*The company's property activities have been with accounting effect demerged per 1 January 2020. Financial highlights are not adjusted.

The financial ratios have been calculated as follows:

Return on invested capital (ROIC)	$\frac{\text{Profit before financial income and expenses/profit for year} \times 100}{\text{Average invested capital}}$
Assets/Equity	$\frac{\text{Total assets}}{\text{Equity}}$
Return on equity (ROE)	$\frac{\text{Profit/loss from ordinary activities after tax} \times 100}{\text{Equity}}$

Management's review

Operating activities

The principal activities in NorSea Denmark A/S are to act as the Offshore Energy Industry's one-stop-service provider of logistics, customs declarations, warehousing, supply chain activities, steel constructions and offshore medic clinics, on- and offshore-manning, offshore and maritime construction and maintenance projects, office and meeting facilities, and lease of buildings and yards.

We structure our business areas in.

- Port services
- Logistics
- On- and Offshore-Manning / Projects
- Facility
- Steel'nPaint (*discontinued end of 2021*)

Development in activities and financial matters

In the first half of 2021 we were negatively influenced by Covid19 in all business areas, and experienced a positive catchup in the main parts of the business areas in the second half. We ended 2021 with a revenue on index 191 compared to primo 2021. However our expansion in Steel'nPaint, to significantly larger facilities, by end of 2020, did not materialize according to plans and we ended 2021 with a disappointing loss of 14mdkk causing our overall business results in NorSea Denmark to end the year negative.

This lead us to conclude sales of the Steel'nPaint business area to a good business partner, ensuring continuity of employees and customers with the new ownership. We will continue to provide this type of services through our partner networks.

With above organizational changes and positive trend on activities we look into 2022 with forecasted positive results and increasing market size. Result for 2022 is forecasted to +1mDKK.

In 2021 we have increased our business outside Oil & Gas by 26% contributing well to our market diversification strategy of being a full Energy Industry service provider.

Safety is our most important value, this also means being able to be safe at work with regards to Covid19 with has been managed well in all areas of the business throughout 2021.

In 2021 we proudly passed a zero TRIF milestone on our Supply Base.

Further steps toward reduction of the climate footprint of our operations were taken in 2021 and more to come with deeper analysis and actions in 2022.

Corporate social responsibility

The Health & Safety of our people is our top priority. We could not have achieved the strong results without our people's commitment across the whole company.

In line with previous years, activities for the year were carried out highly focusing on safety. We have in 2021 achieved the zero TRIF milestone.

These great results for a safe workplace is carried through by our engaged employees and in execution of "Project Safe NorSea Group".

We are committed to limit the climate impact of our operation to an absolute minimum.

Therefore we e.g. invest in CO2 reducing elements in trucks with a high mileage and in our buildings with LED lightning, increased insulation and heat recovery ventilation, and we have set a target to be the first Offshore Supply Base running at Zero Emission.

We have adopted and participates in the NorSea Group's mutual efforts of documenting and complying with good corporate social responsibility. We have therefore prepared a report on own policies which are Group aligned.

Particular risks

General risks

Activities in connection with the offshore oil and gas industry are sensitive towards changes in the oil companies' activity levels. Current political developments on increased climate initiatives holds a potential risk to our business in the oil and gas industry, especially in the North Sea regions. However with the increase of in our renewable customer mix we enjoy the growth in this segment.

Financial risks

Currency risks

Activities abroad imply that profit/loss, cash flows and equity are affected by the foreign exchange and interest rate development relating to a number of currencies.

Credit risks

These risks primarily relate to customers. Customers are credit rated on a regular basis and mortgage liabilities are based on a floating rate of interest.

Events after the balance sheet date

Management is of the opinion that from the balance sheet date until today, no events have occurred which could alter the assessment of the annual report substantially.

Statement by the Board of Directors and the Executive Board

The Board of Directors and the Executive Board have today discussed and approved the annual report of NorSea Denmark A/S for the financial year 1 January - 31 December 2021.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2021 and of the results of the Company's operations and cash flows for the financial year 1 January – 31 December 2021.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's operations and financial matters and the results of the Company's operations and financial position.

We recommend the annual report to be approved at the annual general meeting.

Independent Auditor's Report

To the Shareholders of Norsesea Denmark A/S

Opinion

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company at 31 December 2021, and of the results of the Company's operations and cash flows for the financial year 1 January - 31 December 2021 in accordance with the Danish Financial Statements Act.

We have audited the Financial Statements of Norsesea Denmark A/S for the financial year 1 January - 31 December 2021, which comprise income statement, balance sheet, statement of cash flows, statement of changes in equity and notes, including a summary of significant accounting policies ("financial statements").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the financial statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Management's Responsibilities for the Financial Statements

Management is responsible for the preparation of Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes

1 Accounting policies

The financial statements of NorSea Denmark A/S for 2021 have been prepared in accordance with the provisions applying to reporting class C medium enterprises under the Danish Financial Statements Act.

