Generelt om indregning og måling

I resultatopgørelsen indregnes indtægter i takt med, at de indtjenes. Herunder indregnes værdireguleringer af finansielle aktiver og forpligtelser. I resultatopgørelsen indregnes ligeledes alle omkostninger, herunder afskrivninger, nedskrivninger og hensatte forpligtelser samt tilbageførsler som følge af ændrede regnskabsmæssige skøn af beløb, der tidligere har været indregnet i resultatopgørelsen.

Recognition and measurement in general

Income is recognised in the income statement concurrently with its realisation, including the recognition of value adjustments of financial assets and liabilities. Likewise, all costs are recognised in the income statement, including depreciations, amortisations, writedowns for impairment, provisions, and reversals due to changes in estimated amounts previously recognised in the income statement.

Aktiver indregnes i balancen, når det er sandsynligt, at fremtidige økonomiske fordele vil tilflyde selskabet, og aktivets værdi kan måles pålideligt.

Assets are recognised in the statement of financial position when it seems probable that future economic benefits will flow to the company and the value of the asset can be reliably measured.

Forpligtelser indregnes i balancen, når det er sandsynligt, at fremtidige økonomiske fordele vil fragå selskabet, og forpligtelsens værdi kan måles pålideligt.

Liabilities are recognised in the statement of financial position when it is seems probable that future economic benefits will flow out of the company and the value of the liability can be reliably measured.

Ved første indregning måles aktiver og forpligtelser til kostpris. Efterfølgende måles aktiver og forpligtelser som beskrevet nedenfor for hver enkelt regnskabspost.

Assets and liabilities are measured at cost at the initial recognition. Hereafter, assets and liabilities are measured as described below for each individual accounting item.

Visse finansielle aktiver og forpligtelser måles til amortiseret kostpris, hvorved der indregnes en konstant effektiv rente over løbetiden. Amortiseret kostpris opgøres som oprindelig kostpris med fradrag af eventuelle afdrag samt tillæg/fradrag af den akkumulerede amortisering af forskellen mellem kostpris og nominelt beløb. Herved fordeles kurstab og kursgevinst over aktivets eller forpligtelsens løbetid.

Certain financial assets and liabilities are measured at amortised cost, allowing a constant effective interest rate to be recognised during the useful life of the asset or liability. Amortised cost is recognised as the original cost less any payments, plus/less accrued amortisations of the difference between cost and nominal amount. In this way, capital losses and gains are allocated over the useful life of the liability.

Anvendt regnskabspraksis

Accounting policies

Anvendt regnskabspraksis

Accounting policies

Modervirksomheden og de danske tilknyttede virksomheder er omfattet af de danske regler om tvungen sambeskatning af koncernens danske virksomheder. Modervirksomheden er administrationselskab for sambeskatningen og afregner som følge heraf alle betalinger af selskabsskat med skattemyndighederne.

Den aktuelle danske selskabsskat fordeles ved afregning af sambeskatningsbidrag mellem de sambeskattede virksomheder i forhold til disses skattepligtige indkomster. I tilknytning hertil modtager virksomheder med skattemæssigt underskud sambeskatningsbidrag fra virksomheder, der har kunnet anvende dette underskud (fuld fordeling).

Balancen

Finansielle anlægsaktiver

Kapitalandele i tilknyttede virksomheder

Kapitalandele i tilknyttede virksomheder måles til kostpris. Er genindvindingsværdien lavere end kostprisen, nedskrives til denne lavere værdi.

Tilgodehavender

Tilgodehavender måles til amortiseret kostpris, hvilket sædvanligvis svarer til nominal værdi.

Der nedskrives til nettorealiseringsværdien med henblik på at imødegå forventede tab. Virksomheden har valgt at anvende IAS 39 som fortolkningsgrundlag ved indregning af nedskrivning af finansielle aktiver, hvilket betyder, at der skal foretages nedskrivning til imødegåelse af tab, hvor der vurderes at være indtruffet en objektiv indikation på, at et tilgodehavende eller en portefølje af tilgodehavender er værdiforringet. Hvis der foreligger en objektiv indikation på, at et individuelt tilgodehavende er værdiforringet, foretages nedskrivning på individuelt niveau.

The company is subject to Danish rules on compulsory joint taxation of Danish group enterprises. The company acts as an administration company in relation to the joint taxation. This means that the total Danish tax payable by the Danish consolidated companies is paid to the tax authorities by the company.

The current Danish income tax is allocated among the jointly taxed companies proportional to their respective taxable income (full allocation with reimbursement of tax losses).

Statement of financial position

Investments

Equity investments in group enterprises

Equity investments in group enterprises are measured at cost. If the recoverable amount is lower than the cost, writedown for impairment is done to match this lower value.

Receivables

Receivables are measured at amortised cost, which usually corresponds to nominal value.

In order to meet expected losses, impairment takes place at the net realisable value. The company has chosen to use IAS 39 as a basis for interpretation when recognising impairment of financial assets, which means that impairments must be made to offset losses where an objective indication is deemed to have occurred that an account receivable or a portfolio of accounts receivable is impaired. If an objective indication shows that an individual account receivable has been impaired, an impairment takes place at individual level.

