Management's Review

Financial highlights of the company

Key figures and financial ratios have been prepared according to the same method as preceding years. As of the financial year 2017/18, the MIFID related activities of A/S Global Risk Management Ltd. Holding were transferred to the newly established sister company A/S Global Risk Management Ltd. Fondsmæglerselskab and

the Singapore Branch was changed into a Singapore based subsidiary. Thus, the key figures and financial ratios for 2017/18 and onwards do not include the transferred activities. The key figures and financial ratios for 2016/17 have not been adjusted.

As of the financial year 2016/17, the Company applied IFRS for recognising and measuring financial instruments. This resulted in a reclassification of amounts.

Seen over a five years, the development of the Company is described by the following financial highlights.

USD '000	2020/21	2019/20	2018/19	2017/18	2016/17
Profit/loss					
Net gain on trading and derivatives activities	1,439	1,246	8,146	4,842	20,373

Liquidity ratio	0.85	0.95	0.97	0.94	1.65
Solvency ratio	5.3%	6.6%	10.1%	11.6%	41.4%

For definitions, please refer to the accounting policies.

Review

Activities

The Company's activities comprise the offering of fixed-price contracts in respect of physical deliveries of fuel and bunker oil and treasury services within energy price risk management for group related entities.

The Company is represented by its own offices in Denmark and a subsidiary in Singapore.

Developments in the year

For the financial year 2020/21, A/S Global Risk Management Ltd. Holding achieved a net gain on derivatives and financial instruments of 2.4 M USD. The

result before tax for the year is negative 17 M USD, and the net result is negative 13.4 M USD. Equity amounts to 4.2 M USD at the end of the year. The result for the year is highly influenced by loss on debtors and the challenging business environment as given by the pandemic, and the result is viewed as non-satisfactory.

Net gain on derivatives and financial instruments is obtained by trading fixed-price contracts in respect of physical deliveries of fuel and bunker oil and through the sale and purchase of hedging products with group-related entities who need to secure their budgets against fluctuations in fuel prices. The risks associated with the sale of fixed-price contracts and purchase and sale of hedging products are continuously monitored and hedged back-to-back or by correlated contracts assisted by the use of advanced risk assessment methodologies. Both purchased, and own-developed systems are used to manage risks.

Efforts and investments have been made in setting up new capabilities within power trading, serving to broaden the potential product offering of derivative instruments.

Uncertainty related to recognition and measurement

For information on insecurities on measurement, please refer to note 11.

Financial risks

Foreign exchange risks

The Company hedges against commercial foreign exchange exposure on a current basis and assesses the need to hedge against foreign exchange exposure of future cash flows. Hedging mainly takes place by means of forward exchange contracts. Future expected cash flows are hedged for a maximum period of the first succeeding 12 months.

Credit risks

The Company is exposed to credit risk relating to its clients, and all clients and other business partners are credit-rated regularly in accordance with the Company's policy for assuming credit risks.

Interest rate risks

The Company's interest-bearing debts are mainly based on variable interest rates, and therefore earnings are affected by any changes in the level of interest. The Company monitors and assesses the financial consequences of interest rate changes on a current basis and makes full or partial hedging of the interest rate risk.

Commodity price risks

The Company hedges against all commercial price risks deriving from providing clients and group-related entities with different hedging solutions. To optimise the utilisation of trade flow, the Company may, from time to time, choose to assume a basis risk by entering into opposite positions not perfectly correlated. Any assumed basis risk is continuously quantified, monitored and managed using Value-At-Risk models and stop-loss limits.

Corporate social responsibility

(cf. Section 99 as of the Danish Financial Statements Act)

The Company's policies for corporate social responsibility are disclosed in the Financial Statement of A/S United Shipping & Trading Company for 2020/21.

