MANAGEMENT REVIEW

Activities of the Group

The Cotton Group started its operations in March 2021 by acquiring a portfolio of leading businesses in the European professional wear market.

- B&C, the market leader within promotional wear in Continental Europe with products sold across 30 European countries. The company is headquartered in Waterloo, Belgium.
- Wenaas, the Norwegian market leader in heavy workwear, expanding across Northern Europe. The company is also the European market leader in offshore and shipping expanding outside Europe. The company is headquartered in Måndalen, Norway.
- Clinic Dress, an e-commerce based healthcare apparel company, selling directly to clinics and individual care workers across Central Europe. The company is headquartered in Bramsche, Germany.
- Sverre W. Monsen, the market leader in garments and textiles to the healthcare and leisure industry in Norway, expanding across the Nordic region. The company is headquartered in Bergen, Norway.
- Hejco, designs, develops and manufactures workwear for employees in the care industry across the Nordic region. The company is headquartered in Borås, Sweden.
- Martinson, the market leader in Sweden within garments for hospitals. The company is headquartered in Borås, Sweden.

Performance in 2022

The revenue for the Group was DKK 2,265.7 million and the operating profit before special items (EBIT) was DKK 255.3 million. The performance in 2022 exceeded management's expectations as stated in the annual report for 2021.

Financial outlook 2023

The Cotton Group expects an operating profit before special items (EBIT) in 2023 around the level of the 2022 operating profit before special items (EBIT).

Forward-looking statements

Certain statements in this financial review are forward-looking statements. Such statements are based on current expectations and are, by their nature, subject to a number of uncertainties that could cause actual results and performance to differ materially from expected results or performance, expressed or implied, in the forward-looking statements.

Events after the balance sheet date

No significant events have occurred after 31 December 2022.

*) The income statement and cash flows for 2021 cover operations from the acquired activities from 31 March to 31 December 2021.

FINANCIAL REVIEW

Income Statement

Revenue

The revenue was DKK 2,265.7 million, compared to DKK 1,511.8 million in 2021, which only included revenue from 31 March 2021. If the acquired activities were consolidated from 1 January 2021, revenue in 2021 would have been DKK 2,003.3 million.

Gross margin

Costs of goods sold was DKK 1,568.7 million, which resulted in a gross profit of DKK 697.0 million compared to DKK 518.8 million in 2021. The gross margin decreased to 30.8% from 34.3% as sales prices were not increased as much as the cost price of goods sold.

Operating profit before special items (EBIT)

Operating profit before special items (EBIT) was DKK 255.3 million compared to DKK 190.4 million in 2021 (DKK 270.0 million for the full year 2021). The operating margin was 11.3% compared to 12.6% in 2021.

Earnings before interests and tax

Earnings before interest and tax was DKK 255.3 compared to DKK 303.3 million in 2021. 2021 was positively impacted by one-off negative goodwill of DKK 112.9 million.

Financial items

Financial items, net was an income of DKK 7.0 million compared to a cost of DKK 1.5 million in 2021. Excluding net foreign exchange rate gains of DKK 17.0 million (2021 DKK 9.1 million) financial items net was a cost of DKK 10.0 million compared to DKK 10.6 million in 2021.

Income tax

The effective tax rate for the year was 25.0% (2021 19.2%). The effective tax rate in 2021 was impacted by the non-taxable one-off income from negative goodwill.

Net profit

The net profit for the period was DKK 196.8 million compared to DKK 243.9 million in 2021. The decrease originated from the one-off negative goodwill of DKK 112.9 million in 2021.

Statement of financial position

Total assets

Total assets amounted to DKK 1,322.2 million compared to DKK 1,122.2 million in 2021. The higher total assets originated from an increase in inventories of DKK 247.0 million.

Shareholders' equity

The Cotton Group A/S was incorporated 25 February 2021. In connection with the acquisition of activities, the equity was increased to DKK 320.5 million. In 2022 a capital reduction of DKK 127.9 million and a dividend of DKK 74.0 million was paid out to the shareholders. On 31 December 2022 the equity of the Group was DKK 541.3 million (2021 DKK 567.8 million), of which DKK 8.9 million (2021 DKK 6.4 million) was attributable to non-controlling interests in subsidiaries. The equity ratio was 40.9% compared to 50.6% in 2021. The decrease in equity ratio mainly originated from the higher total assets.

FINANCIAL REVIEW

The equity of the parent company, The Cotton Group A/S, was DKK 113.0 million (2021 DKK 318.4 million).

Cash flow statement

Cash flow from operating activities excluding tax was DKK 20.3 million (2021 DKK 200.0 million), negatively impacted by increased inventories and trade receivables.

Cash flow from investing activities was a cash outflow of DKK 3.2 million (2021 a cash outflow of DKK 87.6 million). Cash flow from investments in intangible assets and property, plant and equipment were DKK 73.5 million (2021 DKK 23.8 million) of which DKK 43.3 million was related to right of use assets. The cash flow from investments in intangible assets and property, plant and equipment were almost fully offset by positive cash flow from the release of an escrow balance.

Cash flow from financing activities was a cash outflow of DKK 10.1 million (2021 a cash inflow of DKK 25.9 million). The cash outflow in 2022 originating from a capital reduction and dividend paid to shareholders, reduced by proceeds from the bank overdraft facility.

SUSTAINABILITY

The following constitutes The Cotton Group's statutory statement regarding corporate responsibility cf. section 99a of the Danish Financial Statements act.

The Cotton Group was established in March 2021, by taking over 6 brands within promotional wear and workwear. Within these brands The Cotton Group cooperates with third party suppliers to produce garments that are sold via the entities in the Group. The work in respect of sustainability has been built upon the structures already established by the former owner of the brands. The key focus during 2022 has been on analysing areas where the environmental impact can be reduced the most and preparing the compliance structure in respect of sustainability. A decentralized structure has been established to ensure that sustainability decisions are taken at the same level as business decisions to realize the highest possible effect from initiatives, rather than following a generic set of actions.

The sustainability approach applied for the individual business segments is based on an overall vision for conducting our business, which sets out a high ethical standard with a focus on minimizing the environmental footprint and being a fair and equitable company respecting everybody's rights. As a cornerstone of our sustainability commitment, we follow the UN Global Compact and its guiding principles for Corporate Responsibility on human rights, labour, environment, and anti-corruption.

