Contingent liabilities

The company is a management company in joint taxation with SiPhotonIC ApS. The companies in the joint taxation are jointly liable on corporation taxes and taxes on dividends, interest and royalties.

Accounting policies

The Annual Report has been prepared in accordance with the provisions of the Danish Financial Statements Act applying to enterprises of reporting class B with election from reporting class C.

General

Reporting currency

The Annual Report is presented in Danish kroner (DKK).

In general regarding accounting and measuring

Income is recognized in the income statement when they are earned. Furthermore are all costs, depreciations and write downs recognized in the income statement when incurred.

Assets are recognized in the balance sheet when it is probable that future economical benefits will accrue to the company and the assets value can be measured reliably.

Liabilities are recognized in the balance sheet when it is probable that future economical benefits will be deducted from the company and the value can be measured reliably.

On inital recognition assets and liabilities are measured to cost price. Thereafter assets and liabilities are measured as described for each entry.

Anticipated risks and losses that arise before the time of presentation of the annual report and that confirm or invalidate affairs and conditions existing at the balance sheet date are considered at recognition and measurement.

Currency retranslation

Transactions denominated in foreign currency are translated into the functional currency at the exchange rates ruling at the date of the transaction. Exchange differences arising between the transaction date and the exchange rate at the date of actual payment are recognized in the income statement under financial income or financial expenses.

Receivables, payables and other monetary items denominated in foreign currencies are translated into the functional currency at the exchange rates ruling at the balance sheet date. The difference between the exchange rates ruling at the balance sheet date and at the date when the receivable or payable arose is recognized in the income statement under financial income or financial expenses.

Non-current assets aquired in foreign currency are measured to the exchange rate ruling at the date of the transaction.

Accounting policies

Income statement

Other external expenses

Other external expenses include expenses related to administration etc.

Dividends from group enterprises

Received dividends in the financial year from group enterprises are recognized in the income statement.

Financial items

Financial income and expenses are recognized in the income statement with the amounts related to the year. Financial income and expenses comprise interest receivable and payable, realised and unrealised capital gains on securities and currency translation adjustments.

Tax expense

Tax on income for the year, consisting of the year's current tax and deferred tax, is recognized in the income statement to the extent that it relates to the income or loss for the year and on equity to the extent that it relates there to.

Balance sheet

Financial fixed assets

Investments in group enterprises

Investments in group enterprises are recognized at historic cost less accumulated impairment losses. If the historic cost exceeds the recoverable amount the investment is written down to this lower value.

Receivables

Receivables are measured at amortized cost which corresponds in all material respects to nominal value. The value is reduced with provisions for expected bad debts.

Cash and bank balances

Cash comprises cash balances and bank balances.

Dividends

Dividends expected to be paid in respect of the year are stated as a separate line item under equity.

Accounting policies

Current tax and current deferred tax

The company is as an parent company liable for all outstanding taxes in the joint taxation.

Current tax liabilities and current tax assets are recognized in the balance sheet as estimated tax on the taxable income for the year, adjusted for change in tax on prior years' taxable income and for tax paid under the on-account tax scheme.

Deferred tax is measured according to the balance sheet liability method on all timing differences between the tax and accounting value of assets and liabilities.

Defered tax assets, including the tax value of tax loss carryforwards, are recognised at the expected value of their utilisation within the foreseeable future; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Any deferred net assets are measured at net realisable value.

Deferred income tax is measured using tax rules and tax rates that apply by the balance sheet date when the deferred tax asset is realised or the deferred income tax liability is settled. The change in deferred tax as a result of changes in tax rates is recognized in the income statement.

Liabilities

Other liabilities are measured at amortized cost, corresponding to the nominal value.
