LETTER FROM THE CEO

In 2019 we continued our performance improvement and took a number of initiatives to strengthen and transform our international delivery platform.

Revenue for the year was DKKm 870, which was an increase of 5% compared to the proforma accounts for 2018.

EBITDA (before special items) in 2019 was DKKm 153, which is an improvement of 12% from 2018 (excluding impact from IFRS 16 adoption). The EBITDA effect of implementing IFRS16 is an increase of DKKm 44. Since 2017 EBITDA (excluding impact rom IFRS16 adoption), has increased by 58%.

DKKm	2019	2018 ¹	2017 ¹
Revenue	870	831	759
EBITDA	153	97	69
EBITA	73	50	7

The improvement in EBITDA compared to last year was in line with our expectations and we consider the results satisfactory.

In 2019 we generated a positive cashflow from operating activities of DKKm 102 (2018 negative DKKm 1). The improvement was driven by increased operating profit, partly offset by increased income taxes paid.

The negative cashflow from investing activities amounted to DKKm 123, which mainly was related to the purchase of equipment and acquisitions of subsidiaries. The negative cashflow from investing activities amounted to DKKm 483 in 2018 of which DKK 413m was related to the acquisition of Falck Safety Services Holding A/S. The negative cashflow from financing activities was DKKm 18 (2018 positive DKKm 589). In 2018 the vast majority related to the financing of the acquisition mentioned before. The negative net cash flow for the year amounted to DKKm 39 (2018 positive DKKm 105).

The solvency ratio was 24% (2018 30%) at the end of December 2019.

New name

In January we launched our new name RelyOn Nutec and initiated a rebranding process of the companies in the group. On a global scale we launched a digital awareness campaign targeting relevant customer groups with a consistent and clear messaging across digital and social media: “New name, still your global trusted safety partner We have received good feedback from partners and customers for our new name.

Expanding our digital service offering

Building a strong digital service platform and global digital presence is a key element in our strategy and has been of highest priority in 2019. We have a unique opportunity to become the leading full service solution provider, supported by digital expansion.

Three strategic important digital acquisitions

Our digital strategy consist of three elements

- 1) Digital learning,
- 2) Simulation technology and
- 3) Competence and workforce management software

In 2019 we made three digital acquisitions that provide us a great starting point to meet our digital aspiration international. The three acquisitions are Cresent (for digital learning), Oiltec (for simulation technology) and Rider (for competence and workforce management software).

In August, we acquired **Cresent (Red Oak Ltd.)** based in Aberdeen. The company has a 37 years history within digital safety training, Control of Work and safety consultancy. Cresent has successfully been rebranded to RelyOn Nutec Digital. Acquiring Cresent was the first of many steps in building a world class digital learning capability. The digital learning capability will build on the platform and could potentially also include further acquisitions. We plan to build a globally accessible digital safety training offering, which enables us to deliver both the very important traditional hands-on training and the digital knowledge-based learning all from the same reliable source, supported by our global teams across the world.

In August, We acquired **Oiltec Solutions**, a Stavanger based company active within advanced simulation technology.

Over the past decades Oiltec has developed a cutting edge Drilling and Well simulation platform, as well as on- and offshore crane simulator capabilities. These services are being rolled out in select training centres across our footprint and Oiltec will form the basis of our future development within training simulation technology. The activities in Oiltec are integrated into our service offerings in Aberdeen Drilling School.

In October we acquired **Rider International B.V.** (Rider). They have developed the advanced workforce performance platform called ‘Rider’. This technology is geared towards Competence Management, Learning Management and real-time Workflow Management.

The Training and Competence Management aspects of the platform fit tightly with our rapidly increasing digital product portfolio. Expanding our services with this scalable purpose built workforce performance platform is one of our initiatives to become a full service provider in our segment and to bring more value to our customers. Rider is in the process of being rebranded and fully integrated under the RelyOn Nutec Group.

Global aligned business model

In 2019 we finalised the re-organisation of our business and started a global business transformation to deliver profitable growth. We have a real opportunity to leverage our leading international position by driving commercial excellence, service expansions and global alignment.

To build a solid foundation for transforming our business we initiated a strategically important project of migrating into the same ERP platform globally.

“We have kicked off our digital journey, both within simulation technology, digital enablement and online learning”

This is an important first step in aligning our IT structure globally. We went live in the second quarter. The roll-out was nearly completed by the end of December 2019.

In 2019 we have successfully integrated our businesses in the Netherlands by bringing together the Fire academy and our traditional safety training business.

We have also started further regionalising our business, driving synergies and learnings across borders and regions. We have made rotations and new hires in the global management team in order to serve the customer needs in all our markets.

Acquisitions and investments in training centers

We have facilities in 21 countries on five continents. We continuously evaluate our facilities and assess the quality and maintenance needs in order to live up to the standards that we and our customers require. We also assess if our sites are strategically correctly placed in order to be where the market is and moving towards.

That means that we from time to time need to refurbish or rebuild our sites, build new sites or as our history proves acquire companies to ensure that we keep our position as a the leading global safety and survival training provider.

In 2019 we finalised and opened a new facility in Cherating, Malaysia. The facility is strategically located at the gateway to the east coast of the Malaysian Peninsula and only few hours’ drive from Kuala Lumpur.

In 2019 we concluded that our facilities in the US had fallen behind our standards. We evaluated several options and concluded that acquiring the training facilities from Safety Management Systems LLC was the best option. The deal was concluded late December giving us state of the art training facilities in a very attractive area in Lafayette.

We have also significantly upgraded our training facilities in Houston and our facilities in Houma is currently being completely rebuild giving us up to date and state of the art facilities across our US operation.

¹BidCoRelyOn Nutec A/S was established on 30 March 2018, and acquired RelyOn Nutec on 20 September 2018. Due to limited comparability, we have prepared unaudited pro-forma adjusted comparatives figures for 2017 and 2018. The comparative figures have been prepared in accordance with the international accounting standards at that time, i.e. before adoption of IFRS 16.

Tailored booking engine and website to drive online

We launched our new integrated website and sales engine. The new platform will make it easier for customers to find and book courses at our more than 30 training centres. It will also facilitate sale of our increasing online learning catalogue and it will enable further digitalisation of services.

Safety is in our heart

We have instructed and guided in safety training for decades. Safety is our DNA and is of outmost importance to us. We continuously strive to provide a safe environment for our employees and delegates and we encourage them to think about safety in their daily work.

As a global safety and survival training company we feel it is our obligation to lead the industry. We have therefore initiated a global safety awareness program in 2019 that will continue into 2020. The program will share best practices and learnings across all of our regions.

Financing

Our leverage (NIBD-to-LTM EBITDA) has dropped from 4.5 to 3.4 in Q3 2019, but increased to 3.8 at the end of the year due to the acquisitions made as the EBITDA of the acquired entities were not fully included.

The importance of agility in the processes, and to reduce administrative work, we decided to initially acquire Cresent and Rider at a top-co holding company level supported by a bridge facility until a collective tap issue of our bond was issued in December. The tap issue was accompanied with a group contribution of DKKm 68.

Bond financing has increased with DKKm 45 as a consequence of the tap issue. The total financing therefore increased with DKKm 113.

Preparation

The annual report for 2019 has been prepared on the basis of IFRS as adopted by the EU as well as additional Danish disclosure requirements.

IFRS 16 was adopted with effect from 1 January 2019. Right of use assets accounts for DKKm 242 and the right-of-use liabilities amounts to DKKm 330 as of 31 Dec 2019 cf. note 3.3. to the financial statements.

BidCo RelyOn Nutec A/S was established on 30 March 2018, and acquired RelyOn Nutec on 20 September 2018, and due to this only limited comparable figures are available.

Outlook

We have had a very strong start of 2020. Bookings were strong through to last week of February and we entered March with the best order book for many years.

The outbreak of the Coronavirus disease (COVID-19) is unfortunate and critical to the global society. Management is committed to the health and safety of our customers and of course our own staff. Due to the measures introduced by the Governments in several countries, management has taken several measures since January 2020 to keep customers and employees safe during this unusual situation. This includes scaling down or closing temporarily some training sites and to lay off employees temporarily.

Obviously, this will have a negative impact on the Group's revenue as well as net profit for 2020; however, at this point the effect is too early to quantify. The extent of the impact will depend on how long the situation will continue. Therefore, management finds itself unable to disclose a reliable outlook for 2020.

Further reference is made to note 1.1 in the financial statements.

OUR BUSINESS AND INDUSTRIES

Safety, survival and skills training services for hazardous work environments

We provide safety, survival and skills training and services, helping organisations in high risk industries, improve safety for their employees and their customers.

We are the world's leading provider of multi-service safety, survival and skills training

From the principles of realistic and fully immersive training, we have grown to more than 30 sites in 21 countries and moved beyond basic safety and survival training, to include more advanced and technical training and corporate services to help companies better manage their overall training and competence needs. Knowledge and experience are transferable and we play an increasingly significant role in developing a safe workplace helping clients in high risk industries improve safety.

We emphasise preparedness in our training helping people to better understand their own emotional reactions in stressful situations knowing how the individual could react as well as what to do. We do realistic, real-life simulations to trigger emotional reactions and decision making under pressure in a controlled environment as close to reality as possible. By ensuring people are familiar with these emotions under expertly managed conditions, we give them the skills to respond under any crisis situation.

Our business is founded on the belief that real life practical training is the key to acquiring the competences needed to execute complex and dangerous tasks

Lead industry development and respond to new customer needs by embracing new technology

Our extensive experience has given us an unrivalled insight into the ever-changing needs of our customers in the market. As more and more customers look to outsource their training management needs, we have developed Training Management Services as a core part of our business today. As our customers' operations and people have become more technical, we have invested in new digital ways of learning, making the training experience increasingly realistic – and increasingly efficient.

We have steadily evolved from a Danish fire training provider founded in 1968, to a global multi-service safety, survival and skills training provider. We continue to be innovative building on the solid foundation of past experience

Technological advances are driving our industry to new levels of effectiveness. New tools and approaches such as 3D digital platforms, e-learning, simulation and blended training are making the training experience increasingly realistic – and increasingly efficient. We have inhouse digital capabilities and formed a series of partnerships with technology partners to help our customers embrace the many benefits of these exciting new training techniques.

Reliable and rock-solid

We serve more than 10,000 companies every year, from the sole employee contractor to some of the biggest companies operating in the high-risk industries across the world.

More than 250,000 course participants trust us with their safety development year after year because we put reliability and competence first. They trust us not only to improve their safety through training, but also in cases of emergency where experts are needed immediately to handle incidents and manage crises. Our maritime emergency response team react to critical and acute customer situations around the world, because they know we can be trusted even under the

most difficult circumstances.

Drive safety with a 360 perspective and mindset

Our fundamental belief is that safety requires a 360 degree perspective and mindset. We apply this principle to how we develop our business, investing in new technology, services and types of training to cover an increasing breadth of risk. We apply it to how we develop our training, to implementing new ways of improving training effectiveness and how we work with our customers to help them cover risk from all angles.

The industries we serve

Oil and gas

Everything from basic safety courses to high-level crisis management and contingency plans for entire organisations. The ideal combination of global consistency and local flexibility

Maritime

We have trained personnel from the maritime industry for over 30 years. Including the management of passenger safety in the cruise sector.

Renewables

Practical and realistic safety training designed specifically for the renewables sector. Dedicated facilities including wind turbine training towers and boat transfer simulators.

Other high risk industries

A wide range of training and competency solutions for construction, engineering, manufacturing, aerospace and aviation, food and drink, and defence.

TRAINING CENTERS

Our people

Our people are the backbone of the organisation; rock solid and dependable. Our more than 1,200 capable people around the world includes experienced instructors with relevant safety experience formed in military, industrial or professional safety and survival environments. Our instructors have more than 17 years of experience on average. We focus on helping people develop lifelong careers in our organisation. Our expert instructors have personal experience and insights that create an engaging and powerful training experience.

Our training facilities

Our modern training facilities are easily accessible for delegates in the global energy and maritime hubs and they play an important role in our offering. They are built to simulate real-life environments, including modern classrooms and training simulators.

Our facilities include training vessels, launching installations for rescue capsules, free-fall launching towers, fast rescue boats and indoor training pools equipped with wave, rain and wind machines, as well as helicopter underwater egress simulators.