The financial statements have been prepared in accordance with the same accounting policies as last year.

Recognition and measurement

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the Company and the value of such assets can be reliably measured.

Liabilities are recognised in the balance sheet when an outflow of economic benefits is probable and the value of such liabilities can be reliably measured.

On initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described below for each individual item.

In recognising and measuring assets and liabilities, any gains, losses and risks occurring prior to the presentation of the annual report that evidence conditions existing at the balance sheet date are taken into account.

Income is recognised in the income statement as earned. Moreover, costs incurred to generate the year's earnings are recognised, including depreciation, amortisation, impairment losses and provisions as well as reversals as a result of changes in accounting estimates of amounts that were previously recognised in the income statement.

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rates at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and at the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables and payables and other monetary items denominated in foreign currencies are translated at the exchange rates at the balance sheet date. The difference between the exchange rates at the balance sheet date and at the date at which the receivable or payable arose or was recognised in the latest financial statements is recognised in the income statement as financial income or financial expenses.

Income statement

Revenue

Income from sale of goods is recognised when the risk and rewards relating to the goods sold have been

transferred to the purchaser, the revenue can be measured reliably and it is probable that the economic benefits relating to the sale will flow to the Company

Revenue is measured at the fair value of the agreed consideration ex. VAT and taxes charged on behalf of third parties. All discounts granted are recognised in revenue.

Work in progress concerning customised production is recognised as revenue by reference to the stage of completion. Accordingly, revenue corresponds to the selling price of work performed during the year (the percentage of completion method).

Gross profit/loss

With reference to section 32 of the Danish Financial Statements Act, gross profit/loss is calculated as a summary of revenue, other operating income, expenses for raw materials and consumables and other external expenses.

Other external costs

Other external costs comprise costs of sale, distribution, administration as well as purchases of services for resale.

Staff expenses

Staff expenses comprise wages and salaries as well as payroll expenses.

Amortisation, depreciation and impairment losses

Amortisation, depreciation and impairment losses comprise amortisation, depreciation and impairment of intangible assets and property, plant and equipment.

Other operating income

Other operating income comprises items secondary to the activities of the Company, including gains on the disposal of intangible assets and property, plant and equipment.

Financial income and expenses

Financial income and expenses comprise interest income and expense, payables and transactions denominated in foreign currencies, amortisation of financial assets and liabilities as well as surcharges and refunds under the on-account tax scheme, etc.

Tax on profit/loss for the year

Tax for the year comprises current tax for the year and changes in deferred tax. The tax expense relating to the profit/loss for the year is recognised in the income statement, and the tax expense relating to amounts directly recognised in equity is recognised directly in equity. The tax expense recognised in the income

statement relating to the extraordinary profit/loss for the year is allocated to this item whereas the remaining tax expense is allocated to the profit/loss for the year from ordinary activities.

Balance sheet

Intangible assets

On initial recognition, intangible assets are measured at cost.

Goodwill is measured at cost less accumulated amortisation and impairment losses. Goodwill is amortised on a straight-line basis over 5-6 years for strategic acquisitions with a long-term earnings profile.

Property, plant and equipment

Land and buildings, plant and machinery and fixtures and fittings, tools and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated.

Cost comprises the purchase price and any costs directly attributable to the acquisition until the date when the asset is available for use.

Where individual components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items, which are depreciated separately.

The basis of depreciation, which is calculated as cost less any residual value, is depreciated on a straight-line basis over the expected useful life. The expected useful lives are as follows:

Buildings	3 - 20 years
Plant and machinery	3 - 10 years
Fixtures and fittings, tools and equipment	3 - 5 years

The basis of depreciation is based on the residual value of the asset and is reduced by impairment losses, if any. The depreciation period and the residual value are determined at the time of acquisition and are reassessed every year. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognised.

Gains and losses on the disposal of property, plant and equipment are determined as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains or losses are recognised in the income statement as other operating income or other operating costs, respectively.

Leases

Leases for non-current assets that transfer substantially all the risks and rewards incident to ownership to the Company (finance leases) are initially recognised in the balance sheet at cost, corresponding to the lower of fair value and the net present value of future lease payments. In calculating the net present value of the future lease payments, the interest rate implicit in the lease or the incremental borrowing rate is used as the discount factor. Assets held under finance leases are subsequently depreciated as the Company's other non-current assets.

The capitalised residual lease obligation is recognised in the balance sheet as a liability, and the interest element of the lease payment is recognised in the income statement over the term of the lease.

All other leases are treated as operating leases. Payments relating to operating leases and any other leases are recognised in the income statement over the term of the lease. The Company's total obligation relating to operating leases and other leases is disclosed in contingencies, etc.

Fixed assets investments

Fixed assets investments consist of deposits.

