price in revenue arrangements with multiple deliverables, such as handsets and subscriptions, are allocated to each performance obligation based on the stand-alone selling price. Where the selling price is not directly observable, it is estimated based on expected cost plus a margin. Discounts on bundled sales are allocated to each element in the contract.

Contracts with similar characteristics have been evaluated using a portfolio approach due to the large number of similar contracts.

In case of contracts for longer periods and if the payment exceeds the services rendered, contract liabilities are recognised, see note 3.5.

Revenues are recognised gross when DKTH Group acts as the principal in a transaction. For content-based services and the resale of services from content providers where DKTH Group acts as the agent, revenues are recognised net of direct costs.

The percentage-of-completion method is used to recognise revenue from contract work in progress based on an assessment of the stage of completion. Contract work in progress includes installation of telephone and IT systems, systems integration and other business solutions.

Non-refundable up-front connection fees are included in the total transaction price for the contract with the customer and thereby allocated to the identified performance obligations (services).

The period between the transfer of the service to the customer and the payment by the customer is not of an extent that gives reason to adjust the transaction prices for the time value of money.

Other income

Other income comprises mainly rental income, compensation for cable breakages, investment advisory fees from the related pension funds as well as profit relating to divestment of property, plant and equipment.

2.3 | Cost of sales

(DKK)m	2020	2019
Mobility services	(573)	(570)
Landline voice	(81)	(110)
Internet & network	(297)	(369)
TV	(1,956)	(2,233)
Other services	(1,719)	(1,663)
Total	(4,626)	(4,945)

Accounting policies

Cost of sales includes transmission costs and cost of goods sold. Transmission costs include external expenses related to operation of mobile and landline networks and leased transmission capacity as well as interconnection and roaming costs related directly to the Group's primary income.

Cost of goods sold includes terminal equipment and transmission material as well as TV-programme rights and other content costs.

2.4 | External expenses

(DKK)m	2020	2019
Marketing and advertising	(215)	(247)
Subscriber acquisition and retention, cf. note 3.5	(141)	(276)
Properties	(371)	(341)
IT	(381)	(350)
Temps and personnel-related expenses	(141)	(242)
Other	(800)	(926)
Total	(2,049)	(2,382)

Accounting policies

External expenses include expenses related to marketing and advertising, IT, property, expenses related to staff, capacity maintenance, service contracts, etc.

2.5 | Personnel expenses

(DKKm)	2020	2019
Wages and salaries (including short-term and long-term bonuses)	(3,954)	(3,968)
Pensions:		
• defined benefit plans	(96)	(101)
• defined contribution plans	(310)	(304)
Social security	(74)	(84)
Total	(4,434)	(4,457)
Of which capitalised as tangible and intangible assets	1,262	1,073
Total personnel expenses recognised in the income statement	(3,172)	(3,384)

Remuneration for the key management of TDC and the Board of Directors of TDC² (DKKm)

	2020	2019
Base salary (incl. benefits)	22.3	24.6
Cash bonus	16.4	20.8
Retention allowance ¹	8.8	69.6
Pensions	3.7	4.2
Long-term incentive programme	4.3	3.6
Management incentive programme (cf. note 6.1)	1.8	0.0
	57.3	122.8
Redundancy compensation	0.0	24.2
Key management in total	57.3	147.0
Fee to the Board of Directors	5.8	4.9
Total	63.1	151.9

¹ In addition to the retention element the allowance is linked to reaching a number of strategic targets in the execution of the new strategy.

² During 2020, the remuneration to the key management (excluding redundancy compensation) comprised 5.0 members on average (2019: 5.7 members).

Number of full-time employee equivalents	2020	2019
1 January	7,498	7,126
Redundancy programmes	(405)	(58)
Acquisitions and divestments	42	38
Insourcing	23	0
Hirings and resignations	(126)	392
31 December	7,032	7,498
Former Danish civil servants	65	72
Employees entitled to pension from TDC Group's pension fund	711	767
Other employees	6,256	6,659
31 December	7,032	7,498
Of which in Denmark¹	7,032	7,405
Average number of full-time employee equivalents, DKTH Group²	7,260	7,327

¹ In 2019, employees outside Denmark were employed by Contact Center Europe GmbH, Flensburg, Germany.

² The average number of full-time employee equivalents seconded to external parties in connection with outsourcing of tasks or divestment of operations and entitled to pensions on conditions similar to those provided for Danish civil servants is not included in the reported figures (76 in 2020 and 100 in 2019).

Comments

The key management of TDC consists of the Executive Committee as well as Andreas Pfisterer (CEO of TDC NET) and Michael Moyell Juul (CEO of Nuuday).

Remuneration for the Executive Committee of TDC amounted to DKK 36.5m (2019: DKK 108.4m) of which DKK 2.3m are pensions and DKK 3.5m are other long-term benefits.

2.5 | Personnel expenses (continued)

Accounting policies

Wages, salaries, social security contributions, paid leave and sick leave, bonuses and other employee benefits are recognised in the year in which the employee renders the related services.

Pension costs

See note 3.7.

Full-time employee equivalents

The number of full-time employee equivalents includes permanent employees and trainees.

Employees who are entitled to pensions on conditions similar to those provided for Danish civil servants and who are seconded to external parties in connection with outsourcing of tasks or divestment of operations are not included in the reported numbers.

Employees in acquired enterprises are included as the average number of full-time employee equivalents from the time of acquisition until 31 December. Employees in divested enterprises are included as the average number of full-time employee equivalents from 1 January until the time of divestment.

Employees in discontinued operations are not included in the number of full-time employee equivalents. The total number of full-time employee equivalents including discontinued operations is disclosed in a footnote.

2.6 | Depreciation, amortisation and impairment losses

(DKKm)

	2020	2019
Amortisation of intangible assets, cf. note 3.1	(3,169)	(3,320)
Depreciation of property, plant and equipment, cf. note 3.2	(2,664)	(2,994)
Depreciation of lease assets, cf. note 3.3	(394)	(382)
Impairment losses, cf. notes 3.1 and 3.2	(42)	(162)
Of which capitalised as tangible or intangible assets	37	28
Total	(6,232)	(6,830)

Comments

The decrease in amortisation from 2019 to 2020 was due primarily to reduced amortisation of customer relationships as a result of the diminishing-balance method partly offset by higher amortisation of software due to an increased amortisation base.

The decrease in depreciation from 2019 to 2020 was due primarily to the increased useful lives of various network equipment and a decreased depreciation base resulting from various fully depreciated assets. The decrease was also impacted by the 2019 reduction of useful lives of existing mobile equipment as a result of the replacement with Ericsson equipment.

2.7 | Special items

(DKKm)	2020	2019
Costs related to redundancy programmes	(172)	(72)
Other restructuring costs, etc.	0	(80)
Distribution of "excess capital" to members of TDC Pension Fund	(35)	(24)
Profit on sale of enterprises	17	0
Loss on sale of enterprises	0	(5)
Profit on sale of other investments	15	0
Loss from rulings	(2)	(1)
Adjustment of purchase price re. acquisition of enterprises	(2)	(1)
Costs related to acquisition of enterprises	(1)	(11)
Special items before income taxes	(180)	(194)
Income taxes related to special items	37	36
Special items related to joint ventures and associates	0	2
Total special items	(143)	(156)

Cash flow from special items (DKKm)	2020	2019
Redundancy programmes	(161)	(70)
Rulings	(2)	0
Other	(71)	(58)
Total	(234)	(128)

Worth noting

Special items are significant amounts that Management considers are not attributable to normal operations such as restructuring costs and special write-downs for impairment of intangible assets and property, plant and equipment. Special items also include gains and losses related to divestment of enterprises, as well as transaction costs and adjustments of purchase prices relating to the acquisition of enterprises. Special items consist of both recurring and non-recurring items.

Critical accounting judgements

In the Group's income statement, special items are presented as a separate item. Special items include income or costs that in Management's judgement shall be disclosed separately by virtue of their size, nature or incidence. In determining whether an event or transaction is special, Management considers quantitative as well as qualitative factors such as the frequency or predictability of occurrence of the transaction or event, including whether the event or transaction is recurring. This is consistent with the way that financial performance is measured by Management and reported to the Board of Directors and facilitates a meaningful analysis of the operating results of the Group.

Accounting policies

Special items, as described above, are disclosed on the face of the income statement. Items of a similar nature for non-consolidated enterprises are recognised in profit from joint ventures and associates.

2.8 | Income taxes

i Worth noting

A large part of DKTH Group's deferred tax liabilities relates to assets that are not expected to be taxed in the foreseeable future (pension assets, customer relations and brands). The deferred tax liabilities relating to customer relationships and brands stem primarily from the acquisition of TDC A/S in May 2018 and the resulting purchase price allocation.