We have advanced fire fighting facilities ranging from small basic fire scenarios to large advanced fires and fire and rescue in confined spaces.

We have a global footprint combined with a local anchoring and a unique understanding of the local regulatory, cultural and business environment.

Global accreditations and national standards

We have more than 30 internationally recognised accreditations to meet the global training needs. Our training is also tailored to meet national standards when required.

Our courses

We have more than 750 courses delivered in more than 30 centers.

Safety and survival courses teach delegates to survive and handle themselves in case of an emergency. Typically not specific to a certain job role.

Advanced and industrial fire courses teach delegates in advanced fire fighting methods and courses related to the emergency response team onboard a rig, platform, ship or onshore plant.

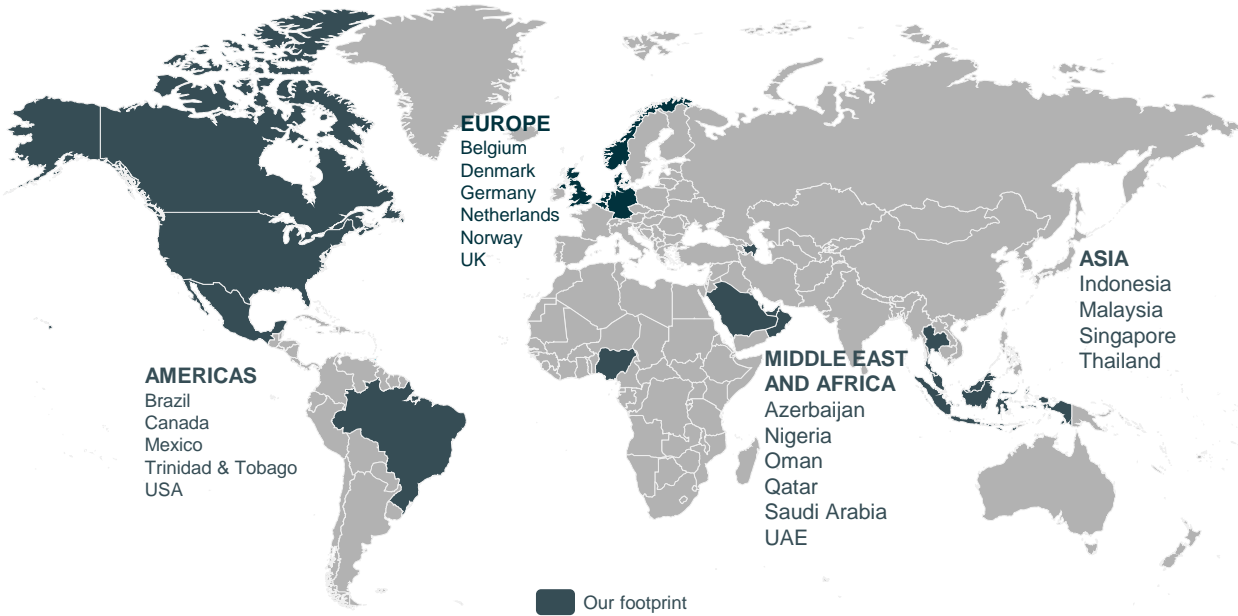

Skills and technical courses teaching job related skills such as drilling, lifting, rigging, crane and working at heights.

Crisis management courses aimed at the people responsible for the crisis management part of the organization, training and assessing their ability to manage major emergencies.

We train people in all aspects of training including, Life boat free fall simulation, first aid, sea survival, search and rescue, cruise ship evacuation, basic and advanced fire fighting, major emergency management, working at height, well control, lifting and rigging as well as related and client bespoke courses.

Our clients

We are the trusted global safety partner to more than 10,000 companies and more than 250,000 people trained every year in oil and gas, maritime, wind and other high risk industries. We work at all levels of the organisation to improve safety, from the executive suite to the worker on the floor, helping organisations address safety with a 360 degree perspective and mindset.

A SNAPSHOT OF OUR GLOBAL ACCREDITATIONS

DIGITAL SOLUTIONS

Building a solid digital service platform with digital solutions to supplement the core classroom based training services is an essential element in our business model.

Our digital solutions are centered around digital learning, competence and workforce management software and simulation technologies supported by the acquisitions of Cresent, Oiltec and Rider.

Digital learning

In 2019 we acquired Cresent as our starting point to enter the digital learning market. Cresent is rebranded to RelyOn Nutec Digital and has been through a significant ramp-up to become the cornerstone in our future digital learning aspirations. Cresent is a pioneer in digital learning and control of work systems to the oil and gas industry.

We have a strong portfolio of generic courses based on industry standards that we sell to our client in high risk industries. The portfolio of nearly 100 course titles covers the most demanded digital learning courses for the high risk industries and has the appropriate accreditations.

Our Learning Management Services (LMS) and digital learning offering portfolio is brand new and our content library is rapidly growing. The development roadmap for 2020 includes regional specific content and content to serve all our industries.

Competence and workforce management software

Our competence and workforce management software tracks the workforce compliance, competence and training requirements of the customers workforce. It is able to operationalise complex procedures and policies safely and in line with policies and regulations.

The software is a purpose build state of the art workforce performance management software to be sold stand alone and additionally forms the digital backbone of our Training Management Services (TMS) and Competence Management Services (CMS)

The software is integrated with our booking system, with training calendars of all our training centre's, realtime booking and availability checking and our digital learning content is preloaded within the software.

The software is developed specifically for oil and gas drilling, production and refinery operations, however it can be seamlessly deployed across all high risk industries.

The software has a modular approach, where the customer can pick and choose what they need, and overtime add more modules as required.

It integrates with the customers existing IT systems including all the major ERP systems and it has on and offline capabilities. The product is compatible with all modern devices for offline and online and it can be deployed as: SaaS, cloud, on premise, central or decentral installation

The software can generate customizable dashboards and reporting adjusted to customer specific KPI's and contains powerful data analysis.

Simulation technology

Simulator training, is a proven method of enriching the learning experience and increasing knowledge retention.

Our digital solutions

	Digital learning	Competence and workforce management software	Simulation technology

Our simulator technology is currently focused around drilling and crane simulation. The technology is state of the art and widely accepted as industry leading. Furthermore, the technology is capable of being utilised in the other high-risk industries we serve which represents new business opportunities for RelyOn Nutec.

Our simulator training enhances a team's practical understanding of changes which occur during drilling operation. Our highly qualified facilitators and practical instructors encourage the participants to work as a team through group decision making, problem solving, and general team building.

By utilising our simulators, we can fully immerse teams into the real drilling conditions they would experience offshore – enabling them to drill a well, react to changes as they happen, and take actions necessary to restore the well, all in a safe environment. The training employs real-time incident scenarios on the simulator, followed up by class-based feedback discussions and reflection. The simulators can incorporate the client's actual well data which is used to create realistic well-specific scenarios.

The client's virtual well can be drilled from the safety of our full-size simulator room, ensuring that the participants' new found knowledge is relevant to their upcoming operations and their learning can be applied to real life scenarios.

The combination of a world class simulation development team and our operationally experienced coaches and market leading technical expertise is bringing our unique solutions to the forefront of advanced drilling and well engineering training.

With total ownership of advanced simulator technology, we can now produce, manage and customise our simulators to our clients' specifications, creating the high quality drilling and crane simulation that international operators and contractors have long been asking for. The simulation technology gives us the opportunity to offer our clients the same world class and true-to-life training facilities wherever their operations are located.

VALUE ADDED SERVICES

Outsourced Training Management Services

With Training Management Services (TMS) we help our customers in high risk industries manage their training and licensing, while reducing administration costs and ensuring compliance, controlled and deployed via our workforce management system.

Effectively managing company-wide training needs is a complex task. TMS is the full or partial outsourcing of these tasks, to let the customer focus on its core business.

With access to over 750 training courses (classroom, online, onsite) our TMS specialises in the management of all the customer organisations training and competence requirements, to allow them to free up valuable company resources. We map training needs against company and regulatory requirements and manage the customers organisation's certifications. We identify the most suitable vendors and offer the benefit of a larger consolidated volume.

We are equipped to handle all aspects from initial bookings, communication with participants to invoicing. We are available to handle travel and accommodation arrangements. We offer consolidated invoicing and payment management with the capability to produce detailed reports and spend overview.

With our outsourced TMS the customers global workforce is always properly trained and certified in the most cost-effective way. The key benefits for our customers of our TMS is reduced administrative work, improved operational efficiency, reduced training and logistics costs, reduce risk from non-compliance and competitive advantage by responding quickly to ever changing requirements.

Safety consultancy

All safety consultancy for high risk industries are aimed at safe working practices, guaranteeing safety for people, economic continuity, and preserving the reputation of the company. At each level people involved are taught to act effectively and bring the incident under control as soon as possible by taking the correct (control) measures.

Our safety consultancy can consult in all aspects of safety related to working in high risk industries including processes, policy review, procedures, culture, equipment, environment, risk management, preplanning, scenario management, emergency planning, contingency planning and other foreseen and unforeseen risk to safety that a customer might face.

What steps must be taken in order to implement a policy? What should you do tomorrow to achieve future goals? It is this comprehensive expertise that distinguishes our consultants from the rest. The realization and implementation of these plans will further optimise safety.

Our consultants are based all over the world and can perform assessment and analysis onsite or where ever it is most appropriate given the customer need. A structured methodology is required to ensure that all areas have been addressed.

Emergency response and stand by services

Our Emergency Response Team (ERT) in the Netherlands is on hand to assist with all of the following 24 hours a day, 7 days a week and 365 days a year:

- Fires on board ships;
- Industrial fires;
- Incidents involving hazardous substances;
- Damping down fires or spontaneous combustion;
- Assistance of fire service operations;
- Aftercare following initial firefighting activities;
- Fire safety during and after a fire;
- Providing firefighters;
- Providing firefighting specialists.

Our team consists of a number of (firefighting) specialists. It is always available to assist with emergencies, wherever they might happen in the world. It has its own personal protective equipment and the relevant specialist materials.

The ERT is available to assist with fires on board ships, industrial fires and incidents involving hazardous substances. The team:

- is led from Rotterdam in the Netherlands;
- consists of a number of skilled and well-trained specialists who are familiar with the maritime and industrial sectors and know how to respond to incidents involving hazardous substances;
- has more than 30 years of experience in the provision of emergency assistance to the maritime and petrochemical industries;
- has gained extensive experience, having attended over 115 incidents in every corner of the world;
- is able to assemble at Amsterdam or Rotterdam airport within three hours of an initial call-out and virtually always arrives at the scene of an accident within 24 hours;
- works with global maritime salvage companies when incidents involve ships.

CORPORATE GOVERNANCE

Board of Directors

The general Meeting elects the members of the Board of Directors.

The Board of Directors shall annually revise and oversee the overall strategy, business and action plan for RelyOn Nutec and approve the annual budget for the next financial year.

The Board of Directors has decided not to establish an Audit Committee, however the Board of Directors handles the tasked related to such an committee.

Outline of responsibility:

- Lay down general business and management principles of the Company
- Decide on strategy and risk policies for the Company
- Supervise the performance of the Company, the Executive Management and secure the proper organization of the Company
- Monitor the independence of the external auditors and the planning, execution and the opinion of the external auditors.
- Review the Company's financial position, capital resources and reporting on financials and performance
- Appoint members of the Executive Management

The Board of Directors will convene at least four times per year.

Executive Management

The Executive Management is appointed by the Board of Directors and consist of the Chief Executive Officer (Group CEO)

The Executive Management is responsible for RelyOn Nutec's day-to-day management of the Company in accordance with the directions provided by the Board of Directors, among others comprising:

- Develop the business and provide strategies for the Company to be approved by the Board of Directors
- Implement the strategy for the Company and execute on investments and divestments
- Develop the organizational structure of the Company and allocate resources
- Drive and monitor the performance of the Company
- Prepare internal and external financial reporting
- Establish internal policies and procedures for relevant topics such as accounting, finance, IT, etc.
- Oversee Enterprise Risk Management
- Report to the Board of Directors

RISK MANAGEMENT

RelyOn Nutec consistently identifies, manages and monitors risks globally and rapidly shares risk mitigation solutions against critical risks.