A/S Global Risk Management Ltd. Holding conducts its business based on a Code of Conduct which sets high standards within the following areas:

- Health and safety
- Staff development
- Equal opportunity
- Environment
- Competition and anti-corruption

Report on gender composition in management

(cf. Section 99 b in the Danish Financial Statements Act)

Targets for the underrepresented gender on the board of directors

Currently, the Board of Directors in A/S Global Risk Management Ltd. Holding consists of three members, of which zero is female. In 2020/21, all board members were re-elected, and therefore no increase in female members of the board was achieved. Our ambition is to have 25-33 % female members among the members of the Board of Directors elected at the Annual General Meeting no later than 2022.

Policy for the underrepresented gender at other management levels

The Company's policies for the underrepresented gender at other management levels are disclosed in the Financial Statement of Bunker Holding A/S for 2020/21.

Expectations for the year ahead

The new GRM strategy has a strong focus on client segment diversification, and this will depend heavily on the oil price, the market volatility, and the lifting of travel restrictions. Lower oil prices mean more consumer hedging in general.

Another focus point for the new strategy is enhanced internal cooperation within the Bunker Holding Group. GRM predicts significant growth in term bunker fixings that will require derivatives that GRM H will provide.

Trade on natural gas to support the GRM business will be implemented, and GRM expects to generate positive income from prosecuting those client hedges and through limited opportunistic risk-taking.

The intra-day power trading business will continue with added markets.

Financial liabilities				
Derivatives	-1,047,067	-1,020,720	0	-2,067,787
Total	-1,047,067	-1,020,720	0	-2,067,787

Financial instruments measured at fair value comprise only derivatives and can be divided into three levels:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). To a large extent level 2 is based on observable quoted prices. However, in some instances, forward prices are not observable. In these situations, the most liquid forward curves are used, and a spread to the specific location is derived. For options, theoretical pricing models with implied volatilities from Ice (option smile) are used to calculate market prices. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity-specific estimates. If all significant inputs required to calculate the fair value of an instrument are observable, the instrument is included in Level 2;

Level 3 – Inputs for the asset or liability that are primarily based on unobservable market data.

Notes to the financial statements

11 Derivatives and financial instruments (continued)

Amortisation of day 1 gains

Day 1 gains arise from contract specific margins. Management has determined that a straight-line amortization over the contract term reflect how market participants would price such instruments.

USD '000	2020/21	2019/20
Deferred day 1 gains at 1 May	1,885	2,123
Added day 1 gains this year	1,872	1,705
Amortisation this year	-1,747	-1,943
Deferred day 1 gains at 30 April	2,010	1,885

SENSITIVITY OF LEVEL 3 INSTRUMENTS

The level 3 instruments have been valued with a risk-neutral approach based on historically available data for the underlying commodities. If the markets were to become inefficient and risk-averse to a degree where all likely market risks were to be priced into the valuation of the level 3 instruments (i.e. at a 95% confidence interval), fair value would decrease by TUSD 255.

SENSITIVITY OPEN NET EXPOSURE

The overall risk limit set in the risk policy is defined by a maximum net open (unhedged) position in financial instruments for the Company.

The sensitivity of the consolidated net open position is every day calculated on a 1-day Value-at-Risk basis, based on a confidence level of 95% and 500 days historical observations.

Measured on these terms, Value-at-Risk was TUSD 398 for 2020/21.

Notes to the financial statements

12 Prepayments

Prepayments consist of prepaid expenses relating to rent, insurance premiums and subscriptions.

13 Equity

The share capital consists of 307,974 shares of DKK 100.

Conversion at historical average price USD/DKK of 6.159 equal to USD 5,000,575.

14 Deferred tax

USD '000	2020/21	2019/20
Deferred tax at 1 May	1,026	1,258
Change of the year	-233	-232
Deferred day 1 gains at 30 April	793	1,026

Deferred tax relates to software and property, plant and equipment, and tax loss carry forward.

A/S Global Risk Management Ltd. Holding is an obligor in respect of the bank loans of the Bunker Holding Group. As of 30 April 2021, these obligations were limited to USD 8.8 million, equal to A/S Global Risk Management Ltd. Holding's equity and intra-group liability to Bunker Holding A/S as of 30 April 2021. In the event that these obligations materialize, Bunker Holding A/S will cancel any claim it may have against A/S Global Risk Management Ltd. Holding in an amount equaling the part of the obligations that relate to A/S Global Risk Management Ltd. Holding's intra-group liability to Bunker Holding A/S.