Most of our impact on society comes from the suppliers we work with, which continue to be a focus for our sustainability work. We have a high focus of ensuring that all of our suppliers are subject to audits either through certifications or through a membership of Amfori-BSCI. It is our aim that 100% of our key suppliers and 95% of our tier one suppliers are subject to compliance audits by third party organisations. Currently 90% of all tier one suppliers are subject to sustainability audits.

By conducting audits via associations and certification agencies, we strengthen our leverage thanks to cooperation with other member brands in risk prevention and remediation.

Further to requiring certifications or compliance audits from our suppliers, we seek to create continuous improvements by establishing long-lasting relationships with our suppliers and to treat them with respect and dignity to create business relationships that are mutually beneficial. Together with our suppliers we follow up on audits performed trying to improve the way our suppliers work. The organisations that we are a member of also make whistle-blower systems available, so the employees or other partners of our suppliers have the possibility to report issues. This gives us further possibilities to follow up and act on potential issues.

We have during 2022 been analysing training programmes and whistle blower systems and expect to implement this during 2023.

During 2023 we will also start analysing the Corporate Sustainability Reporting Directive adopted by the EU in 2022, to be prepared for complying with and reporting in accordance with the requirements, which will become mandatory for The Cotton Group in 2025.

Environment and climate

We acknowledge that activities associated with the production, the consumption and the end-of-life disposal of clothing has an impact on the environment. As an apparel brand, we are committed to contributing to continuous environmental improvements, within the sphere of our influence. Therefore, we support initiatives to promote greater environmental responsibility and encourage environmentally friendly technologies, and continuously seek to improve environmental performance, by reducing use of energy, water and material resources, and by minimizing emissions and waste.

We have in 2022 continued our work in several different ways to reduce our environmental impact. This includes producing high quality clothing, which can be used for a long time, and to optimising the production process to reduce the waste in respect of fabrics.

We have also introduced several new products based on organic cotton, in-conversion cotton (where we assist suppliers in converting to organic cotton) and bio fibres.

The Cotton Group has obtained recognised environmental certificates i.e., ISO 14001 or from Miljøefyrtern together with several product label certificates.

In The Cotton Group we have an overall strategy, to limit our impact on the climate. Our discharge of CO2 mainly originates from transportation, travel, company cars and energy consumption in the supply chain. It is thus within these areas we seek to reduce discharge by selecting climate friendly solutions.

SUSTAINABILITY

Human rights

In The Cotton Group, we are committed to respecting and supporting internationally declared human rights, and not to be complicit in any human rights abuses. To ensure that we uphold high standards, our policies are based on the Code of Conduct for Amfori-BSCI and similar organisations, the standards of the International Labour Organisation (ILO) and the United Nations Universal Declaration of Human Rights, in relation to forced labour, child labour, freedom of association, compensation, working hours, occupational health and safety, and a legally binding employment relationship. Due to the breaches of human rights in Uighur we have implemented a decision not to use cotton originating from this region.

Our main challenges and risks in terms of human rights is in our global supply chain. To manage these risks, the Group has developed a set of Supplier code of conducts, which all suppliers must commit to and sign. The compliance with these guidelines is tested through audits conducted by Amfori-BSCI or other certification agencies as described earlier.

Social- and employee conditions

As with human rights, the Group's primary risks regarding the fundamental labour standards are in our supply chain. During 2022 the share of suppliers being audited has increased, and our audit partners have in 2022, through on-site audits continued to test, that our suppliers are not using for example: child labour, forced labour or prohibiting the right to association and collective bargaining. Suppliers are typically audited every second year.

We aim at establishing strong long-lasting relationships with our supplies, where we through cooperation and support maintain high social standards, which include improving working and living conditions for workers and communities, paying decent wages, promoting gender equality, eliminating child labour, discrimination, and harassment.

For the Group's own activities, we aim to make sure that we provide our employees with a safe working environment for both warehouse and office workers trough training and analysing best practices.

Anti-corruption

The Cotton Group recognises corruption and bribery as barriers to sustainable development and free trade. We believe that business should always be conducted with integrity, treating all business partners fairly and equitably. Any form of corruption destroys confidence in the marketplace and business relationships, weakens democracy, changes economic and social development, and damages transparency in the transaction of businesses. Business should be based on the quality of products and fairness.

The Cotton Group follows a policy of zero tolerance for all forms of corruption, including extortion and bribery. We do not permit any undue payments, nor do we engage in any political activity or contribution contrary to the laws in countries, where we do business. The acceptance of any kind of kickbacks, rebates, or other values to obtain an advantage or personal benefit in relation to our business is prohibited and is a breach of our policies.

SUSTAINABILITY

Gender diversity

The following constitutes The Cotton Group's statutory statement regarding corporate responsibility cf. section 99b of the Danish Financial Statements act.

The global gender distribution by the end of 2022 was 43% men and 57% women. The proportion of women and men in management positions constituted 50%. Management comprises 6 persons, and include the CEO's of the Brands and the CEO of the Group. It is the intention of the Board of Directors to ensure that the percentage of the underrepresented gender does not fall below 33%.

In accordance with the Danish Act on Public and Private Limited Companies, the Board of Directors has set a target for the percentage of the underrepresented gender in the Board of Directors.

It is the goal to have 25% representation of women in the Board of Directors within the next 4 years. The Members of the Board of Directors have been elected amongst the shareholders of the Cotton Group A/S, who are all men, and it has therefore not been possible to meet this goal in 2022.

Statutory statement on data ethics

The data utilised by The Cotton Group mainly relates to business-to-business information. However, we do have some data, generated by the Group, in respect of private customers and employees. For private customers, we utilise analytical tools like google to analyse consumption patterns, but do not store this data in respect of individuals, all in accordance with data protection laws.

The Group has established a policy in respect of data ethics. This requires data ethics and security to be considered when implementing new technologies and requires us to act according to applicable law, ethically and transparent in respect of persons providing data.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

The Cotton Group A/S is a limited company incorporated and domiciled in Denmark. The financial statements for the year ended 31 December 2022 include the consolidated financial statements for The Cotton Group A/S and its subsidiaries (collectively, the Group) and the financial statements for The Cotton Group A/S.

The financial statements cover the period for the 1 January to 31 December 2022.

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), as approved by the EU and the announcement of the implementation of IFRS in accordance with the Danish Financial Statements Act. The Board of Directors has adopted the Annual Report for The Cotton Group A/S for the year ended the 31 December 2022 on 31 March 2023. The Annual Report for the year ended 31 December 2022, is presented for the shareholders' approval at the annual general meeting 17 April 2023.

