Statement by the Board of Directors and the Executive Board

Today, the Board of Directors and the Executive Board have discussed and approved the annual report of Varimixer A/S for the financial year 1 January - 31 December 2020.

The annual report is prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2020 and of the results of the Company's operations and cash flows for the financial year 1 January - 31 December 2020.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's operations and financial matters and the results of the Company's operations and financial position.

We recommend that the annual report be approved at the annual general meeting.

Independent auditor's report

To the shareholders of Varimixer A/S

Opinion

We have audited the financial statements of Varimixer A/S for the financial year 1 January - 31 December 2020, which comprise income statement, balance sheet, statement of changes in equity, cash flow statement and notes, including accounting policies. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2020 and of the results of the Company's operations as well as the cash flows for the financial year 1 January - 31 December 2020 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements.

Management's responsibilities for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

Independent auditor's report

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any material misstatement of the Management's review.

Management's review

Business review

Varimixer A/S is a production company which develops, produces and brands a complete program of industrial mixers under the brand BEAR Varimixer and Teddy.

BEAR Varimixer mixers are used for kneading, whipping and stirring of a wide range of products within the catering sector and the bakery sector. The mixers are also used in supermarkets, butcher shops, industrial bakeries, industrial food companies as well as laboratories within chemical and mechanical industries.

Varimixer A/S markets its products world wide. Of total production, the majority is sold to export markets on all continents. The Company markets its products through local dealers.

Financial review

The income statement for 2020 shows a profit of DKK 10,427 thousand against a profit of DKK 16,248 thousand last year, and the balance sheet at 31 December 2020 shows equity of DKK 47,181 thousand.

The Company's net profit has been at a satisfactory level.

Events after the balance sheet date

No events materially affecting the Company's financial position have occurred subsequent to the financial year end.

Outlook

The Company's revenue for 2021 is expected to remain on level, due to Covid-19. On this basis, a EBITDA in the range of DKK 17,000,000-19,000,000 is expected for 2021. The expectations are based on the assumption that the exchange rates for the currencies to which the Company is exposed will remain unchanged.

Cash generated from operations in 2021 is expected to be positive as a result of the expected profit growth.

Notes to the financial statements

1 Accounting policies

The annual report of Varimixer A/S for 2020 has been prepared in accordance with the provisions in the Danish Financial Statements Act applying to medium-sized reporting class C entities.

Effective from the financial year 2020, the Company has implemented amending act no. 1716 of 27 December 2018 to the Danish Financial Statements Act. The implementation of the amending act has not affected the Company's accounting policies on recognition and measurement of assets and liabilities but has solely entailed a requirement for further disclosures. The accounting policies used in the preparation of the financial statements are consistent with those of last year.

Reporting currency

The financial statements are presented in Danish kroner (DKK'000).

Intra-group business combinations

The book value method is applied to business combinations such as acquisition and disposal of investments, mergers, demergers, contributions of assets and share conversions, etc. in which entities controlled by the parent company are involved, provided that the combination is considered completed at the time of acquisition without any restatement of comparative figures. Differences between the agreed consideration and the carrying amount of the acquiree are recognised directly in equity.

Derivative financial instruments

On initial recognition, derivative financial instruments are recognised at cost in the balance sheet and are subsequently measured at fair value. Positive and negative fair values of derivative financial instruments are presented as separate items in the balance sheet.

Income statement

Revenue

The Company has chosen IFRS 15 as interpretation for revenue recognition.

Revenue from contracts with customers is recognised when control of the goods is transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods. The Company has generally concluded that it is the principal in its revenue arrangements, because it controls the goods before transferring them to the customer.

Production costs

Production costs comprise costs incurred in generating the revenue for the year. Such costs include direct and indirect costs of raw materials, consumables and production staff, rent and leases, as well as depreciation on production plant.

Production costs also comprise research and development costs that do not qualify for capitalisation and amortisation of capitalised development costs.

Also, provision for losses on construction contracts is recognised.