Reconciliation of income taxes (DKKm)	2020			2019		
	Income tax income/ (expense)	Income tax payable/ (receivable)	Deferred tax liabilities/ (assets)	Income tax income/ (expense)	Income tax payable/ (receivable)	Deferred tax liabilities/ (assets)

Special items	37	-	-	36	-	-
Total	180	-	-	309	-	-

2.8 | Income taxes (continued)

Specification of deferred tax (DKKm)	2020			2019
	Deferred tax assets	Deferred tax liabilities	Total	
Intangible assets	0	315	315	411
Other	0	20	20	32
Current	0	335	335	443
Intangible assets	0	2,218	2,218	2,497
Property, plant and equipment	(223)	0	(223)	(215)
Lease assets and liabilities	(194)	0	(194)	(170)
Pension assets and pension liabilities	0	1,766	1,766	1,642
Tax value of tax-loss carried forwards	(12)	0	(12)	(8)
Other	(9)	0	(9)	(2)
Non-current	(438)	3,984	3,546	3,744
Deferred tax at 31 December	(438)	4,319	3,881	4,187

DKT Holdings ApS participates in joint taxation with all its Danish group companies. DKT Holdings ApS is the administration company in the joint taxation. The jointly taxed companies are jointly and severally liable for the total income taxes, taxes paid on account and outstanding residual tax (with additional payments and interest) relating to the joint taxation.

Reconciliation of effective tax rate (DKKm)	2020		2019	
	DKKm	%	DKKm	%
Danish corporate income tax rate	666	22.0	738	22.0
Limitation on the tax deductibility of interest expenses	(541)	(17.9)	(523)	(15.7)
Tax value of non-capitalised tax losses and utilised tax losses, net	0	0.0	2	0.1
Adjustment of tax for previous years	18	0.6	56	1.7
Effective tax excluding special items	143	4.7	273	8.1
Special items	37	0.9	36	0.6
Effective tax including special items	180	5.6	309	8.7

Reconciliation of effective tax rate

The decreasing effective tax rate (excluding special items) was due primarily to an increased impact of the Danish limitation on the deductibility of interest as well as the decrease of adjustment of tax for previous years.

2.8 | Income taxes (continued)

Accounting policies

Tax for the year comprises current income tax, changes in deferred tax and adjustments from prior years and is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income.

Current income tax liabilities and current income tax receivables are recognised in the balance sheet as income tax payable or income tax receivable.

Deferred tax is measured under the balance-sheet liability method on the basis of all temporary differences between the carrying amounts and the tax bases of assets and liabilities at the balance sheet date. However, deferred tax is not recognised if the temporary difference arises from the initial recognition of goodwill or if it arises from initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit/loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries, joint ventures and associates, except where the timing of the reversal of the temporary difference is controlled by DKT Holdings Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets including the tax value of tax-losses carried forwards are recognised when it is likely that these will be utilised in the foreseeable future.

Deferred tax is adjusted concerning elimination of unrealised intra-group profit and losses.

Deferred tax is measured on the basis of the tax rules and tax rates effective under the legislation in the respective countries at the balance sheet date when the deferred tax is expected to be realised as current income tax. Changes in deferred tax as a result of changes in tax rates are recognised in the income statement except for the effect of items recognised directly in other comprehensive income.

Deferred tax assets and liabilities are offset in the consolidated balance sheet.

Section 3

Operating assets and liabilities

This section shows the assets used to generate the Group's performance and the resulting liabilities incurred. Assets and liabilities relating to the Group's financing activities are addressed in Section 4. Deferred tax assets and liabilities are shown in note 2.8.

In this section

3.1. Intangible assets.....	51
3.2. Property, plant and equipment.....	55
3.3. Lease assets and liabilities	57
3.4. Trade receivables.....	59
3.5. Contract assets and liabilities	60
3.6. Provisions.....	60
3.7. Pension assets and pension obligations	62

Worth noting

DKTH Group's intangible assets relate largely to goodwill, customer relations and brands stemming from the acquisition of TDC A/S in May 2018 and the resulting purchase price allocation.

Comments

Write-downs for impairment of intangible assets, etc. totalled DKK 23m (2019: DKK 146m) of which DKK 15m relate to right-of-use assets, DKK 7m to termination of various software projects, all in Nuuday.

Assets with indefinite useful lives other than goodwill related to the TDC brand and were unchanged at DKK 833m compared with 2019.

The carrying amount of software amounted to DKK 2,799 (2019: DKK 2,705m). The addition of internally developed software totalled DKK 601m (2019: DKK 482m).

The carrying amount of individually material Danish mobile licences included in other rights, software etc., amounted to DKK 2,549m (2019: DKK 2,711m) and is shown in the next table. Of this DKK 83m relates to licences not yet in use.

Critical accounting estimates

Useful lives

Management estimates useful lives for intangible assets based on periodic studies of customer churn or actual useful lives and the intended use for those assets. Such studies are completed or updated when new events occur that may have the potential to impact the determination of the useful life of the asset, i.e. when events or circumstances occur that indicate that the carrying amount of the asset may not be recoverable and should therefore be tested for impairment. Any change in customer churn or the expected useful lives of these assets is recognised in the financial statements, as soon as any such change has

been ascertained, as a change of a critical accounting estimate.

Impairment testing of intangible assets

Intangible assets comprise a significant portion of DKTH Group's total assets. The measurement of the recoverable amount of intangible assets is a complex process that requires significant Management judgements in determining various assumptions to be used in the calculation of cash-flow projections, discount rates and terminal growth rates.

The sensitivity of changes in the assumptions used to determine the recoverable amount may be significant. Furthermore, the use of other estimates or assumptions when determining the

recoverable amount of the assets may result in other values and could result in required impairment of intangible assets in future periods.

The assumptions used for the impairment testing of goodwill are shown in the section Impairment testing of goodwill and intangible assets with indefinite useful lives.

Impairment testing of goodwill and intangible assets with indefinite useful lives

Goodwill and intangible assets with indefinite useful lives relate primarily to DKTH's acquisition of TDC A/S. The carrying amount of goodwill relating to the acquisition of TDC amounted to DKK 21,913m and the carrying value of intangible assets with indefinite useful lives amounted to DKK 833m. The carrying amount of goodwill is tested for impairment annually and if events or changes in circumstances indicate impairment. The annual tests were carried out at 1 October 2020 and at 1 October 2019, respectively.

Impairment testing is an integral part of DKTH Group's budget and planning process, which is based on long-term business plans with projection until 2030. The discount rates applied reflect specific risks relating to the individual cash-generating unit. The recoverable amount is based on the value in use determined on expected cash flows based on long-term business plans approved by Management. The business plans approved by Management follow the operating segments as described in note 2.1.

Projections for the terminal period are based on general expectations and risks, taking into

account the general growth expectations for the telecoms industry in Denmark. We apply a negative real growth rate (1.0% perpetuity growth factor) reflecting expectations of relatively saturated markets.

The long-term business plans are based on current trends. The budget period includes cash flow effects from completed restructurings combined with effects of strategic initiatives aimed at improving or maintaining trend lines.

For the impairment testing of goodwill, TDC Group uses a pre-tax discount rate for each cash-generating unit. In determining the discount rate, a risk premium on the risk-free interest rate is fixed at a level reflecting Management's expectations of the spread for future financing.

Goodwill and intangible assets with indefinite useful lives relate to Nuuday and TDC NET. The assumptions for calculating the value in use for the most significant goodwill amounts are given below.

3.1 | Intangible assets (continued)

Assumptions regarding recoverable amounts and projected earnings

Nuuday

Sensitivity driven by reasonably possible changes in the key assumptions are disclosed below.

Projections are based on the assumption of a stabilising EBITDA towards 2022 and positive growth hereafter in the long-term business plan based on the following assumptions:

- Landline voice decline from continuation of lower churn and improved product mix
- Growth in mobility services from higher RGUs and ARPU partly offset by the ambition to continue to have superior networks
- Declining broadband gross profit trend due to decreasing RGUs, however offset in the long run by increased ARPUs as customers migrate to high-speed technologies (e.g. Fibre and Coax)
- TV gross profit decline due to RGU-pressure. Focus on future-proof TV technology such as YouTV, a streaming platform, alongside own-produced content, which will improve the RGU trend and generate higher ARPUs
- Opex savings driven by initiatives generated in an extensive savings programme with reductions of external Opex and personnel cost

Sensitivity analyses have been performed to assess the probability that any likely changes in cash flow or discount rate will result in an impairment loss. One of the key swing factors behind the projection is the EBITDA level in the planning period. A sensitivity analysis indicates that each year in the planning period EBITDA may be 4.7% lower before a write-down would have to be recognised.

TDC NET

Any reasonably possible changes in the key assumptions are not expected to cause the carrying amount of goodwill to exceed the recoverable value.