Basis for preparation

The consolidated financial statements have been prepared in DKK.

The accounting policies of the Group have been prepared on a historical cost basis.

The shares of The Cotton Group A/S are not publicly traded, and The Cotton Group has chosen not to implement IFRS 8, why the financial statements do not include information on operating segments.

Statement on going concern

The Board of Directors and the Management Board have during the preparation of the consolidated financial statements of the Group assessed the going concern assumption. The Board and the Management Board believe that no events or conditions give rise to doubt about the Group's ability to continue as a going concern (within the next reporting period). The conclusion is made based on knowledge of the Group, the estimated economic outlook and identified risks and uncertainties in relation here-to. Further, the conclusion is based on review of budgets, including expected development in available liquidity and capital, current credit facilities and their contractual and expected maturities. Consequently, it has been concluded that it is reasonable to apply the going concern concept as underlying assumption for the consolidated financial statements of the Group.

Changes in accounting policies

Effective 1 January 2022, the Group has implemented the following amended standards and interpretations:

- Reference to the Conceptual Framework – Amendments to IFRS 3
- Property, Plant and Equipment: Proceeds before Intended Use – Amendments to IAS 16
- Onerous Contracts – Costs of Fulfilling a Contract – Amendments to IAS 37
- Annual improvements (2018-2020 cycle).

The changes have not had any impact on recognition and measurement in the annual report.

Basis of consolidation

The consolidated financial statements comprise The Cotton Group A/S and entities controlled by The Cotton Group A/S. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Control is usually achieved by directly or indirectly holding or controlling more than 50% of the voting rights. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

The financial statements used for consolidation have been prepared in accordance with The Cotton Group's accounting policies. On consolidation intra-group transactions, balances, income and expenses are eliminated. Unrealised gains arising from Group entities are eliminated against the investment to the extent of the Group's interest in the investment. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

The non-controlling interest's share of net profit and equity of subsidiaries, which are not wholly owned, are included in the Group's net profit and equity, respectively, but disclosed separately.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

A change in ownership interest of a subsidiary, without loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets, liabilities, non-controlling interest, and other components of equity, while any resultant gain or loss is recognised in the income statement.

Business combinations

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative costs.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances, and pertinent conditions as at the acquisition date.

The acquisition date is the date when The Cotton Group A/S obtains control of the acquired business.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units. Goodwill is tested for impairment at a minimum once a year. The first impairment test is performed before the end of the acquisition year.

If there at the time of acquisition are uncertainties around the identification or measurement of assets, liabilities, contingent liabilities or the cost of acquisition, then the initial recognition is based on provisional values. If changes related to the identified or the valuation of the costs of acquisition or acquired assets, liabilities or contingent liabilities are detected within 12 months of the acquisition date, such changes are recognised with retrospective effect to the acquisition date and comparative figures are adjusted to that effect. After 12 months goodwill is no longer adjusted.

Where goodwill has been allocated to a cash-generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

Foreign currency translation

The functional currency of the parent company is DKK.

A functional currency is determined for each of the reporting entities of The Cotton Group. The functional currency is the currency used in the primary economic environment in which the reporting entity operates. Transactions in currencies other than the functional currency are transactions in foreign currencies.

On initial recognition, transactions denominated in foreign currencies are translated to the functional currency at the exchange rates at the transaction date. Exchange differences arising between the exchange rate at the transaction date and at the date of payment have been recognised in the income statement as financial income or expenses.

Receivables, payables and other monetary items in foreign currencies are translated into the functional currency at the exchange rate at the reporting date.

The difference between the exchange rate at the reporting date and at the date of which the receivable or payable arose or the exchange rate applied in the most recent financial statements has been recognised in the income statement under financial income or financial expenses.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

On recognition in the consolidated financial statements in other subsidiaries with another functional currency than DKK, the income statement is translated at the exchange rates at the transaction date and the statement of financial position is translated at the exchange rates at the reporting date. Average exchange rates for the month are used as the exchange rate at the transaction date to the extent that this does not significantly change the presentation of the underlying transactions.

Exchange rate differences arising on the translation of the equity of these subsidiaries at the beginning of the year to the exchange rates at the reporting date; and on the translation of the income statement from the exchange rate at the transaction date to the exchange rate at the reporting date are recognised directly in other comprehensive income and classified in equity in a separate currency translation reserve. Exchange rate differences are allocated between the parent company's and the non-controlling interests' shares of equity.

Exchange rate differences from inter-group balances in another functional currency, that are considered to be an integrated part of the net investment in a group company, is recognised in other comprehensive income and classified in equity in a separate currency translation reserve.

On full or partial divestment of foreign subsidiaries, where The Cotton Group ceases to have control, foreign exchange adjustments accumulated in equity through other comprehensive income and which can be attributed to entities are recirculated from the "Currency translation reserve" to the income statement together with any gain or loss from the divestment.

A repayment of an inter-group balance considered to be an integrated part of the investment in a group company is not considered to be a partial divestment of a foreign subsidiary.

Derivative financial instruments

On initial recognition, derivative financial instruments are recognised in the balance sheet at cost and are subsequently measured at fair value. Positive and negative fair values of derivative financial instruments are presented as separate items in the balance sheet.

Fair value hedges

Fair value adjustments of derivative financial instruments designated and qualifying as hedging of the fair value of a recognised asset or liability are recognised in the income statement together with fair value adjustments of the hedged asset or liability.

Hedging of future cash flow

Fair value adjustments of derivative financial instruments designated and qualifying as hedging of future assets or liabilities are recognised as separate items in the balance sheet and in the hedging reserve under equity. If the forecast transaction results in the recognition of assets or liabilities, amounts previously recognised in equity are transferred to the cost of the asset or liability, respectively. If the forecast transaction results in income or expenses, amounts previously recognised in equity are transferred to the income statement in the period in which the hedged item affects the income statement.

Fair value adjustments of derivative financial instruments that do not qualify for hedge accounting are recognised in the income statement on an ongoing basis.

Other derivative financial instruments

Fair value adjustments of derivative financial instruments that do not qualify for hedge accounting are recognised in the income statement on an ongoing basis.

Revenue

The Group's revenue consist of sale of different types of workwear and promotional wear.