RelyOn Nutec maintains a reporting and review process to create an overview of risks and full transparency into mitigating controls for the entire Group and its constituent entities, divisions and business streams.

The objective is to manage top risks in order to deliver the best possible service to customers, protect the value of the business, safeguard future earnings and reduce costs associated with risk events.

Risk is defined as “all threats to the current value of the business and its future cash flows”.

Identification
Identification is made in a joint effort between group functions and the local teams. Evaluation and control are performed through the global risk management platform.

Evaluation
All identified risks are evaluated through the global risk management platform. Risk assessment is rated for impact and likelihood.

Control
Risk response actions depend on the evaluation. Response actions have the nature of control, awareness, communication and/or other preventing actions.

Report
Communication and monitoring are made through the global risk management platform.

An overall report is presented to the management, which includes risk assessment and risk response for the following risks:

- 1. Global economic crisis
- 2. Material slowdown in the oil and gas industry
- 3. Safety incidents
- 4. Cybercrime and IT breakdown

The above risks are not prioritized or ranked. Definition and mitigation of risk are outlined on page 20. Financial risk are outlined in the notes section 4.

Reference is also made to note 1.1 in the financial statements.

Risk management principles
The Board of Directors assist the Executive Management in overviewing the Company’s overall risk-taking while the Executive Management is responsible for identifying and analyzing material risks and developing the Company’s risk management.

Financial reporting and internal controls
The Board of Directors and the Executive Management regularly assess material risks and internal controls in connection with the Group’s financial reporting process. The Board of Directors monitors the process of financial reporting on an ongoing basis, as well as the adequacy and effectiveness of the established internal controls.

The Board of Directors and the Executive Board define the guidelines for procedures and internal controls to which compliance must be kept.

The adopted policies, guidelines and procedures are updated and communicated internally on a regularly basis. Any material weaknesses, inadequacies and violation of adopted policies, business procedures and internal controls are reported to the Board of Directors.

Recommendation outlined by Danish Venture Capital Association
Polaris Private Equity IV K/S (Polaris) is a private equity company. Polaris is a member the Danish Venture Capital Association (DVCA) and therefore covered by DVCA’s guidelines and recommendations for responsible ownership and corporate governance for private equity companies and their portfolio companies.

Thus, RelyOn Nutec must disclose how we address the recommendations, using a “comply or explain” approach. RelyOn Nutec complies with all the recommendations of September 2019 except recommendation 3.1. with respect to establishment of an audit committee. Considering the size and structure of RelyOn Nutec, the Board of Directors has decided not to establish a formal Audit Committee. Instead the such tasks are undertaken by the Board of Directors.

For further information of the recommendations, please refer to www.DVCA.dk.

RISK MANAGEMENT - continued

1 Global economic crisis

Risk

Our operation and activities are global and a global economic crisis could effect us by customers cutting resources, lowering activity and limit travel.

Mitigation

Variable and flexible cost base
Distributed foot print and global multiskilled workforce

2 Material slowdown in the oil and gas industry

Risk

The majority of activities is related to the oil and gas market. Profitability and cash flow are dependent on the level of oil and gas capital spending by such companies who are dependent on the market price of oil and gas.

Mitigation

Roll-out of Competence and workforce management software and Outsourced TMS, which ensures volume, stickiness and market intelligence.

Product development and entry into new industries are ongoing, however, with a decreased focus towards the oil and gas market.

3 Safety incidents

Risk

Incident occurs where student is severely injured or even killed.

Mitigation

Safety instructions prior to the start of any training sessions. Documentation of incidents and close communication with customers about any incidents.

4 Cybercrime and IT breakdown

Risk

The Group depends on information technology to manage critical business processes, including administrative and financial functions. Cyber attack or failure of the Group's information technology systems could cause transaction errors and loss of customers, and could have an adverse effect on the Group's business, earnings, and financial position as well as future prospects.

Mitigation

The Group has a dedicated IT Department to monitor business critical application.

The Group aims at using standard systems, whenever possible and implementation of additional cyberattack mitigation measures. The purpose is to lower exposure and increase the ability to receive assistance from external resources.

CORPORATE SOCIAL RESPONSIBILITY

RelyOn Nutec has effected a significant transformation and optimisation in 2019. Corporate Social Responsibility (CSR) and Environmental Social Governance (ESG) has been – and will continue to be - one of the key areas of focus.

We are the leading provider in safety and survival training and services, helping organisations in the oil and gas, maritime, renewables and other high risk industries to improve safety for their employees and their customers. Our purpose is to transfer knowledge and experience needed to execute complex and dangerous tasks and provide an emergency response team in cases of crisis where experts are needed immediately. We are committed to do so in a safe, responsible and sustainable way.

Signatory to the UN Global Compact and approach to CSR
The board of directors of RelyOn Nutec approved in 2019 a Policy on Corporate Social Responsibility, which reflects RelyOn Nutec's business behaviour. The policy is supplemented by the Code of Conduct and the Code of Conduct for business partners supported by specific policies and procedures.

The policies and codes of conduct are aligned with the UN Guiding Principles on Business and Human Rights to (UNGPs) and the OECD Guidelines for Multinational Enterprises (OECD) and are the foundation to ensure that we have a proper framework for our sustainability and CSR efforts.

COMMUNICATION ON PROGRESS

This is our **Communication on Progress** in implementing the principles of the **United Nations Global Compact** and supporting broader UN goals.

We welcome feedback on its contents.

We have also become a signatory to the UN Global Compact. This commitment and work will continue and be further developed and improved in 2020 also with increased focus on sustainability.

The Policy on Corporate Social Responsibility provides the framework for RelyOn Nutec's work with Corporate Social Responsibility and sustainability and shall ensure that RelyOn Nutec contributes to and shows the necessary care by mitigating any adverse impacts to core principles for sustainability.

RelyOn Nutec's Policy and Codes of Conduct, outlining the expectations to and reflecting the principles on how we conduct our business, and how our providers and employees are expected and required to act.

The Policy on Corporate Social Responsibility and the Codes of Conduct can be found on our [website](#)

Commitment and implementation
RelyOn Nutec's commitment is based on the agreed core principles for sustainable development; human rights (including labour rights), environment (including climate), and anti-corruption.

We naturally comply with local legislation, wherever we operate. In addition to this, our commitment means that RelyOn Nutec continuously identifies, prevents or mitigates our risks of adverse impacts in relation to the core principles for sustainability. We will make impact assessments and communicate how we manage such impacts.

We will seek to contribute proactively to sustainable development, where it makes most sense and where we can have the best impact. The UN's Sustainable Development Goals (SDGs) also play a part in assessing where our business activities have the greatest and in conveying to our stakeholders how we seek to make a difference. All SDGs are relevant to RelyOn Nutec, however our business activities have a bigger impact on reaching some goals more than other. We wish to help by doing what we do best.

Primary CSR Related Risks and Policies

LABOUR

The RelyOn Nutec Group wishes to contribute to the society and to the people that we engage with when conducting our business. Our commitment to respect and protect human rights is among other things following the UN Guiding Principles on Business and Human Rights and inspired by International Labour Organization's Declaration on Fundamental Principles and Rights at Work.

RelyOn Nutec believes that an engaged and motivated workforce that is offered development opportunities will produce better quality work and be more satisfied. RelyOn Nutec invests in the development of employee skills, knowledge and competencies as this is essential for the success of the group and continued satisfaction of the employees. We want our employees to be successful in their jobs and to grow their careers.

RelyOn Nutec has numerous policies in place to ensure the well-being, health and safety of our delegates and employees, including policy on health and safety, on safe driving and on human rights. With respect to health and safety we have in 2019 continued to work systematically to implement improvements across the RelyOn Nutec Group. We focus on minimising risks and raising awareness about health and safety for our employees, both physical and mental.

We are committed to ensure that every employee feels valued and safe in their jobs, and we work continuously to bring out the best in our people by:

- offering development opportunities for all employees and
- providing safe and healthy workplaces

As an example, we have in 2019 initiated a new partnership regarding travel safety to ensure that our employees are safe, also when travelling, and that all appropriate precautionary measures are in place.

HUMAN RIGHTS

Further, RelyOn Nutec has continuous focus on ensuring that the employees and customers' personal data is not misused. This is ensured by compliance initiatives and ongoing projects to continuously ensure the highest standard of data protection. Data protection projects initiated in 2017 and 2018 were continued throughout 2019, including implementation of an improved IT tool to support the data protection governance and life cycle.

In 2019 we implemented a dataprotection module in our risk and compliance tool. The Data Protection governance and compliance work is anchored with the Group General Counsel.

ENVIRONMENT

RelyOn Nutec's vision on environment and climate is included in the Policy of Corporate Social Responsibility and will be a significant part of the impact assessments. In addition, a number of environmental elements are already an integral part of our business behaviour, such as ensuring cleaning of and reuse of water at training facilities, and the focus on the environmental and sustainable efforts and initiatives will be increased in 2020.

Several of our sites has been environmental certified in 2019 and we have implemented the environmental standard in all of our sites to comply with increasingly stringent environmental laws and regulations.

ANTI-CORRUPTION

RelyOn Nutec conducts business in accordance with all relevant laws and regulations in all counties including the FCPA and the UK Bribery Act and adheres to all policies and procedures. RelyOn Nutec operates in areas of the world where corruption is not an uncommon practice. Therefore, it remains crucial that appropriate policies and procedures are duly implemented and that measures are taken to mitigate this risk and to prevent non-compliant practices.

In 2019 a revised Code of Conduct was approved by the board of directors and implemented across RelyOn Nutec. In addition a new reporting process has been implemented to ensure that appropriate reporting measures are available. When an incident is reported – regardless of where in the world it has occurred – we investigate thoroughly and make sure that appropriate action is taken.

Continuous focus will remain on anti-corruption and additional initiatives will be implemented in order to mitigate and prevent non-compliant practices.

Governance documents and procedures have been prepared and implemented to support and ensure that the above vision is complied with. Further, a management system is in place in order to support the conduct of the impact assessments and ensure due implementation, improving performance and ensuring an appropriate culture complying with the policies and procedures in place.

Business model

For a description of our business model please refer to *our business* section from page 8.

Activities and results 2019

It is assessed by Executive and Group Management that the continued work with and focus on human rights, ESG and CSR contributes positively to RelyOn Nutec's reputation and performance.

The governance and processes around the CSR and sustainability related activities were established and implemented during 2019 and will further be improved during 2020.

Conducting impact assessments to further understand our impact is key to development and improvement. We wish to increase transparency in our sustainability efforts and to improve the data quality and reporting as we improve the governance across the business.

By knowing the material topics for our corporate responsibility efforts, we can focus our efforts on improvement and change. Within each of the key areas we will work to minimise our impacts and, where possible, make a positive difference. In any scenario, our corporate responsibility efforts follow the company's strategy of pursuing profitable growth and value creation for all stakeholders.

RelyOn Nutec ascertains that the fundamental work with respect to assessing and mitigating potential negative impacts on the international principles in itself will ensure that RelyOn Nutec contributes to fulfill a number of the sustainable development goals (2015-2030).

The overall aim of RelyOn Nutec's CSR and ESG is mainly to create the foundation and the framework for a trusting, appropriate and evolving cooperation, where social responsibility becomes a natural and core part of the RelyOn Nutec business.

Outlook and activities 2020

As part of RelyOn Nutec's continued transformation, management will, in 2020 continue its dedicated work with CSR and ESG following the UN Guiding Principles on Business and Human Rights and the OECD Guidelines.

By committing to sustainable development and by establishing due diligence, RelyOn Nutec wishes to demonstrate its ability to effectively prevent or mitigate adverse impacts on international principles of key importance to sustainable development; i.e. principles on human rights, on environment and on anti-corruption.

Following the completion of the first two impact assessments during 2020 we will be able to report more detailed area by area and to report on and measure our outcome and progress to be included in the future annual Communication of Progress in terms of the UN Global Compact.

RelyOn Nutec appreciates that transparency and accountability in CSR will improve its ability to attract and retain customers, partners, employees and investments.

The key initiatives for the work with CSR and sustainability in 2020 are i.a.:

- 1. Perform two impact assessments
- 2. Effect global employee survey
- 3. Implement and roll-out of the Code of Conduct requirement towards business partners
- 4. Initiate and prepare CSR strategy and vision with specific targets

The continued transition has offered us an opportunity to strengthen the corporate responsibility area – both within the organisation and in terms of setting more ambitious targets – so at the end of 2020, we introduce a CSR strategy with more ambitious targets. The CSR strategy will be serving as a guide for RelyOn Nutec's future sustainability efforts.

