##### Balance sheet

###### Investments in participating interests

Investments in participating interests are measured at cost. Dividends received that exceed the accumulated earnings in the participating interests during the period of ownership are treated as a reduction in the cost of acquisition.

###### Receivables

The Company has chosen IAS 39 as interpretation for impairment write-down of financial receivables.

Receivables are measured at amortised cost.

An impairment loss is recognised if there is objective evidence that a receivable or a group of receivables is impaired. If there is objective evidence that an individual receivable has been impaired, an impairment loss is recognised on an individual basis.

Receivables in respect of which there is no objective evidence of individual impairment are tested for objective evidence of impairment on a portfolio basis. The portfolios are primarily based on the debtors' domicile and credit ratings in line with the Company's risk management policy. The objective evidence applied to portfolios is determined based on historical loss experience.

Impairment losses are calculated as the difference between the carrying amount of the receivables and the present value of the expected cash flows, including the realisable value of any collateral received. The effective interest rate for the individual receivable or portfolio is used as discount rate.

###### Cash

Cash comprise cash and subject only to minor risks of changes in value.

###### Other payables

The Company has chosen IAS 39 as interpretation for liabilities.

Other payables are measured at net realisable value.