Distribution costs

Distribution costs comprise costs related to the distribution of goods sold in the year and to sales campaigns, etc. carried out in the year, including costs related to sales staff, advertising, exhibitions and amortisation/depreciation. Sales and marketing costs are recognised in the income statement when the Company obtains control of the sales or marketing product.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Administrative expenses

Administrative expenses include expenses incurred in the year for company management and administration, including expenses relating to administrative staff, Management, office premises and expenses as well as amortisation/depreciation of assets used for administrative purposes.

Other operating income

Other operating income comprise items of a secondary nature relative to the Company's core activities, including gains or losses on the sale of fixed assets.

Depreciation

The item comprises depreciation of property, plant and equipment.

The basis of depreciation, which is calculated as cost less any residual value, is depreciated on a straight line basis over the expected useful life. The expected useful lives of the assets are as follows:

Land and buildings	25-40 years
Plant and machinery	5-10 years
Fixtures and fittings, other plant and equipment	3-10 years

Financial income and expenses

Financial income and expenses are recognised in the income statements at the amounts that concern the financial year. Net financials include interest income and expenses as well as allowances and surcharges under the advance-payment-of-tax scheme, etc.

Tax

Tax for the year includes current tax on the year's expected taxable income and the year's deferred tax adjustments. The portion of the tax for the year that relates to the profit/loss for the year is recognised in the income statement, whereas the portion that relates to transactions taken to equity is recognised in equity.

The entity is jointly taxed with other group entities. The total Danish income tax charge is allocated between profit/loss-making Danish entities in proportion to their taxable income (full absorption).

Jointly taxed entities entitled to a tax refund are reimbursed by the management company based on the rates applicable to interest allowances, and jointly taxed entities which have paid too little tax pay a surcharge according to the rates applicable to interest surcharges to the management company.

Balance sheet

Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost includes the acquisition price and costs directly related to the acquisition until the time at which the asset is ready for use.

Gains or losses are calculated as the difference between the selling price less selling costs and the carrying amount at the date of disposal. Gains and losses from the disposal of property, plant and equipment are recognised in the income statement as other operating income or other operating expenses.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Leases

The Company has chosen IFRS 16 as interpretation for classification and recognition of leases.

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets:
The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

- Fixtures and fittings, other plant and equipment 3-10 years.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

Lease liabilities:
At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets:
The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Impairment of fixed assets

The carrying amount of intangible assets, property, plant and equipment and investments in subsidiaries and associates is assessed for impairment on an annual basis.

Impairment tests are conducted on assets or groups of assets when there is evidence of impairment. The carrying amount of impaired assets is reduced to the higher of the net selling price and the value in use (recoverable amount).

The recoverable amount is the higher of the net selling price of an asset and its value in use. The value in use is calculated as the present value of the expected net cash flows from the use of the asset or the group of assets and the expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Previously recognised impairment losses are reversed when the reason for recognition no longer exists. Impairment losses on goodwill are not reversed.

Inventories

Inventories are measured at cost in accordance with the FIFO method. Where the net realisable value is lower than cost, inventories are written down to this lower value. The net realisable value of inventories is calculated as the sales amount less costs of completion and expenses required to effect the sale and is determined taking into account marketability, obsolescence and development in the expected selling price.

The cost of raw materials and consumables comprises the cost of acquisition plus delivery costs.

The cost of finished goods and work in progress includes the cost of raw materials, consumables, direct labour and indirect production overheads.

Indirect production overheads include the indirect cost of material and labour as well as maintenance and depreciation of production machinery, buildings and equipment and expenses relating to plant administration and management. Borrowing costs are not recognised in the sales price.

Goods for resale are measured at cost, which comprises the cost of acquisition plus delivery costs as well as other expenses directly attributable to the acquisition.

Receivables

Receivables are measured at amortised cost.

The Company has chosen IAS 39 as interpretation for impairment of financial receivables.

An impairment loss is recognised if there is objective evidence that a receivable or a group of receivables is impaired. If there is objective evidence that an individual receivable has been impaired, an impairment loss is recognised on an individual basis.