We are also going to refocus our efforts around an even stronger global focus on HSEQ (Health, Safety, Environment and Quality), and higher ambitions for sustainability. We have a global dedicated HSEQ team to develop and uphold a high-quality and transparent framework for HSEQ standards that local entities must follow. This includes continued implementation of the global ISO certifications.

DIVERSITY

RelyOn Nutec’s core principle for diversity is to ensure equal conditions and opportunities for every individual, including gender diversity. RelyOn Nutec’s employees have different culture, backgrounds and religion and we are continuously committed to and promoting an inclusive and balanced workforce.

The core principle for diversity is that there must be equal conditions for all, this applies i.a. both with respect to external candidates applying for leadership positions within RelyOn Nutec and regarding internal promotions.

Following this principle, RelyOn Nutec’s approach to gender diversity is that the composition of the management levels, over a number of years, should reflect the composition of the wider group of employees. We always make jobs postings gender neutral also for our management team and we strive to include at least 50% of the underrepresented gender in the field of candidates.

The composition of employees of RelyOn Nutec consists of 34 % women and 66% men. The management level below Group Management consists of 21 % women and 79 % men. The board of directors consist of four men, while Group Management in 2019 consisted of four men and one woman. The target in relation to gender composition of Group Management is that at least 30% of Group Management is of the underrepresented gender.

As mentioned RelyOn Nutec currently has no female board members. The board of directors are aware of this underrepresentation and wishes to support and contribute to the composition of the board being more diverse. It is the target that before 2023 the board of directors must consist of at least 1/3 of the underrepresented gender. In 2019, we added one new board member. In the search process it was a focus area to consider candidates of the underrepresented gender. The chosen board member was assessed to be the most qualified candidate for the position.

The target for the composition of the board of directors is ambitious considering the industry and the fact that women have traditionally not had a high representation. If new candidates are considered for the board of directors, gender will be part of the assessment, but the relevant and necessary professional competences will remain the most important.

A diverse organisation, reflecting the composition of the customers and the society in general, will ensure a stronger company, increased competitiveness and a good and innovative working environment. RelyOn Nutec wishes to develop and utilize the full potential with all employees and that all employees can develop their full potential in an expedient work-life balance.

RelyOn Nutec continuous to focus on diversity including gender composition and equal rights across the group. Further assessments will be initiated to monitor and improve diversity within RelyOn Nutec and will also be part of the impact assessments that will be performed on entity level across the group.

Note 1.4:	Critical accounting estimates and judgements	33

NOTE 1.1 CAPITAL RESOURCES AND GOING CONCERN

The outbreak of the Coronavirus disease (COVID-19) is unfortunate and critical to the global society. We are committed to the health and safety of our customers and of course our own staff. Due to the measures introduced by the Governments in several countries, we have taken several measures since January 2020 to keep customers and employees safe during this unusual situation. This includes scaling down or closing temporarily some training sites and to lay off employees temporarily.

Obviously, this will have a negative impact on the Group's revenue as well as net profit for 2020; however, at this point the effect is too early to quantify. The extent of the impact will depend on how long the situation will continue.

Management is monitoring the impact of COVID-19 very closely to be able to take the necessary measures to mitigate adverse effects on the operating results, net working capital and liquidity. Management has developed a number of scenarios and are prepared to implement contingency plans as and when deemed necessary.

Further, management considers the implications of COVID-19 a subsequent event occurred after the balance sheet date (31 December 2019), which is therefore a non-adjusting event to the Group. In consequence, the assessments of impairment indications are and the impairment test made by management at 31 December 2019 is based on the future cash flows expected by management at 31 December 2019, which may differ from the cash flows expected by management at the time of adoption of the Annual Report.

The above implies that the Group's liquidity can come under considerable pressure. The Group's ability to continue operations depends on a number of precarious conditions, including the prevalence of COVID-19, the impact of initiatives taken to reduce to the spreading of the virus, economic aid packages provided by governments, financial institutions etc. to the business community, the rate at which the economy evolves subsequently, further capital injections from shareholders and refinancing.

Management is at present looking into such measures, hereunder especially economic aid packages, further capital injections from shareholders and refinancing. At present, no such agreements have yet been concluded.

It is management's expectation that the measures to be taken will ensure that the Group and the Company has sufficient capital resources to continue their operations. Management therefore submits the annual report on the assumption of going concern. However, the above also by nature indicate that a material uncertainty exists that may cast significant doubt on the Group's and Company's ability to continue as a going concern.

NOTE 1.2 – BASIS OF PREPARATION

The activity of BidCo RelyOn Nutec A/S and group companies (the Group), consists of holding shares in subsidiaries and through the subsidiaries operate in the business of safety training services to the oil and gas, wind and maritime industry globally, and other related business.

The financial statements has been prepared under the historical cost convention, except that derivatives and financial instruments are measured at fair value. The financial statements are presented in Danish Kroner (DKK), which is the parent company's functional currency. The financial statements are presented in DKK million.

The financial statements comprise the financial year 1 January – 31 December 2019. The consolidated financial statements include comparative figures from 30 March 2018 to 31 December 2018. The Group was established as of 20 September 2018.

BidCo RelyOn Nutec A/S is a private limited company incorporated in Denmark and is listed on Oslo Stock Exchange (Oslo Børs) due to a bond issue.

In general, the accounting policies are described in each of the specific notes to the financial statements, which also include additional description of the most significant accounting estimates and judgements.

NOTE 1.3 - ACCOUNTING POLICIES

The consolidated financial statements for BidCo RelyOn Nutec A/S have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union as well as additional Danish disclosure requirements applying to entities of reporting class D.

Besides the below mentioned adoption of IFRS 16, the accounting policies applied remain unchanged compared to last year.

Interest payments has been reclassified from investing to financing activities in the cash flow statement. In addition, minor reclassifications and adjustments have been made in the comparative figures.

Adoption of new and amended standards

We have implemented International Financial Reporting Standards (IFRS) as issued by the IASB and amendments effective as of 1 January 2019 as adopted by the European Union. Of the new standards and amendments implemented in 2019, only IFRS 16 Leases has had a material impact on the Group's financial statements .

Adopting of IFRS 16

IFRS 16 was issued in January 2016 and has resulted in almost all leases being recognized on the balance sheet by lessees, as the distinction between operating and finance leases has been removed. Under the new standard, an asset (a right-to-use) and a financial liability to pay rentals are recognized. The only exceptions are short-term and low-value leases.

At the commencement date of a lease, a lessee is required to recognize a liability to make lease payments over the lease term (i.e. the lease liability) and an asset representing the right-to-use the underlying asset during the lease term (i.e. the right-of-use asset). Interest expense on the lease liability and the depreciation expense on the right-of-use asset will be separately recognized.

The Group has applied IFRS 16 using the modified retrospective approach. Previously, the Group determined at contract inception whether an arrangement is or contains a lease under IFRIC 4.

NOTE 1.3 - ACCOUNTING POLICIES - Continued

Under IFRS 16, the Group assesses whether a contract is or contains a lease based on the definition of a lease based on the assessment of whether: fulfilment of the arrangement was dependent on the use of a specific asset or assets; and the arrangement had conveyed a right to use the asset.

Impact

On transition to IFRS 16, the Group has applied the following practical expedients on adoption of IFRS 16 Leases permitted by the standard

- Lease contracts with a remaining term of 12 months or less and low-value assets below TDKK 35 has not been recognized as leased assets.
- The carrying amount of the provision for onerous operating lease contracts has been offset against the carrying amount of the right-of-use assets.
- The use of hindsight has not been applied.

Implementation of the standard has impacted the 2019 opening balance as highlighted in the following:

DKKkM	31.12.2018	Change	01.01.2019
Property, plant and equipment	117	(30)	87
Right-of-use assets	-	259	259
Financial lease liabilities	40	(40)	-
Provisions	80	(80)	-
Lease liabilities	-	349	349

Differences between the operating lease commitments on 31 December 2018 and lease liabilities recognised in the opening balance on 1 January 2019 in accordance with IFRS 16 specify as follows:

DKKkM	31.12.2019
Total operating lease commitments	344
Discounted using incremental borrowing rate at 1 January 2019	(54)
Finance lease liabilities recognised at 31 December 2018	40
Disclosed in the 2018 financial statements	330
Prior year adjustment etc.	19
Right-of-use lease liability as of 1 January 2019	349
Provision for onerous contracts	(80)
Fair value adjustment of finance lease assets	(10)
Right-of-use assets as of 1 January 2019	259

New accounting regulations

The IASB has issued a number of new standards and amendments not yet in effect or endorsed by the EU and therefore not relevant for the preparation of the 2019 consolidated financial statements. RelyOn Nutec expects to implement these standards when they take effect.

None of the new standards issued are currently expected to have any significant impact on the consolidated financial statements when implemented.

Basis of consolidation

The consolidated financial statements include the parent company, BidCo RelyOn Nutec A/S and its subsidiaries. Subsidiaries are entities that are controlled by the Group. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

On consolidation, investments in subsidiaries, intra-group income and expenses, intra-group balances and dividends and realized and unrealized gains and losses on transactions between Group entities are eliminated. The line items of the financial statements of subsidiaries are fully consolidated in the consolidated financial statements. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

Non-controlling interests

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit or loss, statement of comprehensive income, statement of changes in equity and balance sheet respectively.

On initial recognition, non-controlling interests are measured either at fair value (including the fair value of goodwill related to non-controlling interests in the acquiree) or as non-controlling interests' proportionate share of the acquiree's identifiable assets, liabilities and contingent liabilities measured at fair value (excluding the fair value of goodwill related to non-controlling interests' share of the acquiree). The measurement basis for non-controlling interests is selected for each individual transaction.

When the Group assumes an obligation from a put option to acquire shares from a non-controlling interest a financial liability is recognized, which is measured at the present value of the expected redemption amount. Where the significant risks and rewards of the shares have transferred to the Group, no non-controlling interest is recognised, and the liability related to the put option is treated as a contingent consideration liability. If risks and rewards related to the put option have not transferred to the Group, the non-controlling interest remains being recognized, and a corresponding entry is made against the Group's share of equity.

Foreign currency translation

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency').

Transactions and balances

On initial recognition, transactions denominated in foreign currencies are translated to the functional currency at the exchange rates at the transaction date. Exchange differences arising between the exchange rate at the transaction date and the exchange rate at the date of actual payment are recognized in the income statement under financial income or financial expenses.

Receivables, payables and other monetary items in foreign currency are translated to the functional currency at the exchange rate at the balance sheet date. The difference between the exchange rate at the balance sheet date and the exchange rate at the date when the receivable or payable arose or the exchange rate applied in the most recent financial statements is recognized in the income statement under financial income or financial expenses.

NOTE 1.3 - ACCOUNTING POLICIES - Continued

On recognition in the consolidated financial statements of entities with a functional currency other than DKK, income and expenses for the statement of comprehensive income are translated at the exchange rates at the transaction date. Average exchange rates for the month are used as the exchange rate at the transaction date to the extent that this does not significantly change the presentation of the underlying transactions. Assets and liabilities are translated at the exchange rates at the closing rate of the balance sheet date. All resulting exchange differences are recognized in other comprehensive income, and classified in equity in a separate currency translation reserve.

Income statement

Cost of sales

Cost of sales comprise expenses for related to course material and subcontractors.

Other external costs

Other external costs comprise marketing, external consultancy, facilities etc.

Balance

Financial liabilities

Financial liabilities primarily comprise of bonds, banks loans, trade payables, deferred considerations and contingent consideration liabilities. Financial liabilities, except for contingent liabilities, are initially recognised at fair value less transaction costs. In subsequent periods, financial liabilities are measured at amortised cost.

Contingent consideration liabilities arising from business combinations are subsequently measured at fair value.

Cashflow statement

The cash flow statement shows the Group's cash flows for the year broken down by operating, investing and financing activities, changes for the year in cash and cash equivalents as well as the Group's cash and cash equivalents at the beginning and end of the year.