Projections are based on the assumption of steady EBITDA growth and an EBITDA margin in the long-term business plan based on the following assumptions:

- Positive gross profit development from increased growth in mobility services
- Positive gross profit development from increased growth in fibre broadband, stemming primarily from the investments in the fibre roll-out
- Higher customer demand for data consumption leading to a switch in customer mix from established broadband technologies such as DSL and coax to high-speed fibre technologies with higher ARPU

Opex savings driven by initiatives generated in an extensive savings programme with reductions of external Opex and personnel cost

- Capex at a higher level in the coming years than historically due to increased investments in fibre roll-out and mobile network in preparation for digital activities

Key assumptions for calculating the value in use for the significant¹ goodwill amounts (DKKm)

	Nuuday	TDC NET
Carrying amount of goodwill at 31 December 2020 (DKKm)	4,883	17,318
Carrying amount of goodwill at 31 December 2019 (DKKm)	4,883	17,315
Market-based growth rate applied to extrapolated projected future cash flows for the period following 2030	1.0%	1.0%
Applied pre-tax discount rate at 1 October 2020	7.4%	6.3%
Applied pre-tax discount rate at 1 October 2019	8.8%	6.9%

¹ Representing 100% of the total carrying amount in 2020.

3.1 | Intangible assets (continued)

§ Accounting policies

Goodwill and brands with indefinite useful lives are recognised at cost less accumulated write-downs for impairment. The carrying amounts of goodwill and brands with indefinite useful lives are tested for impairment annually and whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable, and are subsequently written down to the recoverable amounts in the income statement if exceeded by the carrying amounts. Write-downs of goodwill are not reversed. For the purpose of impairment testing in the consolidated financial statement, goodwill is allocated to the Group's cash-generating units. The determination of cash-generating units is based on the operating segments in the Group's internal management reporting.

Brands with finite useful lives, licences, proprietary rights, etc. are measured at cost less accumulated amortisation and impairment losses, and are amortised on a straight-line basis over their estimated useful lives.

Customer-related assets are measured at cost less accumulated amortisation and impairment losses, and are amortised using the diminishing-balance method based on the percentage of churn (15% to 28%) corresponding to the expected pattern of consumption of the expected future economic benefits.

Development projects, including costs of computer software purchased or developed for internal use, are recognised as intangible assets if the cost can be calculated reliably and if they are expected to generate future economic benefits. Costs of development projects include wages, external charges, depreciation and amortisation that are directly attributable to the development activities as well as interest expenses in the production period.

Development projects that do not meet the criteria for recognition in the balance sheet are expensed as incurred in the income statement.

The main amortisation periods are as follows:

Brands	3-10 years
Mobile licences	2-20 years
Development projects	3-5 years

Development projects in process and intangible assets of indefinite useful lives are tested for impairment at least annually and written down to recoverable amounts in the income statement if exceeded by the carrying amount.

Intangible assets are recorded at the lower of recoverable amount and carrying amount.

Impairment tests on goodwill and other intangible assets with indefinite lives are performed at least annually and, if necessary, when events or changes in circumstances indicate that their carrying amounts may not be recoverable.

Cash flow from investment in property, plant and equipment	(3,233)	(3,400)

3.2 | Property, plant and equipment (continued)

Accounting policies

Property, plant and equipment are measured at cost less accumulated depreciation and write-downs for impairment.

Cost comprises purchase price and costs directly attributable to the acquisition until the date on which the asset is ready for use. The cost of self-constructed assets includes directly attributable payroll costs, materials, parts purchased and services rendered by sub-suppliers or contractors as well as interest expenses in the construction period. Cost also includes estimated decommissioning costs if the related obligation meets the conditions for recognition as a provision.

Directly attributable costs comprise personnel expenses together with other external expenses calculated in terms of time spent on self-constructed assets.

The depreciation base is measured at cost less residual value and any write-downs. Depreciation is provided on a straight-line basis over the estimated useful lives of the assets. The main depreciation periods are as shown in the next table.

Buildings	20 years
Network infrastructure:	
mobile networks	20 years
copper	20 years
coax	20 years
fibre	30 years
exchange equipment	3-15 years
other network equipment	3-20 years
Equipment (computers, tools and office equipment)	3-15 years

The useful lives and residual values of the assets are reviewed regularly. If the residual value exceeds the carrying amount of an asset, depreciation is discontinued.

Property, plant and equipment that have been disposed of or scrapped are eliminated from accumulated cost and accumulated depreciation. Gains and losses arising from sale of property, plant and equipment are measured as the difference between the sales price less selling expenses and the carrying amount at the time of sale. The resulting gain or loss is recognised in the income statement under other income.

Software that is an integral part of telephone exchange installations, for example, is presented together with the related assets. Useful lives are estimated individually.

Installation materials are measured at the lower of weighted average cost and recoverable amount.

Customer-placed equipment (e.g. set-top boxes) is capitalised and depreciated over the estimated useful life of the individual asset, not exceeding five years.

Property, plant and equipment are recognised at the lower of recoverable amount and carrying amount.

3.3 | Lease assets and liabilities

Lease assets (DKKm)	2020				2019			
	Land and buildings	Network infrastructure	Vehicles and equipment	Total	Land and buildings	Network infrastructure	Vehicles and equipment	Total

Income from sublease	92	85
Depreciation charge of lease assets, cf. above	(394)	(382)
Interest expense (included in financing costs)	(238)	(244)

Comments

The Group leases various offices, exchanges, mobile sites, retail stores, vehicles and equipment. Rental contracts are typically made for fixed periods of 3 to 15 years but may have extension options.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

The total cash outflow for leases in 2020 was DKK 536m (2019: DKK 558m). The amount is excluding short-term leases and leases of low-value assets.

At 31 December 2020, the future sublease payment amounted to DKK 237m (2019: DKK 268m).

Lease reassessments

DKTH is continuously aiming at decommissioning legacy networks as a measure to obtain costs savings in numerous areas, such as rent, power, maintenance, workforce, etc. The most recent business plans for decommissioning legacy networks imply a reduced need for leasing square meters for technical equipment. Accordingly, it is no longer considered to be necessary to exercise certain extension options in DKTHs lease agreements. Previously it was considered necessary to use certain extension options until 2047, i.e. beyond the lease termination in 2037-2041. The reassessed business plans have resulted in a DKK 804m reduction in the lease assets and the lease liabilities.

3.3 | Lease assets and liabilities (continued)

Critical accounting estimates and judgements

Impairment tests of lease assets require management to make significant estimates related to vacant tenancies. Management has estimated the expected sublease income net of operating cost. For each category of lease assets (offices, exchanges, etc.) and in consideration of the geographical location, the probability of obtaining income from sublease and expected sublet rent rates is estimated. The most critical assumptions used in determining the write-down relate to the probability of sublease and expected sublet rent rates that will be impacted by e.g. changed market conditions for subletting.

The Group has 162,458 square metres of leased tenancies no longer used by the Group (2019: 163,650). Of this, 95,831 square metres were sublet (2019: 90,479). The leases terminate in 2041 at the latest.

The Group is expected to vacate and sublet additional tenancies in the future, following further reductions in the number of employees and upgrading to technical equipment that requires fewer square metres.

Significant judgements are involved when assessing the future capacity needs for leases and as such the use of extension options.

Accounting policies

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date
- amounts expected to be payable by the Group under residual value guarantees
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group, the lessee's incremental borrowing rate is used, which is the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the lease asset in a similar economic environment with similar terms, security and conditions.

The incremental borrowing rates are based on our existing credit facilities and observable market data.

The Group is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the lease asset.

Lease payments are allocated between instalments and financing costs. The financing costs are charged to the income statement over the lease period to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Lease assets are measured at cost less accumulated depreciation and write-downs for impairment. Cost comprises the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- decommissioning costs.

Lease assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the lease asset is depreciated over the underlying asset's useful life cf. note 3.2.

Impairment tests on lease assets are performed at least annually and, if necessary, when circumstances indicate their carrying amounts may not be recoverable. Write-downs of lease assets related to vacant tenancies are based on expectations concerning timing and scope, future cost level, etc. The calculation of the write-downs comprises rent and operating costs for the contract period minus the expected rental income from subleases.

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are expensed as incurred. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT equipment and small items of office furniture.

3.4 | Trade receivables

(DKKm)	2020	2019
Trade receivables	1,860	2,082
Allowances for doubtful debts	(204)	(228)
Trade receivables, net	1,656	1,854
Allowances for doubtful debts at 1 January	(228)	(242)
Additions	(69)	(70)
Realised losses	70	45
Reversed allowances	23	39
Allowances for doubtful debts at 31 December	(204)	(228)

Comments

The carrying amount of the balance's approximated fair value is due to the short maturity of amounts receivable.

Of the receivables classified as current assets, DKK 5m falls due after more than one year (2019: DKK 23m).

The impact from COVID-19 has been taken into consideration when estimating the allowances for doubtful debts, but the increase in losses is not expected to be significant.

Accounting policies

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. DKTH operates with standard customer payment terms where customer subscriptions are billed and paid in advance of the subscription period, while usage and one-off services are billed and paid after the subscription period. The receivables are generally due for settlement within 20-30 days and are therefore all classified as current. Trade receivables are recognised initially at the amount of consideration that is unconditional. The Group holds the trade receivables with the objective of collecting the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method.

