Statement by the Board of Directors and the Executive Board

Today, the Board of Directors and the Executive Board have discussed and approved the annual report of Freya Biosciences ApS for the financial year 1 January - 31 December 2023.

The annual report is prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2023 and of the results of the Company's operations for the financial year 1 January - 31 December 2023.

Further, in our opinion, the Management's review gives a fair review of the matters discussed in the Management's review.

We recommend that the annual report be approved at the annual general meeting.

Independent auditor's report

To the shareholders of Freya Biosciences ApS

Opinion

We have audited the financial statements of Freya Biosciences ApS for the financial year 1 January - 31 December 2023, which comprise income statement, balance sheet, statement of changes in equity and notes, including accounting policies. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2023 and of the results of the Company's operations for the financial year 1 January - 31 December 2023 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

Management's responsibilities for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

Independent auditor's report

- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.

Management's review

Business review

Freya Biosciences ApS is a clinical stage women's health company pioneering a new class of microbial immunotherapies to address substantial unmet need across a range of indications.

Financial review

The income statement for 2023 shows a loss of DKK 81,096 thousand against a loss of DKK 32,157 thousand last year, and the balance sheet at 31 December 2023 shows equity of DKK 75,005 thousand.

Management considers the Company's financial performance in the year satisfactory and in line with the strategic directions.

Reclassification misstatement

Management found a reclassification misstatement between "Other external expenses" and "Research costs" in previous years, as "Other external expenses" includes expenses related to research and development. Comparative figures for 2022 have been adjusted to the changed classification in the annual accounts for 2023. The reclassification entails a reduction of "Other external expenses" by DKK 14,397 thousand and a corresponding increase of "Research costs" in the comparative figures for 2022. The changed classification has no impact on the profit for the year 2022 as well as the balance sheet total and equity as of 31 December 2022.

Financial position and going concern

In connection with the preparation of the 2023 Financial Statements, Management and the Board of Directors have assessed, whether it is justified that the going concern assumption is taken as a basis.

As of 31 December 2023, the Company's liquidity, comprised of cash and cash equivalents, was DKK 74,103 thousand and total equity was DKK 75,005 thousand. For the year ending 31 December 2023 the Company incurred a net loss of DKK 81,096 thousand.

The Company monitors its funding position on a monthly basis to ensure that it has access to sufficient funds to meet its forecasted cash requirements, including investing in platforms and clinical programs for the pipeline. Analyses are run to reflect different scenarios including, but not limited to, cash runway, human capital resources and pipeline priorities in order to identify risks to future liquidity and to enable Management to take corrective actions and allow the Company to continue as a going concern.

In 2023, the Company completed an investment agreement, Series A Financing Agreement, for the sale and issuance of 397,882 Series A Preference shares for gross cash proceeds of DKK 161.7m (USD 23.2m).

The Series A Financing Agreement further provides for a Tranche 2 closing in the event of certain development milestones, whereby purchasers of Series A Preference shares are obligated to a further subscription amount of DKK 99.6m (USD 14.8m), which may result in a further issuance of 243,527 Series A Preference shares.

As of the date of these Financial Statements, all development milestones related to the Tranche 2 closing have been met, whereby the Company is able to drawdown the Tranche 2 and the subscription amount of DKK 99.6m (USD 14.8m) whenever the funding is needed.

Based on this, Management and the Board of Directors have prepared the Financial Statements based on a going concern assumption.

Events after the balance sheet date

No material events affecting the Company's financial position have occurred subsequently to the financial year-end.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies

The annual report of Freya Biosciences ApS for 2023 has been prepared in accordance with the provisions in the Danish Financial Statements Act applying to reporting class B entities and elective choice of certain provisions applying to reporting class C entities.

Pursuant to section 110(1) of the Danish Financial Statements Act, the Company has not prepared consolidated financial statements.

The accounting policies used in the preparation of the financial statements are consistent with those of last year.

Reclassification misstatement

Management found a reclassification misstatement between "Other external expenses" and "Research costs" in previous years, as "Other external expenses" includes expenses related to research and development. Comparative figures for 2022 have been adjusted to the changed classification in the annual accounts for 2023. The reclassification entails a reduction of "Other external expenses" by DKK 14,397 thousand and a corresponding increase of "Research costs" in the comparative figures for 2022. The changed classification has no impact on the profit for the year 2022 as well as the balance sheet total and equity as of 31 December 2022.

Reporting currency

The financial statements are presented in Danish kroner (DKK'000).