Cash flows from operating activities are calculated as the operating profit before depreciation, amortization, impairment losses and special items (EBITDA) adjusted for changes in working capital and non-cash operating items such as depreciation, amortization and impairment losses, and provisions. Working capital comprises current assets less short-term debt excluding items included in cash and cash equivalents.

Cash flows from investing activities comprise cash flows from acquisitions and disposals of intangible assets, property, plant and equipment as well as fixed asset investments.

Cash flows from financing activities comprise interests paid cash flows from the raising and repayment of long term debt including payments related to lease liabilities as well as payments to and from shareholders and non-controlling interests.

Cash and cash equivalents comprise cash at bank and in hand.

Key figures

The financial ratios have been computed in accordance with the latest Guidelines issued by the Danish Finance Society.

NOTE 1.4 - CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

In the preparation of the consolidated financial statements according to IFRS, Management is required to make certain estimates. Many financial statement items cannot be reliably measured, but must be based on estimations as the value of assets and liabilities often depends on future events that are somewhat uncertain.

The judgements, estimates and assumptions made are based on historical experience and other factors that Management considers to be reliable, but which by their very nature are associated with uncertainty and unpredictability. These assumptions may prove incomplete or incorrect, and unexpected events or circumstances may arise. The most critical judgments, estimates and assumptions for the individual items are described below.

Critical accounting estimates and judgements related to:

Accounting estimates:

- Goodwill and brands, cf. note 3.1
- Business combination, cf. note 6.1

Management judgements:

- Special items, cf. note 2.5
- Leases, cf. note 3.3

Additional description of management judgements and estimates made are described in the relevant notes.

Non-current assets	101	65	410	83	-	659

§ | Accounting policy

Segment
The accounting policies of the reportable segments are the same as the Group’s accounting policies described throughout the notes. Segment revenue and costs are based on the internal reporting and comprise items that can be directly referred to the individual segments. Unallocated items mainly consist of costs related to group functions.

For the purpose of segment reporting, segment profit has been identified as EBITDA.

When presenting geographical information, segment revenue are based on the geographical location of the individual subsidiary from which the sales transaction originates.

Revenue
The Group generates revenue from delivering of safety training services to its customers within the oil and gas, renewables and maritime industry globally.

Revenue from providing services is recognized over time and in the accounting period in which the services are rendered.

The activity is pay-per-use, and the payment terms for customers are up to 60 days, and invoicing is shortly after completion of courses.

If the services rendered exceed the payment, a contract asset is recognized. If the payments exceed the services rendered, a contract liability is recognized. A receivable is recognized when the receipt of payment is conditional on passage of time only.

Where another party is involved in providing the services to the customer, the Group assesses on a contract by contract basis, whether the Group is acting as a principal or as an agent. The Group is acting as a principal when the nature of its promise is a performance obligation to provide the specified services itself. On the contrary the Group is acting as an agent when it is arranging for the services to be provided by the other party.

When the Group obtains control over the specified service before it is transferred to the customer, it is a principal and thus recognizes revenue on a gross basis. When the Group is acting as an agent, the commission rather than the gross income is recognized as revenue.

Supplementary information

RelyOn Nutec is a global operator, that operates in more than 20 countries around the world. Operations are generally managed based on a geographical structure comprising 8 geographical areas. Management has concluded that the 8 geographical areas can be aggregated into 4 regions according to IFRS 8. An overview of the grouping of countries into regions is presented in note 6.8 - Group companies.

The regions have been identified based on a key principle of grouping countries that share market conditions resulting in similar expectations in respect of revenue growth, rates of return on assets and capital investments. Management has based the assessment that the 8 geographical areas can be aggregated into 4 reportable primarily on the following shared characteristics:

- The nature of the products is the same,
- The customers within the same class, primarily customers within the offshore oil industry operating in the same geographical area. There are subject to the same the same macroeconomic development: despite being located in different countries.

The segment reporting is prepared in a manner consistent with the Group’s internal management and reporting structure. Transactions between reportable segments are made on market terms. Revenue and EBITDA can be reconciled directly to the income statement. The remaining reconciliation items to the loss for the year are disclosed directly in the income statement.

Total	(16)	(4)
of which is classified as special item, cf. note 2.5	(4)	(2)
Total	(13)	(3)

§ | Accounting policy

Staff costs comprise wages and salaries as well as expenses for payroll and pensions.

Supplementary information

Executive Management consisted of the Group CEO and CFO in 2019. Compensation for Executive Management consist of full year remuneration for Group CEO and half year remuneration for CFO.

NOTE 2.3 – INCENTIVE PROGRAM

In 2019, the parent company P-Holding RelyOn Nutec A/S offered a share investment and warrant program to certain key employees. Under the program, participants made a combined share and warrant investment in P-Holding RelyOn Nutec A/S. This company holds all shares in Bidco RelyOn Nutec A/S and has no other activities. As of 31 December 2019, the outstanding number of shares amount to 1.6% of the share capital in P-Holding RelyOn Nutec A/S and outstanding number of warrants amount to potential shares equal to 2.9% of the current share capital in P-Holding RelyOn Nutec A/S. Hereof, the Group Management holds shares of 1.1 and warrants of 1.8% and the Board of Directors holds shares of 0.6% and warrants of 1.1%.

The shares and warrants were acquired at fair value and consequently, no cost is recognized.

The warrants are exercisable upon an exit event such as transfer of at least 50% of the share capital/voting rights or an initial public offering. If no such exit event takes place before 20 September 2023, the participants are entitled to exercise the warrants. The warrants are subject to customary leaver provisions.

During 2019, P-Holding RelyOn Nutec A/S reacquired shares equal to 0.04% of the share capital and warrants equal to a potential shareholding of 0.4% due to a participant leaving the BidCo RelyOn Nutec A/S.

NOTE 2.4 – AMORTISATION, DEPRECIATION AND IMPAIRMENT LOSSES

DKKm	01.01 - 31.12.2019	30.03 - 31.12.2018

Operating profit (EBIT)	23	4	26	(14)	(0)	(14)
Financial income	5	-	5	4	-	4
Financial expenses	(53)	(4)	(57)	(10)	-	(10)
Loss before tax	(30)	4	(26)	(19)	(1)	(20)

§ | Accounting policy

Special items are used in connection with the presentation of income statement for the year to distinguish operating profit from non-recurring income and expenses, which by their nature are not related to the Group's ordinary operations e.g. re-branding costs, restructuring costs relating to structural, procedural and managerial re-organisations as well as transaction and restructuring costs relating to acquisition of businesses.

≈ | Critical accounting judgements

The use of special items entails Management judgement in the separation from the ordinary operations of the Group. In the classification of special items, judgement is applied in ensuring that only exceptional items not associated with the ordinary operations of the Group are included.

NOTE 2.6 – FINANCIAL INCOME

DKKm	01.01 - 31.12.2019	30.03 - 31.12.2018
Exchange rate gain	1	4
Fair value adjustment of contingent consideration, non-controlling interest cf. note 5.1	3	-
Other financial income	1	-
Total	5	4

NOTE 2.7 – FINANCIAL EXPENSES

DKKm	01.01 - 31.12.2019	30.03 - 31.12.2018
Bond interest	(26)	(7)
Interest on lease liabilities, cf. note 3.3	(24)	(1)
Other financial expenses	(7)	(2)
Total	(57)	(10)

§ | Accounting policy

Financial income and expenses represent interest income and interest expense, realized and unrealized exchange rate gains and losses, amortization related to financial liabilities including lease liabilities and fair value adjustments of contingent consideration liabilities.

NOTE 2.8 – TAX

DKKm	01.01 - 31.12.2019	30.03 - 31.12.2018
Current tax on loss for the year	(22)	(1)
Deferred tax on loss for the year and previous years	(1)	2
	(23)	1
Calculated 22.0% tax on loss for the year before income tax	(6)	4
Tax effects of:		
Non-taxable income	6	5
Non-deductible expenses	(2)	(7)
Adjustment of tax relating to previous years	(3)	-
Revaluation of deferred tax assets	(26)	-
Difference in foreign tax rates	(4)	(1)
	(23)	1
Effective tax rate	Neg.	5%

§ | Accounting policy

BidCo RelyOn Nutec A/S and the Group's Danish subsidiaries are jointly taxed. Danish corporation tax is allocated among the jointly taxed companies according to the taxable income of these companies. Income tax for the year, consisting of current tax for the year and changes in deferred tax, is recognized in profit for the year with respect to the part that can be attributed to profit for the year and in other comprehensive income with respect to the part that can be attributed to other comprehensive income or directly to equity.

Corporation tax payables include corporation taxes made up on the basis of estimated taxable income for the financial year and prior-year adjustments. Deferred tax is measured using the tax rate expected to apply when timing differences are reversed.

Deferred tax is calculated according to the balance sheet liability method and is based on all timing differences between the carrying amount and the tax base of assets and liabilities. Deferred tax is not recognized on goodwill that is not tax deductible, and deferred tax is not recognized on undistributed profits in subsidiaries and timing differences that arose at the time of recognition in the balance sheet other than for acquisitions, if such differences will not affect profit or taxable income. When alternative tax rules can be applied to determine the tax base, deferred tax is measured based on planned use of the asset or settlement of the liability respectively.

Deferred tax assets, including the tax base of tax losses carried forward, are recognized under other non-current assets at the expected value of their utilization, either as a set-off against tax on future income or as a set-off against deferred tax liabilities within the same legal tax entity and jurisdiction. Deferred tax assets and liabilities are offset within the same legal tax entity or jurisdiction. Changes in deferred tax as a result of changes in tax rates are recognized in the income statement.

≈ | Accounting estimates

Deferred tax assets are measured at the value at which they are expected to be realized. Deferred tax assets, including the tax base of tax loss carryforwards are recognised if it is assessed that there will be sufficient future taxable income against which the temporary differences and

unutilised tax losses can be utilised. This assessment is based on budgets and business plans for the following years, including planned business initiatives .

The Group is subject to tax legislation in the countries in which it operates. Any significant accounting estimates relating to

the statements of current tax, deferred tax and pending tax matters in the individual countries have been provided.

Further reference is made to note 1.1. in the financial statements.

§ | Accounting policy

Goodwill

Goodwill is recognized in the balance sheet at cost on initial recognition as described under “Business combinations”, note 6.1. Goodwill is subsequently measured at cost less accumulated impairment losses. Goodwill is not amortized, but is tested for impairment at least once a year.

On initial recognition, goodwill is allocated to those of the Group’s activities that generate separate cash flows (cash-generating units), however, not a higher level than operating segments.

Brands

Brands acquired in a business combination are recognized at fair value at the acquisition date. They have an indefinite useful life and are subsequently carried at cost less accumulated impairment losses.

Customer contracts and knowhow

Customer contracts and knowhow acquired in a business combination are recognized at fair value at the acquisition date. Knowhow are based on obtaining business required certificates to perform the operation. They have an finite useful life and are subsequently carried at cost less accumulated amortization and impairment losses. Customer contracts and knowhow are amortized over the expected economic life, estimated to be 10 years.

Software

Software acquired in a business combination is recognized at replacement cost at the acquisition date. Software bought or developed for internal use is measured at the lower of cost less accumulated amortisation and impairment losses and the recoverable amount. Cost comprises payments for the software and other directly attributable expenses of preparing the software for its intended use. Software is amortized over the expected economic life, estimated to be 3 to 5 years.

Other intangible assets

Other intangible assets mainly include assets (software) under construction.

Supplementary information

Brands includes active brands within RelyOn Nutec Group; RelyOn Nutec, Aberdeen Drilling School and MSTs. Nutec is our heritage. Nutec is dated back to 2004 and it is a symbol for safety training in multiple parts of the world. Aberdeen Drilling School is a world known-brand to deliver well-control training. MSTs is the local brand in the Asian region, which is associated with high quality safety training. Nutec is the only material brand, which carrying amount is DKKkM 39 (DKKkM 38 in 2018). **Knowhow** includes the knowledge for obtaining business critical certificates, such as OPITO, GWO, ISO etc.

