Statement by the Board of Directors and the Executive Board

Today, the Board of Directors and the Executive Board have discussed and approved the annual report of Medlog Denmark A/S for the financial year 1 January - 31 December 2019.

The annual report is prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2019 and of the results of the Company's operations for the financial year 1 January - 31 December 2019.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's operations and financial matters and the results of the Company's operations and financial position.

We recommend that the annual report be approved at the annual general meeting.

Mogens Møller Klintemark

Independent auditor's report

To the shareholders of Medlog Denmark A/S

Opinion

We have audited the financial statements of Medlog Denmark A/S for the financial year 1 January - 31 December 2019, which comprise income statement, balance sheet and notes, including accounting policies. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2019 and of the results of the Company's operations for the financial year 1 January - 31 December 2019 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements.

Management's responsibilities for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

Independent auditor's report

- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.

Management commentary

Business review

The object of the Company is to engage in container and terminal operation and other related activities.

Financial review

The income statement for 2019 shows a loss of DKK 3,819 thousand against a loss of DKK 486 thousand last year, and the balance sheet at 31 December 2019 shows a negative equity of DKK 2,455 thousand. Management considers the Company's financial performance in the year to be as planned.

Going concern assumption

Due to the financial position of the Company, and as the Company has more than lost its entire equity, the going concern status of the Company is subject to some uncertainty. Management strives at strengthening the Company's financial position and capital base and expects to achieve a profit for the coming financial year, which will restore the equity and share capital. Accordingly, the financial statements have been presented on a going concern assumption.

The going concern assumption is further described in note 2.

Implementation of new standard

Effective from 1 January 2019, Medlog Denmark A/S has implemented the new standard on leases, IFRS 16. When implementing IFRS 16, the Company has recognised a leased asset of DKK 23,195 thousand and a lease commitment of DKK 23,195 thousand as of 1 January 2019.

The effect of implementing IFRS 16 is further described in note 1.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies

The annual report of Medlog Denmark A/S for 2019 has been prepared in accordance with the provisions in the Danish Financial Statements Act applying to reporting micro class B entities and elective choice of certain provisions applying to reporting class C entities.

As the Company uses the exceptions according to the provisions applying to micro businesses, it does not disclose information on:

- ▶ debt falling due for payment after more than 5 years after the balance sheet date, see section 53
- ▶ certain special items, see section 67 a, (i) and (ii)
- ▶ number of average full-timers in the financial year, see section 68.

Changes in accounting policies

Effective from 1 January 2019, the Company has implemented IFRS 16 Leases.

The effects of IFRS 16 relating to recognition and measurement in the annual report are explained in the section below.

Reporting currency

The financial statements are presented in Danish kroner (DKK'000).

Leases

Effective from 1 January 2019, Medlog Denmark A/S has implemented the new standard on leases, IFRS 16, using the modified retrospective transition method and has therefore not restated the comparative figures, which are still presented in accordance with the rules of IAS 17 and IFRIC 4. The accounting policies of IAS 17 and IFRIC 4 are presented separately if they deviate significantly from the accounting policies of IFRS 16.

As opposed to previously, the Company must now recognise all leases in the balance sheet, including operating leases, with a few exceptions. Consequently, a lease commitment measured at the present value of the future lease payments, see description below, must now be recognised together with a corresponding leased asset adjusted for payments made to the lessor prior to the commencement of the lease and incentive payments received from the lessor.

In accordance with the transitional provisions of IFRS 16, when implementing the standard, the Company has chosen:

- Not to recognise leases with a term of less than 12 months or of low value.
- Not to reassess whether a contract is or comprises a lease.
- To determine a discount rate on a portfolio of leases with similar characteristics.

When assessing the future lease payments, the Company reviewed its operating leases and identified the lease payments related to a lease component that are fixed or variable but change in line with changes in an index or an interest rate. The Company has chosen not to recognise payments related to service components as part of the lease commitment.

When assessing the expected lease term, the Company identified the non-cancellable lease term of the lease plus periods covered by an extension option that Management is reasonably likely to exercise and plus periods covered by a termination option that Management is reasonably unlikely to exercise.

For leases on equipment and properties, the Company has assessed that the expected lease term is the non-cancellable lease term in the leases, as the Company has not historically exercised the extension options in similar leases.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

When discounting the lease payments to present value, the Company used its incremental borrowing rate, which is the cost of obtaining external financing for a corresponding asset with a financing period corresponding to the term of the lease denominated in the currencies in which lease payments are settled. The Company has documented the incremental borrowing rate of each portfolio of leases with similar characteristics.

When implementing IFRS 16, the Company has recognised a leased asset of DKK 23,195 thousand and a lease commitment of DKK 23,195 thousand, and thus, the effect on equity is DKK 0.

Since the leases classified as finance leases at 31 December 2018 amount DKK 0 thousand, no carrying amounts were recognised in connection with the implementation of IFRS 16.