DKTH applies the simplified approach to measure expected credit losses, which uses a lifetime expected loss allowance for all trade receivables, contract assets and lease receivables. To measure the expected credit losses, receivables have been grouped based on shared credit risk characteristics and the days past due. The expected loss rates are based on the payment profiles of sales and the corresponding historical credit losses experienced. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

Trade receivables (DKKm)	Not yet due	Less than 1 month past due	More than 1 month past due	More than 3 months past due	More than 6 months past due	Total
2020						
Expected loss rate	0%	1%	8%	30%	80%	11%
Gross carrying amount	1,371	156	73	31	229	1,860
Loss allowance	(5)	(1)	(6)	(9)	(183)	(204)
2019						
Expected loss rate	1%	1%	7%	20%	74%	11%
Gross carrying amount	1,453	227	89	41	272	2,082
Loss allowance	(9)	(3)	(6)	(8)	(202)	(228)

3.5 | Contract assets and liabilities

(DKKm)	2020	2019
Assets recognised from costs to obtain a contract (SAC)	212	237
Assets recognised from costs to fulfil a contract	109	64
Work in progress for the account of third parties	57	94
Total contract assets	378	395
Deferred subscription income	2,310	2,417
Other deferred income	43	0
Work in progress for the account of third parties, liabilities	45	38
Total contract liabilities	2,398	2,455

Comments

Of the deferred subscription income, DKK 38m (2019: DKK 32m) will be recognised as income after more than one year.

Revenue recognised in 2020 that was included in deferred subscription income at the beginning of the period amounted to DKK 2,358m (2019: DKK 2,521m).

Costs recognised in 2020 that were included in assets recognised from costs to obtain a contract (SAC) at the beginning of the period amounted to DKK 148m (2019: DKK 174m).

Of the assets recognised from costs to obtain a contract (SAC), DKK 79m (2019: DKK 89m) and DKK 80m (2019: DKK 38m) of costs to fulfil a contract will be recognised as costs after more than one year.

Accounting policies

Subscriber acquisition costs and fulfilment costs

The most common subscriber acquisition costs are dealer commissions. Subscriber acquisition costs and fulfilment costs are capitalised and recognised as expenses in external expenses and personnel expenses over the expected term of the related customer relationship. The term is estimated using historical customer churn rates.

Change of management estimates may have a significant impact on the amount and timing of the expenses for any period.

Deferred subscription income recognised as a liability comprises payments received from customers covering income in subsequent years.

3.6 | Provisions (continued)

Comments

Provisions for decommissioning obligations relate to the future dismantling of mobile stations and restoration of property owned by third parties. The uncertainties relate primarily to the timing of the related cash outflows. The majority of these obligations are not expected to result in cash outflow within the next five years.

Provisions for restructuring obligations relate primarily to redundancy programmes. The majority of the provisions for redundancy programmes are expected to result in cash outflows in the next five years. The uncertainties relate primarily to the estimated amounts and the timing of the related cash outflows.

Other provisions relate mainly to onerous contracts and jubilee benefits for employees as well as legal claims. The majority of these provisions are not expected to result in cash outflows in the next five years. The uncertainties regarding legal claims and onerous contracts relate to both timing and estimated amounts. The uncertainties regarding jubilee benefits relate to both salary and the number of employees included.

In pursuance of Section 32 of the Danish Civil Servants Act, the Group has a termination benefit obligation to former Danish civil servants and to employees with civil-servant status hired before 1 April 1970 who are members of the related Danish pension fund. In the event of termination, such employees have a right to special termination benefits in the amount of three years' salary (tied-over allowance) or three months' full salary and two-thirds of their full monthly salary for four years and nine months (stand-off pay).

The Group's total termination benefits include wages during the notice period, severance pay, stand-off pay, payments pursuant to the Danish Salaried Employees Act, special termination benefits (in accordance with IAS 19 *Employee Benefits*), social security contributions and out-placement costs. The average redundancy cost per full-time employee equivalent, calculated as the total cost divided by the number of full-time employee equivalents included in the redundancy programmes during this period, is shown in the table below.

Average redundancy cost per full-time employee equivalent¹ (DKK thousands)

	2020	2019
Non-civil servants	307	405
Former Danish civil servants	2,112	936
Employees with civil-servant status	660	1,771
Weighted average per full-time employee equivalent	379	441
Number of redundancies	436	104

¹ Excluding corporate management.

Accounting policies

Provisions are recognised when the Group has a legal or constructive obligation arising from past events, it is probable that economic benefits must be sacrificed to settle it, and the amount can be estimated reliably.

Provisions for restructuring, etc. are recognised when a final decision thereon has been made before or on the balance sheet date and has been announced to the parties involved, provided that the amount can be measured reliably. Provisions for restructuring are based on a defined plan, which means that the restructuring commences immediately after the decision has been made.

When the Group is under an obligation to demolish an asset or re-establish the site where the asset was used, a liability corresponding to the present value of estimated future costs is recognised and an equal amount is capitalised as part of the initial carrying amount of the asset. Subsequent changes in such a decommissioning liability that results from a change in the current best estimate of cash Provisions are recognised when the Group has a legal or constructive obligation arising from past events, it is probable that economic benefits must be sacrificed to settle it, and the amount can be estimated reliably.

Provisions are measured at Management's best estimate of the amount at which the liability is expected to be settled. Provisions are discounted if the effect is material to the measurement of the liability.

3.7 | Pension assets and pension obligations

i Worth noting

In a defined contribution plan, DKTH Group pays fixed contributions to a third party on behalf of the employees and has no further obligations towards the employees. The benefits for the employees ultimately depend on the third party's ability to generate returns.

In a defined benefit plan, members receive cash payments on retirement, the value of which depends on factors such as salary and length of service. The Group underwrites investment, mortality and inflation risks necessary to meet these obligations. In the event of returns not being sufficient to honour obligations towards the employees, DKTH Group needs to address this through increased

levels of contribution. The Group has defined a benefit plan in TDC Pension Fund. 796 of TDC Group's employees are covered by the defined benefit plan, while all other employees are covered by defined contribution plans.

DKTH Group makes contributions to TDC Pension Fund, which is not consolidated in these financial statements, but are reflected in the balance sheet in pension assets. TDC Pension Fund can under certain circumstances distribute "excess capital" to DKTH Group triggering a payment to members of the pension fund as well. DKTH Group's pension assets and pension obligations are outlined in more detail in the following.

Defined benefit plan

Under conditions similar to those provided by the Danish Civil Servants' Pension Plan, 796 of DKTH Group's employees (2019: 880) were entitled to pensions from the pension fund related to the Group. Of these, 70 (2019: 96) employees were seconded to external parties in connection with outsourcing tasks or divesting operations. In addition, 7,637 (2019: 7,731) members of the pension fund receive or are entitled to receive pension benefits. The pension benefits comprise life-long old-age and disability pensions as well as certain benefits for spouses and children. Future pension benefits are based primarily on years of credited service and on participants' compensation at the time of retirement. Since 1990, no new members have joined the pension fund plans,

and the pension fund is prevented from admitting new members in the future due to the articles of association.

The pension fund operates defined benefit plans via a separate legal entity supervised by the Danish Financial Supervisory Authority (FSA). In accordance with existing legislation, articles of association and the pension regulations, the Group is required to make contributions to meet the capital adequacy requirements. When all pension obligations have been met, the remaining funds will be distributed from the pension fund to DKTH Group. With effect from 2019, TDC Pension Fund can under certain circumstances distribute "excess capital" to DKTH Group triggering a payment to members of the pension fund as well. In 2020,

TDC Pensions Fund distributed DKK 235m (2019: DKK 160m) of which DKTH Group received DKK 200m (2019: DKK 136m).

Ordinary monthly contributions to the pension fund are made corresponding to a percentage of wages. The ordinary contributions have been reduced from 1 January 2018. This decision was made due to the positive funding situation of the pension fund. Extraordinary contributions are made in connection with redundancy programmes and other retirements. Overall, the risk of additional capital contributions to the pension fund can be categorised as investment, longevity and regulatory risks.

Investment risk is managed within risk tolerance limits to mitigate excessive risk that could lead to contribution. The fund invests in a wide variety of marketable securities (predominantly fixed-income securities) and the return on the investments has implications for DKTH Group's financial results. Uncompensated risk related to nominal interest rates and inflation has been hedged.

In 2011, the Danish FSA introduced the longevity benchmark for statutory purposes, and the fund's actuary has since conducted a detailed longevity

statistical analysis that has generally underpinned the fund's assumptions regarding observed current longevity. In line with the sector, however, the fund has increased its provisions for future expected improvements to longevity corresponding to the updated Danish FSA benchmark. Other risks of capital contributions in excess of the planned ordinary contributions and extraordinary contributions in connection with redundancies going forward relate primarily to future changes to pension regulation and benefits over which the Group does not have full control.

