Basis of recognition and measurement

I resultatopgørelsen indregnes indtægter i takt med, at de indtjenes. Herudover indregnes værdireguleringer af finansielle aktiver og forpligtelser. I resultatopgørelsen indregnes ligeledes alle omkostninger, herunder afskrivninger og nedskrivninger.

Aktiver indregnes i balancen, når det er sandsynligt, at fremtidige økonomiske fordele vil tilflyde selskabet og aktivets værdi kan måles pålideligt.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow from the company and the value of the liability can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. On subsequent recognition, assets and liabilities are measured as described below for each individual accounting item.

Certain financial assets and liabilities are measured at amortised cost using the effective interest method. Amortised cost is calculated as the historic cost less any installments and plus/less the accumulated amortisation of the difference between the cost and the nominal amount.

On recognition and measurement, allowance is made for predictable losses and risks which occur before the annual report is presented and which confirm or invalidate matters existing at the balance sheet date.