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rate at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables and payables and other monetary items denominated in foreign currencies are translated at the exchange rate at the balance sheet date. The difference between the exchange rates at the balance sheet date and the date at which the receivable or payable arose or was recognised in the most recent financial statements is recognised in the income statement as financial income or financial expenses.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Income statement

Research costs

Research and development expenses are primarily internal and external costs incurred in the development of the Company's product candidates, including research and development expenses.

Due to the general uncertainty related to the development of pharmaceutical drugs, Management concludes that development costs can be capitalized only if the product has been fully developed and all necessary approvals from the authorities have been obtained. As a result, in 2023, Management has chosen to expense research and development costs in the year when incurred.

Contract Research Organizations expenses and related prepayments and accruals

Substantial portions of the Company's pre-clinical and clinical studies are performed by third-party laboratories, contract research organizations and other vendors (collectively, the "CROs"). The CROs generally bill monthly or quarterly for services performed. For studies, the Company accrues expenses based upon estimated percentage of work completed.

The Company's estimates depend on the timeliness and accuracy of the data provided by the CROs regarding the status of each program and total program spending. The Company evaluates the estimates to determine if adjustments are necessary or appropriate based on information received.

CROs invoice the Company upon the occurrence of predetermined contractual or activity-based milestones; however, the timing of these invoices and the Company's related payments often do not correspond directly to the level of performance of contracted activities. To the extent payments are made by the Company in advance of the related activities performed by the CROs, they are included in prepayments and expensed when the activities performed by the CROs. To the extent the payments are made by the Company following the performance of the related activities, the expense is accrued for as a trade payable.

Other external expenses

Other external expenses include the year's expenses relating to administration, premises, external consultants and advisors, payments under operating leases, etc.

Staff costs

Staff costs include wages and salaries, including compensated absence and pension to the Company's employees, as well as other social security contributions, etc. The item is net of refunds from public authorities.

Depreciation

The item comprises depreciation of property, plant and equipment.

The basis of depreciation, which is calculated as cost less any residual value, is depreciated on a straight line basis over the expected useful life. The expected useful lives of the assets are as follows:

Fixtures and fittings, other plant and equipment	2-5 years
Leasehold improvements	2-5 years

Depreciation is based on the residual value of the asset and is reduced by impairment losses, if any. The depreciation period and the residual value are determined at the acquisition date and are reassessed annually. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognised.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

In the case of changes in the depreciation period or the residual value, the effect on the depreciation charges is recognised prospectively as a change in accounting estimates.

Financial income and expenses

Financial income and expenses are recognised in the income statements at the amounts that concern the financial year. Net financials include interest income and expenses as well as allowances and surcharges under the advance-payment-of-tax scheme, etc.

Tax

Tax for the year includes current tax on the year's expected taxable income and the year's deferred tax adjustments. The portion of the tax for the year that relates to the profit/loss for the year is recognised in the income statement, whereas the portion that relates to transactions taken to equity is recognised in equity.

The Company is part of the tax credit scheme (in Danish: skattekreditordningen).

Balance sheet

Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost includes the acquisition price and costs directly related to the acquisition until the time at which the asset is ready for use.

Leases

The Company has chosen IAS 17 as interpretation for classification and recognition of leases.

Leases that do not transfer substantially all the risks and rewards incident to the ownership to the Company are classified as operating leases. Payments relating to operating leases and any other rent agreements are recognised in the income statement over the term of the lease. The Company's aggregate liabilities relating to operating leases and other rent agreements are disclosed under "Contingent liabilities".

Deposits

Deposits are measured at cost.

Investments in group entities, associates and participating interests

The Company has a subsidiary in the United States, Freya Biosciences, Inc.

Investments in group entities and associates are measured at cost. Where costs exceeds the recoverable amount, writedown is made to this lower value.

Dividends received that exceed the accumulated earnings in the group entity during the period of ownership are treated as a reduction in the cost of acquisition.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Impairment of fixed assets

The carrying amount of property, plant and equipment and investments in group entities is assessed for impairment on an annual basis.

The recoverable amount is the higher of the net selling price of an asset and its value in use. The value in use is calculated as the present value of the expected net cash flows from the use of the asset or the group of assets and the expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Previously recognised impairment losses are reversed when the reason for recognition no longer exists.

Receivables

The Company has chosen IAS 39 as interpretation for impairment write-down of financial receivables.

Receivables comprise Prepayments, Other receivables, Intercompany receivables and Tax receivables, which are presented separately in the statements of financial position.

Prepayments and other receivables are measured at amortized cost.