The surplus under the Danish FSA pension regulation amounted to approx. DKK 3.6bn (2019: DKK 3.3bn). The equity of the pension fund amounted to approx. DKK 4.6bn (2019: DKK 4.3bn). The equity differs from the pension assets recognised in accordance with IFRS (DKK 8.0bn) due to specific FSA pension regulation requirements resulting in a higher pension obligation for regulatory purposes. The method for determining the fair value of plan assets is identical under the two requirements.

Pension (costs)/income (DKKm)	Expected 2021	2020	2019

General price/wage inflation	1.19	1.30

Assumptions used to determine pension (costs)/income (%)	2021	2020	2019
Discount rate	0.35	0.77	1.55
General price/wage inflation	1.19	1.30	1.51

3.7 | Pension assets and pension obligations (continued)

The basis for determining the discount rate is the yield of AA-rated euro-denominated corporate bonds with an average maturity of 11 years, taking into account that the pension liability is in Danish kroner. For purposes of determining DKTH Group's pension costs, the assumed discount rate was 0.77% (1.55% in 2019) and inflation was 1.30% (1.51% in 2019). The assumptions for 2021 reflect a discount rate decrease to 0.35% and a decrease of the assumed inflation rate to 1.19%.

The decreased discount rate and inflation rate during 2020 resulted in an increased pension benefit obligation compared with year-end 2019.

In 2021, with these changed assumptions, pension costs from the domestic defined benefit plan are expected to amount to DKK 54m (2020: cost of DKK 39m), assuming all other factors remain unchanged.

The remeasurement effects in 2020 of DKK 849m covered primarily a gain related to the plan assets (DKK 1,597m) as the actual return was higher than the expected return¹ and a loss related to the benefit obligation (DKK 748m) resulting from the decreasing discount rate (from 0.77% to 0.35%), was partly offset by the decreasing inflation rate (from 1.30% to 1.19%).

In 2019, the remeasurement effects of DKK 763m covered primarily a gain related to the plan assets (DKK 2,220m) as the actual return was higher than the expected return¹ and a loss related to the benefit obligation (DKK 1,457m) resulting from the decreasing discount rate (from 1.55% to 0.77%), was partly offset by the decreasing inflation rate (from 1.51% to 1.30%).

The mortality assumptions are based on a yearly mortality study, which analyses the actual mortality experience of the DKTH Group pension fund plan. The mortality assumptions provide the best estimate for the Group's recent experience plus an allowance for future improvement. The allowance for future improvement is in accordance with the Danish FSAs guidelines.

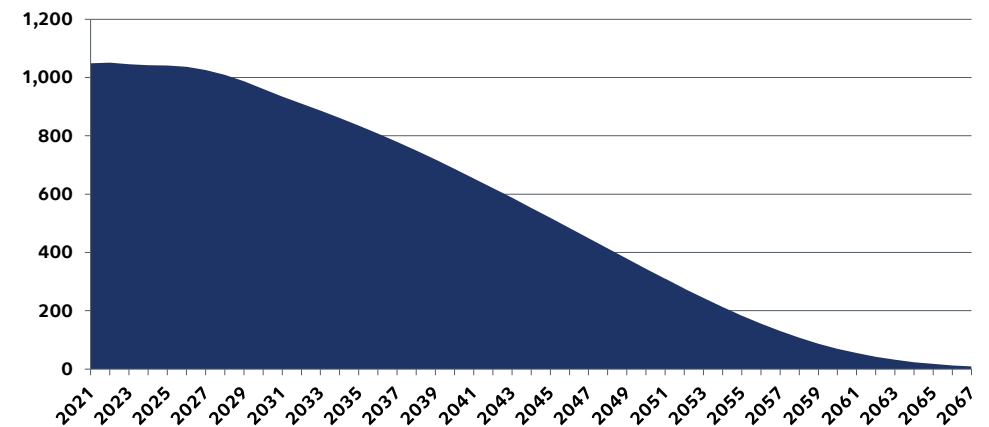

The table below shows the estimated impact of some of the risks to which DKTH Group is exposed. The Group is also exposed to fluctuations in the market value of assets. For some of these risks, if the defined benefit obligation rises or falls, the market value of assets may move in the opposite direction, thereby eliminating part of the risk.

Sensitivity analysis (DKKm)

	2020	2019
Reported defined benefit obligation	23,954	23,967
Discount rate sensitivity	0.35%	0.77%
Assumption -0.5%	25,692	25,714
Assumption +0.5%	22,394	22,399
General price/wage inflation sensitivity	1.19%	1.30%
Assumption +0.25%	24,824	24,844
Assumption -0.25%	23,125	23,132
Mortality sensitivity		
Assumption +1 year longevity	25,027	25,288
Assumption -1 year longevity	22,897	22,630

Projected benefit payments¹

DKKm

¹ The duration of the pension plan is approximately 14 years.

¹ In accordance with International Financial Reporting Standards, the expected return should be assumed to equal the discount rate as of the end of the previous year.

3.7 | Pension assets and pension obligations (continued)

DKTH Group's contributions (DKKm)	Expected 2021	2020	2019
Ordinary contributions	2	3	3
Extraordinary contributions in connection with retirements	5	4	3
Total	7	7	6

Other information

Ultimately, 491 members of the defined benefit plans will have part of their pension payments reimbursed by the Danish government. (2019: 497 members).

The related benefit obligations of DKK 384m (2019: DKK 396m) have been deducted in the projected benefit obligation.

Critical accounting estimates

Defined benefit plans

The pension liability regarding defined benefit plans is estimated based on certain actuarial assumptions, the most significant of which relate to discount rates, wage inflation and mortality. The discount rate applied is based on the yield of corporate bonds and may change over the years depending on interest rate developments. Management estimates of actuarial assumptions illustrate current market conditions. See the separate section Sensitivity analysis for a statement on the sensitivity of the defined benefit obligation to the discount rate, inflation and mortality.

Accounting policies

In a defined benefit plan, DKTH Group is obliged to pay a specific benefit at the time of retirement. A pension asset or pension obligation corresponding to the present value of the obligations less the defined pension plans' assets at fair value is recognised for these benefit plans.

The obligations are determined annually by independent actuaries using the projected unit credit method assuming that each year of service gives rise to an additional unit of benefit entitlement, and each unit is measured separately to build up the final obligations. Estimation of future obligations is based on the Group's projected future developments in mortality, early retirement, future wages, salaries and benefit levels, interest rate, etc. The obligation does not take into account potential distributions of "excess capital" which is under DKTH's control. The defined pension plan assets are estimated at fair value at the balance sheet date.

Differences between the projected and realised developments in pension assets and pension obligations are referred to as remeasurement effects and are recognised in other comprehensive income when gains and losses occur.

Pension assets are recognised to the extent that they represent future repayments from the pension plan.

Pension income/costs from defined benefit plans comprise the items: service cost, administrative expenses and interest on pension assets. Service cost and administrative expenses are recognised in personnel expenses, whereas interest on pension assets is presented as an item in financial income and expenses.

Past service costs are recognised as an expense when a plan amendment or curtailment occurs.

For the defined contribution plans, the Group will pay in a fixed periodic contribution to separate legal entities and will have no further obligations after the payment has been made.

Section 4

Capital structure and financing costs

This section explains the Group's capital structure and related financing costs, net interest-bearing debt as well as finance related risks and how these are managed.

In this section

4.1. Equity	67
4.2. Loans and derivatives	67
4.3. Financial risks	69
4.4. Credit ratings and net interest-bearing debt.....	70
4.5. Financial income and expenses	72
4.6. Maturity profiles of financial instruments	74

4.1 | Equity

Comments

The company's share capital is DKK 195,000 divided into shares of DKK 1 each or multiples thereof. All issued shares have been fully paid up.

During 2020, total equity decreased by DKK 2.4bn due to negative total comprehensive income.

During 2019, total equity decreased by DKK 2.7bn due to negative total comprehensive income.

The Parent Company statement of changes in equity specifies which reserves are available for distribution. The distributable reserves amounted to DKK 4,228m at 31 December 2020 (2019: DKK 4,166m). At the Annual General Meeting, the Board of Directors will not propose any dividend for the financial year 2020.

There were no dividend payments during 2020 and 2019.

Accounting policies

Dividends

Dividends expected to be distributed for the year are recognised in a separate item in equity. Dividends and interim dividends are recognised as a liability at the time of adoption by the Annual General Meeting and the meeting of the Board of Directors, respectively.

Currency translation reserve

The currency translation reserve comprises exchange-rate differences arising from translation of the functional currency of foreign enterprises' financial statements into Danish kroner. Translation adjustments are recognised in the income statement when the net investment is realised.

Reserve for cash flow hedges

The reserve for cash flow hedges in equity comprises changes in the fair value of hedging transactions that qualify for recognition as cash flow hedges and where the hedged transaction has not yet been realised.