Impairment of non-current assets

The carrying amount of intangible assets and property, plant and equipment as well as investments in subsidiaries is subject to an annual test for indications of impairment other than the decrease in value reflected by depreciation or amortisation.

Impairment tests are conducted of individual assets or groups of assets when there is an indication that they may be impaired. Write-down is made to the recoverable amount if this is lower than the carrying amount.

The recoverable amount is the higher of an asset's net selling price and its value in use. The value in use is determined as the present value of the expected net income from the use of the asset or the group of assets and expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Inventories

Inventories are measured at cost in accordance with the FIFO method. Where net realisable value is lower than cost, inventories are written down to this lower value.

Raw materials and consumables are measured at cost, comprising purchase price plus delivery costs.

Finished goods and work in progress are measured at cost, comprising the cost of raw materials, consumables, direct wages and salaries and indirect production overheads. Indirect production overheads comprise indirect materials and wages and salaries as well as maintenance and depreciation of production machinery, buildings and equipment as well as factory administration and management. Borrowing costs are not included in cost.

The net realisable value of inventories is calculated as the sales amount less costs of completion and costs necessary to make the sale and is determined taking into account marketability, obsolescence and development in expected selling price.

Receivables

Receivables are measured at amortised cost.

Write-down is made for bad debt losses where there is an objective indication that a receivable or a receivable portfolio has been impaired. If there is an objective indication that an individual receivable has been impaired, a write-down is made.

Receivables with no objective indication of individual impairment are assessed for objective indication of impairment on a portfolio basis. The portfolios are primarily based on the debtors' registered offices and

credit rating in accordance with the Company's credit risk management policy. The objective indicators used in relation to portfolios are determined based on historical loss experience.

Write-downs are calculated as the difference between the carrying amount of receivables and the present value of the expected cash flows, including the realisable value of any collateral received. The effective interest rate for the individual receivable or portfolio is used as discount rate.

Work in progress

Work in progress is measured at the selling price of the work performed less any payments received on account of the customer and expected losses.

The selling price is measured by reference to the stage of completion at the balance sheet date and total expected income from the contract. The stage of completion is determined on the basis of an estimate of the work, usually calculated as the ratio between the costs incurred and total estimated costs of the order or hours worked and the total estimated hours worked for that order.

Net assets are determined as the sum of orders where the selling price of the work performed exceeds progress billings. Net liabilities are determined as the sum of orders where progress billings exceed the selling price.

Prepayments from customers are recognised as liabilities.

Selling costs and costs incurred in securing contracts are recognised in the income statement when incurred.

Prepayments

Prepayments comprise costs incurred concerning subsequent financial years.

Equity – dividends

Proposed dividends are recognised as a liability at the date when they are adopted at the annual general meeting (declaration date). The expected dividend payment for the year is disclosed as a separate item under equity.

Corporation tax and deferred tax

Current tax payable and receivable is recognised in the balance sheet as tax computed on the taxable income for the year, adjusted for tax on the taxable income of prior years and for tax paid on account.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax value of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is not deductible for tax purposes and on office premises and other items where temporary differences arise at the date of acquisition without affecting either profit/loss for the year or taxable income. Where different tax rules can be applied to determine the tax base, deferred tax is measured based on Management's planned use of the asset or settlement of the liability, respectively.

Deferred tax assets, including the tax value of tax loss carry forwards, are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity and jurisdiction.

Adjustment is made to deferred tax resulting from elimination of unrealised intra-group profits and losses.

Deferred tax is measured in accordance with the tax rules and at the tax rates applicable in the respective countries at the balance sheet date when the deferred tax is expected to crystallise as current tax.

Other provisions

Other provisions consist of accrued termination cost

Liabilities other than provisions

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. In subsequent periods, the financial liabilities are measured at amortised cost, corresponding to the capitalised value using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan.

Financial liabilities also include the capitalised residual obligation on finance leases.

Other liabilities are measured at net realisable value.

Cash and cash equivalents

Cash and cash equivalents comprise cash and short-term marketable securities with a term of three months or less which are subject to an insignificant risk of changes in value.

Cash flow statement

The cash flow statement, which is presented according to the indirect method, shows cash flows from operating, investing and financing activities for the year and the cash and cash equivalents at the beginning and end of the year.

Cash flows from operating activities are calculated as the profit/loss adjusted for non-cash operating items, changes in working capital and corporation tax paid.

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of enterprises, activities and investments as well as the acquisition, development, optimisation and disposal, etc. of intangible assets and property, plant and equipment, including the acquisition of assets held under finance leases.

Cash flows from financing activities comprise changes in the size or composition of the Company's share capital and related costs as well as the raising of loans, repayment of interest-bearing debt, acquisition of treasury shares and payment of dividends to shareholders.

Cash and cash equivalents comprise securities, cash less short-term bank loans.