Receivables in respect of which there is no objective evidence of individual impairment are tested for objective evidence of impairment on a portfolio basis. The portfolios are primarily based on the debtors' domicile and credit ratings in line with the Company's risk management policy. The objective evidence applied to portfolios is determined based on historical loss experience.

Impairment losses are calculated as the difference between the carrying amount of the receivables and the present value of the expected cash flows, including the realisable value of any collateral received. The effective interest rate for the individual receivable or portfolio is used as discount rate.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Prepayments

Prepayments recognised under "Assets" comprise prepaid expenses regarding subsequent financial reporting years.

Cash

Cash comprise cash and short term securities which are readily convertible into cash and subject only to minor risks of changes in value.

Equity

Proposed dividends

Dividend proposed for the year is recognised as a liability once adopted at the annual general meeting (declaration date). Dividends expected to be distributed for the financial year are presented as a separate item under "Equity".

Provisions

Provisions comprise anticipated expenses relating to warranty commitments, onerous contracts, restructurings, etc. Provisions are recognised when the Company has a legal or constructive obligation at the balance sheet date as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation.

Provisions are measured at net realisable value or at fair value if the obligation is expected to be settled far into the future.

Warranty commitments include expenses for remedial action in respect of the contract work within the warranty period of 2 years. Provisions for warranty commitments are measured at net realisable value and recognised based on past experience. Provisions that are expected to mature more than one year after the balance sheet date are discounted at average bond yields.

Income taxes

Current tax payables and receivables are recognised in the balance sheet as the estimated income tax charge for the year, adjusted for prior-year taxes and tax paid on account.

Deferred tax is measured according to the liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is not deductible for tax purposes and on office premises and other items where temporary differences, apart from business combinations, arise at the date of acquisition without affecting either profit/loss for the year or taxable income. Where alternative tax rules can be applied to determine the tax base, deferred tax is measured based on Management's intended use of the asset or settlement of the liability, respectively.

Deferred tax is measured according to the tax rules and at the tax rates applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax. Deferred tax assets are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Changes in deferred tax due to changes in the tax rate are recognised in the income statement.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Liabilities

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. On subsequent recognition, financial liabilities are measured at amortised cost, corresponding to the capitalised value, using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan. Financial liabilities also include the capitalised residual lease liability in respect of finance leases.

Other liabilities are measured at net realisable value.

Lease liabilities

Lease liabilities are measured at the net present value of the remaining lease payments including any guaranteed residual value based on the interest rate implicit in the lease.

Deferred income

Deferred income recognised as a liability comprises payments received concerning income in subsequent financial reporting years.

Cash flow statement

The cash flow statement shows the Company's net cash flows broken down according to operating, investing and financing activities, the year's changes in cash and cash equivalents as well as the cash and cash equivalents at the beginning and the end of the year.

Cash flows from operating activities are calculated as the profit/loss for the year adjusted for non cash operating items, changes in working capital and paid corporate income tax and interests.

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of entities and activities and of intangible assets, property, plant and equipment and investments.

Cash flows from financing activities comprise changes in the size or composition of the Company's share capital and related expenses as well as raising of loans, repayment of interest bearing debt and payment of dividends to shareholders.

Cash and cash equivalents comprise cash, short term bank loans and short term securities which are readily convertible into cash and which are subject only to insignificant risks of changes in value.

Financial statements 1 January - 31 December

Notes to the financial statements

1 Accounting policies (continued)

Financial ratios

The financial ratios stated under "Financial highlights" have been calculated as follows:

Operating profit/loss	Profit/loss before financial items adjusted for other operating income and other operating expenses
Return on assets	$\frac{\text{Profit/loss from operating activites x 100}}{\text{Average assets}}$
Equity ratio	$\frac{\text{Equity, year-end x 100}}{\text{Total equity and liabilities, year-end}}$
Return on equity	$\frac{\text{Profit/loss after tax x 100}}{\text{Average equity}}$

Financial statements 1 January - 31 December