A contract is split up into individual transactions when the fair value of each individual sales transaction can be estimated reliably and when each individual sales transaction represents a stand-alone value for the buyer. Sales transactions are deemed to have a stand-alone value for the buyer when the transaction is individually identifiable and usually sold separately.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

Revenue is measured at the fair value of the agreed consideration exclusive of VAT and taxes charged on behalf of third parties. All discounts and rebates granted are recognised in revenue.

Revenue from the sale of goods

Income from the sale of goods for resale and finished goods, including sold workwear, is recognised in revenue when the most significant rewards and risks have been transferred to the buyer, the income can be measured reliably, and payment is expected to be received.

Costs of goods sold

Production costs comprise costs incurred in generating revenue for the year. Such costs include direct and indirect costs of raw materials and consumables, wages and salaries, rent and leases as well as impairment losses on inventories.

Distribution costs

Distribution costs comprise costs related to the distribution of goods sold in the year and to sales campaigns, etc., carried out in the year, including costs related to sales staff, advertising, exhibitions as well as amortisation and depreciation. Sales and marketing costs are recognised in the income statement when the Company obtains control of the sales or marketing product.

Administrative expenses

Administrative expenses comprise expenses paid in the year to manage and administer the Company, including expenses related to administrative staff, office premises, office expenses and amortisation and depreciation.

Special items

Special items include significant non-recurring income or expenses that are not considered to be part of the ordinary activities of the group. Such income and expenses include restructuring costs, adjustments related to business combinations and negative goodwill.

Financial items

Financial income and expenses are recognised in the income statement at the amounts relating to the financial year. Financial income and expenses comprise interest income and expenses, gains and losses on securities, payables and transactions denominated in foreign currencies, fair value adjustments on derivative financial instruments that does not classify for hedge accounting, amortisation of financial assets and liabilities as well as surcharges and refunds under the on-account tax scheme, etc.

Corporation tax

Tax for the year

The Cotton Group A/S is part of a joint taxation with Dyvig Holdings A/S (Administrator of the joint taxation) and the Danish subsidiaries of Dyvig Holdings A/S. The income tax is allocated among the joint taxed companies based on the taxable income of these companies.

Tax for the year comprises current tax for the year and changes in deferred tax. The tax expense relating to the profit/loss for the year is recognised in the income statement, and the tax expense relating to amounts recognised directly in equity is recognised directly in equity.

Payable and deferred tax

Current tax payables and receivables are recognised in the balance sheet as tax computed on the taxable income for the year, adjusted for tax on taxable income in previous years and tax paid on account.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised on temporary

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

differences relating to non-deductible goodwill and on office premises and other items where temporary differences – other than from business combinations - arise at the acquisition date without affecting either profit/loss for the year or taxable income.

Where alternative tax rules can be applied to determine the tax base, deferred tax is measured based on Management's intended use of the asset or settlement of the liability, respectively. Deferred tax assets, including the tax value of tax loss carryforwards, are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity and jurisdiction.

Deferred tax assets and deferred tax liabilities are netted, if the group has a legal right to net current tax assets and liabilities or if it is the intention to settle current tax assets and liabilities on a net basis or realise these simultaneously.

Adjustment is made to deferred tax resulting from elimination of unrealised intra-group profits and losses.

Deferred tax is measured according to the tax rules and at the tax rates applicable in the respective countries at the balance sheet date when the deferred tax is expected to crystallise as current tax. Changes in deferred tax due to changes in the applicable tax rates are recognised in other comprehensive income.

Intangible assets

Intangible assets are measured at cost less accumulated amortisation and impairment losses.

Software, licenses and patents are measured at cost less accumulated amortisation and impairment losses. Software, licenses and patents are amortised on a straight-line basis over the term of the patent, licence or expected utilisation period normally between 3 and 10 years.

Development projects, software, patents and licenses etc

Development projects that are clearly defined and identifiable and where the technical feasibility, sufficient resources and a potential future market or development potential are evidenced, and where the Company intends to produce, market or use the project, are recognised as intangible assets, provided that the cost can be measured reliably and that there is sufficient assurance that future earnings can cover production costs, selling costs, administrative expenses and development costs. Other development costs are recognised in the income statement as incurred.

Property, plant and equipment

Land and buildings, plant and machinery and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated.

Cost comprises the purchase price and any costs directly attributable to the acquisition until the date when the asset is available for use. The cost of self-constructed assets comprises direct and indirect costs of materials, components, sub-suppliers, wages and salaries as well as borrowing costs relating to specific and general borrowing directly attributable to the construction of the individual asset. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

When significant parts of plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred. The basis of depreciation, which is calculated as cost less any residual value, is depreciated on a straight-line basis over the expected useful life. The expected useful lives of the assets are as follows:

Buildings	25-40 years
Plant and machinery	3-10 years
Other equipment	3-10 years

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

Depreciation is based on the residual value of the asset and is reduced by impairment losses, if any. The depreciation period and the residual value are determined at the acquisition date and are reassessed annually. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognised.

In case of changes in the depreciation period or the residual value, the effect on the depreciation charges is recognised prospectively as a change in accounting estimates.

Depreciation is recognised in the income statement as production costs, distribution costs and administrative expenses, respectively.

Gains and losses are recognised in the income statement as other operating income or other operating expenses, respectively. Gains and losses on the disposal of items of property, plant and equipment are calculated as the difference between the selling price less selling costs and the carrying amount at the date of disposal.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received.

Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Impairment of non-current assets

The Group assesses at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an assets or cash generating unit's fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or cash generating unit exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

The Group bases its impairment calculation on most recent budgets and forecast calculations, which are prepared separately for each of the Group's cash generating units to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit or loss in expense categories consistent with the function of the impaired asset, except for properties previously revalued with the revaluation taken to other comprehensive income. For such properties, the impairment is recognised in other comprehensive income up to the amount of any previous revaluation.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the assets or cash generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of each cash generating unit or group of cash generating units to which the goodwill relates. When the recoverable amount of the cash generating unit is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Inventories

Inventories are measured at cost in accordance with the FIFO method. Where the net realisable value is lower than cost, inventories are written down to this lower value.

Goods for resale and raw materials and consumables are measured at cost, comprising purchase price, duties and delivery costs.

Finished goods and work in progress are measured at cost, comprising the cost of raw materials, consumables, direct wages and salaries as well as indirect production overheads. Production overheads comprise costs of material and labour as well as maintenance of and depreciation on production machinery, buildings and equipment as well as costs relating to plant administration and management.

