Balance sheet

Intangible assets

Development projects in progress

Development costs comprise costs, wages and salaries directly and indirectly attributable to development activities.

Impairment of fixed assets

The carrying amount of intangible assets is subject to an annual test for indications of impairment other than the decrease in value reflected by amortisation.

Impairment tests are conducted of individual assets or groups of assets when there is an indication that they may be impaired. Write-down is made to the recoverable amount if this is lower than the carrying amount.

The recoverable amount is the higher of an asset's net selling price and its value in use. The value in use is determined as the present value of the forecast net cash flows from the use of the asset or the group of assets, including forecast net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Receivables

Receivables are measured at amortised cost.

Write-down is made for bad debt losses where there is an objective indication that a receivable or a portfolio of receivables has been impaired. If there is an objective indication that an individual receivable has been impaired, write-down is made on an individual basis.

Cash at bank and in hand

Cash and cash equivalents comprise cash.

Corporation tax and deferred tax

Current tax payable and receivable is recognised in the balance sheet as tax computed on the taxable income for the year, adjusted for tax on the taxable income of prior years and for tax paid on account.

Liabilities

Other liabilities are measured at net realisable value.