NOTE 3.1 – INTANGIBLE ASSETS - continued

Impairment test

Each year, the assets are reviewed in order to assess whether there are indications of impairment. If such indications exist, the recoverable amount, determined as the higher amount of the fair value of the asset adjusted for expected costs to sell and the value in use of the asset, is calculated. The value in use is calculated based on the estimated future cash flows, discounted by using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset or its cash-generating unit is lower than the carrying amount, an impairment charge is recognized in respect of the asset. The impairment loss is recognized in the income statement. In addition, for goodwill and other intangible assets with indefinite useful lives, impairment tests are performed at each balance sheet date, regardless of whether there are any indications of impairment. For acquisitions, the first impairment test is performed before the end of the year of acquisition.

Goodwill and brands are monitored by Management at an operating segment level. Goodwill and brands are allocated to CGU's, as per below. Allocation of goodwill from 2019 acquisitions, DKKm 43, cf. note 6.1., is preliminary. Goodwill is mainly allocated to operating Portfolio and Partnerships.

Goodwill and brands with an indefinite life have been tested for impairment at 31 December 2019. The tests did not result in any impairment of carrying amounts. The impairment test is based on value in use. The impairment test for 2018 was based on fair value less costs to sell due to the short period between acquisition of RelyOn Nutec and the balance sheet date.

For the year 2020 and projections for subsequent years up to and including 2022, the expected future net cash flows are determined based on budgets and business plans approved by Management. From 2023 onwards, a perpetual cash flow increasing by the terminal growth rate is used.

The below table provides an overview of the carrying amount and key assumptions applied for each cash generating unit for which the carrying amount of goodwill and brands is material.

The key assumptions for each cash generating unit are annual revenue growth and EBITDA margin as well as net working capital and investments. The assumptions are based on past experience, internal as well external benchmarks and statistics, management's expectations for the market development, market trends and initiated digitalization projects and projects in general.

The terminal growth rate is in line with industry expectations.

Notice should be given to the fact that the assumption applied are assumption deemed appropriate by Management as of 31 December 2019. As discussed in note 1.1, the outbreak of the Coronavirus disease is expected to have adverse impact on our business. Consequently, future impairment tests may be impacted.

≈ | **Critical accounting estimates**

Goodwill and brands have a indefinite lifetime since there is no foreseeable limit to the period over which goodwill and brands are expected to generate net cash inflows. Goodwill and Brands with indefinite lifetime are not amortized, but subject to an impairment test once a year. The group tests whether goodwill has suffered any impairment on an annual basis. For the 2018 reporting period, the recoverable amount of the cash generating units (CGUs) was determined based on fair value less costs to sell which require the use of assumptions. For 2019 the impairment tests have been based on value-in-use calculations, which also require the use of management assumptions. The calculations use cash flow projections for multiple years with extrapolation beyond the forecast period using the estimated growth rates.

Factors that played a significant role in the determining that brands have an indefinite useful lifetime; 1) brands have existed in decades, 2) the strategy is based on the brands, and 3) the brands have a low maintenance costs attached.

DKKm	Asia	Golf of Mexico	Partnerships	Portfolio	Other	Total
Carrying amount of goodwill	43	49	19	26	39	190
Carrying amount of brands	25	7	5	5	14	57

§ | Accounting policy

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes direct costs related to the asset and the initial estimate of the costs related to dismantling and removing the item and restoring the site on which it is located, if the costs meet the definition of a liability. Cost further includes borrowing costs from specific and general borrowings directly relating to the acquisition, construction or development of the individual qualifying asset during the period that is required to complete and prepare the asset for its intended use.

Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items.

Depreciations are calculated using the straight-line method to allocate their cost, net of their residual values over their estimated useful lives, as follows:

Buildings:	25 - 30 years
Equipment:	3 - 10 years
Leasehold improvements:	Term of lease
Land:	Not depreciated

The residual value and useful life is determined at the date of acquisition and revalued each year. Where the residual value exceeds the carrying amount, the asset ceases to be depreciated.

Gains and losses on the disposal or scrapping of property, plant and equipment are determined as the difference between the sales price less dismantling, selling and re-establishing costs and the carrying amount. Gains and losses are recognized in the income statement as other operating income and expenses, respectively.

The property, plant and equipment acquired under finance leases is depreciated over the asset's useful life, as described above, or over the shorter of the asset's useful life and the lease term if there is no reasonable certainty that the group will obtain ownership at the end of the lease term.

Each year, the assets are reviewed in order to assess, whether there are any indicators of impairment, cf. note 3.1.

Supplementary information

Committed CAPEX on December 31, 2019 was related to completion of upgrade on facility in USA, total DKKm 4. Committed CAPEX on December 31, 2018, was related to completion of the new facility in Asia, total DKKm 2.

§ | Accounting policy

Lease assets

Lease assets are 'right-of-use assets' arising from a lease agreement. Lease assets are initially measured at cost consisting of the amount of the initial measurement of the leases liability, plus any lease payments made to the lessor at or before the commencement date less any lease incentives received and the initial estimate of refurbishment costs and any initial direct costs incurred by RelyON Nutec as the lessee.

RelyON Nutec has primarily these types of leases:

- Rental of premises
- Equipment

The lease assets are depreciated on a straight-line basis over the lease term. The lease asset can be adjusted due to modifications to the lease agreement or reassessment of lease term. Payments associated with short-term leases and leases of low-value assets are recognized on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a term of 12 months or less at inception. Low-value assets typically comprise IT-equipment and small items of office furniture with an initial value of TDKK 35 or less.

Each year, the assets are reviewed in order to assess, whether there are any indicators of impairment, cf. note 3.1

Lease liabilities

Lease liabilities arise from a lease agreement. Lease liabilities are initially equal to the present value of the lease payments during the lease term that are not yet due.

At initial recognition RelyON Nutec assesses for each contract individually the likelihood of exercising a potential extension option in the contract. The option to extend the contract period will be included in the calculation of the lease liability if it is reasonably likely that RelyON Nutec will exercise the option. When calculating the net present value RelyON Nutec use a discount rate corresponding to the incremental borrowing rate. The weighted average discount rate was 8.5% as of 1 January 2019. In order to calculate the incremental borrowing rate, reference interest rates were derived – for a period of up to 4 years – from the yields of corporate bond.

NOTE 3.3 – LEASES - continued

≈ | Accounting judgements

In accounting of lease contracts, various judgements are applied in determining right-of-use assets and lease liabilities. Judgements include assessment of periods and applicable discount rates.

Supplementary information

At inspection of a contract, The Group assesses whether a contract contains a purchases, termination or extension option. For the contracts that contains either purchase, termination or extension options, the management have assessed the reasonably certain to exercise the options. The Group reassesses whether it is reasonably certain to exercise the options if there is a significant event or significant change in circumstances within its control. The carrying out amount of the recognized extensions and terminations options on lease liabilities amounts to DKKm 29 and on right-of-use assets DKKm 28.

NOTE 3.4 – TRADE RECEIVABLES AND CONTRACT ASSETS

The Group has recognised the following assets and liabilities related to contracts with customers

	Contracts assets	Trade receivables
DKKm		
Balance at 31.12.2018	19	162

Balance at 31.12.2019	13	170
------------------------------	-----------	------------

	Expected loss rate	Gross carrying amount, trade receivables	Expected credit loss	Trade receivables
<i>As of 31 December 2018</i>

More than 90 days past due	20%	7	(1)	5
More than 120 days past due	12%	30	(4)	26
		191	(8)	183

§ | Accounting policy

On initial recognition, receivables are measured at fair value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortized cost.

Trade receivables and contract assets are written down for expected credit losses. The Group applies the simplified approach in IFRS 9 to measuring expected credit losses which uses a lifetime expected loss allowance for trade receivables and contract assets. The Group's impairment policies are further described in note 4.3. A write-down is recognized in other external costs.

During 2019, the Group has entered into trade receivables transfer agreements in which the buyer takes on credit risk whereas the Group retains some late payment risk. Under the arrangements, the Group obtains an up-front payment of 80-85% of the nominal value of the trade receivables transferred. As of 31 December 2019, outstanding trade receivables in the amount of DKK 11 million has been transferred. Management has assessed that the late payment risk in the transferred portfolio is limited, and consequently, that transfer of the credit risk results in substantially all risks and rewards have been transferred to the counterpart. Consequently, the up-front amounts received are treated as a reduction of the outstanding trade receivables.

≈ | Accounting estimates

To measure the expected credit losses trade receivables have been grouped based on shared credit risk characteristics and the days past due. The expected loss rates are based on the payment profiles of sales over a 12 month period and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward looking information affecting the ability of the customers to settle the receivables. Further reference is made to note 1.1. in the financial statements.

Movement on the Group's provision for impairment of trade receivables

DKKm	2019	2018
Opening balances	(3)	0
Increase during the year	(5)	(3)
Receivables written off as uncollectible	0	0
Expected credit loss at 31 December	(8)	(3)

NOTE 3.5 – DEFERRED TAX

DKKm	Asset	Liability
Deferred tax at 30.03.2018	-	-
Addition of business, cf. note 6.1	14	-

Deferred tax at 31.12.2018	13	-
Deferred tax at 01.01.2019	13	-
Addition of business, cf. note 6.1	-	7
Deferred tax recognised in the income statement	4	3
Deferred tax at 31.12.2019	17	10
Deferred tax relates to:	Asset	Liability
Intangible assets	1	7
Property, plant and equipment	(0)	0
Tax loss carry forwards	14	1
Other	3	2
Total	17	10

§ | Accounting policy

Accounting policy are listed within note 2.8.

Supplementary information

The Group have unrecognized tax losses to carry forwards, total DKKm 56 (DKKm 46 in 2018). The Group is of the opinion, that utilization within 3-5 years is not possible within a foreseeable future. There are no expiry date on the tax losses to carry forward. Further, there are unrecognized deferred tax assets related to property, plant and equipment, and trade receivable, total DKKm 8 (DKKm 12 in 2018).

Tax assets related to the tax loss carried forward have be recognized in countries where we expect to generate positive taxable income from 2020 and with the amount expected to utilized within 3-5 years.

Note 3.5 and 3.6

NOTE 3.6 – SHARE CAPITAL

The share capital comprise:	Number of shares	Nominal value (DKK'000)
Share capital 30.03.2018	500,000	0
Capital increase 19.09.2018	1,651,925	2
Capital increase 09.10.2018	170,000	0
Share capital 31.12.2018	2,321,925	2
Share capital 31.12.2019	2,321,925	2

Supplementary information

All shares have nominal value of DKK 1.

All shares have the same rights, preferences and restrictions.

All shares are fully paid up.

Section 4: Financial Risk Management

Note 4.1:	Financial risk management	49
Note 4.2:	Market risk	49
Note 4.3:	Credit risk	50
Note 4.4:	Liquidity risk	50

NOTE 4.1 – FINANCIAL RISK MANAGEMENT

The Group's activities give rise to exposure to a variety of financial risks, including market risk (currency risk and interest risk), credit risk and liquidity risk. These financial risks are managed centrally by Group Finance.

Financial risks are described in the following sections:

- Market risk: note 4.2
- Credit risk: note 4.3
- Liquidity risk: note 4.4

It is the Group's policy to mitigate risk exposure derived from its business activities. Group Policy does not allow taking speculative positions in the financial markets.

As part of a global operation, the Group is exposed to cash flow in multiple different currencies. The Group has adopted an expected credit loss model to calculate credit exposure relating to trade receivable. Liquidity risk arises from the financing facility for the Group.

At 31 December 2019, the exposure to credit risk related to cash and cash positions equivalents was DKKm 77 (2018: DKKm 106). It is the Group's Policy to upstream as much cash as possible to its relationship bank with a credit rating A and keep local cash positions on a level only needed for the operations.

NOTE 4.2 – MARKET RISK

Currency risk

Fluctuating currency rates influence the Group's reported income statement, balance sheet and value of future cash flows denominated in foreign currencies. Changes in currency exchange rates result from various factors such as macro-economic factors, speculative transactions and interventions by central banks and governments. In addition, government and monetary authorities may impose exchange controls that could adversely affect an applicable currency exchange rate.

Foreign exchange exposure in the Group consists of two types of risk (a) translation risk and (b) transaction risk. The objective is to minimize impact from change in exchange rates.

Translation risk arises from the translation of subsidiaries' income statement and net assets into the Group's functional currency DKK. The majority of the current cash position is within low risk foreign currency; GBP, MYR, EUR, TTD and USD). No hedges were in place for currency translation risks at the end of 2019 and 2018.