The net realisable value of inventories is determined as the selling price less costs of completion and costs incurred to affect the sale, taking into account marketability, obsolescence and developments in the expected selling price.

A right-of-return asset is recognised in inventories for the right to recover the goods expected to be returned by customers. The asset is measured at the former carrying amount of the inventory, less any expected costs to recover the goods and any potential decreases in value. The Group updates the measurement of the asset for any revisions to the expected level of returns and any additional decreases in the value of the returned products.

Receivables

Receivables are measured at amortised cost.

The Group recognises an allowance for expected credit losses for all debt instruments not held at fair value through profit or loss. Expected credit losses are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate.

For trade receivables, the Group applies a simplified approach in calculating expected credit losses. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime expected credit losses at each reporting date. The Group has established a provision matrix that is based on its

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Prepaid costs

Prepayments comprise costs incurred concerning subsequent financial years.

Pension obligations

The Group contributes to pension plans which cover employees in various companies of the Group. The pension plans are typically defined contribution plans.

The Group holds an unfunded defined benefit pension plan in Germany, which has been closed, but requires pension payments to be made to former members.

Remeasurements, comprising of actuarial gains and losses, are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Group recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability. The Group recognises the following changes in the net defined benefit obligation under administrative expenses in the consolidated statement of profit or loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- Net interest expense or income.

Provisions

Provisions are recognised when the Company has a legal or constructive obligation as a result of a past event at the balance sheet date, and it is probable that an outflow of the Company's resources embodying economic benefits will be required to settle the obligation. Provisions are measured at net realisable value based on management's best estimate of the costs to be incurred. If the obligation is expected to be settled far into the future, the obligation is measured at fair value.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contract liabilities

Refund liabilities are recognised for the obligation to refund some or all of the consideration received (or receivable) from a customer. The Group's refund liabilities arise from customers' right of return and volume rebates. The liability is measured at the amount the Group ultimately expects it will have to return to the customer. The Group updates its estimates of refund liabilities at the end of each reporting period.

Liabilities other than provisions

Financial liabilities are recognised at the date of borrowing at the proceeds received less transaction costs paid. On subsequent recognition, financial liabilities are measured at amortised cost, corresponding to the capitalised value, using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan.

Short term financial liabilities and other liabilities are measured at net realisable value.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 Accounting policies

Fair value

Fair value is determined based on the principal market. If no principal market exists, the fair value is based on the most advantageous market, i.e. the market that maximises the price of the asset or liability less transaction and/or transport costs.

All assets and liabilities that are measured at fair value or whose fair value is disclosed are classified based on the fair value hierarchy, see below:

- Level 1: Value based on the fair value of similar assets/liabilities in an active market.
- Level 2: Value based on generally accepted valuation methods on the basis of observable market information.
- Level 3: Value based on generally accepted valuation methods and reasonable estimates based on non-observable market information.

Cash flow statement

The cash flow statement shows the Company's cash flows from operating, investing and financing activities for the year, the year's changes in cash and cash equivalents as well as the Company's cash and cash equivalents at the beginning and end of the year.

Cash flows from operating activities are calculated as the profit/loss for the year adjusted for non-cash operating items, changes in working capital and corporation tax paid. Interest received is classified as cash flows from operating activities. Furthermore, dividends received are classified as operating activity.

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of entities, activities and intangible assets, property, plant and equipment and investments.

Cash flows from financing activities comprise changes in the size or composition of the Company's share capital and related costs as well as the raising of loans, repayment of interest-bearing debt and payment of dividend to shareholders.

Cash and cash equivalents comprise cash and short-term marketable securities with a term of three months or less that are subject to only minor risks of changes in value.

Key figures

The financial ratios stated under "Financial highlights" have been calculated as follows:

Gross margin	Gross profit / Revenue
Operating margin	Operating profit before special items (EBIT) / Revenue
Equity ratio	Total equity / Total assets
Return on equity	Net profit / Average total equity

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2 Significant accounting estimates and management judgements

In preparing the consolidated financial statements, Management makes a number of accounting estimates and judgements on complex areas of accounting. The assessments are based on assumptions concerning future developments and may have a significant effect on recognised assets and liabilities, as well as income and expenses. As a consequence of their complex nature and their effect on the consolidated financial statements, these assessments receive close attention from Management throughout the year. Thus, all estimates and judgement assumptions are regularly reassessed as more detailed information based on historical data, experience, the financial situation, market situation and other external factors become available.

The most significant accounting estimates for The Cotton Group are related to Right of use assets, trade receivables and inventories.

Right of use assets

In accounting for lease contracts, various estimations are applied in determining right-of-use assets and lease liabilities. Estimates include assessment of lease periods, utilisation of extension options and applicable discount rates. Please refer to note 14 for a description of right of use assets.

Trade receivables

Estimates are applied when assessing input to the expected credit loss model. Management evaluates the expected losses and the nature of the receivables. Judgements are applied in determining credit risk characteristics of the customer category.

Please refer to note 30 for an aging analysis of trade receivables and a description of credit risks.

Inventories

Estimates are applied with assessing the net realisable value of inventories.

Inventories are written down based on the impairment practices applied by the Group. This includes an individual assessment of inventories in respect of obsolete goods, quality of goods and relevance of goods.

Please refer to note 15 for an analysis of inventories carried at net realisable value.

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits.

Please refer to note 11 for a description of deferred tax assets.

Land and buildings

The group leases offices and warehouses, used in the sale- and distribution activities of the group.

Warehouses are the main part of the group's property leases.

Rental contracts are typically made for fixed periods of three to five years. In 2022 a new rental contract for a warehouse has commenced with a duration of ten years. Rental contracts may have extension options, which are used to maximise operational flexibility in terms of managing the assets used in the group's operations.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

Other equipment

Other equipment mainly consist of leased vehicles, which are primarily used by the group's management and salespersons. The group currently leases 90-100 vehicles. Rental contracts for vehicles are typically made for fixed periods of three to four years. The group also leases printer and other equipment with a typical rental period of two to three years.

The group has not provided any considerable residual value guarantees in relation to equipment leases.

Short-term leases and low value assets

The group has expensed DKK 2.1 million (2021 DKK 0.5 million) in the income statement related to rental agreements for short-term leases and low value assets.

Leases not yet commenced to which the group is committed

The group has entered into a new rental agreement for office facilities in Belgium, which will commence on 1 January 2023. The rental agreement has a fixed term of 9 years with an annual rent of DKK 1.9 million.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

17 Prepayments

Prepayments include prepayments made to suppliers and prepaid services.