4.2 | Loans and derivatives

Worth noting

DKTH Group is financed through the European bond market (EMTN), the market for syndicated senior secured bank loans (Senior Facility Agreement or SFA), the High Yield bond market (Senior Notes) and Shareholder loans (SHL). DKTH Group also has a Revolving Credit Facility to support its daily liquidity management.

The next upcoming maturity is the EUR 500m EMTN bond that will mature in March 2022.

The Group's outstanding EMTN and Senior Notes have been issued in EUR, GBP and USD with fixed interest rates. Both the GBP and USD notes have been swapped to fixed

EUR interest rates. Part of the fixed-rate debt has been swapped to floating-rate debt.

The Group's outstanding SFA loan has been issued in EUR with floating interest rates and is partly hedged to fixed interest rates due to requirements in the Senior Facility Agreement (SFA).

Derivatives are used for hedging interest and exchange-rate exposure only.

Loans (DKKm)

	2020	2019
Shareholder loans ¹	19,141	17,599
SFA loan ¹	14,107	14,158
Senior Notes ¹	10,201	10,450
EMTN ¹	7,540	7,973
Bank loans ¹	5	681
Spectrum licence liabilities ²	1,361	1,414
Total	52,355	52,275
Recognised as follows in the balance sheet:		
Non-current liabilities	52,320	51,503
Current liabilities	35	772
Total	52,355	52,275

¹ For maturity profiles of expected cash outflows and fair value of debt, see note 4.6.

² Spectrum licence liabilities are maturing as follows: DKK 30m within 1 year, DKK 365m between 1 and 3 years, DKK 318m between 3 and 5 years, DKK 648m between 5 and 10 years.

4.2 | Loans and derivatives (continued)

• Of which nominal value swapped to or with floating interest rate (EURm) ³	100	-	-	-	1,625	-	-	1,725
• Of which nominal value swapped to or with fixed interest rate (EURm) ³	400	500	359	1,050	275	2,345	228	5,157

¹ The SFA Loan have Euribor floor at zero and a margin of 3.00% per 31-12-2020.

² EUR exposures are not considered a significant risk due to the fixed EUR/DKK exchange rate policy.

³ The maturity of interest rate swaps used for hedging long-term EMTN bonds matches the maturity of the underlying EMTN bonds. Derivatives of nominal EUR 150m used for hedging long-term SFA loan matures in January 2021 and nominal EUR 125m matures in later periods.

Accounting policies

Loans

Loans are recognised initially at the proceeds received net of transaction expenses incurred. In subsequent periods, loans are measured at amortised cost so that the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan. Fair value hedged loans are measured at fair value excluding the effect of changes in own credit risk.

Other financial liabilities are measured at amortised cost.

Financial instruments

On initial recognition, financial derivatives are recognised in the balance sheet at fair value and subsequently remeasured at fair value in the balance sheet and in the income statement. Depending on the type of instrument, different recognised measurement methods are applied for derivative financial instruments.

On 30 June 2018 DKTH decided to stop using the hedge accounting rules in accordance to IAS 39. As a result of this, values recognised in other comprehensive income or fair value adjustments

on loans at 30 June 2018 were fixed and will be

reversed to the income statement over the lifetime of the underlying hedged item.

Unrealised gains/losses relating to hedging of future cash flows are recognised in other comprehensive income under a separate reserve.

4.3 | Financial risks

i Worth noting

DKTH Group is exposed to financial market and credit risks when buying and selling goods and services denominated in foreign currencies as well as due to the cash flow from investing in the business and financing activities. As a consequence of DKTH Group's capital structure and financing, the Group faces interest-rate and exchange-rate risks. DKTH's Group Treasury identifies, monitors and manages these risks through policies and procedures that are revised and approved by the Board of Directors on an annual basis.

Interest-rate risks

DKTH Group is exposed to interest-rate risks in the euro area, as 100% of the nominal gross debt is denominated in or swapped to EUR or DKK.

The interest-rate risk emerges from fluctuations in market interest rates, which affect the market value of financial instruments and financial income and expenses.

The TDC Groups interest rate risk is described in the annual report 2020 for TDC Group, see note 4.3. The two Senior Notes and Shareholder loans are both fully fixed and the first reset risk is in 2.5 years as the Senior Notes matures in June 2023.

Exchange-rate risks

DKTH Group is exposed primarily to exchange-rate risks from USD, GBP and EUR. Both the GBP EMTN bond and USD Senior notes have been swapped to EUR.

The USD exchange-rate exposure relating to payables and receivables mainly comes from roaming and interconnection agreements with foreign operators as well as equipment and handset suppliers.

Due to DKTH Group's capital structure, the exposure from financial activities in EUR is significant, as 60% of the nominal gross debt (including derivatives) is denominated in EUR. However, due to the fixed EUR/DKK exchange-rate policy of the Danish government (in place since 1982), DKTH Group does not consider its positions in EUR to constitute a significant risk. The last 40% of the nominal debt is in DKK. The Group's EUR exposure was DKK 30.4bn at year-end 2020 (2019: 30.7bn).

The monitoring of the exchange-rate risks is described in TDC Groups annual report 2020, (see note 4.3).

Credit risks

DKTH Group is exposed to credit risks principally as a provider of telecommunications services in Denmark and as counterparty in financial contracts. The credit risk arising from supplying telecommunications services is handled by subsidiaries, whereas the credit risks in relation to financial contracts are handled centrally by Group Treasury. Credit risks arising in relation to financial contracts are governed by the financial strategy that defines a maximum exposure for each counterparty. The maxima are based primarily on the lowest credit ratings of the counterparties from either Standard & Poor's (S&P) or Moody's Investor Services (Moody's).

The credit risk is described in TDC Groups annual report 2020, see note 4.3.

Liquidity risks

DKTH Group has no short-term refinancing risk as the next debt maturity is in March 2022.

The committed Revolving Credit Facilities provided by a group of banks under the Senior Facility Agreement (SFA) totaled EUR 600m (or DKK 4,465 m) at 31 December 2020. Additionally, a process was initiated in December 2020 to raise additional committed funding to maintain current operations, to complete projects underway and to finance stated objectives and plans for the coming period.

Undrawn credit lines

At year-end 2020, DKTH Group had undrawn committed credit lines totalling DKK 4,453m (2019: DKK 3,790m) provided by a group of banks.

4.4 | Credit ratings and net interest-bearing debt

Worth noting

Credit rating

DKTH Group is rated by three international rating agencies: S&P's, Moody's and Fitch.

The high yield bonds issued by DKT Finance contain change of control provisions customary for this type of financing. Further, the high yield bonds contain customary cross-default provisions (including a payment default provision and a cross-acceleration provision) in relation to certain other indebtedness of DKT Holdings and its subsidiaries.

The senior secured credit facilities borrowed by TDC contain change of control provisions customary for this type of financing. Further, the senior secured credit facilities contain customary cross-default provisions in relation to certain other indebtedness of DK Telekommunikation, TDC and its subsidiaries.

The EMTN notes issued by TDC contain change-of-control provisions customary for this type of financing. Further, the EMTN notes contain customary cross-default provisions in relation to certain other indebtedness of TDC and its principal subsidiaries.

During 2020, S&P downgraded DKTH Group's corporate rating, senior secured debt, unsecured

debt and senior notes by one notch. Moody's and Fitch maintained their credit ratings.

DKTH Group's company ratings at 31 December 2020

	Corporate rating	Senior unsecured debt	Senior secured debt	Senior Notes	Outlook
Rating

¹ Currency adjustment effect from derivatives that hedge long-term loans and fixed hedge accounting effects that will be reversed to the income statement over the lifetime of the underlying hedged long-term loans.

² Includes amortisation of borrowing costs, lease reassessment and fair value adjustment.

4.5 | Financial income and expenses

(DKKm)	2020	2019
Interest income	41	36
Interest expenses	(3,559)	(3,398)
Net interest	(3,518)	(3,362)
Currency translation adjustments	589	(311)
Fair value adjustments	(334)	527
Interest, currency translation adjustments and fair value adjustments	(3,263)	(3,146)
Profit/(loss) from joint ventures and associates	(2)	0
Interest on pension assets	57	105
Total	(3,208)	(3,041)

In DKTH's internal reporting, currency translation adjustments and interest from derivatives are reported as such, as specified in the adjacent table.