Current tax receivables are recognized in the balance sheet as calculated tax on the taxable income for the year, adjusted for tax on previous years' taxable income and for any taxes paid on account.

Prepayments comprise costs incurred concerning subsequent financial years.

An impairment loss is recognised if there is objective evidence that a receivable is impaired.

Cash

Cash comprise cash.

Equity

The share capital comprises the nominal amount of the company's ordinary and preference shares

Share premium account comprising the amount received, attributable to shareholders' equity, in excess of the nominal amount of the shares issued at the Company's capital increases, reduced by any expenses directly attributable to the capital increases as well as any exchange rate adjustments.

Retained earnings include the accumulated profit or loss for the year as well as prior periods.

Taxes

Current tax payables and receivables are recognised in the balance sheet as the estimated income tax charge for the year, adjusted for prior-year taxes and tax paid on account.

Deferred tax is measured according to the liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. Where alternative tax rules can be applied to determine the tax base, deferred tax is measured based on Management's intended use of the asset or settlement of the liability, respectively.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Deferred tax is measured according to the tax rules and at the tax rates applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax. Deferred tax assets are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Changes in deferred tax due to changes in the tax rate are recognised in the income statement.

Tax credits for research and development costs is recognised as a tax receivable of 22 % of the costs eligible for tax credits, when such cost has been realised.

Liabilities

The Company has chosen IAS 39 as interpretation for liabilities.

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. On subsequent recognition, financial liabilities are measured at amortised cost, corresponding to the capitalised value, using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan. Financial liabilities also include the capitalised residual lease liability in respect of finance leases.

Other liabilities are measured at net realisable value.

Convertible loans

The convertible debt facility is separated into liability and equity components based on the terms of the contract. On issuance of the convertible debt facility, the fair value of the liability component, is determined using a market rate for an equivalent non-convertible instrument.

The difference between the fair value of the liability component and the total proceeds is allocated to the conversion option. The conversion option is classified as a derivative liability, as it is not convertible into a fixed number of shares for a fixed amount of cash. Subsequent to initial recognition, the conversion option is accounted for as a derivative and thus, it is measured at fair value through profit or loss. Any gains or losses on the conversion option is recognized as part of financial items.

When estimating the fair value of financial instruments, management applies inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Fair value

The fair value measurement is based on the principal market. If no principal market exists, the measurement is based on the most advantageous market, i.e. the market that maximises the price of the asset or liability less transaction and/or transport costs.

All assets and liabilities which are measured at fair value, or whose fair value is disclosed, are classified based on the fair value hierarchy, see below:

Level 1: Value in an active market for similar assets/liabilities

Level 2: Value based on recognised valuation methods on the basis of observable market information

Level 3: Value based on recognised valuation methods and reasonable estimates (non-observable market information).

If a reliable fair value cannot be stated according to the above levels, the asset or liability is measured at cost.

Financial statements 1 January - 31 December

Notes to the financial statements

2 Financial position and going concern

In connection with the preparation of the 2023 Financial Statements, Management and the Board of Directors have assessed, whether it is justified that the going concern assumption is taken as a basis.

As of 31 December 2023, the Company's liquidity, comprised of cash and cash equivalents, was DKK 74,103 thousand and total equity was DKK 75,005 thousand. For the year ending 31 December 2023 the Company incurred a net loss of DKK 81,096 thousand.

The Company monitors its funding position on a monthly basis to ensure that it has access to sufficient funds to meet its forecasted cash requirements, including investing in platforms and clinical programs for the pipeline. Analyses are run to reflect different scenarios including, but not limited to, cash runway, human capital resources and pipeline priorities in order to identify risks to future liquidity and to enable Management to take corrective actions and allow the Company to continue as a going concern.

In 2023, the Company completed an investment agreement, Series A Financing Agreement, for the sale and issuance of 397,882 Series A Preference shares for gross cash proceeds of DKK 161.7m (USD 23.2m).

The Series A Financing Agreement further provides for a Tranche 2 closing in the event of certain development milestones, whereby purchasers of Series A Preference shares are obligated to a further subscription amount of DKK 99.6m (USD 14.8m), which may result in a further issuance of 243,527 Series A Preference shares.

As of the date of these Financial Statements, all development milestones related to the Tranche 2 closing have been met, whereby the Company is able to drawdown the Tranche 2 and the subscription amount of DKK 99.6m (USD 14.8m) whenever the funding is needed.

Based on this, Management and the Board of Directors have prepared the Financial Statements based on a going concern assumption.