18 Shareholders equity

Management of the capital structure

The group continuously monitors and adjusts the capital structure to balance the return on equity with the cost and risk related to third party financing. The equity ratio of the Group at the end of 2022 was 40.9% (2021 50.6%).

The return on equity in 2022 was 35.5% (2021 43.0%)

Payment of dividends are to be declared, only after due consideration of the strength of the capital structure and ensurance that the group continues to have sufficient funds to grow the business. It is proposed to declare DKK 86.5 million as dividend for 2022 (2021 DKK 74.0 million).

The share capital at the end of 2022 comprised 26,311,150 shares. A capital reduction was carried out in February 2022 resulting in a payment of DKK 127.9 million to cancel all 16,719,537 A-shares.

Reserves

Dividend

Dividend is recognised as a liability, at the time the declaration of dividend has been adopted by the general assembly. Dividend proposed for the year is shown as a separate item under the shareholders equity, until adopted by the general assembly. It is proposed to declare DKK 86.5 million as dividend for 2022 (2021 DKK 74.0 million).

Currency translation reserve

Currency translation reserves, which at 31 December 2021 was negative by DKK 31.0 million (2021 negative by DKK 5.8 million), includes the parent company's share of exchange rate fluctuations from converting the net assets in subsidiaries reporting in other functional currencies than DKK into DKK.

The currency translation reserve is dissolved if a subsidiary is sold.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

19 Non-controlling interest		
Non-controlling interest share in the statement of financial position can be specified as follows:		
Non-current assets	70.1	68.0
Current assets	1,068.9	526.8
Non-current liabilities	(80.6)	(32.4)
Current liabilities	(397.9)	(128.0)
Owners of The Cotton Group A/S	651.6	428.0
Non-controlling interests	8.9	6.4

Non-controlling interest are related to Wenaas Workwear AS, The Cotton Group SA/NV, Sverre W Monsen AS and Hejmar AB. A profit of DKK 2.3 million was allocated to non-controlling interests in 2022 (2021 DKK 0.0 million).

20 Pensions and similar obligations

In a defined benefit plan, the company holds the risk related to the development in interest, inflation and mortality, and the company has committed to make a certain payment to the employees. In a defined contribution plan, the risk related to fluctuations are solely born by the employees. The Cotton Group mainly has defined contribution plans. However, a dormant company in Germany has a defined benefit plan, under which the company will make pension payments to former employees. No further rights can be earned under this plan. Furthermore, the general structure of pension plans in France and in Sweden leave a residual risk with the company, and are as a result thereof also to be considered defined benefit plans.

The future payments under the defined benefit plans are mainly dependent on the salaries at the time of retirement and the seniority of the employees. The group expects to pay out DKK 0.6 million under the defined benefit plans in 2023 (2022 DKK 0.6 million).

The most significant actuarial assumptions are as follows:

DKK million	2022	2021

---	------	------

Contract liabilities comprises liabilities related to customer loyalty programmes and right of return liabilities towards customers.

25 Contingent liabilities

The Cotton Group is party to a few legal disputes. It is not expected that the outcome from these cases, will have a significant impact on the Group. In connection with the acquisition made in 2021, The Cotton Group took over guarantees related to the former owners' sale of its other subsidiaries. Currently, we do not have knowledge of any potential payments to be made under these guarantees. As security for the guarantees issue, The Cotton Group has issued a bank guarantee of DKK 14.9 million and DKK 15.8 million have been placed on an escrow account recognised as current other receivables. In 2021 DKK 82.3 million was placed on escrow accounts recognised as non-current other receivables. During 2022 an escrow of DKK 66.5 million was replaced with the bank guarantee described above.

The Cotton Group A/S is jointly taxed with all Danish resident affiliated companies of Dyvig Holdings A/S, who is the administration company for the joint taxation. Pursuant to the Danish Corporation Tax Act, the companies are liable for income taxes etc. for the jointly taxed companies and for any obligations to withhold tax at source on interest, royalties and dividends from the jointly taxed companies.

28 Business combination

On 24 March 2021 The Cotton Group A/S acquired 100% of the shares in Fristads Workwear Group Holding AB owning a number of companies in the European professional wear market, and providing promotional wear and workwear for a wide variety of customers and industries across Europe. The activities of The Cotton Group are operated through three businesses segments:

Promotional wear, sold and distributed by B&C across approx. 30 European countries through a network of specialized promotional textile wholesalers, who distribute the products to many thousand local print shops and e-tailers that service the end customers;

Heavy workwear is sold by Wenaas with operations in Norway, Aberdeen, Rotterdam and Singapore. Wenaas was among the first to develop and make work clothes in Norway, and has developed from a small, local enterprise into a leading international supplier of head-to-toe workwear, and safety solutions to the shipping and offshore sector. Wenaas is also the market leader amongst large customers in Norway across most industries; and

Healthcare workwear are distributed by Clinic & Job Dress, Sverre W. Monsen, Hejco and Martinsson all with strong positions within the healthcare and the hospitality segment across the Nordics and Central Europe.

No acquisition was carried out in 2022.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

28 Business combination (continued)

DKK million	2021
<i>The fair value of assets and liabilities recognised as a result of the acquisition, can be specified as follows:</i>	
Cash and cash equivalents	197.8
Trade receivables	219.4
Inventories	559.8
Other receivables	86.5
Non-current assets	170.0
Deferred tax, net	53.0
Interest-bearing loans and borrowings	(490.6)
Trade payables	(226.1)
Contract liabilities	(23.1)
Other liabilities	(100.3)
Defined benefit obligations	(13.0)
Net assets acquired	433.4
Negative goodwill on acquisition	(112.9)
Cash purchase consideration	320.5

The fair value of trade receivables acquired in 2021 was DKK 219.4 million. The gross contractual amount for trade receivables acquired in 2021 was DKK 227.9 million, with an impairment loss allowance of DKK 8.5 million recognised on acquisition.

The acquisition in 2021 technically resulted in negative goodwill, which has been recognised as a special item in the income statement. The negative goodwill originated from revaluation of assets and liabilities to fair value in accordance with IFRS 3. In this valuation, inventory was marked-up and a number of acquired receivables were valued at nominal value as we do not have any knowledge of potential claims related to these receivables. Furthermore, the agreement to acquire the companies was entered into in 2020, at a time where the performance of the companies had been negatively impacted by COVID-19, and where the expectations for the future was uncertain. The risks and rewards from the day to day operations was transferred to The Cotton Group at the time of the agreement. During the extended period from acquisition until closing, the business developed favourably and generated profits, which also increased the net assets and resulted in negative goodwill.