(DKKm)	Net interest	Currency translation adjustments	Fair value adjustments	Total
2020				
Shareholder loans	(1,658)	0	0	(1,658)
Senior Notes	(754)	64	(18)	(708)
Senior Facility Agreement (SFA) loans	(441)	57	5	(379)
Euro Medium Term Notes (EMTNs)	(217)	42	30	(145)
Lease liabilities	(238)	0	0	(238)
Other	(110)	(6)	(19)	(135)
Total	(3,418)	157	(2)	(3,263)
2019				
Shareholder loans	(1,529)	0	0	(1,529)
Senior Notes	(751)	(9)	66	(694)
Senior Facility Agreement (SFA) loans	(405)	(12)	(18)	(435)
Euro Medium Term Notes (EMTNs)	(208)	(21)	58	(171)
Lease liabilities	(244)	0	0	(244)
Other	(95)	9	13	(73)
Total	(3,232)	(33)	119	(3,146)

Comments

Interest, currency translation adjustments and fair value adjustments represented an expense of DKK 3,263m in 2020. The increase of DKK 117m compared with 2019 was driven primarily by:

- A higher level of Shareholder loans in 2020 resulted in higher interest expenses. Furthermore in 2019, the Senior Facility Agreement interest-margin step up was due to an increase in the SFA covenant leverage, resulting in higher interest expenses. Furthermore, the EMTN Bond step up of 1.25% in coupon interest was due to a rating downgrade to below investment-grade level resulting in higher interest expenses in 2020.
- Throughout 2020, the lower EUR exchange rate resulted in gains relating to EUR loans as well as USD and GBP loans swapped to EUR.

4.5 | Financial income and expenses

Cash flow from net interest (DKKm)	2020	2019
Interest received	579	625
Interest paid	(2,276)	(2,331)
Net interest paid	(1,697)	(1,706)
Specified as follows:		
Senior Notes incl. hedges	(718)	(678)
Senior Facility Agreement (SFA) loans incl. hedges	(260)	(412)
Euro Medium Term Notes (EMTNs) incl. hedges	(406)	(320)
Lease liabilities	(238)	(244)
Other	(75)	(52)
Net interest paid	(1,697)	(1,706)

Comments

Net interest of DKK 1,697m paid in 2020 represented a DKK 9m decrease compared with 2019 (DKK 1,706m), driven primarily by a transition from monthly payments to semi-annual payments on the SFA loan, partly offset by higher interest paid on the EMTN Bonds due to a coupon step-up of 1.25%.

4.6 | Maturity profiles of financial instruments

Maturity profiles

The maturity analyses of financial assets and liabilities are disclosed by category and class and are allocated according to maturity period. All interest payments and repayments of financial liabilities are based on contractual agreements. Interest payments on floating-rate instruments are determined using forward rates.

Financial assets and liabilities measured at fair value relate to derivatives. Calculation of fair value of these derivatives is based on observable inputs such as interest rates, etc. (Level 2 in the IFRS fair value hierarchy).

DKTH Group generally accepts that vendors sell-off to a third party their receivables arising from the sales to the Group. DKTH Group has established a supply chain financing programme where vendors can sell off their receivables from DKTH Group at attractive terms, but at the bank's sole discretion. DKTH Group is not directly or indirectly a party to these agreements. At 31 December, the Group is aware of approx. DKK 236m of trade payables that are part of such agreements.

Maturity profiles of expected cash flows¹(DKKm)	< 1 year	1-3 years	3-5 years	> 5 years	Total	Fair value	Carrying amount

¹ All cash flows are undiscounted. The table reflects only the cash flow from financial liabilities and derivatives recognised as financial assets. Other cash flow from financial assets is not disclosed.

² Both assets and liabilities measured at fair value through profit or loss are disclosed in the above table because some of the derivatives are used for hedging financial liabilities measured at amortised cost, see table.

³ Fair value and carrying amount value consist of accrued interest on Shareholder loans, SFA loan, Senior Notes and EMTNs at 31 December 2020.

⁴ As not all trade and other payables recognised in the balance sheet are financial instruments (e.g. unbilled payables do not constitute a financial liability), the amount differs from the amount disclosed in the balance sheet.

Section 5

Cash flow

This section provides information on the Group's cash flow. More information on development in the cash flow items is included in note 2.7 Special items, note 3.1 Intangible assets, note 3.2 Property, plant and equipment, 3.6 Provisions, note 3.7 Pension assets and pension obligations as well as note 4.5 Financial income and expenses.

In this section

5.1. Adjustment for non-cash items.....	76
5.2. Change in working capital	76

§ Accounting policies

Cash flow from operating activities is presented using the indirect method and is based on profit before interest, taxes, depreciation, amortisation and special items adjusted for non-cash operating items, cash flow related to special items, changes in working capital, interest received and paid as well as income taxes paid. Interest received and paid includes settlement of interest-hedging instruments.

Cash flow from investing activities comprises acquisitions and divestments of enterprises, purchases and sales of intangible assets, property, plant and equipment as well as other non-current assets, and purchases and sales of securities that are not recognised as cash and cash equivalents. Cash flows from acquired enterprises are recognised from the time of acquisition, while cash flows from enterprises divested are recognised up to the time of divestment.

Cash flow from operating, investing and financing activities of discontinued operations are presented with comparative figures in separate lines in the statement of cash flow.

Cash flow from financing activities comprises changes in interest-bearing debt, lease instalments, purchase of treasury shares and dividends to shareholders.

Cash and cash equivalents cover cash and marketable securities with a remaining life not exceeding three months at the time of acquisition, and with an insignificant risk of changes in value.

The cash flow statement cannot be derived solely from information presented in the financial statements

Section 6

Other disclosures

This section contains statutory notes or notes that are presumed to be less important for understanding the Group's financial performance.

In this section

6.1. Incentive programmes.....	78
6.2. Related parties	79
6.3. Fees to auditors	80
6.4. Other financial commitments.....	80
6.5. Pledges and contingencies.....	81
6.6. Events after the balance sheet date	81
6.7. Overview of group companies at 31 December 2020.....	81

6.1 | Incentive programmes

In order to support the delivery of short- and long-term financial results, the Group has both short- and long-term incentive programmes for executives and managers.

Short-term incentive programmes (STI)

The short-term bonus programmes are closely linked to our strategy. The performance measures are focused on EBITDA, capex, fibre connection performance, dividend capacity and NPS, but with variance between Nuuday, TDC NET and Group Functions.

Bonus payments are calculated as the individual employee's basic salary multiplied by the bonus percentage multiplied by the degree of target fulfilment.

The bonus percentage for members of the Executive Committee is usually 50%. For other managers, the bonus percentage varies within a range of 10%-33%. The target fulfilment can be maximum 200%.

Long-Term Incentive Programme (LTI)

The LTI programme is cash based and its objectives are linked to the long-term strategy. The programme is revolving with grants given each year but with a 3-year vesting period, as the goals are principally set for a 3-year period. The objectives are EBITDA, cash flow, fibre connection performance, dividend capacity and NPS, but with variance between Nuuday, TDC NET and Group Functions. The expenses are recognised over the 3-year vesting period.

Bonus payments are calculated as the individual employee's basic salary multiplied by an LTI percentage multiplied by the degree of target fulfilment.

The LTI percentage usually varies within a range of 12%-36%. The target fulfilment can be maximum 200%.

Management Incentive Programme (MIP)

In July 2020, TDC Group established a new cash-based incentive programme for the Executive Committee and certain key managers (in all 37 participants). Under the MIP, the participants are required to place a deposit to the TDC Group to qualify for a return. The payback amounts are based on the development in certain financial performance measures of the group as well as certain business and Health & Safety KPIs over the period until 2023. The investment programme covers the time period 2019-2023. The participants have 40% of the deposits at risk of being lost in downside scenarios and the expected range of payouts are at 2x-4x the participants' deposit. The participants' total deposits amount to DKK 59m and the expenses for 2020 relating to the programme amounted to DKK 6m.

6.2 | Related parties

Name of related party	Nature of relationship	Domicile
DKTUK Limited, managed by Macquarie Infrastructure and Real Assets Europe Limited	Ownership	London, United Kingdom
Arbejdsmarkedets Tillægspension (ATP)	Ownership	Hillerød, Denmark
PFA Ophelia InvestCo I 2018 K/S, managed by PFA Asset Management A/S	Ownership	Copenhagen, Denmark
PKA Ophelia Holding K/S, managed by AIP Management P/S	Ownership	Hellerup, Denmark
TDC Pensionskasse	Pension fund	Copenhagen, Denmark

The Group has annual contributions paid to the pension fund, TDC Pensionskasse, see note 3.7.

The Group has property lease contracts with Arbejdsmarkedets Tillægspension (ATP) and PFA who are shareholders of the company. The lease payments amounted to DKK 231m (2019: DKK 228m).

Related parties also included the Group's joint ventures and associates shown in note 6.7.

The Group has the following additional transactions and outstanding balances with related parties:

The company's shareholders have provided shareholder loans to the company. See note 4.2 for further information.

The members of for the Board of Directors and the Executive Committee do not receive remuneration. Chairman of the Board of Directors of TDC, Michael Parton, provides consultancy services to

DK Telekommunikation ApS. The DKT Holdings ApS Group's key management personnel comprise TDC's Board of Directors and Executive Committee as well as the CEO of Nuuday A/S and the CEO of TDC NET A/S. Total remuneration to key management personnel amounts to DKK 66m (2019: DKK 157m).