At 31 December 2018, Medlog Denmark A/S had noncancellable operating lease commitments of DKK 14,439 thousand. At 1 January 2019, the Company reassessed the lease contracts and adjusted for service components of a negative DKK 341 thousand, thus, the Company had total operating lease commitments of DKK 14,098 thousand before discounting and DKK 13,407 thousand after discounting at an incremental borrowing rate at 1 January 2019. Thus, the discounting effect of the transition represents a negative DKK 691 thousand as of 1 January 2019. Furthermore, the Company formed its judgements and assumptions on lease payments for periods under extension options that are reasonably certain to be exercised of DKK 9,788 thousand, totaling DKK 23,195 thousand in lease commitments recognised at 1 January 2019 (IFRS 16).

The leased assets are depreciated on a straight-line basis over the expected lease term, which is:

Land and buildings: 20 years

When measuring the lease commitment, the Company has applied an incremental borrowing rate of 3.15 % for the leased assets representing what a lessee would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment.

Income statement

Revenue

The Company has chosen IFRS 15 as interpretation for revenue recognition.

Income from the rendering of services is recognised as revenue as the services are rendered.

Revenue is measured at the fair value of the agreed consideration excluding VAT and taxes charged on behalf of third parties. All discounts and rebates granted are recognised in revenue.

Cost of sales

Cost of sales includes the cost of goods used in generating the year's revenue.

Other external expenses

Other external expenses include the year's expenses relating to the Company's core activities, including expenses relating to distribution, sale, advertising, administration, premises, bad debts, payments under operating leases, etc.

Staff costs

Staff costs include wages and salaries, including compensated absence and pension to the Company's employees, as well as other social security contributions, etc. The item is net of refunds from public authorities.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Depreciation

The item comprises depreciation of property, plant and equipment.

Where individual components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items, which are depreciated separately.

The basis of depreciation, which is calculated as cost less any residual value, is depreciated on a straight line basis over the expected useful life. The expected useful lives of the assets are as follows:

Buildings	20 years
Fixtures and fittings, other plant and equipment	4-8 years

Depreciation is recognised in the income statement as amortisation, depreciation and impairment losses.

The basis of depreciation is based on the residual value of the asset and is reduced by impairment losses, if any. The depreciation period and the residual value are determined at the time of acquisition and are reassessed every year. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognised.

In case of changes in the depreciation period or the residual value, the effect on the depreciation charges is recognised prospectively as a change in accounting estimates.

Land is not depreciated, except right-of-use assets.

Financial expenses

Financial expenses are recognised in the income statements at the amounts that concern the financial year. Net financials include interest expenses as well as allowances and surcharges under the advance-payment-of-tax scheme, etc.

Tax

Tax for the year includes current tax on the year's expected taxable income and the year's deferred tax adjustments. The portion of the tax for the year that relates to the profit/loss for the year is recognised in the income statement, whereas the portion that relates to transactions taken to equity is recognised in equity.

The entity is jointly taxed with other group entities. The total Danish income tax charge is allocated between profit/loss-making Danish entities in proportion to their taxable income (full absorption).

Jointly taxed entities entitled to a tax refund are reimbursed by the management company based on the rates applicable to interest allowances, and jointly taxed entities which have paid too little tax pay a surcharge according to the rates applicable to interest surcharges to the management company.

Balance sheet

Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost includes the acquisition price and costs directly related to the acquisition until the time at which the asset is ready for use.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Gains or losses are calculated as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains and losses from the disposal of property, plant and equipment are recognised in the income statement as other operating income or other operating expenses.

Leases applicable from 1 January 2019

Leased assets and lease commitments are recognised in the balance sheet when the leased asset under a lease entered into regarding a specific identifiable asset is made available to the Company in the lease term, and when the Company obtains the right to almost all economic benefits from the use of the identified asset and the right to control the use of the identified asset.

On initial recognition, lease commitments are measured at the present value of the future lease payments discounted by an incremental borrowing rate. The following lease payments are recognised as part of the lease commitment:

- Fixed payments.
- Variable payments that change concurrently with changes to an index and an interest rate based on said index or interest rate.
- Payments overdue subject to a residual value guarantee.
- Exercise price of call options that it is highly probable that Management will exercise.
- Payments subject to an extension option that it is highly probable that the Group will exercise.
- Penalty related to a termination option unless it is highly probable that the Group will not exercise the option.

The lease commitment is measured at amortised cost according to the effective interest method. The lease commitment is recalculated when the underlying contractual cash flows change due to changes in an index or an interest rate if the Company's estimate of a residual value guarantee changes or if the Group changes its assessment of whether call options, extension options or termination options can reasonably be expected to be exercised.

On initial recognition, the leased asset is measured at cost, corresponding to the value of the lease commitment adjusted for prepaid lease payments plus directly related costs and estimated costs for demolition, repairs or the like and less discounts or other types of incentive payments received from the lessor.

Subsequently, the asset is measured at cost less accumulated depreciation and impairment losses. The leased asset is depreciated over the shorter of the lease term and the useful life of the leased asset. Depreciation charges are recognised on a straight-line basis in the income statement.