The acquired business contributed with revenues in 2021 of DKK 1.511.8 million, and net profits of DKK 131.6 million. If the acquisition had occurred at 1 January 2021, consolidated pro-forma revenue, EBIT and net profit for the year ending 31 December 2021 would have been as follows:

	2021
Revenue	2,003.3
Operating profit before special items (EBIT)	270.0
Net profit	179.0

These values have been calculated based on the same accounting principles as The Cotton Group, but without costs related to the financing of the acquisition and effects of fair value adjustments made.

Outflow of cash related to the acquisition can be specified as follows:

Cash purchase consideration	320.5
Less cash and cash equivalents acquired	(197.8)
Net cash outflow	122.7

No costs related to the acquisition was incurred by The Cotton Group A/S.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

29 Cash and cash equivalents

DKK million	2022	2021
Cash and cash equivalents in the cash flow statement as at 31 December includes:		
Cash in bank and in hand	30.4	78.4
Cash and cash equivalents in the cash flow statement	30.4	78.4

In 2021 cash deposited in escrow in a bank account owned by The Cotton Group of DKK 66.5 million, has been provided as security for guarantees related to the disposal of companies, was recognised as non-current other receivables. The escrow has been released in 2022.

The Cotton Group has a not utilised credit facility under the bank overdraft of DKK 99.3 million (2021 DKK 221.8 million).

30 Financial risks and financial instruments

The Cotton Group is exposed to a number of risks arising from its operational and financial activities. This covers operational risk, currency risk, interest rate risk, liquidity risk and credit risk.

Financial risks are managed centrally by the Group. It is on an ongoing basis considered, if the financial risk management approach appropriately addresses the risk exposures. Operational risks are addressed by management of the individual business segments.

The most significant risks for The Cotton Group are specified in the following:

Operational risk

The main operational risks, that would affect The Cotton Group, are risks related to the supply chain, including price increases and lack of inbound transport capacity. Also, the group would be impacted by changes in demand for the garments in inventory.

Risk of price increases

If The Cotton Group is not able to pass on increases in purchase prices to customers, this will have a negative effect on the profitability of the Group. Historically, The Cotton Group has been able to pass on a significant part of such price increases to the customers, as the majority of the revenue is based on prices, which can be adjusted.

Risk related to inbound logistic services

The Cotton Group would be negatively impacted if products can not be transported efficiently from the factories, mainly in Asia, to the warehouses in Europe. The negative impact would either result in lower revenues (from lack of products) or in higher freight costs (from more expensive transportation). The Group mitigates the effects of this risk by establishing partnerships and long-term agreements with carriers and freight forwarders. Furthermore, alternative transportation methods are used from time to time.

Inventories

The Cotton Group has inventories at a carrying amount of DKK 819.3 million (2021 DKK 572.3 million). The Group's gross profit would be negatively impacted by a decrease in the demand for the garments in inventories leading to impairment losses. The valuation of the inventories is assessed on a monthly basis, and inventories are closely monitored, where slow moving or obsolete inventories are identified and dealt with on a regular basis. Being in the workwear and promotional wear market, the inventories are generally not impacted by changes in fashion. For inventories acquired on behalf of specific customers, the customers generally have an obligation to buy out remaining garments at the end of the contract.

Currency risk

Currency risk is the risk that arises from changes in exchange rates, that affects The Cotton Group's result, investments or value of financial instruments.

Currency exposure from operational activities

The Cotton Group has activities in several different countries, resulting in a cash inflow in several different currencies, mainly comprising EUR, NOK and SEK. However, costs related to the purchase of goods are mainly incurred in USD and EUR. This results in net cash inflows in EUR, NOK and SEK and net cash outflow in USD, with related currency exposure in respect of future cash flows. The Group monitors this exposure on a continuous basis, and enters into foreign currency hedges when it is considered to be advantageous to mitigate the risk.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

30 Financial risks and financial instruments (continued)

The exposure and sensitivity for a theoretical change in the foreign exchange rates, can be illustrated as follows:

	2022			2021		
	Change in foreign exchange rates	Effect on revenue	Effect on EBITDA	Change in foreign exchange rates	Effect on revenue	Effect on EBITDA
EUR/DKK	-1%	-0.6%	-1.8%	-1%	-0.6%	-1.4%
USD/DKK	-10%	-0.1%	-31.9%	-10%	-0.2%	-22.3%
NOK/DKK	-10%	-2.9%	-15.7%	-10%	-3.0%	-11.7%
SEK/DKK	-10%	-0.8%	-4.7%	-10%	-0.9%	-5.0%

A corresponding positive change in the foreign currency exchange rates will have the opposite effect on revenue and EBITDA.

Currency exposure from financial activities

Currency exposure from financing activities include risks of having internal and external loans (receivables and payables), in currencies other than the functional currency of the legal entity. It also covers the conversion of the income statements and balance sheets, and dividends from subsidiaries in currencies other than the parent company's functional currency.

Most of The Cotton Group's external loans as of 31 December 2022 are in EUR. Given the liabilities in EUR that existed at the balance sheet date, a 1% change in the EUR foreign exchange rate, would have affected the Group's profit before tax by +/- DKK 3.2 million (2021 DKK 1.5 million).

The loan in EUR is to a degree hedged by net the inflow of EUR. The Cotton Group does not normally hedge currency exposures from financing activities.

Hedges entered into to hedge future cash flows:

DKK million	2021			
	Currency forward contracts	' Fair value adj. incl. in Amounts hedged		
		income	statement	Fair value in months
EUR to USD		50.6	(4.5)	0.6 0-4

Currency forward contracts for The Cotton Group, do not meet the criterias for hedge accounting in accordance with International Financial Reporting Standards.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

30 Financial risks and financial instruments (continued)

Interest rate risk

The interest rate risk comprises the risk that a change in market interest rates, will have a negative impact on profits. The Cotton Group pays variable interest on its interest-bearing liabilities. Changes in the market interest rates, therefore affect the Group's interest costs. The Group does not normally hedge its interest risk.

An increase in relevant interest rates of 1%-point would, disregarding cash and cash equivalents, decrease net profit by DKK 2.9 million (2021 DKK 2.1 million).