Related parties (DKKm)	2020	2019
TDC Pensionskasse		
Other income	2	1
Investment advisory fees	0	17
Interest income of subordinated loan	1	1
Subordinated loan	149	149
Other receivables	1	0
Joint ventures and associates		
Income	2	1
Expenses	(3)	(4)
Receivables	9	3
Payables	0	(3)

6.3 | Fees to auditors

Fees to auditors elected by the Annual General Meeting (DKKm)	2020	2019
Statutory audit, PricewaterhouseCoopers	6	8
Other assurance engagements	1	2
Tax advisory services	0	1
Other services	3	4
Total non-statutory audit services, PricewaterhouseCoopers	4	7
Total, PricewaterhouseCoopers	10	15

Fee for other services than statutory audit services rendered by PricewaterhouseCoopers Statsautoriseret Revisionspartnerselskab to the Group amounted to DKK 4m and consisted mainly of the auditor's statements to customers regarding services provided by the Group and advisory, IT and tax services.

Worth noting

Commitments represent amounts DKTH Group has contractually committed to pay to third parties in the future. This gives an indication of future cash flows.

6.4 | Other financial commitments

(DKKm)	2020	2019
Lease commitments for short-term and low value leases		
Short-term leases	40	45
Low value leases	2	5
Total	42	50
Capital and purchase commitments		
Investments in intangible assets	386	553
Investments in property, plant and equipment	538	1,379
Commitments related to outsourcing agreements	251	428

Comments

From 1 January 2019, leases are recognised as a lease asset and a corresponding liability at the date at which the leased asset is available for use by the Group, except for short-term leases and low-value leases, cf. note 3.3.

6.5 | Pledges and contingencies

Pledges

Cash with a carrying amount of DKK 508m (2019: DKK 1,686m) is pledged as security for the Senior Facility Agreement.

Contingent liabilities

DKTH Group is party to certain pending lawsuits and cases pending with public authorities and complaints boards. Based on a legal assessment of the possible outcome of each of these lawsuits and cases, Management is of the opinion that these will have no significant adverse effect on DKTH Group's financial position.

6.6 | Events after the balance sheet date

There have been no events that materially affect the assessment of this Annual Report 2020 after the balance sheet date and up to today.

6.7 | Overview of group companies at 31 December 2020

Company name ¹	Domicile	Currency	Ownership share (%)
Nuuday			
Nuuday A/S	Copenhagen, Denmark	DKK	100

Notes to parent company financial statements

1 | Accounting policies

The Annual Report for 2020 for DKT Holdings ApS has been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union (EU) and further disclosure requirements in the Danish Financial Statements Act

The accounting policies are unchanged from last year.

Recognition and measurement

Assets are recognised in the balance sheet when it is probable that future economic benefits attributable to the asset will flow to the company, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow out of the company, and the value of the liability can be measured reliably.

Assets and liabilities are initially measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

Foreign currency translation

The functional currency is Danish kroner. The functional currency is the currency applied in the primary economic environment where the company operates. Transactions in currencies other than the functional currency are transactions in foreign currencies. The financial statements are presented in Danish kroner (DKK).

Transactions in foreign currencies are translated at the transaction-date exchange rates. Foreign exchange gains and losses arising from differences between the transaction-date rates and the rates at the date of settlement are recognised as financial income and expenses in the income statement.

Cash, loans and other amounts receivable or payable in foreign currencies are translated into the functional currency at the official exchange rates quoted at year-end. Currency translation adjustments are recognised as financial income and expenses in the income statement.

Investments in subsidiaries

Investments in subsidiaries are measured at cost. Where cost exceeds the recoverable amount, the carrying amount is written down to the recoverable amount.

Dividends received from investments in subsidiaries are recognised as income in the financial year when the dividends are distributed.

External expenses

External expenses comprise administration expenses etc.

Special items

Special items are significant amounts that Management considers are not attributable to normal operations such as restructuring costs and special write-downs for impairment of intangible assets and property, plant and equipment. Special items also include gains and losses related to divestment of enterprises, as well as transaction costs and adjustments of purchase prices relating to the acquisition of enterprises.

Income taxes

Tax for the year comprises current income tax, changes in deferred tax and adjustments from prior years and is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income.

Current income tax liabilities and current income tax receivables are recognised in the balance sheet as income tax payable or income tax receivable.

Deferred tax is measured under the balance-sheet liability method on the basis of all temporary differences between the carrying amounts and the tax bases of assets and liabilities at the balance sheet date. However, deferred tax is not recognised if the temporary difference arises from the initial recognition of goodwill or if it arises from initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit/loss.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, joint ventures and associates, except where the timing of the reversal of the temporary difference is controlled by the company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is measured on the basis of the tax rules and tax rates effective under the legislation in Denmark at the balance sheet date when the deferred tax is expected to be realised as current income tax. Changes in deferred tax as a result of changes in tax rates are recognised in the income statement except for the effect of items recognised directly in other comprehensive income.

Loans

Loans are recognised initially at the proceeds received net of transaction expenses incurred. In subsequent periods, loans are measured at amortised cost so that the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan.

2 | Income taxes

The effective tax rate deviates significantly from the Danish corporate income tax rate of 22% due to the Danish limitation on the tax deductibility of interest expenses.

DKT Holdings ApS participates in joint taxation with all its Danish subsidiaries. DKT Holdings ApS is the management company in the joint taxation. The jointly taxed companies in the DKT Holdings Group are jointly and severally liable for the total income taxes, taxes paid on account and outstanding residual tax (with additional payments and interest) relating to the joint taxation.

3 | Investments in subsidiaries

(DKKm)	2020	2019
Accumulated cost at 1 January	4,113	4,113

11 | Events after the balance sheet date

There have been no events that materially affect the assessment of this Annual Report 2020 after the balance sheet date and up to today.

Management statement

Today, the Board of Directors and the Executive Committee considered and approved the Annual Report of DKT Holdings ApS for 2020.

The Annual Report has been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and further requirements in the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and parent company financial statements give a true and fair view of the financial position at 31 December 2020 of the Group and the parent company and of the results of the Group and parent company operations and cash flows for 2020.

In our opinion, the management's review includes a true and fair account of the developments in the operations and financial circumstances of the Group and the parent company, of the results for the year and of the financial position of the Group and the parent company as well as a description of the most significant risks and elements of uncertainty facing the Group and the parent company.

We recommend that the Annual Report be adopted at the Annual General Meeting.

Independent auditor's report

To the shareholders of DKT Holdings ApS

Opinion

In our opinion, the Consolidated Financial Statements and the Parent Company Financial Statements give a true and fair view of the Group's and the Parent Company's financial position at 31 December 2020 and of the results of the Group's and the Parent Company's operations and cash flows for the financial year 1 January to 31 December 2020 in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act.

We have audited the Consolidated Financial Statements and the Parent Company Financial Statements of DKT Holdings ApS for the financial year 1 January - 31 December 2020, which comprise income statement and statement of comprehensive income, balance sheet, cash flow statement, statement of changes in equity and notes, including a summary of significant accounting policies, for both the Group and the Parent Company ("financial statements").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the financial statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Consolidated Financial Statements and the Parent Company Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement in Management's Review.

Management's responsibilities for the Financial Statements

Management is responsible for the preparation of Consolidated Financial Statements and Parent Company Financial Statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Disclaimer

Disclaimer

This report may include statements about DKTH group's expectations, beliefs, plans, objectives, assumptions or future events or performance that are not historical facts and may be forward-looking. These statements are often, but not always, formulated using words or phrases such as "are likely to result", "are expected to", "will continue", "believe", "is anticipated", "estimated", "intends", "expects", "plans", "seeks", "projection" and "outlook" or similar expressions or negatives thereof. These statements involve known and unknown risks, estimates, assumptions and uncertainties that could cause actual results, performance or achievements or industry results to differ materially from those expressed or implied by such forward-looking statements.

Any forward-looking statements are qualified in their entirety by reference to the factors discussed throughout this financial report. Key factors that may have a direct bearing on DKTH Group's results include: the competitive environment and the industry in which DKTH group operates; contractual obligations in DKTH group's financing arrangements; developments in competition within the domestic and international communications industry; information technology and operational risks including DKTH group's responses to change and new technologies; introduction of and demand for new services and products; developments in demand, product mix and prices in the mobile and multimedia services market; research regarding the impact of mobile phones on health; changes in applicable legislation, including but not limited to tax and telecommunications legislation and anti-terror measures; decisions made by the Danish Business Authority; the possibility of being awarded licences; increased interest rates; the status of important intellectual property rights; exchange-rate fluctuations; global and local economic conditions; investments in and divestment of domestic and foreign companies; and supplier relationships.

As the risk factors referred to in this report could cause actual results or outcomes to differ materially from those expressed in any forward-looking statements made in this Report, undue reliance is not to be placed on any of these forward-looking statements. New factors will emerge in the future that DKTH group cannot predict. In addition, DKTH group cannot assess the impact of each factor on its business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those described in any forward-looking statements.