A/S Global Risk Management Ltd. Holding has issued a guarantee with the sister company A/S Global Risk Management Ltd. Fondsmaeglerselskab as beneficiary in respect of the novation of two named client agreements and any obligations related thereto. The total guarantee amount is USD 2.3 million, and an amount of USD 0.5 million has been called. It is assessed likely that the guarantee amounts called will be returned and that the guarantees will not be utilized any further. The guarantee obligation is not recognized in the balance.

The Danish Group enterprises are jointly and severally liable for tax on the consolidated jointly taxed income etc. The total corporation tax payable is shown in the Annual Report of SelfGenerations T ApS, which is the management company of the joint taxation. The Danish group enterprises are moreover jointly and severally liable for Danish withholding taxes. Any subsequent tax adjustments and withholding taxes may imply that the Company is liable for a higher amount.

Notes to the financial statements

16 Related parties and ownership

The Company is included in the Consolidated Financial Statements of the immediate Parent Company, Bunker Holding A/S.

Controlling interest is exercised through the Company's immediate Parent Company, Bunker Holding A/S. The Company's ultimate Parent Company, which prepares consolidated Financial Statements, is SelfGenerations T ApS, in which Torben Østergaard-Nielsen, CEO, exercises control.

With reference to section 98 C(7) of the Danish Financial Statements Act, related party transaction details are not disclosed.

17 Subsequent events

No significant events affecting the assessment of the Annual Report have occurred after the balance sheet date.

18 Fee to auditors appointed at the Annual

General Meeting

Fee to auditors appointed at the Annual General Meeting is stated in the Annual Report of Bunker Holding A/S.

Notes to the financial statements

19 Accounting policies

Basis of preparation

The Annual Report of A/S Global Risk Management Ltd. Holding for 2020/21 has been prepared in accordance with the provisions of the Danish Financial Statements Act applying to large enterprises of reporting class C.

The accounting policies applied remain unchanged from last year.

The Annual Report for 2020/21 is presented in USD thousands.

Recognition and measurement

The Financial Statements have been prepared based on the historic cost principle.

Value adjustments of financial assets and liabilities measured at fair value or amortised cost are recognised in the income statement. Moreover, all expenses incurred to achieve the earnings for the year are recognised in the income statement, including depreciation, amortisation, impairment losses and provisions, and reversals due to changed accounting estimates of amounts that have previously been recognised in the income statement.

All leases are considered operating leases. Payments made under operating leases are recognised in the income statement on a straight-line basis over the lease term.

Assets are recognised in the balance sheet when it is probable that future economic benefits attributable to the asset will flow to the Company, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow out of the Company, and the value of the liability can be measured reliably.

Financial assets and liabilities are initially measured at fair value. Other assets and liabilities are initially measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

Certain financial assets and liabilities are measured at amortised cost, which involves the recognition of a constant effective interest rate over the maturity period. Amortised cost is calculated as original cost less any repayments and with addition/deduction of the cumulative amortisation of any difference between cost and the nominal amount. In this way, capital losses and gains are allocated over the maturity period.

Recognition and measurement take into account predictable losses and risks occurring before the presentation of the Annual Report, which confirms or invalidate affairs and conditions existing at the balance sheet date.

USD is used as the measurement currency. All other currencies are regarded as foreign currencies.

Presentation currency

The Financial Statements for 2020/21 have been presented and measured in USD. On 30 April 2021, the year-end exchange rate for USD/DKK was 6.15. The comparative figures are translated at the historical year-end exchange rate, which as of 30 April 2020 was USD/DKK 6.86.

Foreign currency translation

Transactions in foreign currencies are translated during the year at the exchange rates at the dates of transaction. Gains and losses arising due to differences between the transaction date rates and the rates at the dates of payment are recognised in financial income and expenses in the income statement.