The leased asset is adjusted for changes to the lease commitment due to changes to the terms of the lease or changes to the cash flows of the lease concurrently with changes to an index or an interest rate.

Leased assets are depreciated on a straight-line basis over the expected lease term, which is:

Land: 20 years

Fixtures and fittings, other plant and equipment: 5 years

The Company has chosen not to recognise leased assets of a low value and short-term leases in the balance sheet. Instead, related lease payments are recognised on a straight-line basis in the income statement.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Impairment of fixed assets

The carrying amount of intangible assets, property, plant and equipment and investments in subsidiaries and associates is assessed for impairment on an annual basis.

Impairment tests are conducted on assets or groups of assets when there is evidence of impairment. The carrying amount of impaired assets is reduced to the higher of the net selling price and the value in use (recoverable amount).

The recoverable amount is the higher of the net selling price of an asset and its value in use. The value in use is calculated as the present value of the expected net cash flows from the use of the asset or the group of assets and the expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Previously recognised impairment losses are reversed when the reason for recognition no longer exists. Impairment losses on goodwill are not reversed.

Inventories

Inventories are measured at cost in accordance with the weighted average method. Where the net realisable value is lower than cost, inventories are written down to this lower value. The net realisable value of inventories is calculated as the sales amount less costs of completion and expenses required to effect the sale and is determined taking into account marketability, obsolescence and development in the expected selling price.

The cost of raw materials and consumables comprises the cost of acquisition plus delivery costs.

Receivables

Receivables are measured at amortised cost.

The Company has chosen IAS 39 as interpretation for impairment of financial receivables.

An impairment loss is recognised if there is objective evidence that a receivable or a group of receivables is impaired. If there is objective evidence that an individual receivable has been impaired, an impairment loss is recognised on an individual basis.

Receivables in respect of which there is no objective evidence of individual impairment are tested for objective evidence of impairment on a portfolio basis. The portfolios are primarily based on the debtors' domicile and credit ratings in line with the Company's risk management policy. The objective evidence applied to portfolios is determined based on historical loss experience.

Impairment losses are calculated as the difference between the carrying amount of the receivables and the present value of the expected cash flows, including the realisable value of any collateral received. The effective interest rate for the individual receivable or portfolio is used as discount rate.

Prepayments

Prepayments recognised under "Assets" comprise prepaid expenses regarding subsequent financial reporting years.

Cash

Cash comprise cash.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Income taxes

Current tax payables and receivables are recognised in the balance sheet as the estimated income tax charge for the year, adjusted for prior-year taxes and tax paid on account.

Joint taxation contribution payable and receivable is recognised in the balance sheet as "Joint taxation contribution receivable" or "Joint taxation contribution payable".

Deferred tax is measured according to the liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities.

Deferred tax is measured according to the tax rules and at the tax rates applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax. Deferred tax assets are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Changes in deferred tax due to changes in the tax rate are recognised in the income statement.

Liabilities

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. On subsequent recognition, financial liabilities are measured at amortised cost.

Other liabilities are measured at net realisable value.

2 Going concern uncertainties

Due to the financial position of the Company, and as the Company has lost more than its entire equity, the going concern status of the Company is subject to some uncertainty. Management strives at strengthening the Company's financial position and capital base and expects to achieve a profit for the coming financial year, which will restore the equity and share capital. In order to support the continued operations of the Company, Medlog SA (the sole shareholder) made a statement where it commits to provide liquidity to the entity as required in order to continue the operations of Medlog Denmark A/S and to be subordinated to the entity's other creditors until the submission of the financial statements for the financial year 2020. Management decided to continue the operations of the Company, as the sole shareholder of the Company has undertaken a commitment to provide liquidity and issued a statement that the shareholder has agreed to be subordinated to the Company's other creditors. Accordingly, the financial statements have been presented on a going concern assumption.

3 Events after the balance sheet date

No events materially affecting the Company's financial position have occurred subsequent to the financial year-end.

Other contingent liabilities

Medlog Denmark A/S is jointly taxed with other Danish group companies. As a group company, the Company has joint and several unlimited liability, together with other Danish group companies, for all Danish income taxes and withholding taxes on dividend, interest and royalties within the group of jointly taxed entities. The jointly taxed entities' total known net liability in respect of income taxes and withholding taxes payable on dividend, interest and royalties are recognised in the financial statements of the administration company, MSC Denmark A/S, CVR no. 32 55 13 35. Any subsequent corrections of income subject to joint taxation and withholding taxes, etc. could entail an increase in the entities' tax liability.

11 Collateral

As collateral for the Company's debt to Sparekassen Kronjylland, the Company has provided a floating company charge secured on its assets for at total amount of DKK 5,000 thousand. The total carrying amount of these assets is DKK 4,244 thousand. Furthermore, Medlog SA (the sole shareholder) has provided a guarantee for any obligation, which the Company has to Sparekassen Kronjylland.