Transaction risk arises from cash flows in currencies other than the functional currencies of the Group's subsidiaries. This can be due to the contracts with limited customers or suppliers paying/requiring payments in other currencies than functional currencies. This is mainly currencies USD, GBP and EUR. The Group does not hedge with financial contracts against transaction risk, although natural hedges (income and expenses in same currency) minimize the impact in the profit and loss.

The internal borrowings/deposits are primarily done in local currencies.

The Group's Bond and credit facility are in EURO. The Group considers both DKK and EUR as base currencies due to the historically fixed currency band between DKK/EUR.

Due to the above no sensitive analysis is included for both the translation and transaction risks.

NOTE 4.2 – MARKET RISK - continued

Interest rate risk

Interest rates on Bonds and revolving credit facility depends on several factors, one of the most significant over time being the level of market interest. The interest rate on the Bonds and credit facility is based on the 3M Euribor rate.

Sensitivity analysis

The sensitivity of profit or loss is based on changes in in the interest rates on the borrowings on Group level only.

	Profit after tax / Equity	
Change in 3M EURIBO	-0.50%	0.50%
(DKKkm)	1.92	-1.92

If the market rate at 31 December 2019 had been 1 percentage point higher, net finance cost would have increased by DKKm 2. The analysis assumes a parallel shift in the relevant yield curves. Sensitivity analysis are based on annual interest expenses.

The Group is not using hedging instrument to mitigate the risk.

NOTE 4.3 – CREDIT RISK

In accordance with IFRS 9, the Group is to recognize a loss allowance for expected credit loss ("ECL") on its trade receivables.

The ECL for the Groups "private and commercial" customers and "major oil companies or public companies" customers is estimated separately in the model due to differences in the credit characteristics of these customer segments. Expected credit losses are estimated on customers categorised as "private and commercial". Based on experience, actual credit losses for customers categorized as "major oil companies or public companies" are limited.

The impairment model is based on a roll rate method. The roll rate method is derived from the provision matrix described in IFRS 9 as a historical credit loss matrix based on number of days a trade receivable is overdue.

Probability of default ("PD") is based on historical roll rate for each category and based on Moody's' country-specific PDs.

Loss Given Default is estimated using a loss ratio calculated as the incurred loss divided by the outstanding balance of trade receivables.

The risk in monitored local, and global follow-up as per development in outstanding. For further information about the Group's credit loss allowance, refer to note 3.4.

Maximum credit risk is outlined below:

DKKkm	Gross	Expected credit loss	Net, amount
Cash and cash equivalents	77	-	77
Trade receivables:			
Major oil companies or public companies	79	(1)	78
Private and commercial	112	(7)	105
Total	268	(8)	260

NOTE 4.4 - LIQUIDITY RISK

Liquidity risk results from the Group's potential inability or difficulty in meeting the contractual obligations associated with its financial liabilities due to insufficient liquidity.

Liquidity reserves

The Group's liquidity reserves mainly of liquid funds (cash and cash equivalents less not readily available or restricted cash) and unused credit facility. As at 31 December 2019 the Group's liquid reserves consisted of readily available liquid funds of DKKm 61 (2018: DKKm 80) and unused revolving credit facility of DKKm 26 (DKK 2018: DKKm 31), where it is available for drawing until 20 June 2021. The undrawn facility amounted to DKKm 25 at the end of December 2019.

DKKm 16 (2018: DKKm 26) of the total cash position at 31 December 2019 was placed on bank accounts in Trinidad with limited availability due to legal and local circumstances.

Credit facility is available with a maximum of DKKm 67 for financing of working capital. The interest is based on 3M Euribor rate plus a margin (4%). Drawings on the credit facility expire less than one year.

In addition, the Group has a Bond facility available with a maximum of DKKm 745. The Bond is listed on the Norwegian Stock Exchange (NO0010831373 named "BidCo nr. 2 af 15. marts 2018 A/S FRN Senior Secured Callable Bonds 2018/2023"). The interest is based on 3M Euribor rate plus a margin (7%).

The bond facility expires in 2023. Upon expiry the settlement of the bond is expected to be made with cash flow from operating activities, through re- refinancing or in connection with a sale of the company.

NOTE 4.4 - LIQUIDITY RISK - continued

To centralise and optimise liquidity the Group utilises cash pooling in most of the entities in Western Europe as well as intercompany lending and borrowing between RelyOn Nutec Holding and subsidiaries.

Maturity analysis

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows incl. interest payments calculated under current conditions, and thus summarises the gross liquidity risk.

The risk implied by the values reflects the one-sided scenario of cash outflows only. Trade payables and other financial liabilities originate from the financing of assets in ongoing operations, such as property, plant and equipment, and investments in working capital, for example inventories and trade receivables.

Non-derivatives	DKKkm	Less than 1 year	Between 1 and 5 year	More than 5 years	Total	Net book value

Prior year adjustment cf. note 6.1	17
Fair value adjustment recognized in the income statement cf. note 2.6	(3)
As of 31.12.2019	22

§ | Accounting policy

Fair value is the price that would be received when asset is sold or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial instruments that are not traded in an active market is determined using generally accepted valuation technics based on observable inputs from active markets. For financial liabilities where the fair value is disclosed, the fair value is estimated by discounting future contractual cash flows at the current market interest rate.

Supplementary information

The Group has entered into contingent consideration arrangements and has put option liabilities related to non-controlling interests treated as contingent consideration. The liabilities are measured at fair value and based on unobservable input (level 3). The amounts to be paid are based on earnings multiples. Fair value is determined on the basis of earnings forecasts for the respective subsidiaries. Fair value adjustment recognized in financial items amounted to DKKm 3 in 2019, cf. note 2.6. An 10% percentage increase or decrease in forecasted earnings will increase or decrease the liability by DKKm 2.

NOTE 5.2 – CHANGES IN LIABILITIES ARISING FROM FINANCING ACTIVITIES

DKKm	30.03.2018	Cash flows	Non-cash changes		31.12.2018

Total liabilities from financing activities	378	37	309	(19)	743

NOTE 5.3 – CAPITAL MANAGEMENT

The overall objective is to ensure the ability to continue as a going concern, so entities can continue to provide solid returns for shareholders and benefits for other stakeholders.

The Group's objectives when managing capital are to;

- Maintain an optimal capital structure on a global scale,
- Cash pool is used within some areas to optimize cash position,
- Cash flow forecasting on a bi-weekly frequency and accuracy analysis
- Full cash transparency on daily basis

The Group's bond and credit facilities do not include specific covenant provisions. The agreements include requirement about performing incurrence test if certain events arise.

Reference is made to note 1.1. in the financial statements.

Note 6.1 – BUSINESS COMBINATION

2019

RelyOn Nutec has acquired the full share capital of four companies in 2019. RelyOn Nutec has invested in an asset deal to strengthen the core marked in USA within onsite training. Further, RelyOn Nutec has invested in three digital companies; Oiltec AS, Red Oak Ltd and Rider International B.v. Red Oak Ltd. And Rider International B.V. are the corner stone of the digital journey for RelyOn Nutec.

None of the acquisition are material compared to the value of RelyOn Nutec Group. The total purchase consideration for all acquisition were DKKm 72; DKKm 47 from Group contribution, DKKm 22 are paid, and DKKm 3 are deferred.

Red Oak Ltd and Rider International B.V. were acquired by the parent company P-Holding RelyOn Nutec A/S during 2019 and transferred to the Group partially as a group contribution, DKKm 47. In accordance with the accounting policies applied, these businesses were accounted for as if they had been acquired by the Group as of P-Holding RelyOn Nutec A/S' respective acquisition dates and at the considerations agreed between P-Holding RelyOn Nutec A/S and the respective sellers.

A goodwill in the amount of DKKm 34, of which DKKm 17 is deductible for tax purposes, has been recognized. The value of the acquisition comes from integration and creation of digital platform to grow in the future.

The acquired entities have as from the date of acquisition contributed with revenue of DKKm 12 and loss of DKKm 12. If all entities had been acquired as of 1 January 2019, the Group's revenue would have been DKKm 60 and loss before tax DKKm -1.

Transaction costs related to the acquisitions, recognized as special items in the income statement cf. note 2.4, amount to DKKm 4.

The assets and liabilities recognised as a result of the acquisition are as follows:

DKKkM	SMS	Oiltec AS	Red Oak Ltd	Rider International B.V.	Fair value
Cash	-	0	1	0	2
Trade receivables	-	1	3	-	4
Property, plant and equipment	1	0	0	1	3
Intangible assets: customer contracts	2	-	4	-	6
Intangible assets: software	-	5	10	26	41
Intangible assets: knowhow	-	-	0	-	0
Intangible assets: other intangible assets	-	-	-	5	5
Deferred tax assets	-	(0)	-	-	(0)
Other assets	-	2	1	1	4
Trade payables	-	(1)	(3)	(1)	(4)
Deferred tax liability	-	-	(1)	(6)	(7)
Other liabilities	-	(9)	(3)	(4)	(16)
Net identifiable assets acquired	3	(2)	13	24	37
Goodwill					34
Net assets acquired					72

The purchase price allocations are preliminary, however the Management does not expect any changes.

Adjustments to the 2018 purchase price allocation:

Outflow of cash to the acquired companies amounts to DKKm 22, less balances of acquired cash, DKKm 2. The total net outflow of cash from investing activities are recognized to DKKm 20.

The purchase price allocation related to the 2018 acquisition of the RelyOn Nutec Group have been finalized in 2019. This has resulted in the below fair value adjustments to the opening balance. During 2019, the remaining part of the purchase consideration in total DKK 47m has been settled.

DKKkM	Adjustment
Tangible assets: Property, plant and equipment	(3)
Contingent consideration, non-controlling interest	(17)
Goodwill	17
Deferred consideration	3

Note 6.1 – BUSINESS COMBINATION – continued

2018

On 20 September 2018, the parent company acquired the entire share capital of RelyOn Nutec Holding A/S, former known as Falck Safety Services Holding A/S, which operates in the business of safety training services to the oil and gas, wind and maritime industry globally, and other related business.

Details of the purchase consideration, the net asset acquired and goodwill are described below.

Purchase consideration:	DKKm
Cash paid for shares and deferred consideration including group contribution	116
Settlement of acquires debt to seller	448
Deferred consideration	50
Total purchase consideration	614

The assets and liabilities recognised as a result of the acquisition are as follows:	Fair value DKKm
Cash	126
Trade receivables	143
Contract assets	24
Property, plant and equipment	369
Intangible assets: customer contracts	63
Intangible assets: brand	55
Intangible assets: knowhow	27
Intangible assets: other	6
Deferred tax assets	14
Other assets	52
Trade payables	(118)
Unfavorable contracts	(83)
Finance lease	(40)
Other liabilities	(131)
Net identifiable assets acquired	507
Non-controlling interests	(29)
Goodwill	136
Total purchase consideration	614

The Group has elected to measure non-controlling interests in the RelyOn Nutec Group at its proportionate share of the net assets acquired. The goodwill amounting to DKKm 136 is attributable to workforce etc. It will not be deducted for tax purposes. The fair value of acquired trade receivables is DKKm 167. The gross contractual amount for trade receivables due is DKKm 193, of which DKKm 26 is expected to be uncollectable.

The acquired RelyOn Nutec business contributed revenues of DKKm 248 and net profit of DKKm (19). If the acquisition had occurred on 30 March 2018, consolidated pro-forma revenue and profit for the year ended 31 December 2018 would have been DKKm 620 and DKKm (12), respectively.

Cash flow on acquisition

Outflow of cash to acquire RelyOn Nutec	DKKm
Cash consideration	91
Settlement of acquired debt to seller	448
Less cash acquired	(126)
Net outflow of cash - investing activities	413

Acquisition-related costs of DKKm 27 have been recognized in the income statement within special items cf. note 2.4.

Note 6.1 – BUSINESS COMBINATION – continued

§ | Accounting policy

Businesses acquired from unrelated parties during the financial year are recognized as from the date of acquisition, i.e. the date when the Group obtains control over the acquire. The comparative figures are not restated to reflect businesses acquired. The acquisition method is applied, i.e. identifiable assets, liabilities and contingent liabilities of acquires are recognized at their fair value at the date of acquisition.