Receivables, payables and other monetary items in foreign currencies are translated at the exchange rates at the balance sheet date. Any differences between the exchange rates at the balance sheet date and the transaction date rates are recognised in financial income and expenses in the income statement; however, see the paragraph on hedge accounting.

Fixed assets acquired in foreign currencies are measured at the transaction date rates.

Derivatives and financial instruments

Derivative financial instruments are initially recognised in the balance sheet at fair value and are subsequently remeasured at their fair values. Any difference between the transaction price and fair value determined when applying a valuation model, which is not solely based on observable market data, is deferred and recognised over the term of the contract.

Derivative financial assets and liabilities and related collateral payable and receivable are presented net if the Company has both a current legally enforceable right to set off the recognised amounts and intends to settle net. Net amounts of positive and negative fair values of derivative financial instruments are presented in separate line items in the balance sheet.

Fair value of OTC oil derivative contracts is determined on the basis of generally applied forward and option pricing models. Inputs to the models are, to the extent possible, determined on the basis of observable prices for the underlying products. For contracts where the most significant input is unobservable, Management estimates the input based on recent transactions, transactions with similar products etc.

Notes to the financial statements

19 Accounting policies (continued)

Changes in the fair values of derivative financial instruments are recognised in the income statement unless the derivative financial instrument is designated and qualify as hedge accounting.

The contracts entered into as of 30 April 2021 comprise commodity derivatives.

Income statement

NET TURNOVER

The net turnover comprises sale of bunker fuels and sale of power and is recognised as delivery takes place.

COST OF GOODS SOLD

Cost of goods sold includes the purchase of bunker fuels and purchase of power and is recognized at the time of delivery.

NET GAIN ON DERIVATIVES AND FINANCIAL INSTRUMENTS

Net gain on derivatives and financial instruments includes fair value gains and losses net related to commodity derivatives.

OTHER EXTERNAL EXPENSES

Other external expenses include expenses for sales, administration, the running of office facilities, loss on debtors, etc.

STAFF EXPENSES

Staff expenses comprise wages and salaries as well as payroll expenses.

FINANCIAL INCOME AND EXPENSES

Financial income and expenses comprise interest, financial expenses in respect of finance leases, realised and unrealised exchange adjustments, price adjustment of securities, amortisation of mortgage loans and extra payment and repayment under the onaccount taxation scheme.

TAX ON PROFIT/LOSS FOR THE YEAR

Tax for the year consists of current tax for the year and adjustment of deferred tax for the year. The tax attributable to the profit for the year is recognised in the income statement, whereas the tax attributable to equity transactions is recognised directly in equity.

Any changes in deferred tax due to changes to tax rates are recognised in the income statement.

The Company is jointly taxed with Danish group enterprises. The tax effect of the joint taxation is allocated to enterprises showing profits or losses in proportion to their taxable incomes (full allocation with credit for tax losses). The jointly taxed enterprises have adopted the on-account taxation scheme.

Balance sheet

INTANGIBLE ASSETS

Intangible assets are measured at cost less accumulated amortisation calculated on a straight-line basis over the expected useful lives of the assets.

Amortisation based on cost is calculated on a straight-line basis over the expected useful lives of the assets, which are:

Goodwill	max. 20 years
Software	3-5 years

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Cost comprises the cost of acquisition and expenses directly related to the acquisition until the asset is ready for use.

Depreciation based on cost reduced by any residual value is calculated on a straight-line basis over the expected useful lives of the assets:

Fixtures and fittings, tools and equipment	3-10 years
--	------------

Depreciation period and residual value are reassessed annually.

IMPAIRMENT OF FIXED ASSETS

The carrying amounts of intangible assets and property, plant and equipment are reviewed annually to determine whether there is any indication of impairment other than that expressed by amortisation and depreciation. If so, an impairment test is carried out to determine whether the recoverable amount is lower than the carrying amount, and the asset is written down to its lower recoverable amount.

The recoverable amount of the asset is calculated as the higher of net selling price and value in use. Where a recoverable amount cannot be determined for the individual asset, the assets are assessed in the smallest group of assets for which a reliable, recoverable amount can be determined based on a total assessment.

