Management's Statement

Management has today considered and adopted the annual report for the financial year 15 February 2023 - 31 December 2023 for RHE DK ApS.

The Annual Report, which has not been audited, is presented in accordance with the Danish Financial Statements Act.

Management believes that the financial statements give a true and fair view of the Company's assets, liabilities and financial position and of the result.

Management considers the conditions for opting out of audit to be met.

The annual report is submitted for approval by the General Assembly.

Management's Review

The Company's principal activities

The Company's principal activities consist in marketing and trading software and IT solutions, consulting and other related business.

Development in the activities and the financial situation of the Company

The Company has been dormant during the financial year and considers the result for the first financial period to be in line with expectations.

Events after the end of the financial period

No events have occurred after the end of the financial period that may have a significant impact on the financial position of the Company.

Accounting Policies

The annual report has been prepared in accordance with the regulation applying to Reporting class B.

As the financial year 2023 is the Company's first financial year, the Financial Statements with associated notes have been prepared without comparative figures.

The annual report is presented in DKK.

General information

Income is recognised in the income statement as and when it is earned, including recognition of value adjustments of financial assets and liabilities.

Any costs, including depreciation, amortisation and impairment, are also recognised in the income statement.

Assets are recognised in the balance sheet when it is likely that future economic benefits will accrue to the Company and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is likely that future economic benefits will not accrue to the Company and the value of the liability can be measured reliably.

The initial recognition measures assets and liabilities at cost. Subsequently, assets and liabilities are measured as described in the following for each item.

Certain financial assets and liabilities are measured at amortised cost, recognising a constant yield to maturity. Amortised cost is stated at initial cost less any deductions and with addition/deduction of the accumulated amortisation on the difference between cost and nominal amount.

The recognition and measurement takes into account predictable losses and risks arising before the year-end reporting and which prove or disprove matters that existed at the balance sheet date.

Income statement

External expenses

External expenses include expenses relating to administration and similar expenses.

Tax for the period

The tax for the period consists of the current tax and the deferred tax for the period. The tax relating to the results is recognised in the income statement, whereas the tax directly relating to equity entries is taken directly to equity.

Balance sheet

Cash and cash equivalents

Cash includes deposits in bank account.

Current tax and deferred tax

Current tax liabilities and tax receivables are recognised in the balance sheet as calculated tax of taxable income for the financial year.

Deferred tax is measured on all temporary differences arising between the tax values of assets and liabilities and their carrying amounts in the financial statements.

Accounting Policies

Deferred tax assets, including the tax value of tax loss carry-forwards, are measured at the value at which the asset is expected to be realised, either by elimination against tax on future earnings or by setoff against deferred tax liabilities within the same legal tax entity and jurisdiction.

Deferred tax is measured on the basis of the tax rules and tax rates that under the legislation in force on the balance sheet date would be applicable when the deferred tax is expected to crystallise as current tax. A change in the deferred tax, which is a result of changes to tax rates, is recognised in the income statement with the exception of items that are taken directly to equity.

Other liabilities

Other liabilities are measured at amortised cost corresponding substantially to nominal value.

Translation of foreign currencies

Transactions in foreign currencies are at the initial recognition translated at exchange rate on the transaction date. Foreign exchange rate differences arising between the exchange rate at the transaction date and the exchange rate at the payment date are recognised in the income statement as financial income or financial expense.

Receivables, payables and other monetary items in foreign currency are translated at the exchange rate of the balance sheet date. The difference between the exchange rate at the balance sheet date and the exchange rate at the date of the occurrence of receivable and liability is recognised in the income statement as financial income or financial expense.