Liquidity risk

Liquidity risk results from the Group's potential inability or difficulty to meet the contractual obligations associated with its liabilities due to insufficient liquidity.

The Cotton Group aims to, at all times, have sufficient available liquidity to meet all its obligations and has established a short-term bank overdraft facility of DKK 446.2 million, which expires 31 December 2023. DKK 346.9 million of the overdraft facility was utilised 31 December 2022 (2021 DKK 150.0 million). Net interest bearing debt 31 December 2022 increased to DKK 291.4 million (2021 DKK 72 million) via distribution to shareholders and to finance the growth in working capital. Despite the increase in net interest bearing debt, the leverage in The Cotton Group remains low. The Group continuously monitors its liquidity risk and risks related to renewing or obtaining new credit facilities.

The bank overdraft facility is subject to a change of control clause for the ultimate beneficial owner and key subsidiaries. Furthermore, The Cotton Group A/S may not pay out dividends in case the equity ratio, calculated as agreed with the banks, falls below 25%.

Maturity analysis

The Cotton Group's financial liabilities mature as follows:

	Contractual cash flow	Due within 1 year	Due from 1 - 5 years	Due after 5 years
2021 (DKK million)				
Interest-bearing loans and borrowings	151.4	151.4	0.0	0.0
Lease liabilities	45.2	21.2	23.3	0.7
Trade payables	229.3	229.3	0.0	0.0
Other payables	73.4	61.7	5.8	5.9
31 December 2021	499.3	463.6	29.1	6.6

2022 (DKK million)

Interest-bearing loans and borrowings	334.7	334.7	0.0	0.0
Lease liabilities	71.3	17.8	34.8	18.7
Trade payables	283.0	283.0	0.0	0.0
Other payables	58.7	56.6	2.1	0.0
31 December 2022	747.7	692.1	36.9	18.7

Basis for the maturity analysis

The maturity analysis is based on all undiscounted cashflows including estimated interest payments. Interest payments are estimated based on the current market conditions.

The undiscounted cashflows from financial liabilities are presented gross, unless the parties have a right to settle the balances net.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

30 Financial risks and financial instruments (continued)

Credit risks

The credit risk related to customers are, based on historic experience, considered to be low. Also, receivables are distributed on a significant number of customers located across Europe and within several different industries, including public customers and small private customers. However, within individual business segments, there is a concentration of receivables from individual customers. The credit risk is mitigated through inhouse assessments of customers' creditworthiness.

Aging analysis trade receivables as at 31 December (DKK million)

	Accrual	Receiv- able	Expected loss	Trade receiv- able
2021

Between 60 and 90 days overdue	10.0%	3.9	0.4	3.5
Above 90 days overdue	40.0%	16.2	6.6	9.6
Trade receivables		284.4	8.6	275.8

The Group applies a simplified approach in calculating expected credit losses. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime expected credit losses at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The maximum credit risk from financial assets are reflected in the carrying amounts included in the financial position.

The credit losses realised during the financial year ending 31 December 2022 was DKK 1.4 million (2021 DKK 1.7 million).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

32 Significant events after the balance sheet date

No significant events have occurred after the 31 December 2022.

33 New accounting standards, amendments and interpretations

At the time of publication of this annual report, the IASB has issued the following new accounting standards and interpretations that are not mandatory for The Cotton Group A/S' preparation of the 2022 annual report:

- IFRS 17 Insurance Contracts
- IFRS 17 Insurance Contracts – Amendments to IFRS 17: Initial Application of IFRS 17 and IFRS 9 Financial Instruments – Comparative Information
- IAS 12 Income Taxes – Amendments to IAS 12: Deferred Tax related to Assets and Liabilities arising from a Single Transaction
- IAS 1 Presentation of Financial Statements – Amendments to IAS 1 and IFRS Practice Statement 2: Disclosure of Accounting policies
- IAS 8 Accounting policies, Changes in Accounting Estimates and Errors: Definition of Accounting
- Annual Improvements 2018-2020 Cycle.

Not all of the above standards and interpretations are approved by the EU. The approved standards and interpretations not in force will be implemented as they become mandatory for The Cotton Group A/S.

None of the new or amended standards or interpretations are expected to have an impact on the consolidated financial statements for The Cotton Group A/S.

NOTES TO THE PARENT COMPANY FINANCIAL STATEMENTS

1 Accounting policies

The financial statements for The Cotton Group A/S are presented in accordance with the Danish Financial Statement Act of large reporting class C companies.

The parent company applies the same accounting policies for recognition and measurement as the Group, except from the following:

- Shares in subsidiaries are measured at cost.
- Dividend from subsidiaries is recognised as income in the income statement in the year when the dividend is declared. If dividend received from subsidiaries exceeds the profit for the year, investments in subsidiaries are tested for impairment.

STATEMENT BY MANAGEMENT

The Board of Directors and the Executive Board have today discussed and approved the annual report of The Cotton Group A/S for the financial year 1 January – 31 December 2022.

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act. The parent company financial statements have been prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2022 and of the results of their operations and consolidated cash flows for the financial year 1 January – 31 December 2022.

Further, in our opinion, the Management's review gives a fair review of the development in the Group's and the Parent Company's operations and financial matters, the results for the year and the Group's and the Parent Company's financial position.

We recommend that the annual report be approved at the annual general meeting.

INDEPENDENT AUDITOR'S REPORT

Opinion

We have audited the consolidated financial statements and the parent company financial statements of The Cotton Group A/S for the financial year 1 January – 31 December 2022, which comprise income statement, balance sheet, statement of changes in equity and notes, including accounting policies, for the Group and the Parent Company, and a consolidated statement of comprehensive income and a consolidated cash flow statement. The consolidated financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act, and the parent company financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements give a true and fair view of the financial position of the Group at 31 December 2022 and of the results of the Group's operations and cash flows for the financial year 1 January – 31 December 2022 in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

Further, in our opinion, the parent company financial statements give a true and fair view of the financial position of the Parent Company at 31 December 2022 and of the results of the Parent Company's operations for the financial year 1 January – 31 December 2022 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements and the parent company financial statements" (hereinafter collectively referred to as "the financial statements") section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the Management's review.

INDEPENDENT AUDITOR'S REPORT

Management's responsibilities for the financial statements

Management is responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act and for the preparation of parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act.

Moreover, Management is responsible for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risk of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

INDEPENDENT AUDITOR'S REPORT

- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- ▶ Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including