Anvendt regnskabspraksis

Accounting policies

Nedskrivninger opgøres som forskellen mellem den regnskabsmæssige værdi af tilgodehavender og nutidsværdien af de forventede pengestrømme, herunder realisationsværdi af eventuelle modtagne sikkerhedsstillelser. Som diskonterings­sats anvendes den effektive rente for det enkelte tilgodehavende eller portefølje.

Likvide beholdninger

Likvide beholdninger omfatter indeståender i pengeinstitutter og kontantbeholdninger.

Selskabsskat og udskudt skat

Simple Revolution Holding ApS hæfter som administrations­elskab for dattervirksomhedernes selskabsskatter over for skattemyndighederne.

Aktuelle skatteforpligtelser og tilgodehavende aktuel skat indregnes i balancen som beregnet skat af årets skattepligtige indkomst, reguleret for skat af tidligere års skattepligtige indkomster og for betalte acontoskatter.

Selskabet er sambeskattet med koncernforbundne danske selskaber. Den aktuelle selskabsskat fordeles mellem de sambeskattede selskaber i forhold til disses skattepligtige indkomster og med fuld fordeling med refusion vedrørende skattemæssige underskud. De sambeskattede selskaber indgår i acontoskatteordningen.

Skyldige og tilgodehavende sambeskatningsbidrag indregnes i balancen som ”Tilgodehavende selskabsskat” eller ”Skyldig selskabsskat”.

Impairment losses are calculated as the difference between the carrying amount of accounts receivable and the present value of the expected cash flows, including the realisable value of any securities received. The effective interest rate for the individual account receivable or portfolio is used as the discount rate.

Cash on hand and demand deposits

Cash on hand and demand deposits comprise cash at bank and on hand.

Income tax and deferred tax

As administration company, Simple Revolution Holding ApS is liable to the tax authorities for the subsidiaries' corporate income taxes.

Current tax liabilities and current tax receivable are recognised in the statement of financial position as calculated tax on the taxable income for the year, adjusted for tax of previous years' taxable income and for tax paid on account.

The company is jointly taxed with consolidated Danish companies. The current corporate income tax is distributed between the jointly taxed companies in proportion to their taxable income and with full distribution with reimbursement as to tax losses. The jointly taxed companies are comprised by the Danish tax prepayment scheme.

Joint taxation contributions payable and receivable are recognised in the statement of financial position as ”Income tax receivable” or ”Income tax payable”.

Anvendt regnskabspraksis

Accounting policies

Udskudt skat måles efter den balanceorienterede gældsmetode af midlertidige forskelle mellem regnskabsmæssig og skattemæssig værdi af aktiver og forpligtelser opgjort på grundlag af den planlagte anvendelse af aktivet henholdsvis afvikling af forpligtelsen. Udskudt skat måles til nettorealisation sværdi.

Der foretages regulering af udskudt skat vedrørende foretagne elimineringer af urealiserede koncerninterne avancer og -tab.

Udskudt skat måles på grundlag af de skatteregler og skattesatser i de respektive lande, der med balancedagens lovgivning vil være gældende, når den udskudte skat forventes udløst som aktuel skat. Ændring i udskudt skat som følge af ændringer i skattesatser indregnes i resultatopgørelsen bortset fra poster, der føres direkte på egenkapitalen.

Udskudte skatteaktiver, herunder skatteværdien af fremførselsberettiget skattemæssigt underskud, måles til den værdi, hvortil aktivet forventes at kunne realiseres, enten ved udligning i skat af fremtidig indtjening eller ved modregning i udskudte skatteforpligtelser inden for samme juridiske skatteenhed. Eventuelle udskudte nettoskatteaktiver måles til nettorealisation sværdi.

Gældsforpligtelser

Øvrige gældsforpligtelser, som omfatter gæld til leverandører, tilknyttede virksomheder samt anden gæld, måles til amortiseret kostpris, hvilket sædvanligvis svarer til nominel værdi.

Deferred tax is measured on the basis of temporary differences in assets and liabilities with a focus on the statement of financial position. Deferred tax is measured at net realisable value.

Adjustments take place in relation to deferred tax concerning elimination of unrealised intercompany gains and losses.

Deferred tax is measured based on the tax rules and tax rates applying under the legislation prevailing in the respective countries on the reporting date when the deferred tax is expected to be released as current tax. Changes in deferred tax due to changed tax rates are recognised in the income statement, except for items included directly in the equity.

Deferred tax assets, including the tax value of tax losses allowed for carryforward, are recognised at the value at which they are expected to be realisable, either by settlement against tax of future earnings or by set-off in deferred tax liabilities within the same legal tax unit. Any deferred net tax assets are measured at net realisable value.

Liabilities other than provisions

Other liabilities concerning payables to suppliers, group enterprises, and other payables are measured at amortised cost which usually corresponds to the nominal value.