Identifiable intangible assets are recognized if they are separable or derive from a contractual right. Deferred tax on fair value adjustments is recognized. Fair values may be determined provisionally up until 12 months after the acquisition date. Adjustments, if any, within this period are treated as prior period adjustments.

Any positive difference between the consideration and the value of non-controlling interests in the acquirer and the fair value of any previously held interests in the acquirer, on the one hand, and the fair value of the identifiable assets, liabilities and contingent liabilities, on the other hand, is recognized in the balance sheet as goodwill. Goodwill is not amortized, but is tested for impairment at least once a year. On acquisition, goodwill is allocated to the cash-generating units which will subsequently form the basis for future impairment tests. Any negative difference is recognized in the income statement on the date of acquisition.

The consideration for an entity consists of the fair value of the agreed purchase price. For business combinations in which the agreement includes an adjustment of the consideration conditional on future events (contingent consideration), the fair value of this part of the consideration is recognized at the date of acquisition. Any changes in the fair value of the contingent consideration after initial recognition are recognized in the income statement within financial items.

Businesses acquired from parties who are under common control with the Group are recognised at the predecessor values as if the Group had owned the business as of the first day of the comparative period, however no earlier than as of the date the selling party obtained control over the business.

Put options issued to minority shareholders in connection with acquisitions for them to sell their remaining shares to the Group, the value of which is contingent on future events, will be recognized as part of the consideration at the date of acquisition if risks and rewards have transferred to the non-controlling interests have transferred to the Group. The put options issued are subsequently measured at the present value of the expected exercise price. Any changes in the value of the issued put options after initial recognition are recognized in the income statement within financial items.

Acquisition costs are recognized in the income statement as special items.

≈ | Critical accounting estimates

In connection with acquisitions, the identifiable net assets acquired from the seller are recognized at fair value. This includes an assessment of the value of e.g. customer relations and customer contracts. The valuation thereof is based on the "Multi-Period Excess Earnings Method (MEEM method)" in which the value is calculated on the basis of an expected future cash flow. The principal assumptions are expected lives of the existing agreements and portfolios, earnings and contribution for using associated assets and employees.

Further reference is made to note 1.1 in the financial statements.

NOTE 6.2 – PROVISIONS

DKKkm	Onerous contracts	Refurbishment provision	Total
At 30.03.2018	-	-	-
Addition of business , cf.note 6.1	83	20	103
Change during the period	(3)	-	(3)
At 31.12.2018	80	20	100
Change in accounting policy, IFRS 16	(80)	-	(80)
Exchange difference	-	1	1
Balance at 31.12.2019	-	21	21
Of which is classified as non-current	-	21	21

§ | Accounting policy

Provisions are recognized when, as a consequence of an event occurring before or on the balance sheet date, the Group has a legal or constructive obligation and it is probable that an outflow of resources will be required to settle the obligation. The amount recognized as a provision is Management's best estimate of the present value of expenses required to settle the obligation.

Provisions for restructuring are recognized when a detailed, formal plan for the restructuring has been made before or on the balance sheet date and has been announced to the parties involved.

Provisions for retained risks related to occupational injuries are recognized at the time of the claim and include an estimate of claims incurred but not reported based on actuarial calculations.

Supplementary information

Provision for refurbishment obligation are related to clean up on the facilities within the Group. Refurbishment provision will be an obligation prior relocation. Relocation is not highly likely, hence all provisions are non-current.

NOTE 6.3 – Change in net working capital

DKKkm	31.12.2019	31.12.2018
Change in trade receivables	8	(26)
Change in contract assets	0	12
Change in prepaid expenses	0	1
Change in trade payables	(1)	20
Change in other receivables	(7)	6
Change in other operating liabilities	4	(1)
Total change in working capital	5	12

NOTE 6.4 – FEE TO AUDITORS

DKK m	01.01 - 31.12.2019	30.03 - 31.12.2018
Audit fee to PwC	(4)	(2)
Other assurance engagements	(1)	-
Tax advisory services	-	-
Non-audit services	(1)	(4)
Total	(6)	(6)

Supplementary information

Non-audit services provided by PricewaterhouseCoopers, Statsautoriserede revisionspartnerselskab, amounts to DKKm 2 in 2019 relating to due diligence services, assurance services i relation the prospectus and sundry tax advisory services.

NOTE 6.5 – RELATED PARTIES

The Group is controlled by the following entities:

Immediate parent entity: P-Holding RelyOn Nutec A/S

Ultimate parent entity and controlling party: Polaris Private Equity IV K/S

Note 6.8 includes information about the Group's structure and the Group's related parties. Information about key management’s personel remuneration has been disclosed in note 2.2.

The following transactions occurred with the immediate other related parties:

Group contribution: DKKm 68 (DKKm 25 received in 2018)

In 2019 DKKm 47 of the group contribution from P-Holding RelyOn Nutec A/S was related to the acquisition of two subsidiaries. Please refer to note 6.1. The remaining part of group contribution was related to a debt cancellation of DKKm 21.

The ultimate parent entity, Polaris Private Equity IV K/S, did pay for some of the transactions cost in 2018, total DKKm 1. There is no balance as of 31 December 2019

NOTE 6.6 - COMMITMENTS AND CONTINGENT LIABILITIES

Joint taxation scheme

The Danish Group companies are jointly and severally liable for tax on the jointly taxed income etc. of the Group. The total amount of corporation tax payable by the Group is disclosed in the financial statements of P-RelyOn Nutec 2018 A/S, which is the management company of the joint taxation. The Danish companies are jointly and severally liable for the joint taxation liability. The joint taxation liability covers income taxes and withholding taxes on dividends, royalties and interest.

Contingent liabilities and guaranties

As part of the bond agreement, share pledges have been issued. total carrying amount of the net assets in the subsidiaries pledged as at 31 December 2019 was DKKm 570.

NOTE 6.7 - EVENTS AFTER THE BALANCE SHEET DATE

Reference is made to note 1.1 in the financial statements.

No other events materially affecting the assessment of the annual report have occurred after the balance sheet.

NOTE 6.8 – GROUP COMPANIES

Supplementary information

Non-audit services provided by PricewaterhouseCoopers, Statsautoriserede revisionspartnerselskab, amounts to DKKm 1 in 2019 relating assurance services i relation the prospectus and sundry tax advisory services.

NOTE 4.1 – BASIS OF PREPARATION

BidCo RelyOn Nutec A/S prepares the parent company financial statements in accordance with the Danish Financial Statements Act applying to enterprises of reporting class D.

The financial statements comprise the financial year 1 January – 31 December 2019. The financial statements include comparative figures from 20 March 2018 to 31 December 2018. The Group was established as of 20 September 2018.

The financial statements are presented in DKK million.

NOTE 4.2 - ACCOUNTING POLICIES

The accounting policies of the parent company are identical with the policies for the consolidated financial statements, unless otherwise are listed. The accounting policies applied remain unchanged compared to last year.

Minor reclassifications and adjustments have been made in the comparative figures.

Leases

IFRS 16 Leases is not applied in the financial statements for the parent company.

Investments in subsidiaries

Investments in subsidiaries are measured at cost. Where cost exceeds the recoverable amount, writedown is made to this lower value.

Dividends from subsidiaries are recognised as income in the income statement when adopted at the general meeting of the subsidiary.

Other

The balance sheet has been presented in accordance with the current/non-current distinction in accordance with IFRS, which is applicable after the Danish Financial Statements Act.

With reference to the provisions of the Danish Financial Statements Act, the parent company has refrained from preparing a cash flow statement information in the parent company financial statements. For this information, see the consolidated financial statements for BidCo RelyOn Nutec A/S.

INDEPENDENT AUDITOR’S REPORT

To the shareholders of BidCo RelyOn Nutec A/S

Our opinion

In our opinion, the Consolidated Financial Statements give a true and fair view of the Group’s financial position at 31 December 2019 and of the results of the Group’s operations and cash flows for the financial year 1 January to 31 December 2019 in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act.

Moreover, in our opinion, the Parent Company Financial Statements give a true and fair view of the Parent Company’s financial position at 31 December 2019 and of the results of the Parent Company’s operations for the financial year 1 January to 31 December 2019 in accordance with the Danish Financial Statements Act.

Our opinion is consistent with our Auditor’s Long-form Report to the Board of Directors.

What we have audited

The Consolidated Financial Statements of BidCo RelyOn Nutec A/S for the financial year 1 January to 31 December 2019 comprise the consolidated income statement, statement of comprehensive income, the consolidated balance sheet, the consolidated statement of changes in equity, the consolidated cash flow statement and the notes, including summary of significant accounting policies.

The Parent Company Financial Statements of BidCo RelyOn Nutec A/S for the financial year 1 January to 31 December 2019 comprise the income statement, the balance sheet, the statement of changes in equity and the notes, including summary of significant accounting policies.

Collectively referred to as the “Financial Statements”.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities

under those standards and requirements are further described in the *Auditor’s responsibilities for the audit of the Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark. We have also fulfilled our other ethical responsibilities in accordance with the IESBA Code.

To the best of our knowledge and belief, prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No 537/2014 were not provided.

Appointment

We were first appointed auditors of BidCo RelyOn Nutec A/S on 29 January 2019 for the financial year 2018. BidCo RelyOn Nutec A/S was listed on Oslo stock exchange on 11 September 2019 from which date BidCo RelyOn Nutec A/S became a Public Interest Entity.

Material Uncertainty Related to Going Concern

We draw attention to Note 1.1 in the Financial Statements stating that the earnings and liquidity of the Group and the Company after the end of the financial year to a large extent is adversely affected by the Covid-19 outbreak. As stated in Note 1.1, the situation indicated that a material uncertainty exists that may cast significant doubt on the Groups and the Company’s ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Statements for 2019. These matters were addressed in the context of our audit of the Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the Material Uncertainty Related to Going Concern section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter

Goodwill and brands with indefinite lifetime assets

Goodwill and brands with indefinite lifetime are subject to an annual impairment test, which encumbers a high degree of management estimate and judgement.

Estimates relate to Management’s assessment of future cash flows, growth and discount rates applied, which assumptions are used to project the recoverability of the carrying amount of goodwill and brands with indefinite lifetime. Judgements relates to the definition of cash generating units and the methods applied for impairment testing.

The assets might be impaired due to for example increased competition in local markets, changes in global economy and changes in the strategy of the Group.

We focused on this area because the impairment tests are subject to complex and subjective estimates and judgements by Management.

Refer to note 1.4 and 3.1 in the Consolidated Financial Statements.

Key audit matter

Consolidation

As part of the consolidation, a number of entries are made on group level due to the original and later business combinations and related purchase price allocations, recognition of right of use assets and lease liabilities according to IFRS16, recognition of minority interests, normal eliminations, etc.

The number of entries and journal entries increases the risk of errors and misstatements in the Consolidated Financial Statement.

We focused on this area because the Group consists of a large number of entities that varies in size, reports in different currencies and due to the number of journal entries made at group level, etc.

Refer to note 1.3, 3.3 and 6.1 in the Consolidated Financial Statements.

How our audit addressed the key audit matter

Our audit procedures included assessing the appropriateness of the cash-generating-units (CGU’s) defined by Management.

We updated our understanding of the internal procedures and relevant controls performed by Management and assessed these where relevant for our audit.

We examined the methodology for impairment testing used by Management.

Further, we examined the value in use calculations prepared by Management, hereunder by assessing and challenging significant assumptions such as expected future cash flows, growth in revenue and costs, capital expenditure, long term growth rates and applied discount rates. We involved our specialists in assessing the applied discount rates.

Finally, we examined the sensitivity analysis prepared by Management.

How our audit addressed the key audit matter

Our audit procedures included assessing the consolidation prepared by Management including the entries made at Group level.

We updated our understanding of the internal procedures and key controls performed by Management and assessed these where relevant for our audit.

We audited the consolidation, hereunder by sending instructions to auditors of entities in scope, receiving and reading the reporting from component auditors, discussed the component reporting with component auditors and performing procedures at group level.

Further, we examined underlying documentation supporting the journal entries made, hereunder tested the calculations prepared by Management with special focus on purchase price allocation entries, minority interests and eliminations.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the Financial Statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Moreover, we considered whether Management's Review includes the disclosures required by the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Consolidated Financial Statements and the Parent Company Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Management's responsibilities for the Financial Statements

Management is responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act and for the preparation of parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group or the Parent Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.