INVESTMENT IN SUBSIDIARIES

Investments in subsidiaries are recognised and measured under the equity method.

The item "Investments in subsidiaries" in the balance sheet include the proportionate ownership share of the net asset value of the enterprises calculated on the basis of the fair values of identifiable net assets at the time of acquisition.

The total net revaluation of investments in subsidiaries is transferred upon distribution of profit to "Reserve for net revaluation under the equity method" under equity. The reserve is reduced by dividend distributed to the Parent Company and adjusted for other equity movements in the subsidiaries.

RECEIVABLES

Receivables are measured in the balance sheet at the lower of amortised cost and net realisable value, which corresponds to nominal value less provisions for bad debts. Provisions for bad debts are determined on the basis of an individual assessment of each receivable.

PREPAYMENTS

Prepayments comprise prepaid expenses paid in respect of expenses in subsequent years.

DIVIDEND

Dividend distribution proposed by Management for the year is disclosed as a separate equity item.

DEFERRED TAX ASSETS AND LIABILITIES

Deferred tax is recognised in respect of all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised in respect of temporary differences concerning goodwill not deductible for tax purposes.

Deferred tax is measured on the basis of the tax rules and tax rates that will be effective under the legislation at the balance sheet date when the deferred tax is expected to crystallise as current tax. In cases where the computation of the tax base may be made according to alternative tax rules, deferred tax is measured on the basis of the intended use of the asset and settlement of the liability, respectively.

Deferred tax assets, including the tax base of tax loss carry-forwards, are measured at the value at which the asset is expected to be realised, either by elimination in tax on future earnings or by set-off against deferred tax liabilities.

Deferred tax assets and liabilities are offset within the same legal tax entity.

CURRENT TAX RECEIVABLES AND LIABILITIES

Current tax receivables and liabilities are recognised in the balance sheet at the amount calculated on the basis of the expected taxable income for the year and adjusted for tax on taxable incomes for prior years. Tax receivables and liabilities are offset if there is a legally enforceable right of set-off and an intention to settle on a net basis or simultaneously.

CASH FLOW STATEMENT

With reference to section 86 (4) of the Danish Financial Statements Act the Cash Flow Statement is not included. The Cash Flow Statement is part of the Financial Statement from the parent company, Bunker Holding A/S.

Definition of financial ratios

Profit margin	=	$\frac{\text{Profit before financials} \times 100}{\text{Net gain on derivatives and financial instruments}}$
Return on equity	=	$\frac{\text{Net profit for the year} \times 100}{\text{Average equity}}$
Liquidity ratio	=	$\frac{\text{Current assets}}{\text{Short-term debt}}$
Solvency ratio	=	$\frac{\text{Equity at year end} \times 100}{\text{Total assets}}$

Management's Statement

The Executive Board and the Board of Directors have today presented and adopted the Annual Report of A/S Global Risk Management Ltd. Holding for the financial year 1 May 2020 - 30 April 2021.

The Annual Report was prepared in accordance with the Danish Financial Statements Acts.

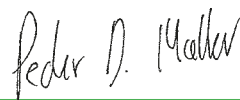

In our opinion, the Financial Statements give a true and fair view of the financial position of the

Company at 30 April 2021 and of the results of the Company's operations for 2020/21.

We recommend that the Annual Report be adopted at the Annual General Meeting.

Independent auditor's report

To the Shareholders of A/S Global Risk Management Ltd. Holding

Opinion

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company at 30 April 2021, and of the results of the Company's operations for the financial year 1 May 2020 - 30 April 2021 in accordance with the Danish Financial Statements Act.

We have audited the Financial Statements of A/S Global Risk Management Ltd. Holding for the financial year 1 May 2020 - 30 April 2021, which comprise income statement and statement of comprehensive income, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies ("Financial Statements").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Statement on management's review

Our opinion on the Financial Statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Management's responsibilities for the financial statements

Management is responsible for the preparation of Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the Financial Statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the Financial Statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
