ACCOUNTING POLICIES

GENERAL INFORMATION

The annual report for Northforge ApS for 2023 is prepared in accordance with the Danish Financial Statement Act for companies in Class B, with the option of individual rules for Class C companies.

The accounting policies applied in the financial statements are consistent with those of the previous year. The reporting currency is Danish kroner.

Recognition and measurement in general

The financial statements have been prepared under the historical cost convention.

Income is recognised in the income statement when earned. Value adjustments of financial assets and liabilities measured at fair value or amortised cost are also recognised in the income statement. Costs incurred to generate the earnings for the year are also recognised in the income statement, including amortisation, depreciation, impairment losses and provisions as well as reversals resulting from changed accounting estimates of amounts previously recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future financial benefits will flow to the Company and it is possible to obtain a reliable measurement of the individual assets.

Liabilities are recognised in the balance sheet when it is probable that future financial benefits will flow from the Company and it is possible to obtain a reliable measurement of the individual liabilities.

On initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described for each item.

Certain financial assets and liabilities are measured at amortised cost, whereby a constant effective interest rate is recognised over the life of the individual asset or liability. Amortised cost is determined as original cost less any repayments and with the addition/deduction of the accumulated amortisation of the difference between cost and nominal amount.

Anticipated losses and risks arising before the presentation of the financial statements and confirming or disconfirming facts and circumstances known at the reporting date are taken into consideration at recognition and measurement.

The functional currency used is Danish kroner. All other currencies are considered foreign currencies.
